EDUCATIONAL RESOURCES

INFORMATION CENTER

Resources in Education (RIE) is processed for printing by Computer Sciences Corporation, under contract with the U.S. Department of Education, Office of Educational Research and Improvement (OERI), and is published monthly by the U.S. Government Printing Office (GPO) with printing funds approved by the Office of Management and Budget. The contents of RIE do not necessarily reflect official OERI policy.

RIE is available on subscription (12 issues/year), or as individual issues, from Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402. Inquiries regarding prices should be directed to the Superintendent of Documents.

Introduction

Resources in Education (RIE) — A monthly abstract journal announcing recent document literature related to the field of education, permitting the early identification and acquisition of documents of interest to the educational community.

Sponsor: Educational Resources Information Center (ERIC)
National Library of Education (NLE)
Office of Educational Research and Improvement (OERI)
U.S. Department of Education
Washington, D.C. 20208-5721

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related documents and journal articles. It consists of a coordinating staff in Washington, D.C. and 16 Clearinghouses located at universities or with professional organizations across the country. These Clearinghouses, each responsible for a particular educational subject area, are an integral part of the ERIC system. The Clearinghouses are listed on the inside back cover.

Organization of Journal:

Resources in Education is made up of resumes and indexes. The resumes provide descriptions of each document and abstracts of their content. Resumes appear in a "Document Section" and are numbered sequentially by an accession number beginning with a prefix ED (**ERIC Document**). The indexes appear in an "Index Section" and provide access to the Resumes by Subject, Personal Author, Institution, and Publication Type.

Availability of Documents:

The documents cited in **Resources in Education**, except as noted, are available from the ERIC Document Reproduction Service (EDRS), in both microfiche (MF) and paper copy (PC), or microfiche only. Availability in microfiche only may be determined by the source, for proprietary or copyright reasons, or by ERIC for reasons related to legibility and reproducibility. The price per document is based on the number of pages and is subject to change over time. An ERIC Price Code Schedule permits the user to convert all price codes to actual dollar amounts. Current price information for paper copy and microfiche is to be found in the section entitled "How to Order ERIC Documents" in the most recent issue of RIE.

How to Submit Documents to ERIC:

If you have documents that you would like to have considered for announcement in **Resources in Education**, you should send clean, legible copies (in duplicate, if possible) to the ERIC Processing and Reference Facility, 1100 West Street, Laurel, MD 20707. A reproduction release, giving ERIC permission to reproduce in paper copy and microfiche (or microfiche only), and signed by the author or official representative of the source institution, is requested for all documents selected for inclusion in RIE. Standard reproduction release forms may be obtained from the ERIC Facility (a sample appears at the back of this issue of RIE). For additional information, see *Submitting Documents to ERIC* at the back of this issue.

How to Order RIE:

The U.S. Government Printing Office (GPO) prints RIE and functions as its subscription agent. Detailed subscription information appears on the page in the back of RIE entitled "How to Order **Resources in Education**".

DOCUMENT SECTION

Sample Document Resume

(for Resources in Education)

ERIC Accession Number—identification number sequentially assigned to documents as they are processed.

**Author(s)
Title**

Institution.
(Organization where document originated.)

**Date Published
Contract or Grant Number**

Language of Document—documents written entirely in English are not designated, although "English" is carried in their computerized records.

Publication Type—broad categories indicating the form or organization of the document, as contrasted to its subject matter. The category name is followed by the category code.

ERIC Document Reproduction Service (EDRS) Availability—"MF" means microfiche; "PC" means reproduced paper copy. When described as "Document Not Available from EDRS," alternate sources are cited above. Prices are subject to change; for latest price code schedule see section on "How to Order ERIC Documents," in the most recent issue of RIE.

(141)—Tests/Questionnaires (160)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors — Career Guidance, *Career Planning, *Demand Occupations, *Employed Women, *Employment Opportunities, Females, Labor Force, Labor Market, Postsecondary Education

Identifiers — Consortium of States, *National Occupational Competency Testing Institute

Women's opportunities for employment will be directly related to their level of skill and experience and also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1990 and 1999, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craft workers and supervisors (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information (in English and in Spanish) concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance that are available to them. (Contains 45 references.) (SB)

Document Resumes

The document resumes in this section are arranged in numerical order by ED number, and also alphanumerically by Clearinghouse prefix and Clearinghouse accession number.

As explained in the Introduction, each Clearinghouse focuses on a specific aspect of education. The reader who is interested in one of these major aspects (e.g., Reading) may, however, find pertinent resumes among the entries of virtually any Clearinghouse, dependent on the orientation of the document. For this reason, it is important to consult the Subject index if a comprehensive search is desired.

The following is a list of Clearinghouse prefixes and names, together with the page on which each Clearinghouse's entries begin:

	Page		Page
AA – ERIC Processing and Reference Facility.....	1	JC – Community Colleges.....	84
CE – Adult, Career, and Vocational Education.....	1	PS – Elementary & Early Childhood Education.....	91

Resources in Education (RIE) is a monthly abstract journal that announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, parents, etc.). Each issue announces approximately 1,100 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This special Computer Output Microfiche (COM) edition is prepared directly from the ERIC database prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The COM edition contains all five of the indexes in the printed edition. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for May 1979. (CRW/WTB)

Descriptors—*Continuing Education, Cost Effectiveness, Higher Education, Labor Turnover, *Military Personnel, *Military Training, *Outcomes of Education, Program Costs, Program Effectiveness, Promotion (Occupational), Regression (Statistics), Student Attitudes, Student Financial Aid, Tables (Data)

Identifiers—*Navy, *Voluntary Participation

The Navy's Voluntary Education (VOLED) program provides off-duty sailors seeking to enhance their professional and personal growth with educational opportunities integrating various continuing education. VOLED's four major components are tuition assistance, the Program for Afloat College Education (PACE), academic skills learning centers, and education centers. Cost-benefit analyses of VOLED's components were conducted by analyzing the following: tuition assistance data for approximately 510,000 students; instructor PACE data (approximately 63,000 records); data on technology PACE (approximately 22,000 records); 20,200 files on sailors who participated in orientation briefs on the PACE program, and records for all 2,230 courses offered at Navy schoolhouse training facilities during fiscal year 1996. All VOLED's elements were deemed cost-effective. For each \$1 invested tuition assistance and instructor PACE, the Navy obtained \$2 from improved retention. The Navy obtained slightly more than \$1 from each \$1 invested in technology PACE. It was recommended that full support for VOLED be maintained and that academic skills investments be accelerated. (Appended are the following: enlisted training cost, training cost of a rating; estimation of promotion

and retention models; regression estimates of promotion, retention, and the probability of passing a PACE course; and academic skills profile. Twenty-six tables/figures are included.) (MN)

Thompson, Gregory W. Balschweid, Mark A.

Agriculture Teachers' Perceptions of Integrating Science in Oregon Agricultural Science and Technology Programs.

Pub Date—1998-12-09

Note—14p.; Paper presented at the National Agricultural Education Research Meeting (25th, New Orleans, LA, December 9, 1998).

Pub Type—Reports - Research (143)—Speeches/Meeting Papers (150)

EDRS Price – MF01/PC01 Plus Postage.

Descriptors—*Agricultural Education, Educational Needs, Higher Education, *Integrated Curriculum, Preservice Teacher Education, *Science Instruction, Secondary Education, State Surveys, *Statewide Planning, *Teacher Attitudes, Technology Education, *Vocational Education, Vocational Education Teachers

Identifiers—Agricultural Sciences, *Oregon

Oregon agricultural sciences and technology (AST) teachers' perceptions of the impact of integrating science into agricultural education programs were examined. Questionnaires were mailed to all 111 Oregon AST teachers employed during the fall 1997 semester. Usable replies were received from 106 teachers (response rate, 95.5%). Respondents were asked to respond (based on a 5-point Likert scale) to 42 statements regarding integrating science into agricultural education. The AST teachers generally supported the following statements: integrating science assists students in better understanding science concepts and their application to agriculture; AST teachers need more preparation time before they can integrate science concepts; administrators should schedule planning time to prepare AST teachers to integrate science into their programs; the most significant barriers to integrating science into agricultural education are equipment and funding; undergraduates in teacher preparation programs do not necessarily need more science courses, but they do need more instruction in how to integrate science; practicing AST teachers need more inservice training in integrating science into the AST curriculum; and integrating science into the AST curriculum is an important component in helping students meet the standards involved in Oregon's Certificate of Initial Mastery and Certifi-

cate of Advanced Mastery. (Contains 19 references and 7 tables.) (MN)

Burge, Elizabeth J.

Keeping Our Balance in Times of Techno-Turbulence.

Pub Date—1999-04-28

Note—8p.; Notes for a colloquium in honor of Helen Hugenor Lyman, School of Information and Library Studies, State University of New York-Buffalo (Buffalo, NY, April 28, 1999).

Pub Type—Opinion Papers (120)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Adult Education, *Classroom Techniques, *Computer Uses in Education, *Distance Education, *Educational Needs, *Educational Technology, Higher Education, Instructional Development, Needs Assessment, *Teacher Student Relationship

Educators involved in the delivery of distance education would do well to heed the following rules regarding the use of learning technologies: know yourself and how you create and manage a personal presence; aim for a mix of learning technologies and strive for integration without duplication; realize that each learning technology has its own inherent biases in how it conveys information and supports interaction; and rely on common sense when deciding when (and how much) to use learning technologies. When selecting learning technologies, educators must also consider various teaching and institutional issues, including the following: the kinds of learners that will be using the learning technologies; the relative storage and interactivity capacities of different media and their strengths and weakness in specific situations; ways learning technologies promote/block self-competence and connection; and the amount of time that can be devoted to online teaching. Learning technologies should possess the following characteristics: flexibility; engaging interface; minimum effort for maximum return; capacity for self-correction; some toleration of errors; fast feedback on another's actions; evidence of best operational capacity; ease of interaction; unobtrusive operational software; and adaptation to various contexts. (The paper contains 10 references and a list of computer technology design faults.) (MN)

Ohio's Accountability System for Career Development: How Do We Know We Make a Difference? AACE Bonus Brief.

American Association for Career Education, Hermosa Beach, CA.

Report No.—ISSN-1524-7244

Pub Date—1999-05-00

Note—3p.

Pub Type—Reports - Evaluative (142)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Accountability, *Career Education, *Career Planning, *Outcomes of Education, Program Effectiveness, Program Evaluation, Secondary Education, *State Programs

Identifiers—*Ohio

In response to trends toward greater accountability expectations for educational programs, a study evaluated the success of the implementation of Ohio's Individual Career Plan (ICP). The ICP is a document initiated by students no later than grade 8 that helps to outline initial career goals and educational plans to reach those goals. A core standard and performance measure was designed and has been in place since 1994. Through an interval sample process, 2 percent of the state's students in grades 8, 10, and 12 are interviewed each year about their career goals, the courses they plan to take in high school to reach those goals, and what they plan to do after high school to reach the goals. It is expected that at least 75 percent of students will be able to articulate career goals and appropriate educational paths to reach those goals; in 1998, 87-91 percent of students responded appropriately. Comparisons of districts with and without ICPs indicated that students with ICPs were more able to articulate career goals. ICP programs' annual reports document program success with quantita-

tive student data, major program accomplishments, and at least one outstanding achievement. Self-directed professional growth for career coordinators also is encouraged as part of the overall effort to make Ohio's career development program accountable and continuously improving. (KC)

Identifiers—*Sweden

Rather than a distinct vocational education and training (VET) system, Swedish institutions include VET as part of an educational philosophy stressing equity, integration, and comprehensiveness. The VET system forms part of a comprehensive model of education stressing active citizenship, work life orientation, and preparation for further studies. The radical reform of the upper secondary system in 1991 resulted in decentralization, new curricula, and more individual choice. Measures taken to develop a more integrated system at the upper secondary level include extension of all programs to 3 years and application of a core curriculum approach to both academic and vocational programs. Of the 16 nationally determined programs, 14 are primarily vocational and 2 are focused on preparation for university. Important institutions at the adult and higher education level include vocational programs in municipal adult education, employment training, in-company training, and staff development. Trade unions have their own extensive education programs. The VET system is overwhelmingly publicly run and financed, with very few private providers of training. At the upper secondary level, national tests determine the achievement of quality standards. However, there is no formal system such as tests, diplomas, or national qualifications to recognize the acquisition of vocational skills and competencies. Among current trends influencing the VET system in Sweden are new developments in work and society that form a new context for policy implementation. These new developments include the following: the growth of unemployment, changing skill requirements, a new intercultural context, the challenge of lifelong learning, and deskilling and upgrading. (Four appendices contain the following: acronyms and abbreviations, addresses of 20 major organizations, 81 resources and references, and a glossary.) (KC)

This document consists of English and French versions of a report profiling some of the local, regional, and national professional development opportunities available to workplace education practitioners across Canada. The report begins with an introduction that describes the process used to identify the programs (surveys and interviews with more than 35 representatives of practitioner development programs and an Internet search). Presented next is an executive summary that discusses the following topics: role of practitioner development in the development of workplace education as a field and a profession; and overview of key points learned about professional development programs for workplace educators (audience, scope, frequency, level, links, format, content, delivery, funding, other professional development opportunities, and the future). The remaining 90% the report consists of descriptions of 27 professional development programs provided through universities, consortia, labor unions, professional associations, and industry improvement councils across Canada. Each program description contains some or all of the following: city and province; program title; general information; host organization; contact information; dates offered; participant characteristics (number attending, eligibility, background, workplace education experience); program details (developing organization, objectives, topics, presentation format, materials, training leaders, evaluation methods); administrative details (fees, funding); and comments. Identifiers—*School to Work Opportunities Act 1994

The federal legislation that created school-to-work (STW) was to meet the educational, economic, occupational, and skill-training needs of the future work force and the needs of employers competing in a global economy. Three key concepts characterize the STW initiative: school-based learning, work-based learning, and connections between school and work. School-based learning includes the following: collaboration of teachers with employers, community speakers in the classroom, career awareness programs, applied academic curriculum, block scheduling, and a continuum from school to work or higher educa-

tion. Components of work-based learning are as follows: job shadowing, workplace tours, work experience, teacher internship, on-the-job training, and workplace mentoring. Connecting activities include the following: school and business liaisons working together, identification and training of worksite mentors, community service by students, job shadowing for teachers, and articulation agreements between secondary and postsecondary education. STW offers many benefits for students and businesses. Many schools and businesses have formed long-lasting and beneficial partnerships that can be used as models for other schools seeking to begin STW. (Contains 18 references.) (KC)

Identifiers—*Taiwan

Junior colleges, which began to expand in size and importance in the 1960s, have had a profound impact on the economy and social structure of Taiwan. The junior colleges of Taiwan resemble tech prep programs in the United States. Today, 74 junior colleges in Taiwan enroll 200,000 students in grades 10-14 and almost another 200,000 in 2-year programs. Junior college is considered a prestigious entity, leading to economic success for students, although it is not as prestigious as academic high school, which leads to university education. Students qualify for all education past grade 9 based on a national examination, with the top 40 percent of students going on to academic high school. Junior college begins at the equivalent of grade 10 and continues for 5 years, combining the last 3 years of high school with 2 years of college. Parents have little involvement in the schooling, but the junior colleges have filled that role by providing counseling and health services. Both private and public junior colleges exist; although the private colleges are about three times more expensive than the public colleges, little difference in instruction seems evident. The Taiwan Ministry of Education provides strong guidance to the junior college system. The system has been effective in serving the need of students and raising the levels of education, income, and status for many in Taiwan. (Contains 29 references.) (KC)

Service-Learning: Getting to the Heart of School Renewal. A Guide for Implementing School-Based Service Learning.

Project Service Leadership, Vancouver, WA.

Pub Date—1998-00-00

Note—33p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Curriculum Development, *Educational Resources, Elementary Secondary Education, Guidelines, Models, Program Implementation, *Service Learning, State Programs

Identifiers—*Washington

This booklet, based on school and community experiences in the state of Washington, was written to provide practical strategies to enable teachers and administrators to enrich instruction through service and service learning. Filled with vignettes and examples of service learning that is taking place in Washington schools, the booklet includes information on the following: (1) the rationale for ser-

vice learning and benefits for students; (2) options for infusing service; and (3) educational leadership for service learning. Throughout the guide, practical tips are offered for planning and implementing service-learning programs in elementary and secondary schools. The guide also contains a list of 81 resource people and programs, books, and videotapes. A list of standards of quality for school-based service learning is included. (KC)

Descriptors—Adult Education, *Adult Educators, Adult Learning, Annotated Bibliographies, *Critical Thinking, *Educational Trends, Literature Reviews, *Reflective Teaching, *Teacher Improvement, *Teacher Student Relationship, Trend Analysis

Recently, the topic of reflection and the development of reflective practitioners have received a great deal of attention. Four elements are central to critical reflection: assumption analysis, contextual awareness, imaginative speculation, and reflective skepticism. Definitions of critical reflection often reveal differing theoretical orientations about reflection and have resulted in confusion about its meaning and uses. Lack of a common definition has also led to interchangeable use of the terms "reflection" and "critical reflection." The ideas of Dewey, Schon, and Mezirow are frequently mentioned in discussions of the origin of reflection in education; however, only Mezirow seems to emphasize the critical nature of reflection. Two issues that emerge in the literature on critical reflection are the effect on students who are encouraged to engage in critical reflection and the kind of teaching that supports critical reflection. Studies have concluded the following: critical reflection can lead to self-doubt, feelings of isolation, and uncertainty; adult learners who engage in activities to facilitate critical reflection must be supported in their efforts; and teaching students to be critically reflective can be a rewarding experience that results in critical reflection on the part of the instructor. (A 23-item annotated bibliography constitutes approximately 75% of this document.) (MN)

Systems Approach, Trend Analysis, *Vocational Education

Identifiers—*Carl D Perkins Voc and Appl Techn Educ Act 1990

This monograph provides a status report on issues related to accountability, including standards and assessments, data systems, and the role of incentives for schools, teachers, and students in improving student achievement. Using information gathered from the literature and interviews with state administrators of vocational education, this paper provides a picture of the progress made to date and points to future challenges. It was discovered that, despite some initial trepidation about the 1990 Carl D. Perkins Vocational-Technical Act (Perkins II) accountability requirements, each state has developed its own system of performance measures and standards and devised some sort of implementation plan. All but two states have gone well beyond the Perkins II requirements for accountability in vocational education at the secondary and postsecondary levels. The public's demand for excellence for all students has been the driving force behind standards-based, systemic reform. However, reaching consensus around what defines excellence has been difficult from state to state, much less nationally. In recent years, the development of student standards has extended beyond traditional academic areas to areas such as general workplace readiness, industry core, and job-specific skills. The research on accountability has established the importance of the following items in developing standards-driven assessment in academic, vocational-technical, and work readiness programs: broad public engagement in the design and implementation of assessments; strong political leadership; and incentives for students, teachers, and schools. More research and development in the area of incentives and consequences are needed. (Contains 20 references.) (MN)

This teacher's guide, intended to be used with a videotape, provides five lessons to accompany each segment of the program. The program shows the importance of technology and describes some of the exciting career possibilities offered by new technologies. It offers high school teachers interdisciplinary lessons, relating technology education to subject areas such as science, mathematics, social studies, and career education. The guide includes background information, discussion questions, activities, research projects, and student worksheets for each of the following lessons: (1) "Why Study Technology?" which discusses technology's pervasiveness in daily life and describes the importance of technological literacy; (2) "Bikes that Fly," which uses the videotape's profile of an innovative bicycle manufacturer as a starting point for a lesson on composite materials; (3) "100 Kilowatts of Regular, Please," which examines the advantages and disadvantages of different kinds of vehicles; (4) "Where Can We Go from Here?," which looks at the history of technology since 1945 and provides student activity pages that discuss communication, transportation, and production technologies, as well as biotechnology, with curriculum connections for these activities; and (5) "Plug into the Future," which uses an internship at Intel as a starting point for a school-to-work activity. A resources section lists seven organizations and publications. (KC)

Identifiers—*Wisconsin

An instrument was developed to record adult basic education instructional time and funding data and predict future cost allocation to meet governmental regulations. Findings of a literature review were as follows: funding for such activities is tied to accounting for previous expenditures; continued funding is contingent upon post-activity reporting; and volumes of directives on how to report funding expenditures are available from state and federal guidelines. Five procedures were followed to develop a product to collect data relating to staff accounting and assurance documentation of instructional time: (1) literature was reviewed concerning staff accounting directives from the Wisconsin Technical College System (WTCSS) and Office of Management and Budget (OMB); (2) evaluation criteria were established to guide the product development process, in compliance with OMB Circular guidelines; (3) the formative committee evaluated time sheets presented by staff, by interpreting the recorded data and determining the value of each data element, and staff completed the time sheets during the field test and critiqued the form for ease of completion, simplicity, and readability; (4) the formative committee redesigned and field tested the time sheet; and (5) the final product was submitted after modifications. It was concluded that the simplified, single-page time card instrument was able to track staff accounting data and capture all assurance documentation data required to satisfy OMB regulations and WTCSS guidelines. (Appendixes contain 12 references and a sample basic education staff time card.) (YLB)

Descriptors—Adult Education, Career Counseling, Career Education, *Career Planning, *Computer Mediated Communication, Computer Uses in Education, Databases, Information Sources, *Occupational Information, Postsecondary Education, *Search Strategies, Secondary Education, *World Wide Web

Identifiers—*Web sites

This publication for career counselors is an easy-to-use, practical guide to identifying useful websites, incorporating them into career planning services, and gaining awareness of ethical concerns. "Overview: Websites in Support of Career Planning" (JoAnn Harris-Bowlsbey) describes four categories of career planning websites: assessment, database searches, information gathering, and communication. For each type, website capabilities and counselor/career development facilitator involvement are detailed. "Sample Websites" (Margaret Riley Dikel) identifies and describes specific websites, organized by the four categories. "Potential Problems and Ethical Concerns" (James P. Sampson, Jr.) discusses the following: the quality of resources and services offered on the Internet, individual readiness for Internet use, availability of user support when needed, credentials of resource and service providers, lack of counselor awareness of local conditions and events, confidentiality and user

privacy, and equality of access to Internet-based career resources and services. "Models of Use of the Internet in Career Planning Services" (JoAnn Harris-Bowlsbey) addresses use of websites in conjunction with one-to-one counseling, group approaches, and computer-based career information and guidance systems. Appendixes include guidelines for Internet use for career information and planning services, standards for the ethical practice of counseling on the Web, and an index. (YLB)

Identifiers—*Taiwan

Changes caused by technology, economy, society, and education have necessitated reform of technological and vocational education (TVE) in Taiwan. Recommended reforms are as follows: relaxing educational regulations, accepting every student into higher education, streamlining channels to higher education, raising educational quality, and creating a lifelong learning society. The government has responded to needs for such reforms by proposing and implementing four categories of strategies and initiatives: (1) a flexible TVE system can be reached by increasing the number of continuing education institutions, revising the curricula, and providing multiple channels for school entrance; (2) for sustainable national economic development, TVE should provide professionals trained in foreign languages, finance, hospitality and travel, transportation, telecommunications, information processing, and film and television; (3) educational equity of TVE can be achieved by 10-year compulsory education, comprehensive high schools, multiple channels for school admission, and planning for lifelong learning; and (4) skill certificates should be emphasized as an indicator of occupational competencies and be considered for continuing education, employment, and job promotion. TVE can serve students' needs for employment or continuing education and become an integral part of the lifelong learning process. Skill certificates to improve students' occupational competencies required in the work world should be emphasized, and TVE must be continually improved to develop a world class work force. Identifiers—Workforce Investment Act 1998

High public expectations of the educational and workforce development systems are the force behind the shifting roles of education and training and efforts to create more coherent and effective systems of work force preparation. The result of pulling and tugging by citizens, policymakers, and educators is a system of widespread access, considerable transparency, and variation. Like the federal government, states have a plethora of programs, some state initiated and funded, others largely federal. Complaints about the system of federal and state programs—some justified, others exaggerated—are as follows: limited information, inadequate access, inefficiency, and duplication; barriers to local system coordination embedded in the basic purposes and structure of different programs; and suspect program effectiveness. States have become increasingly active in defining and coordinating their work force development programs through the dominant state strategy and institutional and market-like mechanisms. At the local level, one-stop centers and Workforce Investment Councils have been created. Although the Workforce Investment Act should enhance development of coherent systems, greater reliance on Individual Training Accounts may undermine it. Strong community colleges have become the linchpin of state systems. In a coherent system, education and training could learn from each other and provide more comprehensive and effective services; some outcomes are possible only within an integrated system. Small and mid-sized companies provide substantial opportunities for many U.S. workers. The nature of work and the culture of workplaces are changing as dramatically as the employment statistics. A company's success or failure may ride on the knowledge and skills of a handful of employees. Employees in small and mid-sized companies—both highly trained professionals with advanced degrees and front-line workers—are wearing more hats; they need specialized skills to perform their jobs and more general skills, such as the following: business skills, computer and mechanical skills, quality management skills, problem-solving skills, and social skills. In such companies, the nature of work changes from project to project, and, in a constantly changing business environment, every project demands fresh thinking from talented professionals. The new rules of work are flexibility and fluidity. For many businesses, their business is about "finding out what is next" before the competition does. Employees must share knowledge and information, exchange ideas, and create bold solutions for clients and customers. A physical work environment that fosters collaborations features large, open workspaces in which employees are able to intersect new ideas into colleagues' open work groups. A new notion of workplace learning is co-mentoring: rather than a pairing of older and younger workers, mentoring involves people of any age sharing knowledge. (YLB)

Popular misconceptions about creativity include the following: it is limited to a few unique individuals, it declines seriously with age, and it is associated with uniqueness or innovation. As the focus of creativity research has shifted from examination of the personality traits of creative individuals to examination of the social and environmental factors that affect creativity, thinking about creativity in general and creativity in relation to adult development and aging has changed significantly. Due to increases in life expectancy and the slowing of physical aging, many adults are not reaching their most creative period until after age 50. Furthermore, some research implies that formal schooling may actually hinder rather than foster creative thinking. Several researchers have identified strategies educators can use to help people develop their creative potential: creating a climate that encourages assertion of ideas rather than reliance on order and tradition, creating a safe place for risk taking, and encouraging a spirit of play and experimentation. Personal, social, and environmental barriers to creativity might be overcome by embracing a cross-cultural definition of creativity: finding and shaping one's life perception and telling one's experiences through creative expression. Identifiers—Contextual Learning, ERIC Digests, Problem Based Learning

Self-efficacy is mediated by individuals' beliefs or expectations about their capacity to accomplish certain tasks successfully or demonstrate certain behaviors. When individuals have low self-efficacy expectations regarding their behavior, they limit the extent to which they participate in an endeavor and are more apt to give up at the first sign of difficulty. Self-efficacy is learned and self-efficacy expectations are acquired in the following ways: performance accomplishments, vicarious learning, verbal persuasion, and physical/affective status. Examination of these four variables and their influence on self-efficacy expectations suggests that efficacy-based interventions must increase the range of students' experiences and promote the personal and contextual factors that lead to high levels of self-efficacy. The literature has identified three strategies for helping students develop positive self-effi-

cacy expectations and outcomes that are connected to occupational interests, linked to career-related goals, translated into action, reflected in skill development, and realized through proper coaching and mentoring. These three strategies are as follows: contextual learning (application of knowledge and skills in the context of real-life experiences, problems, and events); problem-based learning (investigation of problem situations for which no right or wrong answers exist); and community-based learning (engagement in community-based learning projects connecting school work with career goals). Identifiers—ERIC Digests

Recent Supreme Court rulings are motivating employers to take actions reflecting their compliance with federal laws protecting against sexual harassment. Three key steps employers can take to counter sexual harassment are as follows: develop a strong company policy specifying outlawed behaviors and penalties for their demonstration; establish grievance procedures for reporting, processing, and resolving complaints; and provide sexual harassment training for supervisors, managers, and workers that explains how sexual harassment can be recognized, confronted, and averted. All companies and schools that receive federal funds must have written sexual harassment policies specifying what behaviors constitute sexual harassment; how sexual harassment complaints are to be reported, investigated, and resolved; strategies the company will follow to investigate and resolve complaints; and what punishments will be levied for violations of the policy. Although companies are legally required to handle grievances internally before seeking outside litigation, schools are also finding internal grievance procedures to be more effective in handling sexual harassment complaints. Sexual harassment training programs for business's and schools' supervisors and employees can be internally or externally provided. The ultimate success of sexual harassment training programs will be reflected in organizations' ability to eliminate the behavior and avoid sexual harassment lawsuits. (MN)

*Occupational Information, Resource Materials, Resumes (Personal), World Wide Web Identifiers—ERIC Digests

The job hunt has changed significantly in recent years. The World Wide Web has become an important source for job information and career development. After deciding what type of job they are looking for, job seekers should identify their marketable skills and match those skills with available jobs. Job leads can be found through employment agencies, career centers, public libraries, newspapers, the Internet, and networking. State-sponsored one-stop career centers provide the resources needed to succeed in the 21st century. Several web sites offer electronic editions of company information resources. Resumes offer information about job seekers that typical application forms will not. They should be positive and short. Online resumes are essential in today's job market. Many job web sites provide assistance in preparing electronic resumes and will post them at no cost. Job interviews should be viewed as sales jobs. Helpful steps for the interview include the following: prepare, make a good first impression, be positive, ask questions, convey information about yourself that you want the employer to know, close the deal, and send a follow-up thank-you letter. (A 17-item annotated bibliography of selected job search-related resources and 8-item reference list constitute approximately 50% of this document.) (MN)

Identifiers—New York

This practitioner's guide to helping employment program clients find, retain, and advance in jobs is based on the experiences of Moving Up, an employment program operated by New York's Vocational Foundation, Inc. (VFI). The guide begins with an overview of Moving Up, which has become a national model for helping disadvantaged minority youths develop the job and interpersonal skills needed to find, retain, and succeed in employment. The next two sections examine two aspects of the program: (1) enrollment, training, and job readiness (expectations and support, key staff roles, recruitment, program eligibility, screening, training and instruction, case management, stipends, medical and social services); and (2) placement and follow-up (job development, career counseling, and strategies for dealing with crises and building lasting relationships with clients). Presented next are nine principles for successful job retention: hold staff accountable for ends, not means; introduce clients to a "culture of employment"; stress coordination and continuity throughout the program; hire counseling and training staff based on personal skills and professional credentials; maintain a network of services that support the whole person; let students develop a close relationship with at least one caring adult; after students are employed, incorporate the program's services into the rhythm of their workday; cultivate employers; and begin retention at intake. Appended is information on VFI's history, mission, and activities. (MN)

Identifiers—*Carl D Perkins Vocational Technical Educ Act 1998, Congress 105th

This document contains the text of the Carl D. Perkins Vocational and Applied Technology Education Amendments of 1998. The following are among the aspects of Title I of the 1990 Perkins Act (Vocational and Technical Education Assistance to the States) that are addressed in the amendments: allotment and allocation (reservations and state allotment, within-state allocation, accountability, national activities, assistance for outlying areas, Native American program, tribally controlled postsecondary vocational and technical institutions, occupational and employment information); state provisions (state administration, state plan, improvement plans, state leadership activities); and local provisions (distribution of funds to secondary school programs, distribution of funds for postsecondary vocational and technical education programs, special rules for vocational and technical education, local plan for vocational and technical education programs, local uses of funds). Presented next are amendments to the following aspects of Title II (Tech-Prep Education): definitions, state allotment and application, tech-prep education, consortium applications, report, demonstration program, and authorization of appropriations. The amendments to Title III (General Provisions) concern federal and state administrative provisions (including fiscal requirements, construction, voluntary selection and participation, limitation for certain students, federal laws guaranteeing civil rights, participation of private school personnel, joint funding, state administrative costs, and student assistance and other federal programs). This handbook contains guidelines for setting up a workplace literacy project through a partnership between business and an educational partner. It is based on the experiences of a workplace literacy partnership of Bakery Europa, Straub Clinic and Hospital, and the University of Hawaii. Information

is provided on the following six topics: (1) building successful partnerships (duties and responsibilities of educational and business partners, composition and duties of advisory committee); (2) identifying workplace literacy needs (general and business-specific needs); (3) facilities; (4) instruction (goals, content, format, methodology, scheduling, and assessment); (5) recruitment (methods and incentives); and (6) evaluation (recordkeeping and effects on workplace productivity). Identifiers—*Hawaii

Bakery Europa and the Straub Clinic in Hawaii participated in Project BELIEVE, a 3-year (1995-98) workplace literacy project conducted in partnership with the University of Hawaii's College of Education. Instruction focused on the literacy, communication, interpersonal, and problem-solving skills needed to succeed in the baking and health care industries, determined through needs assessments of both companies. These skills include the following: English for nonnative speakers, reading, business writing, mathematics, effective communication strategies, and team building. Courses were designed using workplace-specific materials for each company and conducted during the workday in a room set aside as an education center. Evaluation of the project showed that it is necessary to support of both management and employees for a workplace literacy project to succeed. Management needed to be kept apprised of the progress of the project and its relevance for improvements in productivity. Employees learned why it was important for them to improve their skills and earned small incentives for participation. Most employees improved their skills. (Contains a public service announcement, a newsletter, mini-lessons, evaluation reports, and a Straub employee newsletter article.) (KC)

Identifiers—Turkey (Ankara)

The school-to-work transition process of a vocational-technical high school in Ankara, Turkey was assessed from the perspectives of graduates and employers. Data were collected through interviews with 126 of the school's graduates and 18 of their employers. Results showed that in students' vocational choice, future employment anxiety was more influential than their abilities and interests. Graduates primarily preferred to attend higher education rather than to start work because of poor working conditions in the related labor markets. Overall, 60

percent of graduates were not in the field for which they were trained; however, there are considerable differences with respect to occupational branches. Such occupational branches as lathe, metal work, and furniture and decoration are no longer attractive for students, whereas some electronics and computer-related branches are continuing to attract students. The study concluded that it may be too early for students to choose a career immediately after middle school; therefore, secondary vocational education should be reconsidered. If training institutions would conduct research activities in the labor market it could be very helpful for establishing a more responsive education and training system. (Contains 14 references.) This document is designed to help practitioners and policymakers in the European Union's member states coordinate their initial and continuing vocational education and training (VET) programs. It presents a subclassification of the recently revised International Standard Classification of Education (ISCED) that encompasses all fields of VET. The document begins with an overview of the fields of education in the ISCED, which was developed by the United Nations Educational, Scientific and Cultural Organization to serve as a tool for assembling, compiling, and presenting national and international educational statistics. The creation of a third digit to permit classification of VET within the ISCED system is explained along with the subject content approach underpinning the ISCED. Presented next are a table detailing the 9 broad fields, 25 fields of education, and (approximately) 65 fields of training in the ISCED system and instructions for using the manual. The actual field descriptions are listed next. Descriptions of the each of the 25 fields of VET are described next. Each description includes the following: field name; field audience; types of programs offered at various levels; and specific types of training included in/excluded from the field. Concluding the document are alphabetic and systematic code lists. (MN)

This handbook was developed to give tutors of adult education information and ideas about assessing adult learning. It can be used as a reference for information about assessment and as a practical tool

for tutors. Section 1, Introduction to Assessment in Adult Learning, includes information on these topics: what assessment is, how to assess, why to assess, who assesses, when assessment can be done, monitoring assessment and recording results, the psychology of assessment, and hints on giving feedback. Section 2, Assessing without Paper, includes the following activities: continuum, conversation, discussion, exhibition, games, observation, performance, practical activities, questions and answers, real world, role play, simulation, and tutorial. Section 3, Assessing using Paper, includes these activities: action plan, application form, assignments and projects, checklists, learning journal, profile, record of achievement, self-assessment form, test, and worksheets and gapsheets. Section 4 contains the following: information on inspection in adult education, the assessor awards, how assessment relates to evaluation, an annotated list of 26 books, and a glossary of 90 terms. The 11 chapters in this book are intended to raise awareness of the wealth of expertise the prison education sector has to offer other adult educators. "Policy Development and Cultural Issues in Australian Prison Education" (Bob Semmens) details the current situation, with a major focus on recent developments in Victoria. "Policy, Praxis, and Rehabilitation: Prison Education in Canada 1945-1995" (Stephen Duguid) examines prison education in the essential context of the "politics of crime and corrections." "The Foundations of Prison Education in the People's Republic of China" (Guo Xiang, Xu Zhangrun) offers an introduction to Chinese prison education. "The Prison Service and Education in England and Wales" (W. Forster) discusses history, aims, curriculum, and the prison education officer as adult educator. "The French Prison Education System: A Regional Structure" (J. Duprey-Kennedy) addresses these topics: historical context and current issues; aims; structure and management; current perspectives and problems; and staff. "Education Policy and Its Translation into Action in Penal Institutions in the Federal Republic of Germany" (Klaus-D. Vogel) gives an overview of the educational possibilities. "Filling the Gap: Education in Latvian Prisons" (Maris Mednis) covers these subjects: aims and purposes; current structures and management; curriculum; current issues and problems; and staffing and staff development. "Prison Education in the Netherlands: Some Issues" (Robert Suvaal) examines the origins of positive and negative influences. "The Education of Convicted Prisoners in the Polish Penal System" (Waldemar Strzalkowski) discusses government guidelines, statistics, vocational training, range of facilities, and achievements of the prison administration. "Developments in Prison Education in Sweden" (Svenolov Svensson, Lis Somander) addresses inmates, educational objectives, organization, programs, and educational development. "Then and Now: Approaches to Correctional Education in the United States" (Thom Gehring, Marilyn McShane, Carolyn Eggleston) addresses major attributes of corrections, summarizes its history, introduces problems and concerns of correctional education

professionalization, and reviews connections between education of confined learners and local schools. (YLB)

Descriptors—*Adult Education, Codes of Ethics, Curriculum Evaluation, Distance Education, *Educational Development, *Ethics, Learning, Lifelong Learning, Moral Issues, *Moral Values, *Social Values, Student Evaluation, Teaching Methods

Based on the argument that there is only one universal good and all other moral goods are cultural and relative, this book develops the position that adult education is a site within which human morality is worked out. Chapter 1 inquires into education as a practical activity, the educational, and the nature of educational knowledge. Chapter 2 presents a critical overview of the main theoretical positions in moral philosophy, moral and nonmoral good, and some arguments for moral goodness. Chapter 3 examines an existentialist argument for one universal good, how it is to be distinguished from cultural moral values, and the application of this position to the wider society. Chapter 4 explores the basis of social values and what constitutes socially accepted behavior. Chapter 5 explores the moral base of learning, education, and training and teaching techniques. Chapter 6 examines the assertion that the process of teaching and learning is the location of universal value. Chapter 7 addresses concepts underlying mentoring and mentoring itself. Chapter 8 addresses teaching techniques that emphasize the individual and individualism: self-directed and contact learning. Chapter 9 examines ethical implications for teaching in distance education. Chapter 10 argues education has become a marketable commodity and the market has no place for welfare or the common good. Chapter 11 explores the distinction between being and having and relates the distinction to learning and education. Chapter 12 discusses the relationship between measurement and assessment and evaluation and relates this to the processes of assessing students' achievements and evaluating courses or curricula. Chapter 13 locates adult education within social movements, explores the way in which society is changing, and discusses the role education can play in future social movements. Chapter 14 considers the learning society and the education of desire. (Contains 249 references and author and subject indexes.) (YLB)

Groups, *Participation, Postsecondary Education, Social Class, Unemployment
Identifiers—*Great Britain

An investigation of the reasons for male nonparticipation in education and training in Britain was based on findings of existing research, surveys of male participants and nonparticipants and the views and observations of practitioners. Although men participate in slightly greater numbers than women, they are significantly underrepresented in all forms of postsecondary education, especially early school leavers, manual workers, older men, and some minority groups. Men's primary motivations for participation are practical, employment-related reasons, and nonparticipants tend to be outside or on the margins of the labor market. The stress on employability in national and international policy discussions tends to blame individuals for their lack of qualifications and fails to recognize the localized lack of job opportunities. Suggesting that educational participation is the solution to unemployment thus lacks credibility and raises false hopes. Powerful deterrents for unemployed or underemployed men include the following: structural and institutional constraints, skepticism about the value of learning, and views about what constitutes appropriate male behavior. A change in the wider culture is necessary to promote learning as a normal and acceptable male activity from an early age. The success of appropriate targeted programs depends on the following factors: presentation and delivery, adequate resources, and financial assistance for learners. The clear social class differences in the profile of participants and nonparticipants make it imperative that inequalities in access be addressed to make learning opportunities available to all. Identifiers—Wales

This manual is intended primarily to support policymakers and managers in local education authorities (LEAs) in carrying out their duties under Britain's Further and Higher Education Act 1992 in the new context of collaborative planning as set out in the 1998 Green Paper, "Learning Is for Everyone." Section 1 provides a summary of the legislative background to the adequate provision of further education in Wales. Section 2 presents a framework for LEAs and their partners for defining adequacy at local level. Section 3 focuses on an essential ingredient in determining adequacy—to build a picture of current participation and provision. Section 4 focuses on needs assessment, which is critical to determining adequacy in the local area. Section 5 provides strategies for determining strategic priorities. It sets out a suggested list of six key roles for the LEA: providing a clear definition of adequacy, ensuring that participation is accurately monitored, ensuring that all stakeholders are involved in planning and delivery, identifying how LEA services contribute to adequacy, securing the contributions of other stakeholders to adequacy, and promoting stakeholder collaboration and cooperation. Section 6 considers strategies and approaches for the roles

that deal with partnership in planning. Appendixes contain the following: a description of an LEA project in Wales; Green Paper extracts; Swansea's Charter that commits it to becoming a city and county of learning; integrated summary of two assessment frameworks; example of community mapping exercise; two examples of auditing provisions; and examples of local functional partnerships. Identifiers—*Great Britain

If Britain is to deliver a genuine framework for lifelong learning in the 21st century, a qualifications system must be developed to support this framework. The National Qualifications Framework may not be fit for the purpose of supporting lifelong learning. A policy on lifelong learning must explicitly connect with qualifications reform to have an impact on the structure of provision, accessibility to many learners, and long-term ability of the education and training system to combat social exclusion and support the modernization of the economy. To design a framework for lifelong qualifications, Britain must ensure it can accommodate new achievement sets and combinations of these sets without disturbing the basic design features of the framework. An alternative concept of "national standards" must be established that is linked more closely to the idea of lifelong learning to create the necessary basis for changes needed to create a qualifications system for the next millennium. Qualifications for lifelong learning must draw upon leading-edge industrial and commercial models if they are to become "future proof." A connection exists between the concepts of standardization and customization and the different phases of lifelong learning. Four suggested protocols for a framework of credit-based qualifications to support lifelong learning are unit, network, credit, and qualification. (Contains 60 references.) (YLB)

Identifiers—England

These 11 essays explore the promise and limitations of current models of lifelong learning. "The

Sociology of Lifelong Learning" discusses the relevance of various movements to understanding learning in modern society. "Knowledge, Power, and Ignorance" suggests that a new kind of society—the expert society—is emerging. "Knowing, Understanding, and Feeling" explores the thesis that understanding is best conceived as a social process nurtured most effectively through dialogue and, when adults are helped to approach understanding this way, they learn quickly and effectively. "Lifeworlds and Learning" highlights the critical importance of the value people place on their own education and learning needs, of the ways in which they arrive at interpretations of the social changes taking place in their lives. "Class, Culture, and Adult Education" presents a sense of history and theoretical view of ways in which personal attitudes, identities, and motives challenge and reflect the society in which they are nurtured. "Education and Community Regeneration" sets forth the view that the idea of community must be at the center of all political debate. "Institutions and Power: The Archaeology of Educational Organisations" focuses on one aspect of the problem in higher education: the past, and on ways to move institutions beyond its grip to define a new future for themselves. "Learning and Creativity" explores the proposition that we have an impoverished sense of the creative possibilities in every human life and its implications. "Moral Learning in the Moral Maze" charts the moral contours of adulthood and explores how adults adjust to changes in life circumstances. "Personal Change in Adulthood" explores the idea of lifelong learning as also embracing self-knowledge. "Dialogue and Learning: Towards a New Model of Citizenship" argues that people learn through dialogue with one another and in the process transform their understanding of themselves and their world. Identifiers—*University for Industry (Great Britain)

This report focuses on trade unions in Britain as negotiators for and providers of education and training, either alone or in partnership with employers and educational institutions. Section 1 introduces the report's aims. Section 2 gives an overview of union involvement in education and training. It also introduces the tensions within current union approaches to education and training that reflect uncertainties in both workplace education and training and in plans for the University for Industry (Ufi) initiative. Section 3 explains the rationale behind Ufi, takes an inclusive view of Ufi, summarizes the contents of the Ufi prospectus, and explains how information and technologies can encourage and inhibit participation in lifelong learning. Section 4 looks at recent experiences of the Trades Union Congress and individual unions in negotiating for skills development in the workplace. It suggests how these can form a springboard from

which unions can inform, influence, and contribute to the development of UfI. The section considers the following: different aspects of the skills agenda; motivation, guidance, and learning; negotiating for learning in the context of changing working practices; and priorities for trade unions. Section 5 looks at unions as providers of lifelong learning opportunities. Section 6 develops proposals for specific trade union roles within the UfI concept. Appendixes contain 18 references and resources and a glossary. (YLB)

Identifiers—Great Britain

Women returners now account for over one-third of the total labor force, but the British labor market remains strongly segregated by gender, with over 85 percent of all employed women in the service industries. A high proportion are employed part time. Despite a majority of women now returning to the labor market after breaks for childbirth and caring responsibilities, the reentry process is not always straightforward and many experience a range of barriers and problems: lack of child care; lack of information, advice, and practical help; loss of contact with the labor market; downward mobility; lack of recognition of existing experience and skills; limited training opportunities; and lack of support during the reentry process. Reasons many women return to work without preparatory training include the following: insufficient information and guidance on opportunities; insufficient training programs; domestic constraints; financial constraints; psychological barriers; and disincentives caused by women's position in the labor market. Types of education and training programs for women returning to education and training are as follows: updating; reorientation; positive action programs offering nontraditional training; informal, community-based learning activities; and preparatory programs. Providers include Training and Enterprise Councils and women's projects and centers. Returners have some shared needs: information and advice, broad and appropriate training programs, and practical support. (Contains 44 references.) (YLB)

This training package consists of a print training guide to accompany an audiotape and videotape. It is designed to support adults with learning disabilities in their efforts to become trainers. Adult learners who complete the training package as part of a

further education college, adult education center, day center, or self-advocacy group program are eligible to receive Open College credits for their efforts. The package consists of 16 learning modules that each contain some or all of the following: unit objectives, student handouts, instructional text, and a review checklist. Basic vocabulary and simple sentence structures are used in all the modules, and each module is liberally illustrated. Module topics are as follows: introducing training, being in a group, self-assessment, going to a meeting, let's relax, presenting ourselves, our rights, make it fair, saying no, planning, ways of teaching, giving a talk, how did it go?, resources, doing your own research, and organizing yourself. Concluding the training guide is a word bank in which vocabulary words used throughout the guide are defined in simple terms and illustrated. (The audiotape is an audio version of the print learning modules. The videotape shows people in the trainer training course and introduces people already working as trainers.) (MN)

Guidelines for Reporting Country-Specific Technology Education.

Pub Date—1999-03-00

Note—12p.; Paper presented at the Annual Meeting of the International Technology Education Association (61st, Indianapolis, IN, March 28-30, 1999).

Pub Type—Guides - Non-Classroom (055) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Case Studies, *Comparative Education, *Foreign Countries, Guidelines, Postsecondary Education, Research Methodology, *Research Reports, Secondary Education, *Technology Education, *Vocational Education

In order to promote exchanges and cooperation in technology education among all countries, country-specific information concerning technology education must be appropriately explored and reported. Through a literature review, guidelines for preparing country reports and case studies were developed. The guidelines suggest that the following elements should be included in country reports on technology education: (1) a technology education profile, including the structure of the education system, the curriculum, a description of the teaching and learning processes, and a profile of technology education teachers; (2) dynamics of the development process, including major problems; and (3) international cooperation, such as methods of cooperation and coordination, the means of information exchange, and trends in international participation. Trends in Technology Education in Asia and Their Implications for New Zealand.

Pub Date—1999-04-00

Note—15p.; Paper presented at the Biennial Telecom Technology Education New Zealand Conference (2nd, Auckland, New Zealand, April 14-16, 1999).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Comparative Education, Educational Philosophy, *Educational Practices, *Educational Trends, Foreign Countries, Information Technology, Postsecondary Education, Secondary Education, *Technology Education, *Vocational Education

Identifiers—Asia, *New Zealand

Technology and education are both rapidly being internationalized. In order to promote exchanges and cooperation in technology education between Asian countries and New Zealand, it is necessary to study the trends in Asian countries. The following trends were found in five Asian countries or economies (Hong Kong, Japan, Singapore, South Korea, and Taiwan): (1) flexibility in technology education in national curricula is increasing; (2) information technology is being increasingly incorporated into technology education; (3) the design process is

becoming a new focus of technology education; (4) and the integration of technological content organizers is a new direction in technology education. The implications of these trends for New Zealand are that there should be more dialogue between New Zealand and Asian technology educators, and that computers should be applied as a vital tool in technological learning and teaching. Identifiers—*Ohio

Tech prep programs integrate academic, occupational, and employability during the last 2 years of high school and the first 2 years of college, combining the best of college-prep academics with the best of vocational and technical education. The Ohio Tech Prep program, jointly administered by the Ohio Board of Regents and the Ohio Department of Education, includes 26 tech prep consortia involving the following: 44 public colleges and universities, all community and technical colleges, all vocational educational planning districts, more than 400 of Ohio's 611 public school districts, and more than 600 community and government organizations, businesses, industries, and labor unions. Ohio's tech prep program offers programs in five career clusters (business and management, environmental and agricultural systems, arts and communications, industrial and engineering systems, and health services) encompassing 60 occupational pathways. Progress is being made toward reaching the four goals of the tech prep program: (1) building a seamless education path by creating 11 new associate degree programs and 60 occupational pathways through an innovative curriculum development process; (2) expanding the enrollment of tech prep students to serve Ohio's labor market needs; (3) ensuring that teaching and learning reflect the needs of all students; and (4) maximizing the opportunities afforded by all relevant initiatives, resources, and participating partners. The Ohio tech prep program has received national and state recognition. (KC)

The globalization of work and continuing advances in technology are changing the nature of the work force. Blue-collar workers are being replaced by information specialists who are sometimes called "knowledge workers." Knowledge workers are workers who can think, work with ideas, and use information to solve problems and

make decisions. In terms of their skills and abilities, knowledge workers are people who are highly educated, creative, and computer literate and who have portable skills that allow them to move anywhere their intelligence, talent, and services are needed. Knowledge workers represent the fastest-growing segment of the work force. Their main value to organizations is their ability to gather and analyze information and make decisions that will benefit their companies. Knowledge workers are continually learning. The responsibility for preparing students and unskilled workers with the technical and cognitive skills required for "knowledge" work has been placed in the hands of education. Although some say that workplace education that prepares individuals with information technology skills required for jobs in the knowledge sector should become a national priority, others are pessimistic about the employment potential of individuals engaged in high-tech training. (A 17-item annotated bibliography constitutes the majority of this document.) (MN)

Identifiers—*Transformative Learning

Three areas of the literature on adult learning showing recent activity are transformative learning (TL), adult learning related to technology, and collaborative/group learning. Recent publications on TL include a critical review of the literature, discussion of TL's relationship to adult development, and description of TL in practice. Technological developments have also affected adult learning research and theory building. In adult education, technology is emerging as both a delivery system and a content area. Although learning in groups has had a long history in adult education, the focus has traditionally been on group processes. Recently, the emphasis has shifted to groups as learning environments and helping learners think about group learning as opposed to individual learning. Collaborative learning partnerships and the effect of technology on group learning are other aspects of group learning that have been explored. Other aspects of adult learning that have recently been examined are the relationship between power and gender and the connection between adult learning and social change. The continuing progress in adult learning research is the sign of a vital field, and the literature provides information that can be used to improve practice. Identifiers—*Employment Security

Although not all current jobs require basic computer skills, technological advances in society have created new jobs and changed the ways many existing jobs are performed. Clearly, workers who are proficient in technology have a greater advantage in the current workplace and the need for technologically proficient workers will only continue to grow. Two aspects of technology proficiency include the demand for information technology (IT) workers and the need for all workers to become more proficient in the use of technology. Because they are in short supply, IT workers have great flexibility in today's job market, including the ability to make frequent job changes. Technology is present even in nontechnical workplaces; consequently, the job security of workers who are not specifically classified as IT workers is also tied to technological proficiency. As adult, career, and vocational educators prepare workers who are technologically proficient, they should ask themselves three things: what individuals really need to exist in the work environment; what curricular and instructional responses are required to prepare workers; and how possible inequalities affecting individuals' ability to acquire and maintain technological proficiency should be addressed. (A 18-item annotated bibliography constitutes the majority of this document.) (MN)

Development of a Questionnaire To Survey Graduates of the Electrical Systems Specialization in the Industrial Technology Department (Revised).

Pub Date—1999-04-00

Note—43p.; Ed.D. Practicum, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Electrical Systems, Evaluation Criteria, Formative Evaluation, *Graduate Surveys, Higher Education, Literature Reviews, *Material Development, Pilot Projects, Questionnaires, *Technical Education, *Technology Education

A questionnaire was developed to survey recent graduates of the electrical systems specialization in the Industrial Technology program at the Central Connecticut State University (CCSU) School of Technology. First, the pertinent literature was reviewed and a formative committee consisting of CCSU faculty and staff and the board of trustees of Connecticut State University was established to identify criteria for developing reliable and valid questions. A draft questionnaire was developed and pilot tested with five graduates of the electrical systems program. Next, the questionnaire was revised based on the formative committee's evaluation and the pilot study's results. The final questionnaire consisted of 26 questions soliciting the following information: students' employment during and after college; graduates' use of certain general skills in their job; extent to which their education contributed to development of those skills; helpfulness of each of the required core and technical courses in the electrical systems curriculum in obtaining a job and succeeding in it; graduates' overall satisfaction with the electrical systems program and its faculty, curriculum, and facilities. (The paper contains 23 references. Appended are the following: 20 criteria for evaluating the questionnaire's appearance, ease of completion, and questions; cover letter to accompany the questionnaire; and questionnaire.) (MN)

Identifiers—*Japan

This book examines how the Japanese learn to work by exploring the following topics: common assumptions about vocational education and training (VET) that Japan brings into question; Japan's general education system and the moral quality and prestige status of the teaching and learning process; screening processes within Japan's education system and different attitudes toward vocational education in rural and urban areas; vocational streams in the mainline formal education system (the secondary level, specializations, technical high schools, teaching and assessment of practical subjects, commercial high schools, formal qualifications, colleges of technology, junior colleges, universities, university-industry liaison, overall standards); postsecondary, nonuniversity VET (Ministry of Labour system, Ministry of Health nursing schools, central and local government provision, private training schools, placement of graduates, public assistance); training in enterprises (lifetime employment and training, off-the-job lecture courses, nonformal in-firm training, correspondence courses, enterprise-operated qualification systems); standards and qualifications (skill testing, skill testing bodies, qualification examinations run by the central government, nonofficial qualifications); public expenditure on VET (budgets and priorities); and policies and prospects (policy coordination, consultation and research, recent trends). The book contains 91 references and 32 tables/figures. Appended is the 1994 Ministry of Education budget of vocational education. (MN)

Objectives, Unemployment, *Vocational Education

Identifiers—*East Germany, *German Reunification, *Germany

This book presents empirical evaluations of the effects of different types of training programs in East Germany. Chapter 1 presents an overview of labor, the study objectives and results, and discussion of causality and the identification problem in evaluation studies. Chapter 2 examines point estimates of the effects of two types of continuous vocational training—public sector-sponsored training and enterprise-related training—and concludes that, although publicly sponsored training is not associated with any short-term positive effects in the form of increased earnings or reduced unemployment, enterprise-sponsored training has some fairly immediate positive earnings effects but no effect on reducing individual unemployment. Appended to chapter 2 are the following: data, econometrics, specification tests for the partial propensity score, and additional evaluation results. Chapter 3 explores the possibility of obtaining nonparametric bounds for training effects without knowledge of the participation process and concludes that it is not possible. Appended to chapter 3 are the following: econometrics, results for on-the-job versus off-the-job training, and additional results for on-the-job training versus no training (for women only). Technical problems that should be addressed in future research are considered in chapter 4. The book contains 110 references and 102 tables/figures. (MN)

Descriptors—*Adult Education, *Adult Learning, Citizenship Education, Educational Research, Modernism, Research Methodology, Self Actualization, *Social Science Research, *Theory Practice Relationship

Identifiers—Identity (Psychological), *Postmodernism, Reflective Practice

This book examines the relationship among theory, practice, and research in adult education. Chapter 1 analyzes key features of modernity and postmodernity to highlight significant contemporary socioeconomic and cultural changes that have an impact on adult education. Chapter 2 sketches what a contemporary adult education for citizenship might look like. Chapter 3 approaches the metapractice question by looking at ideas that contributed to an understanding of the way in which education is governed: Durkheim's "modernist" theory of education, Foucault's "governmentality," and Bourdieu's idea of "habitus." Chapter 4 focuses on "disciplinarity." Chapter 5 focuses on conceptions of the self and their implications for the way experience and experiential learning is constructed in adult education discourse. Chapter 6 moves beyond resolving the theory-practice relationship in a philosophical way to a more grounded resolution where the relationship is seen as part of a "metapractice." Chapter 7 examines limitations of Schon's modeling of the process of reflection-in-action by critiquing the theory of reflective practice and his methodology of unpacking the process. Chapter 8 examines the mainstream approaches to social science research in terms of three influential paradigms of research. Chapter 9 deals with two research approaches beyond the conventional limits of mainstream research traditions: emancipatory and postmodern. Chapter 10 extends the analysis of self to consider its location within the experience of doing research. The book contains 220 references and an index. (YLB)

Identifiers—Australia

This book explores everyday social practices and how they influence who people are, their life quality, opportunities and possibilities open and denied, focusing on language and literacy components of social practices. Chapter 1 outlines an approach to thinking about language and culture and how they are related, developed from Gee's (1996) sociocultural approach to literacy studies. Chapter 2 develops a workable approach to critical social literacy across the second school curriculum that deals with practical and conceptual-theoretical aspects. Chapter 3 suggests and explores a conceptual model of empowerment by relating it to Gee's work on literacy and discourse. Chapter 4 considers an emerging genre of business texts, so-called "fast capitalist texts." Chapter 5 explains the significance of two events in 1990—defeat of the Sandinista National Liberation Front in the polls in Nicaragua and Best's publishing of "The New Competition"; it examines a crucial global concern evoked by these events and explores relationships among literacy, work, and life chances. Chapter 6 offers a working definition of technological literacies and identifies examples that may be incorporated within classroom learning. Chapter 7 provides theory-based "snapshots" involving seven Australian school students of different ages and backgrounds as they engage in social practices mediated by electronic technologies in school and out-of-school settings. The book contains 223 references and an index. (YLB)

With more mothers in the work force and greater stresses created by competing demands of work and home, nonstandard work arrangements (NSWAs), which include temporary help agency work, on-call work, day labor, contract work, independent contracting, self-employment, and part-time work, have been suggested as a remedy for this conflict. For the average worker, the cost of employment in a nonstandard arrangement is often quite high in terms of reduced hourly wages and benefits and limited job security; however, little is known about managers and professionals in nonstandard arrangements. A study compared the experiences of managers and professionals in nonstandard arrangements to those with similar characteristics in regular full-time jobs, as well as to other white-collar workers in nonstandard arrangements. Data were gathered from the February 1995 Current Population Survey. The study found that managers and professionals in many types of nonstandard work, especially if they are women, are paid less than their counterparts employed in regular full-time jobs with similar education and personal characteristics. However, some nonstandard workers, usually men, are paid more, especially those in certain independent contractor, self-employment, and contract work arrangement. The study concluded that nonstandard work arrangements, although helpful for expanding the options of some workers, rarely offer effective strategies for most of those hoping to resolve the competing demands of work and family (particularly minority workers). (Contains 58 references.) (KC)

Descriptors—Adults, *Employed Women, Employment Opportunities, *Employment Patterns, Females, *Flexible working Hours, Fringe Benefits, *Males, Part Time Employment, Policy Formation, Public Policy, Self Employment, Temporary Employment, *Wages Nonstandard work arrangements (independent contracting, working for a temporary help agency, contract or on-call work, day labor, self-employment, and regular part-time employment) are growing more common in the United States. In 1995, more than 29 percent of all jobs were in nonstand-

ard work arrangements. A study of these jobs and the characteristics of the workers who hold them was conducted through analysis of the 1995 Current Population Survey. The study found that nonstandard workers are disadvantaged by their work arrangement and the preponderance of low-quality jobs because they are more likely than regular full-time workers to be employed in low-quality jobs. In addition to paying lower wages, all types of nonstandard jobs are much less likely to provide health insurance or a pension than is regular full-time employment, are more likely to be of limited duration, and are poor ways to move to regular full-time employment, at least within a particular firm. More women than men, and both genders in minority groups, are more likely to hold low-quality, nonstandard jobs. The study concluded that public policies are needed to improve job quality and provide greater workplace protection for workers in nonstandard work arrangements. (Contains 21 references.) (KC)

Identifiers—*Appalachia, *California

This book develops an understanding of literacy and illiteracy through the life stories of 12 adults from diverse backgrounds living in the United States, 6 in Appalachia and 6 in California. Part 1 provides a summary of three areas of research offering insights and descriptive data about literacy: ethnographic studies of everyday literacy, studies on workplace uses of literacy, and research on problem solving in everyday activities. It describes the study on which the findings that comprise the remainder of the book are based. Part 2 contains the six profiles from the Appalachian region, with an introduction to the region and people. Part 3 summarizes the role of literacy and technology in their everyday life, their expectations and beliefs about literacy and technology, and how they view the demands placed on them by their social and personal contexts. It outlines barriers and incentives they identify to furthering their own literacy skills and examines how literacy affects their social relationships. Part 4 contains the six profiles from the California Bay Area, with an introduction to the region and people. Part 5 summarizes everyday uses of literacy, everyday technology use, and literacy demands and economic realities. It outlines the barriers and incentives to learning and addresses use of literacy in social and community relationships. Part 6 synthesizes findings relating to literacy, technology, and learning across all profiles. (Contains 48 references and an index.) (YLB)

Descriptors—*Biology, *Cooperative Education, Educational Research, *Experiential Learning, Hands On Science, High Schools, *Integrated

Curriculum, *School Business Relationship, Student Experience, Veterinary Medicine, Vocational Education, *Work Experience

Case studies were conducted of four female cooperative education (co-op) students who participated in two 4-month co-op placements in a veterinary clinic as part of a high school biology credit. Two graduate students gathered data onsite during two phases: an initial 2-month period that oriented the methods of the inquiry at the clinic to match what was witnessed and observation and data collection during the last 2 months of the first placement and the second placement. Early in their placements co-op students learned simple tasks they were expected to complete without supervision. Assuming such responsibilities made them immediately feel like contributing team members and motivated them to complete the tasks proficiently so they could later be available to observe and participate in animal treatment. Students learned the relationship of the routines to the clinic's priorities and the science behind the activities in which clinic personnel engage. Two main types of opportunities for learning were tasks they performed and activities they observed and participated in peripherally. Clinic staff enhanced learning through questioning in the context of direct observation, think-alouds, cueing, and direct instruction. Two features of these approaches were that they reflected priorities of the clinic and they took place in the context of experience. The graduation in responsibility had dimensions in the workplace: complexity of tasks and responsibilities, risk if errors are made, and subject matter undergirding placement activities. Identifiers—Aftercare

Youth who come in contact with the juvenile justice system are often disenfranchised by the education system. Despite research demonstrating that employability is critical to the success of high-risk youth, youth involved in the juvenile justice system often find it difficult to learn marketable skills or compete for jobs. According to a task force of researchers, program experts, market analysts, and representatives of private and public agencies, programs successfully linking court-involved youth to the labor market share the following elements: age-appropriate and comprehensive youth development; involvement of an adult advocate and the family; work-based learning and academic development; close attention to career development and job placement; and long-term follow-up. Programs serving court-involved youth can be divided into three categories: early intervention, residential, and aftercare. All three types of programs must combine quality job training and employment services with strategies to address the behavioral, educational, and social profiles of confined youth. The task force identified six primary systems affecting court-involved youth: juvenile justice, work force development, education, social services, community-based organizations, and the labor market. Enhancing collaboration, improving communication, and increasing these systems' knowledge of each other are among the challenges confronted by policymakers, program personnel, and court-involved youth. TARGET: Teachers As Researchers Gaining Excellence Together. Tech Prep Potential at Goshen High School.

Pub Date—1999-04-22

Note—17p.

Pub Type—Reports - Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Career Choice, Educational Benefits, *Educational Research, Grade 10, Grade 9, High Schools, Occupational Aspiration, Postsecondary Education, Questionnaires, Student Attitudes, Student Educational Objectives, Student Surveys, *Teacher Researchers, *Tech Prep, *Theory Practice Relationship, *Vocational Education, *Vocational Education Teachers

Three tech prep teachers and one counselor at a Vermont high school examined tech prep's effectiveness in influencing students' career decisions and their intentions to receive postsecondary education. Three methods were used to collect data at the end of the third 9-week quarter of the school year: analyzing students' course selections, grades, and responses to a 10-item survey. The teacher researchers found that 14 of the 22 students enrolled in the school's Tech Prep Potential class signed up to take additional college prep courses, and 6 opted to attend a career center. Compared with other students at the high school, the Tech Prep Potential students' grade point average for science, mathematics, and English during their sophomore years averaged 0.62 points lower. This difference was attributed to the fact that meeting the standards needed to participate in the Tech Prep Potential program requires students to schedule more challenging courses than they might choose otherwise. According to the student survey, the Tech Prep Potential was most beneficial in exposing students to new careers. It was also considered valuable in explaining the importance of postsecondary education. (A four-item annotated bibliography is included. Appended is the tech prep student survey.) (MN)

This document contains five papers on vocational education. "Access to a High School General Curriculum Based on Integration of Academic and Occupational Learning: A Case Study" (Laura T. Eisenman, Dantae Wilson) examines the access of secondary special needs students to general education. The school-to-work movement (STW) and the role of research in creating a model STW system are discussed in "School-to-Work: Where Are We, What Do We Know, Where Are We Going?" (William J. Stull, Nicholas M. Sanders). "Implementation of a Model for Strategic Planning in a Regional Technical Education Center" (Barbara Tansey, Bob R. Stewart) reports a study designed to develop a community-based strategic planning model for use in regional vocational-technical education centers. "The Effectiveness of Computer-Assisted Instruc-

tion in Technical Education and Training" (Curtis R. Finch, Mohammad Naim Yaakub) is a quantitative analysis of contemporary individual studies of computer-assisted instruction. The perceptions of district vocational directors and high school building administrators concerning vocational educators' willingness to make changes in their programs are compared in "Attitudes of Vocational Educators toward Change" (Hollie Thomas, Mark Schmidt). This document is a working paper from Cyberstep, a 3-year project during which five literacy service innovators are collaborating to identify practices for educating English-as-a-second-language learners and adults functioning at low literacy levels, extend the use of technology to facilitate learning, and provide practical tools for educators. The document begins with an introduction that includes background information about the project, the working paper, the project partners and products, and the learning venues for which the project products are being designed. The body of the working paper focuses on four sets of issues: learner issues (service populations targeted by Cyberstep, development of a descriptive framework to distinguish different kinds of learners, need for learning materials to provide multiple ways to access and work with information and learn in context); instructional issues (principles of adult learning, learning frameworks, distance learning, learning categories, learning management); development issues (importance of supporting the evolution of the traditional model of learning by persuasive reasons for change, benefits of using converging digital technologies for parallel development of multimedia products); and standards issues (templates and standardization, content standards, assessment standards, technology standards, interface standards, management system standards, template standards). Employment, Trend Analysis, *Vocational Education

Identifiers—*European Union

The nonnational population and labor force in the 15 European Union (EU) member states were characterized from the standpoints of size and structure, and the labor market conditions faced by nationals and nonnationals were compared. In 1995, the non-national labor force in the EU totaled approximately 7.8 million; nearly 3 million were citizens of other EU member states who had the same legal standing as the national labor force. In all the EU member states together, fewer than 2% of workers were from other member states. The situations of nationals and nonnationals regarding rates of unemployment, employment, and self-employment differed markedly from each other. Nonnationals' unemployment rates generally exceeded those of nationals. In many member states, EU nationals' unemployment rates fell between those for nationals and those for third-country nonnationals. The employment rates of nonnationals also differed from those of nationals. Employment rates of female third-country non-nationals were particularly low and they experienced a disproportionately high level of unemployment. In some countries, EU nationals were more inclined to risk self-employment than nationals or third-country nonnationals were. The gap between rates of self-employment of nationals and nonnationals has narrowed. (Contains 25 references.) (MN)

Descriptors—*Education Work Relationship, *Employment Experience, *Employment Patterns, Ethnic Groups, Family Characteristics, Income, Leisure Time, Longitudinal Studies, Part Time Employment, Racial Differences, Religion, Salary Wage Differentials, Secondary Education, Sex Differences, Tables (Data), Trend Analysis, *Vocational Education, *Youth Employment

Identifiers—*National Longitudinal Survey of Youth

The 1997 National Longitudinal Survey of Youth (NLSY) provided data on the employment experience and other characteristics of a nationally representative sample of 9,022 young men and women who were between 12 and 16 years old on December 31, 1996. The NLSY focused on four aspects of youth's lives: overall employment; employment while in school; educational experiences; and home characteristics. According to the NLSY, female youths were much less likely than male youths to hold an employee job at some time while age 14 or 15 and were more likely to engage in freelance jobs. From age 14 to age 15, youths moved toward more formal work arrangement: 24% of youths held an employee job at age 14 versus 38% at age 15. Twenty-eight percent of youths aged 14-16 worked during school and summer months, and 16% of youths who had attended ninth grade or higher in 1997, had been involved in gifted and talented programs. Youths between the ages of 12 and 15 spent an average of 17 hours per week watching television but only 11 hours doing homework or reading for pleasure combined. Working youths watched less television than their nonworking counterparts did. (MN)

This manual contains a series of 10 detailed guides for school practitioners who are beginning to create work-based learning programs at their schools. Work-Based Learning Overview defines the different elements of work-based learning and describes the roles of program participants. Program Planning Guide offers suggestions about how to plan programs, who to involve, and what key steps to take in implementing those plans. Marketing and Work Site Development Guide contains ideas for identifying and establishing contact with potential employers, setting up learning experiences, and evaluating program activities. Career Guidance and Counseling Guide offers suggestions for helping students identify career interests and aptitudes, developing learning objectives, and assessing student learning. Career Awareness Activities Guide describes three examples and includes sample forms for setting up each activity. Career Exploration Activities Guide describes four examples and includes sample forms. School Site Career Preparation Guide describes eight activities and provides sample forms. Work Site Career Applications Guide describes nine applications and provides sample forms. Work-Based Learning Legal Issues Guide covers insurance, health and safety, transportation, and labor laws as they affect the planning of work-based learning opportunities. Teacher/Administrator Externship Guide provides information to set up externships and sample forms. (YLB)

Descriptors—Adult Education, Comparable Worth, Comparative Analysis, Dual Career Family, Employed Parents, *Employed Women, Employment Practices, *Minority Groups, Mothers, Nontraditional Occupations, Personnel Policy, *Racial Discrimination, Salaries, *Salary Wage Differentials, *Sex Discrimination, Wages

A national study, including state-by-state breakdowns, analyzed Census Bureau and Bureau of Labor Statistics data to explore the wage gap. Median weekly earnings of men and women and of minorities and nonminorities were analyzed. Gender-based earnings differences and gender wage gaps were large for all women—and especially large for minority women—compared with all men. Minority-based wage gaps were substantial. The study estimated that, if married women earned as much as

comparable men, their family incomes would rise by nearly 6 percent; if single working mothers earned as much as comparable men, their family incomes would increase by nearly 17 percent; if single working women earned as much as comparable men, their incomes would rise by 13.4 percent; and working women in every state would receive wage hikes if they earned as much as comparable men in their states. Comparison of earnings of workers in female-dominated jobs with comparable workers in other jobs showed very large earnings losses due to the lower pay associated with working in female-dominated jobs. The considerable advantage unionized workers enjoy, both in the form of higher wages and smaller wage gaps, was reviewed. The typical female union member earned 38 percent more per week; unionized women of color almost 39 percent more; and minority men almost 44 percent more. (A national summary table and technical appendix are attached.) (YLB)

This publication presents interviews with 11 prominent women, representing different backgrounds, philosophies, and life experiences, in which they speak about their own experiences with work and family issues. The introduction, "On Common Ground: Prominent Women Talk about Work & Family" (Diana Zuckerman), provides an overview. The 11 interviews present the women's perspectives on the following topics: their upbringing and goals while growing up; juggling career and family; spending time with children; and their happiness with their choices, along with changes they would make if they had to do it over again. Recurring themes were identified: the importance of family; the enjoyment of work; and respect for friends, relatives, and other women who have made other choices. The 11 interviewees are as follows: Judy Woodruff, prime anchor and senior correspondent, CNN; Susan Molinari, former Congresswoman from New York; Linda Chavez-Thompson, Executive Vice President, AFL-CIO; Janice Weinman, former Executive Director of American Association of University Women; Mary Matalin, political strategist and commentator; Gail Shaffer, Chief Executive Officer, Business and Professional Women, USA; Carole Simpson, anchor, ABC's World News Tonight Sunday; Iris Chang, author, "The Rape of Nanking"; Ellen Levine, Editor-in-Chief, "Good Housekeeping"; Irene Natividad, principal, Natividad & Associates, and Co-President, Global Women's Trade Network; and Kathleen Kennedy Townsend, Lieutenant Governor of Maryland. Federal Legislation, *Federal Programs, *Homeless People, *Job Training, Program Effectiveness, Program Evaluation, Program Termination, Success, *Welfare Recipients
Identifiers—*Adult Education for the Homeless Program, Welfare Reform

During its 8-year history, the federal Adult Education for the Homeless Program (AEH) pioneered new methods of service to adults in need and benefited over 320,000 homeless adults and families. Despite an evaluation that documented program success, funding was rescinded from the 1995 federal budget and never reinstated. AEH programs developed the capability and capacity to improve the lives of homeless families and could be viewed as an important technique for welfare reform. Programs were highly successful in preparing learners for employment and training opportunities. In the process, AEH contributed direct economic benefits to employers and communities and social and financial benefits to homeless individuals and families. AEH programs proved useful in helping adults with disabilities overcome personal and societal obstacles to meet everyday challenges. AEH programs were developed to deal with homelessness in holistic ways, to help adults improve all aspects of their lives. Practitioners worked with homeless service delivery providers to provide AEH students access to homeless services. Loss of dedicated AEH funding caused significant harm to efforts to reach and serve homeless adults and families. Short- and long-term policy options were suggested for consideration by national and state policy makers. (Appendixes include 15 websites of relevance to educators and learners; the article, "Silencing Street Voices" by Sally S. Gabb; and "Learning to Hope" report by Darrel Drury and Judy Koloski.) Descriptors—*Adult Education, *Adult Literacy, Correctional Education, Economically Disadvantaged, Educational Background, *Educational Finance, English (Second Language), *Enrollment Trends, Federal Aid, Hispanic Americans, Instructional Student Costs, Limited English Speaking, Minority Groups, National Programs, Outcomes of Education, State Aid, *Student Characteristics, Tables (Data), Welfare Recipients

Information on literacy programs for adults in the United States was compiled from the annual statistical performance reports states submit to the U.S. Department of Education at the end of each program year (PY). Nearly 27 percent of adults had not completed a high school diploma or equivalent. In PY 1991, the nation's adult education (AE) program served 8 percent of the eligible population. In PY 1996, 4 million individuals enrolled in AE programs; White and Hispanic students accounted for more than 70 percent; and most were under age 45. Total enrollment in AE programs increased by more than 30 percent between PY 1988 and 1996. National trends in adult basic education, English as a second language, and adult secondary education (ASE) enrollment masked considerable variability among geographic regions. The number of Hispanic students increased by more than 50 percent, and the number of AE participants in correctional facilities increased by nearly 40 percent. During the period PY 1988-96, between 25-37 percent of ASE students obtained an Adult High School Diploma or its equivalent. From PY 1990 to 1996, more than 1.6 million AE students retained their current jobs or advanced in new jobs, and about 240,000 were removed from public assistance. Characteristics of the AE participant population (race/ethnicity, age, gender, educational level) did not necessarily correspond to the target population. From PY 1986 to 1994, federal and state spending for AE increased in every category; state funds were the most impor-

tant source of funding for services. (Contains 26 tables and 34 figures.) (YLB)

In the United States and many other nations, adult literacy students are marginalized. To serve the educational needs of these adults, governments have established an educational system that is marginalized among education systems. In California, the adult literacy education system is marginalized in the following ways: it is a noncredit system between the K-12 education and college systems; it receives much less funds per full-time equivalent student; 80-90 percent of its teachers work part time; it is clearly of lower social standing; and it lacks legislative attention. There are reasons to argue that adult literacy education ought to occupy a central position in national reform activities. It is central to achievement of the eight national education goals of the National Governors' Association endorsed by the executive and legislative branches of the U.S. government. Four reasons why the adult literacy education system should move from the margins to the mainstream of educational policies are as follows: better educated adults produce better educated children, demand and get better schooling for children, provide better communities for learning, and are more productive for society. Government agencies should consider the multiplier effects that may be possible for investments in adult literacy education. Investment in adult education makes the schools and community more productive, helps in achieving National Educational Goals, and promotes democracy and good citizenship. (Contains 10 references.) Identifiers—Florida (Southwest)

This curriculum guide for postsecondary student development was created in response to needs expressed by business and other organizations throughout the Southwest Florida School-to-Careers Consortium. The guide encompasses four curriculum categories: academic achievement, career development, personal and social development, and community involvement. Each of these four areas is further subdivided into general goals and attendant student outcomes. Activities are provided as examples of the range of possible activities that can be used to meet any particular outcome or goal. A reference section accompanies the guide. The curriculum content is organized in the following eight sections, with course content suitable for postsecondary students: (1) introduction and information on using the curriculum guide; (2) school-to-careers competencies; (3) correlation of sunshine state standards; (4) curriculum matrix; (5) exceptional student education adaptations; (6) evaluation; (7) character education and school-to-careers; and (8) sample activities. Texas School Counseling and Guidance Programs. Final Study Report.

Texas Education Agency, Austin. Div. of Research and Evaluation.

Report No.—GE6-601-09

Pub Date—1996-08-00

Note—89p.

Available from—Texas Education Agency, Publication Distribution, P.O. Box 13817, Austin, TX 78711-3817 (\$8).

Pub Type—Numerical/Quantitative Data (110) — Reports - Research (143)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Counseling, *Counselor Role, Elementary Secondary Education, Prevention, Program Effectiveness, Program Evaluation, *School Counselors, *School Guidance, State Programs, Student Development, Tables (Data)

Identifiers—Texas

The availability and quality of counseling was assessed in an effort to define a professional identity for the school counselor that better addresses student needs. Policy implications were also reviewed. Study components are: (1) counselor profile; (2) statewide counselor survey on the role of the counselor; (3) case study of 21 schools relating the role of the counselor to the broader educational context. The shift to comprehensive, developmental, and preventive guidance programs is discussed. Contents of the study include: (1) "Executive Summary"; (2) "Introduction", which provides an overview of Texas guidance policy and the study components; (3) "Counseling and Guidance Programs and Practices", which discusses "Planned, Designed, and Prevention-Oriented Programs," "Program Resources and Organization" that includes a profile of the counselor, supply and demand issues, program implementation and human resources issues, and "Services to Students"; (4) "Summary of Findings"; (5) "Potential Strategies and Policy Initiatives." Appendixes are: (1) "Survey Instrument"; (2) ASCA (American School Counselor Association) (3) "Characteristics of High and Low Performing Counseling Pro-

grams." (Contains 20 tables and 5 figures and 50 references.) (EMK)

Identifiers—Texas

This report is the third part of a policy research study of the counselor's role in Texas schools. It was conducted as a follow up on a key finding from a previous study, which led to the recommendation that counselors be relieved of extraneous duties in order to concentrate on guidance and counseling services to students. Case studies of 21 schools relating the role of the counselor to the broader educational context is presented. Specific data on actual counseling and guidance programs and practices is summarized or included along with data on the needs of students, counselors, other school staff, parents, and community members. Individual interviews and focus groups were used. The Texas Education Agency (TEA) Comprehensive Model developed in another part of this overall study was introduced so that participants could analyze the model in relationship to counseling and guidance in their schools. The model consists of four components: (1) guidance curriculum; (2) responsive services; (3) individual planning; (4) system support. The methodology is presented, and case studies are presented for elementary, middle or junior high school, high school, and multilevel schools. Interview protocols are appended. (EMK)

Document Not Available from EDRS.

Descriptors—Adolescents, At Risk Persons, Children, *Community Services, Elementary Secondary Education, Financial Support, *Fund Raising, High Risk Students, Outcomes of Treatment, Outreach Programs, *Prevention, Program Development, Program Evaluation, Youth

Information about current prevention practices is provided in a comprehensive resource. An overview of different prevention approaches and how these models have been implemented in a variety of programs is presented. Techniques for outcomes research, other kinds of prevention studies, and funding opportunities are linked to a framework for reducing the impact that substance use, HIV/AIDS, truancy, violence, pregnancy, suicide, and other mental health problems have on young people. Six areas are covered in chapters: (1) "Getting Started" tells how to get started doing outcomes, and demonstrates how to use the information for program feedback and continual quality improvements; (2) "Theory & Practice" provides an overview of prevention research including risk and protective factors, pathways, and prevention models; (3) "Program Outlines" provides profiles of actual pre-

vention programs including philosophy, methodology, outcomes, and tools; (4) "Proposals & Reports" covers how to write effective grant proposals and reports; (5) "Funding Resources" lists publications on funding including government and foundation funding opportunities for prevention programs; (6) "General Resources" lists organizations and places to go for information and support. Presented in short, concise chapters, this guide provides a solid introduction to prevention technology. Text contains marginal "editor's notes" and boxed tips. (EMK)

Preventing child abuse is an endeavor that requires equal parts of caring, optimism, and pragmatism. Drawing on the experiences of more than 100 child abuse prevention projects, this field-tested manual integrates the abstract principles of program development and prevention with the real world experiences and challenges faced by prevention projects on a daily basis. The work is organized into seven chapters, a toolbox, and appendixes. Chapters are: (1) "Child Abuse and Its Prevention: An Overview"; (2) "Cultural Competence: Communicating Effectively"; (3) "Determining Community Needs"; (4) "Designing a Child Abuse Prevention Project"; (5) "Project Funding"; (6) "Implementing a Project"; and (7) "Project Evaluation." The "Project Toolbox" includes: (1) "Structured Group Techniques"; (2) "Needs Assessment: Written Reports"; (3) "Advantages and Disadvantages of Using Surveys"; (4) "Using Community Leaders as Resources"; (5) "Developing Objectives and Clear Statements of Need"; (6) "Working with Volunteers"; (7) "Training"; and (8) "Public Relations Tools for Prevention Projects." Appendixes are: (1) "Abuse Indicators"; (2) "Federal Resources for Child Abuse and Neglect Prevention Activities"; (3) "National Organizations and Information Resources"; (4) "Resources for Statistics"; (5) "Resource Materials"; and (6) "Sample Child Abuse and Neglect Reporting Policy for Prevention Program Staff." Improving the Parenting Skills of Young Teen Mothers in Grades 9th—12th through Parenting Classes, Training, and Mentoring.

Pub Date—1998-00-00

Note—61p.; Ed.D. Practicum Report, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Child Development, *Early Parenthood, *High School Students, High Schools, *Home Visits, Infants, *Mentors, *Mothers, Nutrition, Parent Child Relationship, *Parent-

ing Skills, Practicums, Social Support Groups, Training

This paper discusses a practicum designed to address young teen mothers' lack of knowledge, experience, and skills needed to appropriately care for their infants. It documents that increased knowledge, enhanced interpersonal relationships, and augmented parenting skills made a difference in the teen mothers' approach to parenting. Parenting classes and/or training sessions were implemented, home visitations were conducted and mentors were assigned to accomplish these goals. Analysis of the data revealed that: (1) there was an increase in the teen mothers' knowledge about basic daily care and the developmental milestones and changes that occurred in their infants; (2) the teen mothers became more sensitive to their infants; (3) the teen mothers felt more supported by significant others; (4) the teen mothers reflected an increase in knowledge about child development and interactional skills of parents. Tables depict results of pre- and post-testing of participants. Contains 37 references. Appendixes provide instruments utilized with participants: Adolescent Parenting Inventory, Parenting Attitude Index, Family Support Checklist and Awareness Checklist. (Author/MKA)

Identifiers—*Cross Cultural Counseling

This book is organized into two parts. Part 1 consists of three chapters in which the theoretical groundwork is laid for part 2. In the introduction, an existential based theory of culture is offered, the cross-cultural client is defined, and the format of the book is described. In chapter 1, several constructs that may affect cross-cultural counseling are discussed. In chapter 2, the existential basis of cross-cultural counseling is described. In part 2, ten case studies of culturally different clients are presented. In each case, the client is introduced, the client's history is presented, and three analyses are provided. The first one is from a conceptual perspective using recognized psychological and cultural concepts, the second is from an existential perspective, and the third is based on the diagnostic model presented in the fourth edition of the Diagnostic and Statistical Manual of Mental Disorders. After the case analysis a brief discussion is provided so to enable the reader to understand the rationale for each analysis. Finally, each case presentation is followed by discussion questions that are provided to encourage students and other readers to consider the complex aspects of each case. Contains 141 references and an index. (Author/MKA)

Descriptors—*Counselor Training, Ethics, Graduate Students, Higher Education, *Practicums, Skills, *Supervision

Identifiers—Conceptual Analysis

This second edition offers step-by-step instruction for supervisors of novice counselors. The book is divided into three major parts. The first part, "Introduction and Ethical Framework," contains an introduction in which commitment to supervisor and counselor development is discussed. Chapter 2 provides ethical guidelines for supervisors as they work with counselors in training. The second part, "Supervision Strategies and Case Conceptualization," explores supervision strategies and the case conceptualization model. Chapter 3 describes basic supervision strategies, illustrating each with a vignette. A description of a model of case conceptualization and advanced supervision strategies that combine teaching, counseling, and consulting function are included in chapter 4. The final section, "Practicum Course Outline and Supervision Modules," provides the setting for supervision: a practicum course for first-year counseling students. The first term, outlined in chapter 5, focuses on building a relationship with clients, and delineates plans for each week. It is suggested that each class should include and describe weekly sessions in detail. Vignettes illustrate supervision in action. The second term, outlined in chapter 6, focuses on conceptualization of cases and the process of counseling. Contains 154 references. (Author/MKA)

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Alcoholism, Annotated Bibliographies, Citations (References), *College Students, *Drug Abuse, Higher Education, *Prevention

This annotated bibliography was developed to provide those interested in alcohol and other drug prevention at colleges and universities, and in surrounding communities, with a ready reference of current, important, and available information

resources. Although alcohol and other drug problems have been a focus at institutions of higher education for over two decades, relatively little research on what works to prevent these problems has been conducted in a systematic manner. However, as this bibliography reflects, much has been published to inform a greater understanding of how alcohol and other drug problems develop, and to describe promising theories and practices for preventing and reducing these problems. This bibliography of 130 resources is by no means exhaustive, but it represents what the authors believe are some of the more important sources for advancing prevention in higher education. Three major criteria were used in selecting references for this bibliography: the philosophy of the reference reflected an environmental approach rather than an individual-level approach, the reference fit into identified topic areas listed in the index, and, with few exceptions, the reference was published during or after 1990. Updates to the bibliography are available via the Center's web site. (Author/MKA)

Descriptors—Acquired Immune Deficiency Syndrome, Administrators, Adolescents, Adults, Elementary Secondary Education, *Homophobia, *Homosexuality, *Public Policy, *Public Schools, School Community Relationship, Social History, Students, Teachers

This presentation takes an historical approach to homosexuality and homophobia in public schools. The methodology of "history from below" is applied. Methodological considerations are discussed, and experiences of gay and lesbian teachers and students are explored. The psychological, moral and political meanings various groups attach to homosexuality are reviewed in the context of history, paying attention to political issues and the pathologization of homosexuality. The legacy of the McCarthy era "witch hunts" is discussed. Despite the American Psychiatric Association's removal of homosexuality from the "Diagnostic and Statistical Manual of Mental Disorders" in 1973, a number of educators and administrators have continued to view it as a form of mental illness. Since the 1970s, the emerging gay and lesbian rights movement coupled with the rise of the religious right have served to polarize the politics of American public education. Suicide is a major problem among young homosexuals. The fight against California's "Proposition 6," which would have barred gays and lesbians from working in public schools, is reviewed. The coming of AIDS to the United States heightened public awareness of homosexuality and presented an opportunity for education. The political and social climate of the 1990s has intensified the paradoxes. Appendix A shows results of a Dissertation Abstracts search and ERIC search. (Contains 58 references.) (EMK)

Transfer of training in the construction and use of knowledge maps to text comprehension was investigated. Knowledge maps (k-maps) are spatial/verbal arrays that represent information in the form of node-link diagrams. K-maps make the macrostructure of a body of information more easily available to the learner. Because k-maps emphasize relationships and organizational patterns, training a person in the construction and utilization of these displays may help them implicitly structure and encode information in a variety of other presentation formats. If training in k-mapping results in improved ability to learn without explicit use of the strategy, then this expensive training would be more cost-effective. Participants who received extensive training in the production and processing of k-maps were compared to controls (N=53). Differences in ability and motivation were controlled. Participants who received the training recalled significantly more macro and micro level ideas. Results indicate that k-map training facilitated recall for ideas; however, students may not have been aware of the advantages they received from the training. Apparently, training in mapping promotes students to utilize a top-down learning set that facilitates their acquisition of text information. (Contains 7 references.) (EMK)

Differences among Senior and Young, Men and Women in Attitudes and Cognition.

Pub Date—1999-00-00

Note—25p.

Pub Type—Reports - Research (143)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Adolescents, Adult Development, *Age Differences, *Aging (Individuals), *Attitudes, Children, Older Adults, Problem Solving, *Sex Differences, *Thinking Skills, Young Adults

Identifiers—*Silver Drawing Test of Cognition and Emotion

This study examined the cognitive skills and attitudes toward self and others in samples of independent seniors and young men and women. Three proceedings were used to address questions of age or gender differences. Study 1 (N=95) compared the scores of older adults (approximate age range, 64-95 years) on the Silver Drawing Test of Cognition and Emotion (SDT) Drawing from Imagination Task to those of young adults (age range 20-50 years, from three colleges). Study 2 (N=73) analyzed SDT Predictive Drawing scores of senior and young adults. Study 3 examined Predictive Drawing scores using four age groups: 53 children, 66 adolescents, 51 young adults, 36 senior adults. The test instrument is described. Methods used include statistical analyses of mean scores, group performances in top or bottom range scores, and the responses of particular individuals. No significant age differences were found between young and independent older adults in ability to solve conceptual problems visually, the use of humor, or drawing about unfortunate subjects of stressful relationships. The difference in findings between these studies and the literature on older adults based on those in institutional settings is discussed. Control over one's activities may be a critical factor in successful aging; fear of losing this control may have adverse effects on cognition and emotional well-being. Data analyses and examples of drawings are appended. (Contains 12 references.) (EMK)

DeSimone, Angelo J.

A Quantitative and Qualitative Study of Role Discrepancy among Florida School Psychologists: A Survey of Actual/Preferred Roles and Functions.

Pub Date—1998-11-00

Note—29p.; Paper presented at the Annual Conference of the Florida Association of School Psychologists (25th, Tampa, FL, November 3-5, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Counselor Role, Elementary Secondary Education, Job Analysis, Job Satisfaction, National Surveys, *Occupational Information, *School Psychologists

Identifiers—*Florida, Individuals with Disabilities Education Act

Data on practicing school psychologists (N=211) were derived from a modified version of the National School Psychologists Questionnaire to determine the characteristics of Florida school psychologists. Significant differences were found between the actual and preferred time (in hours) that Florida school psychologists engaged in job functions, which were identified as assessment, counseling, consultation, research, and "other services." Further analysis revealed no difference in time spent in the main roles either as a function of the age or income level of the school psychologist. However, females reportedly performed more assessments than did males. The degree level of the psychologist was positively associated with the amount of time in the counseling role. The psychologist-to-pupil ratio affected the amount of time spent in assessment and counseling. Qualitative analysis of focus group comments revealed that trends and movements within the profession have had little impact on daily service delivery. The most frequently reported areas of role discrepancy men-

tioned in the focus groups related to testing and assessment services, the inclusion movement, the reauthorization of Individuals with Disabilities Act in 1997, and Florida funding issues. Appendix A is a table of time spent in subdomain roles. Appendix B is the Focus Group Topology Flow Chart. (Contains 2 tables and 39 references.) (EMK)

Identifiers—Gambling, *Texas

This report discusses results of the 1998 Texas School Survey of Substance Abuse among Students. Results for secondary students were based on responses of 158,324 students in 66 school districts. This book is divided into six chapters. Chapter 1 discusses the findings of the survey on a drug-by-drug basis to provide information on trends in the use of each substance and the characteristics of those students who reported using each substance. Chapter 2 examines this same information in terms of the relationship of substance use to demographic characteristics. Chapter 3 looks at protective or resiliency factors that can help students resist substance use despite the presence of risks for use. The negative consequences experienced due to substance abuse are examined in chapter 4. Chapter 5 discusses sources of assistance and information concerning substance abuse, including substance abuse education. The final chapter offers conclusions drawn from the survey. Appendixes provide a copy of the survey instrument, charts and tables depicting results of the survey, a description of the survey, and limitations of the study. (MKA)

Identifiers—*Colonias, Drug Trafficking, Gambling, *Mexico United States Border, Texas

This report consists of information gathered from in-person surveys concerning substance abuse with adult residents (n=1,665) living in the Texas-Mexico border cities of Brownsville, El Paso, Laredo, and McAllen and with residents (n=504) of 51 different colonias in Hidalgo and Cameron counties (colonias are rural, unincorporated neighborhoods

characterized by substandard housing and utility services). Current treatment needs and the prevalence of substance abuse within the group is discussed. Participants are compared to other populations including adults in other parts of Texas, Hispanics nationwide, and citizens of Mexican border cities. Acculturation and its relation to substance abuse is examined. Discusses driving while intoxicated, mental health, drug trafficking, availability of drugs and alcohol, family dynamics and problem gambling. Looks specifically at substance use and misuse in the colonias. Provides 22 charts and 29 tables illustrating results of the surveys. (Contains 80 references.) (MKA)

Identifiers—Group Attitudes, Home Pages

Psychology and computer science were clustered into a course in "Internet Psychology" with the goal of enabling students to use electronic networks responsibly and creatively and to understand the principles of psychology as they operate in the electronic context. Fourteen students from a variety of majors registered for the class. Course content, process, and outcomes are described. Electronic means of communication between professor and student, as well as student to student, were emphasized. A broad range of class projects took advantage of the networks and included constructing a home page. First-hand experience in using group dynamics was important to improving the students' ability to work together in teams. Students elected to take harder tests in teams and did well. Follow-up assessment showed that students have become "local experts" on the Internet. Their Internet Psychology course provided them with an understanding of behavior that serves them well as they teach others. (EMK)

Identifiers—Angelou (Maya), O Connor (Sandra Day), Oppression, Ride (Sally), Siegel (Betty Lentz)

The purpose of this book is to describe the process through which women can achieve equity and to delineate the skills by which counselors can assist them. It is organized into five sections and provides a developmental look at the problem, its manifestations, remedies, and the processes through which the problem can be vanquished. Section I, "The Current and Future Status of Women in the United States," provides a window into the realities of the status of women in our time. The three chapters in this section trace the evolution of the

gender gap and describe it in terms of its economic, political, and professional impact; address the specific problems of women related to their race/ethnicity, age, sexual orientation, and health; and explore the current literature and its implications for gender equity. In Section 2, "The Multidimensional Model for Prejudice Prevention and Reduction (MMPR)," the model is examined. The three chapters describe five predisposing factors toward prejudice; elucidate the predisposing factors that support and sanction gender inequity within a social context; and detail political strategies to address the use of power for problem solving. Section 3, "Competencies Required for Gender Equity," contains four chapters that are devoted to designating specific competencies in the physical, emotional, intellectual, and spiritual dimensions that every woman must cultivate if she is to prepare herself to accept equity. Section 4, "Case Examples of Equity Achievement," is devoted to describing the process by which individual women have achieved equity. The four women discussed are: Sandra Day O'Connor, Maya Angelou, Sally Ride, and Betty Lentz Siegel. Section 5, "Instruments for Measuring Attitudes toward Gender Roles and Gender Equity," describes five instruments useful for counselors in studying gender equity perceptions. Names and addresses of test developers as well as an extensive reference list and index are included. (Author/MKA)

Descriptors—*Academic Achievement, Attendance, Attention Span, *Change, Cooperation, Elementary Education, Ethnicity, *High Risk Students, Interpersonal Competence, *Mentors, Objectives, Program Evaluation, Self Esteem, Student Attitudes, Student Motivation, Tutors, Work Ethic

This paper discusses two programs implemented at elementary schools where volunteer adults became involved in the lives of at-risk students. In the Lunch Buddy program, adults had lunch with their child once a week and talked with them. Within the Caring Adult program the children met weekly with an adult, but the adults rotated. The Lunch Buddies did not offer academic assistance other than possibly helping with homework whereas the Caring Adults provided tutoring services. A program evaluation design was created from a set of variables identified by the program administrators that they hoped would be effected by the two programs. Those variables were: attitude toward school, the student's work ethic, student motivation, the student's attendance, the student's work habits, student cooperation, the student's attention span, the student's self-confidence, the student's social skills, and the student's grades and work quality. Classroom teachers were asked about these variables for both the students involved in the programs and students not involved in the programs. Results indicate that the Lunch Buddy program had the most positive results in terms of change, especially in attitude, work ethic, motivation, social skills, and work quality. Iowa Test of Basic Skills change favored the Caring Adult program students. Five tables show statistical results of the study. (MKA)

The Effects of Mentoring At-Risk Female College Students.

Pub Date—1997-07-28

Note—80p.; Master's Thesis, Notre Dame Col-

lege.

Pub Type—Dissertations/Theses - Masters Theses (042)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*College Students, *Females, *High Risk Students, Higher Education, *Mentors, Perception, Private Education, Public Colleges, Research, Sex Differences

Identifiers—Positive Attitudes

Female students at Notre Dame College were surveyed to determine whether their perceptions of mentoring relationships are positive. Chapter 1 examines the historical and present day role of mentors and the mentoring relationship. Five research studies that explored mentoring are discussed in chapter 2. Chapter 3 describes the methodology of the present research study, chapter 4 presents the data from the research analysis, and chapter 5 presents the conclusions supported by the study, draws connections from earlier chapters, and discusses implications and future research. Data were analyzed quantitatively; results show that female students were more positive about the mentoring relationship than male students. In addition, students who attended public school reported being more positive about mentoring relationships than students who attended private school. Upper classmen also indicated more positive perceptions of mentoring relationships than lower classmen. The results confirm that perceptions of mentoring reported by female students are positive. Appendixes are: "A Mentoring Questionnaire," "Informed Consent for Interview," "Interview Protocol," and "Abbreviated Interview Responses." (Contains 23 references, 5 tables, and 3 graphs.) Descriptors—*Adolescents, *Early Parenthood, *Federal Legislation, *Pregnancy, *Prevention, State Federal Aid, Welfare Agencies

Identifiers—*Welfare Reform

Although the 1996 federal welfare reform law exhorts states to reduce teen and out-of-wedlock births, preliminary field research has found few links between welfare reform and pregnancy prevention, and the ones that do exist are often tenuous, hard to believe, and difficult to assess. States have established new and stronger connections between welfare and employment services under welfare reform, but creating welfare programs that explicitly stress pregnancy prevention has been inhibited by several factors. There is little consensus on how to prevent teen and out-of-wedlock births, not just as a practical matter but also as an ethical and political issue. This divisiveness has led most states to devolve critical questions about the design of such programs down to local and community levels. Also, the health agencies that have traditionally administered pregnancy prevention programs have usually not worked closely with welfare agencies in the past. And the federal reforms provide few incentives for states to create strong linkages. Nonetheless, there is an opportunity here for leaders and groups committed to teen pregnancy prevention, regardless of the approach they favor, to forge creative linkages to welfare/employment bureaucracies. Identifiers—Community Ties, *Learning Communities, *New York City Board of Education, Systemic Change

Over the past decade the idea that schools should serve as professional learning communities for teachers has become fashionable. Discussions of "community" pervade the literature on professional development and teacher learning. The three case studies conducted as part of the first-year work on the High Performance Learning Communities Project provide some specific answers to the questions of what it means for a school to serve as a professional learning community for teachers. These studies were conducted in schools which experienced dramatic turnarounds in the past eight years from elementary schools where children were not learning, staff were not teaching, and parents were uninterested to schools with improving student achievement score, dedicated and cohesive teaching staffs, and supportive, involved parents. This paper seeks to explicate the strategies that were used in the case study schools to create and maintain professional learning communities. One overriding similarity was that all three schools were active participants in Community School District #2's overall systemic approach to improvement. Indeed, the decision to intensively study these particular schools was guided by district leaders' beliefs that each had embraced and benefited from the direction, advice, and support provided by the district. As such, the district's hand can be discerned in the cultures of all three schools. As the strategies used by these schools are identified and described, district influences will be noted and elaborated upon. (NKA)

Identifiers—Learning Communities, *New York City Board of Education, Systemic Educational Reform, Teaching Research, Theoretical Orientation, *Variability

This paper describes how Community School District 2 has dealt with individual school variability in the context of an ambitious system-wide instructional improvement effort, and it identifies questions, principles, and practical ideas that can be used to increase the capacity of District 2 to engage in systemic improvement. The paper suggests that it is possible, by focusing on the fundamentals of teaching and learning in a sustained way over time,

to realize significant gains in student performance. It contains the following five sections: (1) a description of Community School District 2 and its strategy for system-wide instructional improvement; (2) a discussion of the tensions between the assumptions of systemic improvement strategies and the specific conditions of the "real world of schools" as seen in District 2; (3) an analysis of the basic tenets of District 2's emerging theory of action regarding systemic instructional improvement and school variability contrasted with the district's "theory in use"; (4) an analysis of District 2's principals' perspectives on the systemic instructional improvement strategy, which reports the findings of interviews with principals in the first year of the High Performance Learning Communities Project study; and (5) questions, principles, and ideas for how school systems can handle the issue of school variability in the context of systemic improvement. Contains 2 tables of data. (NKA)

Identifiers—*Balanced Literacy, Guided Reading Procedure, *New York City Board of Education, Teaching Research

By building upon earlier studies of District 2 (Elmore and Burney, 1996, 1997) which have focused on the ways in which members of the district leadership community interact and learn from one another, this paper investigates the ways in which teachers think about, implement, and learn new instructional practices in District 2 classrooms. The paper begins with a description of the approach to literacy instruction that has been developed by district leadership, the Balanced Literacy Program, and the manner in which district leaders communicate expectations and provide support to teachers as they attempt to implement the program. It then examines how the program is actually being enacted in sample district classrooms, including the ways in which teachers appear to be interpreting what is expected of them by the district. The paper next explores the reasons behind variations in how teachers implement literacy, including the impact of school cultures and teacher comprehension of the Balanced Literacy program. It concludes with a discussion of the ways in which a more explicit articulation of teaching and teacher learning issues could be developed to complement the district's existing articulation of their systemic strategy of educational reform. Includes 14 notes, 2 figures, and a table of data. An appendix explains research methodology. (NKA)

Descriptors—*Educational Change, *Literacy, *Middle Schools, Models, Professional Development, Program Design, *Reading Instruction, *Teacher Attitudes, Teacher Improvement, Theory Practice Relationship, *Writing Instruction

This paper suggests that the idea of "taking stock" of the current program—reflecting on what educators believe to be best practice—and then "charting a course" of action to better align practice with vision is a deliberate way for teachers to build capacity to enact reform. It begins by providing a brief overview of the changing direction of middle years literacy programs; an overview that sets the context for a survey that asked teachers to first determine the perceived importance of what are often viewed as key features of a quality literacy program, and then to determine how well their current program and practices were aligned. The findings from this teacher survey, supported by similar surveys of teachers' perceived needs for support, form the basis for the development of a model to help schools and districts assess the array of educational changes facing teachers, and to strategically plan various types of support for assisting teachers to successfully change curriculum and instructional practice. Contains 16 references, the survey instrument, and a figure illustrating aligning innovations and teacher support. (RS)

Descriptors—Grade 4, Intermediate Grades, *Reading Achievement, *Reading Comprehension, State Surveys, *Writing Achievement

Identifiers—*Colorado Student Assessment Program

This first annual report describes student performance in reading and writing from the spring 1997 administration of the Colorado Student Assessment Program (CSAP). In this first administration of CSAP, all fourth grade students in Colorado were assessed. The report provides policymakers, educators, parents, and the community with a general accounting and a concise overview of the performance of Colorado's fourth grade students relative to the State Model Content Standards Reading and Writing. The first part of the report summarizes student performance in Reading; and part 2 summarizes student performance in Writing. Results on student performance are reported by gender, race and ethnicity, disabling condition, test accommodation, and size of district. Contains numerous tables and figures of data; appendixes contain proficiency level descriptors for grade 4 Reading; a "mock-up" student report with proficiency level descriptors, grade 4 Reading; proficiency level descriptors for grade 4 Writing; and a "mock-up" student report with proficiency level descriptors, grade 4 Writing. This paper presents model reading and writing standards that express what each student in Colorado should know and be able to do in order to become fluent readers, writers and speakers; be able to communicate effectively; recognize the power of language; and be at ease communicating in an increasingly technological world. The six stan-

dards in the paper are: (1) students read and understand a variety of materials; (2) students write and speak for a variety of purposes and audiences; (3) students write and speak using conventional grammar, usage, sentence structure, punctuation, capitalization, and spelling; (4) students apply thinking skills to their reading, writing, speaking, listening, and viewing; (5) students read to locate, select, and make use of relevant information from a variety of media, references, and technological sources; and (6) students read and recognize literature as a record of human experience. For each of the six standards, the paper presents a brief description, a rationale, and specifics for grades K-4, 5-8, and 9-12. Contains 22 references. (RS)

Descriptors—*Beginning Reading, Children's Literature, Content Analysis, Phoneme Grapheme Correspondence, Primary Education, *Reading Material Selection, Reading Research, *Text Structure

A study examined the opportunities provided by several types of text for beginning readers to learn about three aspects of written English: (1) consistent, common letter-sound patterns; (2) the most frequent words; and (3) the contexts of sentences

and texts. Results indicate that texts based on high-frequency words give beginning readers ample opportunity to learn highly frequent words but may impede use of letter-sound knowledge because of the irregular patterns of many of these words. While phonetically regular texts compensate for this problem, occasions for developing fluency with high-frequency words may be few. Texts chosen for literary merit or predictable sentence and text patterns compensate for these problems by providing natural language, a close picture-text match, and predictable text structure, but the variety of different high-frequency and phonetically regular words in literature and little books make these texts demanding for beginning readers. Results also indicated that beginning readers require texts that allow them to become proficient with all three aspects of written English. Findings suggest that such experiences can be provided in two ways: all three of the "single-criterion" texts can be used in first-grade programs, or multiple-criteria texts modeled after some of Dr. Seuss's books can be developed. Contains 53 references and 2 tables and a figure of data. (RS)

Descriptors—Academic Standards, Content Analysis, *Language Arts, Primary Education, Reading Skills, *State Standards

To begin the task of evaluating the impact of state standards on American students, a study compared the structure and information of state language arts standards. The analysis focused on the 14 state documents that provided benchmarks or objectives by grade level for grades K-3. The other 28 states either provided a single set of standards for K-12 or separate sets of standards for different grade clusters (e.g., K-3, 4-6, etc.). The analysis of the state standards documents led to several recommendations: (1) state standards should provide more information for grades K-3, due to the significant differences between and among these grade levels, as compared to the upper grades; (2) the organization of state standards and benchmark documents should conceptualize reading in a manner that is simple enough to support manageable systems of curriculum, instruction, assessment, and reporting, but not so simple that important areas of emphasis are overlooked; (3) state standards should include a logical progression of knowledge and skills from kindergarten through grade 3, and again from grade 3 to grade 12; (4) the content of early reading/language arts standards and benchmarks should derive from information based on current research conducted from a variety of perspectives, including research on reading acquisition among linguistically and culturally diverse children; and (5) state standards should invite conversation about what students should be able to do. Evaluations of state standards need to be based on defensible criteria and should reflect current research. The criteria used for this analysis should be useful to districts in evaluating their states' standards for early reading/language arts. Contains 67 references and 7 tables of data. (RS)

Descriptors—Definitions, *Learning Readiness, Primary Education, *Reading Achievement, *Reading Readiness, *School Readiness

In response to the first of the National Education Goals (1991), which reads, "all children in America will start school ready to learn," this paper addresses four interpretations of the term "readiness" and the methods that have been devised to assess children's learning at the outset of formal schooling. The idealist or nativist view claims that children's proficiency in school is a function of the child's maturation. The empiricist or environmental view sees readiness in terms of proficiency with a specific set of skills. The social constructivist perspective describes readiness as a function of the meanings and values assigned by an individual school community. Each of these views presents dilemmas for young children's learning and teachers' instruction. The paper identifies a fourth view—the interactionist—as a means for resolving these dilemmas. This perspective attends both to what children know and to the capacity of schools to adapt experiences for children who demonstrate different strengths and needs. The instructional goals that emerge are grounded in a comprehensive assessment of the child's skills, knowledge, behaviors, and accomplishments. Contains 84 references and 3 tables and a figure of data. (RS)

Descriptors—*Autobiographies, Cultural Differences, *Cultural Influences, Elementary Secondary Education, Ethnicity, Faculty Development, Higher Education, *Literacy, *Teacher Attitudes, *Teacher Education

A study addressed two challenges in American teacher education: (1) the differences in background between a largely Euro-American teaching force and the diverse pupils it serves; and (2) the difficulty of teaching about literacy and culture in responsive ways. Working with a group of teachers, the study used ethnic autobiographies, written by authors to illustrate cultures other than late 20th century white America, combined with a context for discussion around these books new to many teachers—"Literary Circles." Results indicated that, for the teachers who participated in Literary Circles, the ethnic literature and autobiographies became the means for conducting autobiographical studies of their own lives and, in turn, led to changes in teachers' beliefs about literacy, schooling, and cultural identity. Findings suggest that the combined activities of reading, writing, and discussion have the potential to simultaneously foster personal and professional development. Contains 20 references and a 24-item list of works studied in the Literary Circles. (RS)

Identifiers—Self Selection (Reading)

Based on research indicating successful readers have several common characteristics (student choice and availability of reading materials, time for reading, and time to talk about their reading), a study explored research findings about each characteristic and surveyed middle grade teachers' reading practices in the classroom. Seventh-grade students (n=124) in a small southeastern city and seven of their teachers were surveyed concerning student reading. Results indicated: (1) excluding textbook assignments, the majority of boys surveyed do not read and do not enjoy reading; (2) teachers and parents encourage students to read, but fewer than half are engaged in reading to boys; (3) teachers do not provide a time for personal sustained silent reading during the school day; (4) middle grade boys do not read unless required by their teachers; and (5) assigned reading materials are not the reading materials preferred by middle grade boys. By actively involving the child in hearing, saying, seeing, and writing the letters and sounds, this workbook develops a child's skill in recognizing the alphabet and the initial sounds in words through a series of 78 lessons. It is appropriate for parents to use with their kindergarten and beginning first grade children. By using this learning technique, the workbook quickly focuses the child's attention and reinforces basic skills. This approach also encourages the child to create and to write from the very first lesson. After a preface and advice on getting started, sections of the workbook focus on printing letters of the alphabet, consonant letters and sounds, and the short vowels. (RS)

Descriptors—Content Analysis, Higher Education, *Hypermedia, *Instructional Effectiveness, *Preservice Teachers, *Reading Instruction, Reading Research, Research Needs, *Student Attitudes, *Teacher Education

A study asked how the use of the Reading Classroom Explorer (RCE)—a hypermedia learning environment that features video clips of successful teachers teaching reading to a diverse array of students—influences beginning teachers' thinking about reading issues. The context of the study was a reading education course which included use of RCE. Various kinds of information were gathered on 14 participants (all post-BA students), including course papers, interviews, surveys, and videotaped RCE work sessions. The statements in course papers were analyzed to identify claims, questions, interpretations, and summaries in relation to RCE content. Participants were clustered into three groups, reflecting the degree to which they used RCE in their course papers: investors (high use of RCE, even when not required in an assignment); compliers (use of RCE when required to do so for an assignment); and resisters (low use of RCE). Results indicated that involvement in an interactive learning environment such as RCE increases beginning teachers' awareness of multiple perspectives and approaches to teaching reading; but that the long-term impact on these teachers' classroom practice has yet to be established. Further studies should address this question and others—most specifically, the effects of opportunities such as RCE during the first few years of teaching. (Contains 11 references and 6 tables of data; appendices contain paper assignments and the classification scheme.) (RS)

Descriptors—Case Studies, *Emergent Literacy, Evaluation Methods, Language Acquisition, *Language Impairments, Oral Language, Preschool Education, *Reading Interests, Reading Research, Student Evaluation

This paper asks how findings from emergent literacy (the study of the reading and writing behaviors that develop into conventional literacy) can

combine with findings from oral language development to expand the services provided to preschoolers with language impairments. After giving an overview of major concepts and research of emergent literacy, it draws on research that demonstrates two primary contributions of emergent literacy for language-remediation services for preschoolers: (1) storybook reading with adults that supports the oral language learning of normally developing children also benefits language-impaired children; and (2) assessing language-impaired preschoolers using an emergent reading task in addition to an oral narrative task can give useful data. The paper presents case studies of two language-impaired children who show differing levels of interest in books. Results indicated that enjoyment of storybook reading was linked to consistency in parental expectations and use of language, regardless of the context. It notes that these findings have implications for both language-remediation specialists' practice and for the suggestions they give parents. By incorporating emergent literacy perspectives and methods into language-remediation services for preschoolers, the paper concludes that children's facility with language can be enhanced. Contains 90 references, and 4 tables a figure of data. (RS)

Descriptors—*Literary Genres, *Middle School Students, Middle Schools, *Reading Attitudes, *Reading Interests, *Sex Differences, Sex Stereotypes, *Student Attitudes

A survey was conducted to examine the reading interests of middle school students. Subjects were sixth, seventh, and eighth grade students in a metropolitan, public middle school located in a southeastern state. It was hypothesized that the data would reveal statistically significant categories of reading interest, and would reveal significant differences between categorical interests by gender. A one-dimensional chi square analysis was used to analyze the reading interests for the sample as a whole. A two-dimensional chi square analysis was used to compare the reading interests by gender. The students clearly indicated a strong preference for the categories of Humor and Horror. The students also reported an interest in Mystery, Historical Fiction, Adventure, Science Fiction, and the non-fiction category of Animals. The results of this study showed differences in interest by gender, which are congruent with many of society's stereotypes. The females reported a stronger interest in Romance, Friendship, Animal Stories, Adventure, and Historical Fiction, while the males reported stronger preferences for the categories of Sports and Science. In addition, the results indicated that the male respondents had a stronger preference for non-fiction than did the female respondents. (Author/RS)

Descriptors—Action Research, Grade 1, High Risk Students, *Integrated Curriculum, Music, Physical Education, Primary Education, Reading Attitudes, Reading Improvement, *Reading Skills, Research Needs, *Student Attitudes, Visual Arts, Writing Attitudes, *Writing Improvement, *Writing Skills

A study examined whether the integration of literacy with music, visual arts, and physical education significantly improved the reading and writing skills of struggling first grade students. Data

included running records, teacher observation, writing samples from portfolios, and student surveys. Results indicated: (1) student attitudes toward reading and writing improved over the course of the study; (2) the reading ability of every student improved, but the overall improvement was less than that of the comparison group; (3) each student demonstrated improvement in writing skills; and (4) students improved in rhythmic, visual, and kinesthetic skills correlated with literacy as their reading and writing improved. Although results were somewhat inconclusive concerning whether or not special areas instruction actually impacted student learning, all of the students did improve their reading and writing over the study period. Thus, the combination of classroom, Reading Recovery, special areas, and other instruction did have a positive effect. In light of this, and since vast amounts of research supports literacy instruction in a variety of settings, this instruction should be continued in all areas. Furthermore, a more controlled type of research would most likely be required to obtain more accurate and conclusive data concerning special areas literacy instruction. (Contains 14 references.) Descriptors—Adult Education, *Literacy, *Military Personnel, *Military Training, *Readability, *Reading Achievement, Reading Research, Veterans, Writing Achievement, Writing Research

Literacy in the military has seen drastic changes since the World War II era and even the Vietnam era. Qualification tests are stricter and literacy programs are more available than before. Literacy in the military is crucial in a technological world. In today's armed forces, many soldiers concentrate on the technical aspect of combat through hands-on maintenance and set aside the reading involved in order to understand the complicated task of combat. A study examined the testing process of getting into the military; programs for soldiers who want to improve their literacy; the readability of documents soldiers read; and the literacy experiences of two veterans. Through extensive mathematics and reading comprehension testing, unqualified recruits are weeded out of those soldiers who make the grade in literacy and mathematics. Some soldiers pass the test, yet cannot perform reading tasks at a high school level. Fortunately, there are programs in all branches that assist in bringing all soldiers up to par in regards to reading and writing as well as other areas. A soldier's reading and writing level dictate what kind of occupations are available in the military. The bottom line level is if soldiers cannot read beyond a high school level, their chances for success in the military are small. (Contains 7 references and 2 figures of data.) (Author/RS)

Some Students Don't Want To Read.

Pub Date—1999-04-27

Note—10p.

Pub Type—Opinion Papers (120)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Academic Failure, Elementary Secondary Education, *Learning Disabilities, *Literacy, *Reading Difficulties, Student Experience

A high school teacher recounts his own literacy journey from a young child with an auditory perception problem, to a school-hating student, to a semiliterate Marine in Viet Nam, to a teacher of persons with disabilities. He notes that his literacy journey during the early years was characterized by immaturity, avoidance, and self doubt. He grew up in a family where reading and writing were not valued enough to be modeled and actively promoted. He did poorly in all school subjects and did not get

along with other students. In the Marines he learned that he had a high IQ, but even with that knowledge, he did little to raise his literacy much above a functional level. With maturity, the development of self-confidence, help from others, and some luck, he was able to use those minimal literacy skills to transform himself from an illiterate person with learning disabilities into a literate teacher of persons with learning disabilities. Descriptors—*Beginning Reading, *Early Intervention, Grade 1, Low Income, Poverty Areas, Primary Education, Reading Difficulties, *Tutorial Programs, *Tutoring, *Tutors, Volunteers
Identifiers—University of Virginia

Book Buddies is a community volunteer tutorial that began in Charlottesville, Virginia in the early 1990s as a cooperative effort between the University of Virginia, the Charlottesville City Schools and the Charlottesville community. A replication of Book Buddies was designed in fall of 1997 for two elementary schools in Millville, Virginia. A study investigated replication of Book Buddies in other cities and school districts. Two different schools were chosen to implement the program and a third school was chosen as a control group that would not in any way participate in the tutorial program. Results showed that Millville students achieved higher mean scores than Charlottesville students in 1992. Book Buddies tutors in Millville received more intensive training, and they also benefited from seven years of fine-tuning of the tutoring format. Results from the three sites (two Millville elementary schools and one control group) suggest that this is indeed a replicable model of an affordable, early intervention program and that significant results can be obtained in high-poverty settings. Identifiers—Michigan Educational Assessment Program

As part of the test development process, this technical report is intended to present technical information from the tryout and the pilot stages of the Michigan High School Proficiency Test (HSPT) in Communication Arts: Reading. There are four major parts to this report. Part 1, Evolution of the HSPT in Communication Arts: Reading, introduces the purpose, the legislation, and the committees involved in test development. Development of the reading assessment framework and the structure of the framework are briefly described in this part. Part 2 provides an overview of the exercise development of the test. Part 3 summarizes the process used in sampling, the tryout design, the rating process for extended-response questions, reader reliability, test statistics and analyses, and other technical issues for the HSPT in Communication Arts: Reading tryout and pilot administrations. Summary results from student and teacher surveys conducted during the tryout stage are included in Part 4. Appendixes contain lists of committee members; checklists; scoring guides; expert panel recommendations; try-

out and pilot statistics; survey instruments; and survey results. Contains 18 references. (RS)

The Writing Teacher's Second Self.

Pub Date—1999-00-00

Note—15p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Higher Education, Rhetorical Criticism, *Teacher Role, *Teacher Student Relationship, *Writing Instruction, Writing Research, *Writing Teachers

Identifiers—*Implied Authors, Indiana Univ Purdue Univ at Fort Wayne

A writing teacher wanted to know how students perceive the second selves (alter-egos or implied authors) that writing teachers infer in their written comments on student writing, whether students saw room for negotiating the role this second self implied for themselves, and whether teachers can exercise control over some of the choices they make in written comments on student papers. First, several rhetorical features of teachers' comments on student manuscripts were defined. These features are point of view, mode of address, comments which deal with form or content, are global or specific, and positive or negative. To determine the kinds of second selves formal written comments on student papers create, 16 intermediate composition students at Indiana University Fort Wayne were asked to write essays in the first person. The essays were divided up and sent to four experienced university writing teachers who were to respond completely in their usual manner. The essays were returned to students for revision, and students were interviewed about the teacher comments. Most students associated comments in the second/third person points of view with a teacher-persona. Students felt that they should adopt comments in the second/third person because they sensed "an unbiased critique." Nearly all students associated comments concerning form with a teacher-persona. Comments considered positive or negative, positive turning negative, or negative turning positive were not clearly associated with either persona. (Contains 6 tables of data, a figure, and 6 references.) (NKA)

The Image of Higher Education in American Indian Popular Literature.

Pub Date—1999-03-00

Note—13p.; Paper presented at the Annual Joint Meeting of the Popular Culture and American Culture Association (San Diego, CA, March 31-April 3, 1999).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—American Indian Education, *American Indian Literature, *College Environment, Cultural Isolation, *Higher Education, *Novels, *Popular Culture, Student Needs

Identifiers—*College Image, Native Americans, Theme (Literary)

In their attempts to lead a dual-life experience, characters in popular literature written by and/or about Native American Indians occasionally enroll in institutions of higher education; like many of their real-life counterparts very few of these student characters find the experience to be a positive undertaking. This narrative pattern reflects a "tragic reality" in American higher education today. The paper deals with four novels which target specific problems encountered by Native American students in college, i.e.: "Wolfsong" (Louis Owen); "Turtle

Belly" (Joel Monture); "First Eagle" (Tony Hillerman); and "Agoak" (Yves Theriault). Parallels can be drawn between reality and the negative image of higher education in American Indian popular literature, since the primary reasons for higher education's failure with Native Americans are outlined in the novels discussed: social maladjustment, disinterested faculty, irrelevant curriculum, lack of a support network, alienation from personal heritage, racism, etc. The paper suggests some ways to ameliorate the situation, such as establishing residence halls where a support community can be formed, hiring Native American counselors to facilitate positive peer communication, and organizing tutoring programs. Contains 6 references. (NKA)

Teaching the Works of Nikki Giovanni: "The Same ol' Danger but a Brand New Pleasure."

Pub Date—1999-03-00

Note—14p.; Paper presented at the Annual Spring Conference of the National Council of Teachers of English (Cincinnati, OH, March 3-6, 1999).

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Black Literature, Class Activities, *Cultural Context, Females, High Schools, Oral History, Personal Narratives, *Poetry, *Poets, Student Projects, *Writing Assignments

Identifiers—Black Militancy, *Black Poetry, Black Writers, *Giovanni (Nikki)

This paper intersperses events and experiences from the poet Nikki Giovanni's life—she emerged from the Black Rights Movement in the late 1960s—with student assignments in prereading, reading, discussion, and writing about Giovanni's poetry, specifically the poem "Nikki-Rosa." In addition, the paper describes an oral history project and a formal writing assignment which use the poem as a starting point. The paper also discusses Giovanni's essay "On Being Asked What It's Like to Be Black," and another of her poems, "Knoxville, Tennessee," which was about her beloved home town. An assignment suggested in the paper asks students to write a poem of their own about something, someplace, or someone they like best; several student poems illustrate the assignment. The final Nikki Giovanni poem discussed in the paper is "Revolutionary Dreams," a poem in which the poet explores the development of her thinking in ways that help students see how changing your mind need not invalidate the authenticity of what has been said and written earlier. Some Basic Writers, Some Modes of Representation, and Some Challenges in Learning To Write Scientific Discourse.

Pub Date—1999-00-00

Note—30p.

Pub Type—Reports - Research (143)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Basic Writing, Discourse Analysis, *Discourse Modes, *Grammar, Higher Education

Identifiers—*Academic Discourse, *Basic Writers, Science Writing, Speaking Writing Relationship, Writing Style

This paper describes some aspects of essays produced by students who as writers in the United States would commonly be called "basic writers." The paper focuses primarily on the grammatical subjects in these essays and offers a view of how closely grammatical structure typical in speech correspond to those typical in writing. It reports on the results of an in-class essay writing assignment given to basic writers in which the grammatical subject of the main clause was examined—in general, the subjects were short, and the writers did not use many complex syntactic structures in their subjects. The paper speculates about the challenges that such basic writers will probably face as they try to write academic discourse, especially discourse like that

produced by writers in the sciences who work with a great deal of information that has been generated and stored up over time. Contains a table of data and 34 references. (NKA)

Anne Fisher and 18th-Century Literacy Training.

Pub Date—1997-03-00

Note—9p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (48th, Phoenix, AZ, March 12-15, 1997).

Pub Type—Historical Materials (060) — Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Audience Awareness, *Authors, Educational History, Elementary Secondary Education, *Females, *Grammar, *Literacy, *Rhetoric, Textbooks

Identifiers—Eighteenth Century, *Fisher (Anne), Great Britain

Anne Fisher, a pioneer in British education, was one of the few females in the 18th century to publish a significant grammatical work, one that was used widely in classrooms. This paper highlights Anne Fisher's historic achievement and argues from the discipline of the history of rhetoric that the two verbal disciplines of rhetoric and grammar are nowhere near as distinct as some scholars have assumed. Noting that Fisher's grammar was published twice under a male pseudonym, the paper relates that she established her own school and focused on pedagogical and linguistic issues, not feminist questions. The paper looks at how Anne Fisher's success is related to how she used literacy training to conform to audience, teach style through syntax, and instruct in letter writing. Contains 10 references. The Biology Classroom: A Natural Place for Narrative.

Pub Date—1998-04-00

Note—11p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (49th, Chicago, IL, April 1-4, 1998).

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Biology, Class Activities, *Content Area Writing, *Creative Writing, Higher Education, *Narration, *Science Instruction, Student Motivation

Identifiers—Content Area Teaching, Learning Cycle Teaching Method, Science Writing, *Story Writing, Writing Contexts

Noting that traditional approaches to biology education do not take full advantage of the narrative nature of biology when introducing students to its subject matter, this paper argues that students in biology courses could benefit from being asked to write narratives and that this activity could fit into either a fairly traditional curriculum or a more innovative, process-oriented approach. The paper suggests encouraging students to first write a creative narrative (for example, on photosynthesis) and discusses how creative narratives could be used in either a content-driven biology classroom or a classroom dominated by the learning-cycle approach. Contains 11 references. (NKA)

Reader's Theatre: A "Theatrical Impulse" in the Classroom Performance of Literature.

Pub Date—1998-11-00

Note—10p.; Paper presented at the Annual Meeting of the National Communication Association (84th, New York, NY, November 21-24,

1998).

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Characterization, Class Activities, Higher Education, Introductory Courses, *Literature Appreciation, *Oral Interpretation, *Readers Theater

Identifiers—Drama in Education, *Student Performances

Successful approaches to a more theatrical classroom performance of literature initially depend on a student performer's critical ability to analyze literature and the creative ability to ultimately give voice and body to a literary character. An imaginative Reader's Theater classroom exercises blueprint is also an essential ingredient in promoting a student performer's ability to read literature with a critical eye and to understand the potential role that a theatrical impulse might play in capturing the subtle nuance of a literary character's intention or motivation. The active extent to which supplementary exercises may be used to promote a more theatrical impulse in classroom performance is the true measure of cultivating student skills in role-playing literary characters. (Contains 10 references. Three different exercises—"X Files"; "The Body Shop"; and "You Are There" are attached; exercises contain sections on objective, approach, and extension.) (NKA)

Identifiers—Florida, New York

The Center on English Learning and Achievement (CELA) has been studying the characteristics of successful English programs in middle and high schools. This report discusses the findings of the first two years of their 5-year Excellence in English study and focuses on the educational practices that support student literacy as well as the characteristics of teachers' professional lives that accompany student achievement. The report addresses the issue of teachers' professional environments. The study considered in the report examines professional contexts to understand how they relate to what happens in the classroom. The report discusses features of the professional contexts that permeate the diverse sites that CELA has been studying; data were collected at eight schools in Florida and New York. The report notes that a series of site-specific case studies are also being developed to provide in-depth views of particular teachers' professional experiences and how these in turn are related to curriculum, instruction, and assessment in their classrooms. Findings reported suggest common characteristics in teachers' lives schools and districts they teach in nurtured a climate that (1) orchestrated coordinated efforts to improve student achievement; (2) fostered teacher participation in a variety of professional communities; (3) created structured improvement activities in ways that offered teachers a strong sense of agency; (4) valued commitment to the teaching profession; (5) engendered a caring attitude that extended to colleagues and students; and (6) fostered a deep respect for lifelong learning. Descriptors—Discussion Groups, *Females, Informal Education, *Literature Appreciation, *Organizations (Groups), *Public Libraries, *Recreational Reading

Identifiers—Library History, Michigan (Kalamazoo), *Reading Groups, *Study Groups, Womens Clubs

This paper examines the Kalamazoo Ladies' Library Association during the 25-year period in the last half of the 19th century when the association formed a Reading Circle, held Social Meetings, and finally established a Ladies' Library Club. The Reading Circle met weekly and bi-weekly between 1861-1868; the Social Meetings took place once a month between 1856 and 1861 and again in 1867, while the Ladies' Library Club began in 1873 and met until the 1890s. Each group discussed and studied various topics and literary works and had its own rules and procedures. The Reading Club, for example, allowed male membership and participation. The paper focuses on the structure and topics of the Reading Circle and the Social Meetings and the differences in approach. It examines not only what was studied but also the way gender influenced differences in the reception of and interpretation of literature by men and women in the Reading Circle. It also explores topics discussed in the Social Meeting where some participants felt more freedom to state opinions and extend the discussion of topics over several weeks. Changes in the focus for the study groups between the pre-Civil-War era and the post-Civil-War era are considered in the paper as well. Contains 32 notes and 4 references. (NKA)

Staff Development in Writing Instruction and the Reading/Language Arts Framework for California Public Schools: A Review of the Literature.

Pub Date—1999-04-05

Note—36p.; Research Paper, California State University at Long Beach.

Pub Type—Information Analyses (070) — Reports — Descriptive (141)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Elementary Secondary Education, Instructional Effectiveness, *Language Arts, Literature Reviews, *Public Schools, *Reading Instruction, Staff Development, Whole Language Approach, *Writing Instruction

Identifiers—*California

With the introduction of the "whole language" approach to literacy and an emphasis on "across the curriculum" learning, the effective instruction of writing has taken on an added importance during the past two decades in California. Recent public demands for a "back to basics" school curriculum where the mastering of individual skills is valued has prompted the issuance of rigorous statewide standards and the rewriting of the California Reading/Language Arts Framework. In response to these events, this paper answers the following questions: (1) What are the current practices to inservice teachers of upper elementary students in the instruction of writing?; and (2) Which staff development models for the instruction of writing are best in accord with the new Reading/Language Arts Framework? The paper presents sections on the following: relevant definitions; a history of the topic/major contributors and contributions; major issues and controversies; model practices and programs; synthesis and analysis; conclusions; and recommendations. Contains 21 references and a 9-item bibliography. (NKA)

Descriptors—Accountability, *Freshman Composition, *Grading, Higher Education, Instructional Innovation, *Performance Contracts, Portfolio Assessment, *Self Evaluation (Individuals), *Teacher Student Relationship

Identifiers—Learning Environment, *Student Centered Assessment, Student Cooperation

While scholars—Elbow (1997), Dolphin (1997)—have suggested contract grading, most contracts are initially created from the top down to promote the accountability required by administrators. Additionally, Radican (1997) describes issues of accountability in portfolio assessment. This paper describes the use of contracts along three major assumptions/outcomes: (1) contracts promote individual responsibilities within the framework of differing abilities; (2) contracts promote decentering the teacher as authority; and (3) contracts foster valuable self assessment, allowing for writing which seeks to please the primary audience—the writer. The paper focuses on the issue of the instructor's negotiation of first-year composition as a possible site of teaching and learning, yet also as a site of assessment (with the question of who judges the work or outcomes of a TA/adjunct's first-year composition classroom). It details the writing processes and assessment processes the students developed and implemented. Contains 8 references. (NKA)

Descriptors—*Classroom Communication, Classroom Techniques, Higher Education, *Peer Teaching, *Student Reaction, Teacher Student Relationship, *Writing Instruction

Identifiers—Alternative Assessment, *Dialogic Communication

One writing instructor and her colleagues use the concept of teachers modeling responses for students as a cornerstone of the "mutually responsible" classroom. They spend a week preparing their classes to "do" peer response in much the same way that Mary K. Healy describes in her essay "Using Student Writing Response Groups in the Classroom." As a first step, students do freewrites about their attitudes toward being critiqued positively and negatively, whether that criticism has come in their written work or in some other area of their lives. After talking about the concept of criticism in general, the class is encouraged to share criticism that they have received in the past on their writing, and they then discuss whether or not they felt these criticisms were constructive. After this, students respond to a sample student paper from a previous class. In comparing and contrasting their responses to the sample, they have the opportunity to view the sample paper with previous student comments. They then begin to engage in the response process with each other's work. When a student returns another student's first draft (with comments), the writer then prepares a second draft for the teacher alone, along with a "revision essay" discussing the changes made. Attached are examples of a first draft, second draft, revision essay, and student comments. Contains a 4-item bibliography. (NKA)

The Double-Bind of "Voice": Complicating the Reading of Minority Student Writing.

Pub Date—1999-03-25

Note—7p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (50th, Atlanta, GA, March 24-27, 1999).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Black Students, Ethnography, *Freshman Composition, Higher Education, Teacher Student Relationship

Identifiers—Academic Discourse, *Authenticity, University of Pittsburgh PA, *Voice (Rhetoric)

Some of the most prominent aspects of an ethnographic study of six black undergraduate women at the University of Pittsburgh have been the questions of authenticity and visibility that have emerged while the ethnographer watched the ways students' voices challenged their various composition and writing intensive course instructors' expectations. As she observed the students' written negotiations with their predominantly white audiences, and particularly with their white instructors, the ethnographer noticed that one of the white instructors did not seem to consider her black students' voices "authentic" unless they were articulating black racial issues. At this juncture of the research, the ethnographer would generally argue that, based on observed specifics, when instructors bring their conjectures about the features of a racially "authentic" voice to their readings of minority student writing, it can obstruct their view of the student as a whole student writer. When they ignore race, however, it can render them unable to see the difference that the students' race can make to their writing. Examples of the first pedagogic approach and of the second pedagogic approach help illustrate the issue. The upside of the two examples is that each of the two students' voices emerged in response to each of their instructors' pedagogical approaches in ways that turned their instructors' ideas about authenticity (the first case) and visibility (the second case) upside down. But perhaps a less obstructive middle ground exists. (NKA)

The Effects of Word Study on Students' Application of Spelling and Phonics in Their Independent Writing.

Pub Date—1999-04-22

Note—35p.

Pub Type—Reports — Research (143)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—English (Second Language), Grade 2, *Instructional Effectiveness, *Phonics, Primary Education, *Spelling, *Word Study Skills

A study examined the effect of word study on second-grade students' application of spelling and phonics in their independent writing. Subjects were 19 second graders from a school in a north-central Indiana region marked by a broad range of social and economic levels. Data included a spelling inventory, independent writing samples, and student surveys. Subjects were divided into four groups based on ability and met two or three times a week for 45 minutes at the end of the school day. Activities for student discovery and application included word hunts, word sorts, games, making words, and reading books and poems at the appropriate developmental level. Results indicated that all students progressed in their knowledge of words; the greatest gains were made by the English-as-a-second-language students; and students of all academic levels found word study to be meaningful and enjoyable. Findings suggest that word study was a valuable tool used as part of a larger literacy framework in this second-grade classroom. Appendixes contain evaluation measures; a spelling inventory; a list of characteristics of the developmental stages of learning to spell; 12 charts of data; and student dictation sentences. Contains 8 references. (RS)

Descriptors—*Audience Awareness, *Childrens Writing, Grade 1, Instructional Effectiveness, *Journal Writing, Primary Education, *Writing Instruction, Writing Processes, Writing Research

Identifiers—Rhetorical Strategies, *Writing Contexts

Family message journals, notebooks in which first-graders write a message to their families and receive a family reply each day, provide a fertile context for instruction and practice in writing for real-world functions and authentic audiences. Observation of classroom instruction, qualitative analysis of case-study children's and families' messages, and interviews with children and family members revealed how children developed a functional perspective on writing and audience awareness. Evidence of audience awareness included growth in children's recognition and use of rhetorical and conventional strategies and constraints, as demonstrated in their writing processes and products. Both teachers and family members played important instructional roles. Results suggest that real functions and audiences are central to student ownership of writing and that explicit instruction and clearly delineated assignments may enhance young students' power as writers, rather than limiting their sense of control and engagement. It is viable to argue that literacy can be construed as a set of culturally-based discursive practices rather than as merely a set of cognitive skills. This idea has special relevance for students with learning disabilities, who often struggle with more traditional, individually-based curricular approaches. This study explored the ways in which an experienced second-grade teacher engaged students formally assessed as "learning disabled" in the collaborative editing of a written text. Analyses suggest that one group of teacher utterances served to orchestrate students' participation in the repair of the text while a second group of utterances seemed to guide the level at which students were considering the text. Regarding the latter, the teacher's comments seemed intended to push students toward either one of two ways of thinking. Some comments encouraged them to clarify the conceptual meaning of the text (e.g., "What does that mean?"), while others asked them to consider the grammatical/syntactic structure of the text itself (e.g., "So, how

should we say it?"). As a group, collaborative editing appears to have allowed these students to perform at levels well beyond those at which they typically perform individually. These data demonstrate one way that teachers can socialize students, especially those who are academically challenged, into the collaborative creation and revision of texts. Contains 39 references and 2 tables and 5 figures of data; an appendix contains the full transcript of a round of collaborative editing. (RS)

Behind the Black Veil: Fear, the Internet, and Teaching Composition.

Pub Date—1997-00-00

Note—12p.

Pub Type—Reports - Descriptive (141)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Audience Awareness, Course Descriptions, Graduate Study, Higher Education, *Internet, Student Attitudes, *Student Reaction, *Writing Attitudes, *Writing Instruction

Two writing teachers designed a graduate-level seminar where other writing teachers could share writing with the global electronic community. They expected these seminar students to embrace this new technology because the benefits of Internet writing seemed to provide a practical way to promote audience, voice, and collaboration, three of the basic tenets of the process movement in writing instruction. What the instructors found instead was resistance, fear, and uncertainty. The graduate seminar was designed around the basic idea that students would write a series of papers for publication on the Internet. What actually happened was that the students (seasoned writing instructors who had little experience with computer classrooms and even less experience with the Internet) distrusted the notion of writing for an unknown audience and resisted sharing their own personal work with the world. There was no establishment of an on-line community and the instructors' desire for a global discourse never materialized. The instructors worried initially that the students were being constrained by fear and distrust of the Internet: they now understand that these are ethical considerations that teachers must address in seeking to make

Internet technologies a part of the classroom. Contains 10 references. (RS)

Mandates about the kind and amount of literacy instruction in classrooms and levels of reading required for successful promotion from grade to grade are currently dominating state and federal legislation. This paper gathers scholarship from three disparate sources to produce the first integrated review of policy-related research on literacy education: (1) policy analyses that examine policies about literacy in the framework of systemic reform; (2) measurement and evaluation studies, conducted by psychometricians, that examine the assessments mandated by policies; and (3) studies by literacy researchers that attend to policies and literacy-specific content. Each of these literatures has a unique set of questions, frameworks, methodologies, and audiences. Together, they provide a comprehensive perspective on policies and literacy education. The paper concludes that the best way to influence policy, instruction, and children's learning is for policy, measurement, and literacy researchers to collaborate in conducting and reporting research. Each group needs to learn more about the others' work in order to affect real change in literacy practice. Contains 121 references. (RS)

Integrated instruction may be everyone's ideal, but it is the reality in few classrooms. This review of existing literature examines research to determine why this ideal may be infrequently realized. The review concluded that the mismatch between ideal and practice may be at least partially explained by the ambiguity in definitions in the professional literature. Finding no theoretical framework on which to base the review, the first task of the reviewers was

to develop one. Next, the reviewers applied this framework to existing research on integrated instruction in elementary grades. They found few data-driven studies on integrated instruction of any sort, although essays advocating integrated language arts were many. Most projects interpreted integration as loose, thematic links. When studies considered interdisciplinary instruction, the boundaries between the subject areas were often rigid. Rarely would a literary stance or writing as a means for reflection be fostered across subject areas. While integrated approaches can serve to restructure school curriculum within and beyond the language arts, the paper concludes that a stronger theoretical and a research base is needed in establishing when and how to integrate the curriculum as well as for what purposes and for whom. Contains 108 references and a figure presenting a conceptual map of integration. (RS)

Providing a listing of an essential core of content to be taught and learned in each grade level, this paper presents content standards in four major areas of communication/language arts: reading, writing, listening/viewing, and speaking. The standards are organized by separate grade levels for grades K-9 (except grades 9-12) so readers can quickly review what communication/language arts learning is expected at a specific grade. After a preface and introduction, the paper presents the goals, rationales and indicators for reading, writing, listening/viewing, and speaking followed by the detailed listing of the content standards. Serving as a basis for an educational dialogue that needs to take place in every school district in South Dakota, this technical guide to the South Dakota Communication/Language Arts Standards includes the Goals, Indicators, Benchmarks, and Grade Level Standards for reading, writing, listening and viewing, and speaking. It is organized in grade level clusters according to benchmark levels: K-2, 3-5, 6-8, and 9-12. This format is provided as a framework for school districts to use as they study and implement the state standards, design local district and classroom assessments, and align curriculum materials, resources, and technology to the standards. Descriptors—English (Second Language), higher Education, *Literacy, *Literacy Education, Literature Appreciation, Recreational Reading, *Social Support Groups

Since her involvement (as a 16-year-old) helping women get to their English-as-a-Second-Language classes, a graduate student and writing consultant has puzzled over the question of how to facilitate literacy. People need literacy for economic betterment. Literacy becomes a way out of psychological distress and a way of making sense of the world. She found that English Literature and Anthropology are invaluable tools for making sense of the world, both internal and external to the self. Literacy is something both gained and used in order to know the world. Teaching English Literature provides a support system to others so that they might know the world and themselves better. (SC)

Writing in the Workplace and Freshman Writing Classes: An Imperative for Relevancy.

Pub Date—1999-06-00

Note—26p.

Pub Type—Reports - Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Freshman Composition, *Functional Literacy, Higher Education, *Instructional Effectiveness, Metacognition, *Workplace Literacy, *Writing Attitudes, Writing Research

A study examined the relevancy of freshman composition to writing in the workplace. Four professionals in middle management who had been out of college for a number of years were surveyed by e-mail about their writing in the workplace, college education, freshman writing classes, and importance of seven skills employers want employees to have. Results indicated that: (1) all the participants felt that effective workplace writing must be concise, clear, and effectively written; (2) all the participants had negative attitudes toward writing in the workplace; (3) the participants varied in their awareness of the steps used for their writing process; and (4) all participants hold negative attitudes toward their freshman writing classes. Findings suggest that the participants could not relate what they did in their freshman writing classes to writing they do in the workplace. Proposals for improving this situation include bringing in professionals to talk to students and help design assignments, examining with students the kinds of writing required in jobs that interest them, encouraging students to reflect on their writing to develop metacognitive awareness of their writing process, and analyzing the usefulness of typical assignments in meeting these goals. Contains 7 references and 2 tables of data; the questionnaire is attached. (SC)

Pub Type—Opinion Papers (120)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Higher Education, Teacher Influence, Teacher Student Relationship, *Writing (Composition), *Writing Attitudes, Writing Improvement, Writing Processes, *Writing Teachers

As a teacher it is important to write frequently and in many forms. A writing teacher finds things to write about in his teaching. The angle of intent is sometimes more important than the facts presented. The flow of writing is different than the flow of speaking. Speaking is more spontaneous where writing is more constructed. Writing can be a therapy and a recreation. A teacher who writes is always reflecting on his or her teaching. Writing helps oral communication, and oral communication provides experience for teachers to write about. Writing helps friendship; collegial relationships are much enriched if colleagues read and comment on each other's writing. Writing can be a weapon, but write to build bridges and not to tear them down. In negative writing, get the facts straight and do not exaggerate. The greatest beneficiary of the writerly teacher is the student. A writer has power because a writer is feared. A downside to the writerly teacher is time consumption. (SC)

As part of the test development process, this technical report is intended to present technical information from the tryout and pilot stages of the Michigan High School Proficiency Test (HSPT) in Communication Arts: Writing. There are four major parts to this report. Part I, Evolution of the HSPT in Communication Arts: Writing, introduces the purpose, the legislation, and the committees involved in the test development. Development of the writing assessment framework and the framework structures is briefly described in this part. Part 2 provides an overview of the exercise development of the test. Part 3 summarizes the process used in sampling, the tryout design, the rating process for constructed-response questions, reader reliability, test statistics and analyses, and other technical issues for the HSPT in Communication Arts: Writing tryout and pilot administrations. Summary results from student and teacher surveys conducted during the tryout stage are included in Part 4. Appendixes contain lists of committee members; expert panel recommendations; holistic scorepoint descriptions; tryout and pilot statistics; survey instruments; and survey results. (RS)

Identifiers—*Michigan High School Test

Designed to provide an experience as close as possible to the actual assessment, this paper presents the revised model of assessment in writing for the Michigan High School Test (HST). The revisions incorporated into the paper reflect the testing transition from the High School Proficiency Test to the HST. Session 1 looks at how well students can think critically and report and/or reflect on their own writing. Session 2 looks at how well they can write an extended piece of writing in response to a given topic. Sample student papers (for each session and at each ability level) and a scoring guide are attached. (RS)

Descriptors—*Communication (Thought Transfer), Educational Practices, *Educational Technology, *Educational Trends, *Futures (of Society), Higher Education, Intellectual Disciplines, Internet, Multimedia Instruction, *Virtual Reality

The use of virtual reality technology in the communication discipline is a challenge that educators in the field should investigate thoroughly and begin to embrace as they move into the 21st century. Classrooms with access to the Internet allow students to move outside the physical boundaries of

the classroom and suggest a significant change in how classrooms will be designed and used in the future. Three specific directions that classrooms and teaching might move as technology asserts itself more and more into education are: (1) a permutation of the current historical model of classrooms and teaching; (2) distance education; and (3) self-directed learning using virtual reality. Serious attention has been brought to using virtual reality as a teaching tool in formal educational settings only in the 1990s. Virtual reality is currently being used and explored in educational settings. The next 10 years should see continued activity and the creation of more alliances to design and develop virtual reality programs for use in education. The future of virtual reality in education might include Individual Virtual Environment Pods in which students interact physically and vocally with people and experiences based on specific pedagogic goals. Teachers in such a future would create electronic and computerized modules and act as consultants, assisting students on an individual basis. Contains 12 references. (RS)

Descriptors—Communication Research, *Folk Culture, Foreign Countries, Nonformal Education, *Nonverbal Communication, *Puppetry

Identifiers—Drums, Gongs, Masks, *Nigeria

Drum language, gong language, masquerades, and puppet theater, the traditional forms of communication found in Nigerian culture, reflect tensions that exist between oral and literate cultures. Drum language ranges from simple signals to elaborately coded messages and is learned through both formal and informal educational processes. Formal training for drum language is conducted at various levels. Since there is no direct correlation between the sounds created by the drum and specific letters of the alphabet, it is by definition a form of nonverbal communication. Gong language, as a form of drum language, is based upon tonal patterns that reproduce or replicate the human voice. Masquerades are carved images of humans, animals, or imagined creatures. The masks or carved images are worn by individuals adorned and decorated with colorful apparels. The nonverbal communication skills of masquerades are learned formally during rehearsals in the evenings. Another form of nonverbal communication used by the Masquerade is kinesics, the science and study of movement. Like masquerades, members of a puppetry troupe formally learn the art of puppetry. Puppetry is used for entertainment as well as to communicate news, information, and other serious messages. It relies on the same forms of nonverbal communication that the Masquerade does to communicate its messages. The roots of these traditional forms of nonverbal communication provide insights into how these forms of communication function and how they are interpreted both within and outside Nigerian culture. Role, *Library Skills, Reading Material Selection, *School Libraries, Student Rights

Identifiers—*Media Skills

This curriculum guide identifies minimum library and media skills students should master as well as expanded and new library skills that should be introduced and developed in all elementary classrooms. It begins with the mission of the Passaic School District, a message to classroom teachers and elementary school librarians, the mission of the library media program, a description of the philosophy of the school library media program, the goals of the school library media program, and general information for teachers. It then presents the skills, outcomes, and objectives for the readiness level, the first-through sixth-grade levels, and the advanced level. The curriculum guide then presents evaluation procedures and discusses technology in the library media center. Contains a 39-item glossary, 16 references, and a 93-item bibliography; appendixes contain the Library Bill of Rights, the School Library Bill of Rights, confidentiality information, evaluation and selection standards, a checklist for evaluating textbooks, and information on the New Jersey Library Network. Identifiers—*Baby Boom Echo, California, Colorado, Georgia, Maryland, Washington

The children of the baby boom generation, the baby boom echo, are overwhelming the capacity of U.S. schools. This report describes how increased enrollments are affecting schools in Maryland, Georgia, Colorado, Washington State, and California. Each state report draws on specific examples of enrollment growth that were taken from school districts. The report opens with an assessment of California's schools and how that state leads the nation in projected student growth. This discussion is followed by data on Colorado, which is expected to have marked increases in grades 9 to 12. Georgia, which has one of the fastest growing public school populations and which plans to spend about 4 billion dollars on school facilities by the year 2002, is described next. Growth in Maryland is highly suburban in nature and spread among bedroom communities, whereas Washington has dramatic increases throughout the state, setting the pace for school overcrowding in the Pacific Northwest. Numerous tables offer data on birth history and projections, enrollment numbers in schools, percent changes in enrollment throughout the nation, enrollment for grades K-12 in public and private schools, states with the largest increases, enrollment projections, data on high school graduates, the number and age of classroom teachers in public and private schools, and other information. EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Educational Change, Elementary Secondary Education, Instructional Innovation, *Teaching Methods

Identifiers—ERIC Digests, *Looping (Teachers)

This Digest explores the practice of looping, a pedagogical strategy in which a teacher advances from one grade level to the next along with his or her class. It describes how teachers and students in looping classes need not start from scratch every fall, learning new sets of names and personalities. By spending several years with a class, teachers can accumulate more in-depth knowledge of students' personalities, learning styles, strengths, and weaknesses. Studies have shown that students in looping classes scored substantially higher on standardized tests of reading and mathematics than did students in regular classes, even when both groups were taught by the same teacher. Looping is compatible with other practices and can facilitate assessment and whole-language approaches. It can be used from kindergarten through high school, but in the United States it is most common at the primary- and middle-school levels. Older students in looping may have a tendency to form cliques, and the extended time together may exacerbate some problems that could be endured for a single year. Even so, looping is easier to implement than many educational reforms and can succeed if extra care is devoted to teacher training and to a class's composition. Contains 10 references. (RJM)

Identifiers—*Minnesota

This yearbook provides a review of research concerning the differences in providing quality education to all children. A number of data sources at both the national and state levels were reviewed in compiling the indicators of educational inputs featured within this report. Four focal points are as follows: (1) the financial resources brought to bear on Minnesota's public-education system; (2) several characteristics of the state's current K-12 teaching force; (3) the changing demographics of the state's student population; and (4) the ratio of teachers and staff to students in Minnesota schools. The yearbook is divided into five chapters. Chapters 1 and 2 describe how tests have changed and provide an overview of learning. Educational inputs and processes, such as school finance and teacher characteristics, are covered in chapter 3, whereas chapter 4 focuses on participation and coursework, attendance, and graduation. The last chapter examines achievement and discusses comparative assessments. Findings include the fact that Minnesota's per-pupil funding has increased over time, but at a slower rate than for the nation as a whole. The average age of teachers has risen dramatically over the past 10 years, with 38 percent of the teachers falling into the 45-54-year-old age bracket. Minority students are characterized by higher rates of poverty, limited English proficiency, and disability. (RJM)

Case Studies for School Administrators: Managing Change in Education.

Report No.—ISBN-1-56676-689-3

Pub Date—1999-00-00

Note—297p.

Available from—Technomic Publishing Company, Inc., 851 New Holland Ave., Box 3535, Lancaster, PA 17604; Tel: 800-233-9936 (Toll Free); Tel: 717-291-5609; Fax: 717-295-4538; e-mail: marketing@techpub.com (\$34.95).

Pub Type—Books (010) — Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—*Administrative Problems, *Administrator Education, Administrator Guides, *Case Method (Teaching Technique), Change Strategies, Community Cooperation, Curriculum Development, *Curriculum Enrichment, Educational Change, Elementary Secondary Education, Higher Education, Instructional Innovation, Leadership, *Leadership Training

Identifiers—Michigan State University

This book examines case-based learning in educational leadership courses, discusses case-based learning as an educational tool, exemplifies methods of writing a case study, and contains 14 case-studies by teachers and administrators. "Stakeholders in a House of Cards," by Audrey Burgher, discusses integrating technology with innovation. "Reforming Vocational Educational Programs: Change Among a Veteran Staff," by Sally Lib, looks at curriculum updating. "South Side Middle School: A Magnet Program in an Urban Setting," by Margaret Flowers, reviews implementation of an urban magnet school. "An Example of Curriculum Change through Manipulation," by Megan Russo, explores English curriculum revision. "Red-Green School District Bond Proposal," by Jan C. Amsterg, chronicles a bond proposal and outcome. "Change from the Outside In," by Cary Trexler, focuses on infusion of outside resources. "Restructuring: An Exercise in Futility?," by Robert Van Camp, examines common planning time for teachers. "Block-Scheduling Failure at Montgomery High," by Maria Schleeter, examines attempts to reduce teachers' work load. "Murder at Seneca School," by Linda Amato, relates a shooting incident resulting from a teacher's layoff. "The New Principal: Innovation for Innovations Sake," by Karen Huff, describes the firing of a new principal. "The Parking Lot Case: A Case of Principal Succession," by Stephen Marsden, looks at the effects of changing parking lot assignments. "It's for Children: Successful Inclusion Programs," by Norma Schutzki, examines mainstreaming emotionally impaired students. "A Case of Change: Strategic Planning," by Darleen Tanner, looks at developing grassroots empowerment. "To Be or Not To Be a Middle School," by Ann Tebo, discusses middle-school restructuring. Case-studies also include commentaries by the case-author, a teacher-leader or administrator, and an educational scholar-researcher. Each study and set of commentaries is followed by a list of references. (RIB)

The Feasibility of 4X4 Block Scheduling in Secondary Schools: A Review of the Literature.

Pub Date—1998-11-00

Note—17p.; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (27th, New Orleans, LA, November 4-6, 1998).

Pub Type—Information Analyses (070) — Speeches/Meetings Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Block Scheduling, Educational Change, Educational Innovation, Elementary Secondary Education, Flexible Scheduling, Instructional Innovation, *Literature Reviews, *School Schedules, Time Factors (Learning)

Identifiers—4 X 4 Schedule

This paper reviews the literature on 4x4 block scheduling. Studies reveal that the advantages of such scheduling are simplicity, potential for greater

student achievement, and reduced disciplinary referrals. Discipline is enhanced through this type of schedule because it decreases the number of times that students are moving in the halls between disciplined environments. The schedule promotes student achievement by allowing students to attend additional classes during their 4-year high school tenure, by encouraging more engaging learning activities, and by allowing students to concentrate narrowly on the four subjects taken each semester. This concentration may allow for better mastery of material, but it does not allow for the breadth of coverage found in traditional schedules. Consequently, the 4x4 block schedule should not be implemented in districts where test scores and strict adherence to state curriculum guides are considered sacred. Furthermore, student motivation plays a large part in the success or failure of the 4x4 block schedule; motivated students excel in such an environment, whereas poorly motivated students sometimes fall further behind than in traditional schedule environments. It is emphasized that careful planning in implementing 4x4 scheduling is essential to its success. Contains 21 references. (RJM)

Identifiers—ERIC Digests

This Digest examines some of the ways that truancy affects both individuals and society. It identifies factors that may place students at greater risk of becoming truant and lists some consequences of nonattendance, including delayed promotion and graduation, lowered self-esteem, and lessened employment potential. The causes of truancy vary among individuals. Guidelines for creating effective attendance policies should be consistently enforced, and absences should be followed up by a telephone call or a letter. Many school districts have adopted a hardline approach to reducing unexcused absenteeism; in one such district, truancy rates were reduced 45 percent when truant and their parents were taken to court. Data also show that truancy can be controlled within the school; the power of peer influence was revealed in one study in which 84 percent of the interviewed truants said their friends skipped school. Administrators may also use new software to track student absences. Ways in which the community can become involved include pairing students with volunteer mentors who then work to foster students' career interests, or special programs where students not attending school are reported to the county attorney who then works to help the students back into the school and/or work environment. Student's Perceptions of Block Scheduling Practices in a Selected Arkansas High School.

Pub Date—1998-11-00

Note—7p.; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (27th, New Orleans, LA, November

4-6, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Block Scheduling, Comparative Analysis, Educational Change, Educational Innovation, *Flexible Scheduling, High Schools, Instructional Innovation, *School Schedules, *Student Attitudes

This report compares student perceptions of the block schedule with those of the traditional seven periods in high school. It describes a public school that voted to implement a modified three-block schedule containing two traditional periods. The participants in the study were 200 high-school students, all of whom were switched from a traditional 7-period format to a block schedule. Data collected from surveys were used to compare students' perceptions on various areas related to block-scheduling practices. The surveys consisted of 12 Likert-scaled questions focusing on attitudes and perceptions. The results indicate that the students did not significantly favor the use of block scheduling. Even though after the first year students showed an increase in perceptions that favored block scheduling, rising from 17 percent to 36 percent, the majority (59 percent) still preferred the traditional schedule. Students were initially concerned about being able to make up work, but this concern decreased after the first year. Student did record a rise in interest in several factors of the classes but not enough to outweigh preference for traditional scheduling. It is recommended that school administrators should carefully study implementation and evaluation policies when initiating block scheduling. (RJM)

Descriptors—*Academic Standards, *Accountability, Educational Administration, Educational Change, Elementary Secondary Education, Performance, Quality Control, School Effectiveness

This policy brief reviews developments in standards-based reform and explores new ways for holding schools and districts accountable for discharging their missions. It draws on several Consortium for Policy Research in Education (CPRE) studies of accountability, many of which are still in progress. The report examines characteristics of new accountability systems and focuses on the following: performance, schools as the unit of improvement, continuous improvement strategies, inspections, more accountability categories, public reporting, and consequences attached to performance levels. It discusses issues in designing and implementing new accountability systems, asking such questions as "How is performance measured?" and "What is satisfactory progress?" The brief also describes ways in which to use fair measures in holding schools accountable, such as judging students' satisfactory progress rather than their absolute performance. It offers details on issues such as perverse incentives, complex indices of progress, what to do with students who fall in the middle of the distribution, states' capacity to remedy problems, stability and credibility of programs, public understanding, and student incentives. The report looks at ways in which new accountability systems work, and asserts that when such systems are well designed they can result in improved student

achievement and more highly motivated teachers. (Contains 19 references.) (RJM)

Descriptors—Elementary Secondary Education, Program Evaluation, School Community Programs, School Community Relationship, *Service Learning, *Vocational Education

Identifiers—*Colorado

This report provides a qualitative evaluation of Colorado's 56 Learn and Serve programs. It contains descriptions of 39 K-12 school-based programs and 17 community-based programs funded during the 1997-98 grant cycle. The profiles were written by the program directors, and each profile provides an overview of the program and includes general information about the community and the community members participating in the program. Details are also offered on the service-learning projects and the young people participating; the goals, assessments, and accomplishments of the projects and participants; and the challenges of implementing service-learning programs. A final component of each report offers some reflections about the program and discusses issues that require further attention. The profiles show how the programs have developed over time and indicate whether a program is new or has been funded for years. The report is divided into five sections and includes information on 4 elementary-school programs, 14 middle- and junior-high school programs, 8 high-school programs, 3 K-12 schoolwide programs, and 15 community-based programs. The descriptions include contact information, amount of funding, number of participants, number of volunteers, participant hours, and volunteer hours. An appendix presents the program-narrative guidelines. (RJM)

Descriptors—College Outcomes Assessment, College Students, *Developmental Studies Programs, Higher Education, Instructional Effectiveness, *Outcomes of Education, *Remedial Instruction, Sex Differences, *Student Development

Identifiers—Developmental Students, Louisiana

This report describes the educational outcomes of students enrolled in developmental/remedial courses at one postsecondary institution. Three questions are addressed: What are the demographics of students enrolled in developmental/remedial courses? What percentage of students pass developmental/remedial courses on the first attempt? and How do pass/fail elements modify the educational outcome of students who were enrolled in developmental/remedial education courses? Students enrolled in developmental/remedial courses at a multipurpose institution of higher education in northern Louisiana were studied for this report. Data were obtained from the Institutional Research Department and included information on the developmental course(s) in which each student was enrolled; the semester and year of enrollment; the age, sex, and race of the students; and the number of

times the students attempted the developmental course(s). The results indicate that after a 7-year period, 16 percent of the students enrolled in developmental/remedial courses graduated, 9 percent were still enrolled, and 75 percent were not enrolled at the school. For the courses themselves, 77 percent of the students who were enrolled in developmental/remedial courses completed the courses on the first attempt and more females than males were enrolled in these types of courses. Contains 10 references. (RJM)

Arizona Charter School Progress Evaluation.

Arizona State Univ., Tempe. Morrison Inst. for Public Policy.

Pub Date—1999-03-00

Note—88p.

Pub Type—Reports - Evaluative (142) — Tests/Questionnaires (160)

EDRS Price — MF01/PC04 Plus Postage.

Descriptors—Academic Achievement, Accountability, *Charter Schools, *Educational Assessment, Elementary Secondary Education, Program Evaluation, School Effectiveness, State Surveys

Identifiers—*Arizona

This report describes an evaluation of charter schools in Arizona. Eighty-two charter schools representing the 137 charter-school holders in the state participated in the study. The schools were selected to be representative of all state charter schools with regard to location, population density, grade level, and sponsoring agency. A total of 303 parents of charter-school students, 171 students, 123 teachers, and 54 directors completed surveys about charter schools. Fourteen focus groups were held around the state, and individual interviews were conducted with 23 persons. Student-achievement test data for charter schools, charter-school applications, other state databases, and parent complaints were also reviewed. The findings indicate that the key reasons that students transfer to charter schools are that they were not doing well academically and/or were not happy at their former school. Parents of charter-school students and the students themselves were more satisfied with their academic performance, and student-achievement data appear to indicate that charter-school students were achieving academic gains at levels similar to students attending regular public schools. Common concerns of stakeholders include accountability for student achievement, implementation of special-education requirements, and qualifications of school teachers and directors. Recommendations for addressing concerns of participant groups are offered. (RJM)

Giron, Kathryn M.

Educational Alliances, Property Rights and Trust: Issues of Transaction Costs in the Transfer of Credit.

Pub Date—1998-00-00

Note—20p.; Paper presented at the Annual Meeting of the American Educational Finance Association (Mobile, AL, March 11-15, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Articulation (Education), Cooperative Programs, Credit Courses, *Educational Economics, Higher Education, *Partnerships in Education, Student Welfare, *Transfer Policy, Transfer Programs

Identifiers—Transaction Costs

Using transaction-cost economics as a theoretical lens, this paper analyzes educational alliances, which are agreements between educational organizations, such as those between 2-year and 4-year colleges. Transaction costs are those costs associated with the movement of course-credit hours across different institutional environments. The report suggests that standard cost-benefit analyses, as offered by standard economic models, do not serve well the purposes associated with transfer and articulation and that decision-making processes affecting student transfers are foremost about cost minimization and not about student welfare. Part 1

of the paper discusses the Utah System of Higher Education's transfer policy and the decision-making parameters that influenced the formation of this policy. Part 2 provides a brief explanation of transaction-cost economics as outlined by Williamson. The paper focuses on state-level decision making and the creation of educational alliances, the central components of transfer issues, the debate over intellectual property rights, the presence of trust, education as a trust market, information asymmetry, human costs and life chances, ambiguous and uncertain technology, bounded rationality, opportunism, contrasting assumptions, and implications of cost management. The report states that more research is needed to understand the effects of moving credit hours across institutional environments. Contains 20 references. (RJM)

Descriptors—Annual Reports, *Charter Schools, Educational Assessment, Educational Innovation, Elementary Secondary Education, Program Descriptions, School Effectiveness, State Surveys

Identifiers—*Massachusetts

This document summarizes annual reports provided by Massachusetts' charter schools. It is supplemented with information from reports required of all public schools in the state and provides profiles of the 24 charter schools that were operating in 1997-98. The report opens with an overview of the four common features of charter schools—freedom, accountability, innovation, and choice—followed by general information on the student composition of charter schools and a question-and-answer section that answers some of the frequently asked questions about the Massachusetts Charter School Initiative. The profiles of the 24 schools include a one-page description of the school, its origin and mission, and the focus of the curriculum. Statistics on total enrollment, grades served, number of students on the waiting list, total instructional staff, average cost per pupil, school hours of operation, number of school days, total hours of structured learning time, teacher-salary range, staff turnover, and percentage of teachers certified are provided for each school. A demographic profile and contact information are also included. The report includes short descriptions of the eight schools awarded Commonwealth charters in 1998 and synopses of the five schools awarded Horace Mann charters in that same year. (RJM)

Annual Report on School Violence, 1997-98.

North Carolina State Dept. of Public Instruction, Raleigh.

Pub Date—1999-00-00

Note—76p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Annual Reports, Crime, Elementary Secondary Education, *Public Schools, *School Security, Statistics, Student Welfare, Teaching Conditions, *Violence

Identifiers—*North Carolina

This is the fifth Annual Report resulting from North Carolina's 1993 Safe Schools Act, a legislative initiative that requires schools to report to the State Board specified acts of disruption, crime, or violence. To generate the report, data were collected from all regular public schools in North Carolina via their central offices. The report forms were verified for completion and accuracy and the verified data were submitted for entry and analysis. The findings show that statewide incidents decreased by 7.35 percent for 1997-98, compared to the previous year. For the 13 reported categories of

problems, only "possession of a weapon" did not exhibit a decrease compared to the 1996-97 report. The vast majority of schools reported no-to-few incidents: 40.5 percent reported zero incidents, 37.2 percent reported 1 to 5 incidents, and 22.3 percent reported more than 5 incidents. The three highest incidence acts tracked from the beginning of annual reporting—possession of controlled substances and weapons, and assault on school personnel—continue to be the highest incidence acts in this report, with these three problems accounting for 86 percent of all reportable acts in North Carolina public schools. Assaults on school personnel substantially decreased for elementary schools, and sexual assaults and sexual offenses and robbery decreased for both elementary and high schools. (RJM)

Descriptors—Elementary Secondary Education, Faculty Development, *Peer Evaluation, *Personnel Evaluation, Professional Development, *Teacher Improvement

Identifiers—ERIC Digests

This digest examines peer review, focusing on how these types of reviews can improve teacher competence. Peer review is often linked to peer assistance, which helps new and veteran teachers improve their knowledge and skills. In peer-review programs, consulting teachers conduct formal evaluations and recommend whether the participating teacher should be retained or let go. Programs in Columbus and Toledo, Ohio, have shown that peer review not only helps schools retain teachers, it also provides ongoing evaluations for teachers. Some of the potential benefits of peer review include more teachers receiving help and more incompetent teachers being dismissed. Under peer review, teachers take a more active role in their progression, and teachers and principals can become allies in improving teaching standards. However, critics of peer review say that it presents legal problems for local union affiliates in that consulting teachers could be classified as supervisors and thus lose their bargaining-unit status. Those opposing peer review also claim that it does not address the real problems that lie behind teacher quality. Overall, the future of peer review remains uncertain; currently, only a handful of districts practice peer review, making it difficult to draw conclusions. (RJM)

ED 429 344 EA 029 747

The Four-Day School Week. Revised.

Colorado State Dept. of Education, Denver.

Pub Date—1999-02-00

Note—13p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, Extended School Day, *Flexible Scheduling, Instructional Innovation, *School Schedules

Identifiers—Colorado, *Four Day School Week

This paper provides an overview of the 4-day school week being utilized by 36 school districts in Colorado. These districts, which tend to be rural and sparsely populated, schedule 7.5 hours per day for 144 days of school instead of the normal 6 hours for 180 days. Colorado law requires school districts to schedule 1,080 hours per year of instructional time for secondary schools and 990 instructional hours for elementary schools. Fifteen districts have no Monday classes and 20 districts have no Friday classes. The law allowing for a 4-day week was

passed in 1980, and its implementation proved popular with students, parents, and teachers. The initial reason for the change was financial; the shortened week saved substantial amounts in transportation, food costs, utilities, and staff expenditures. However, the truncated week presents possible problem areas, such as child care for the off days, the effects on instructional time, political concerns over a shortened school year, and how a 4-day week affects student performance. Reliable data on the last feature are yet to be determined. The 4-day week seems to meet a need for communities that are small and rural but may also prove useful for larger, urban areas. Contact information for superintendents of districts on the 4-day schedule are provided. (RJM)

Descriptors—*Accountability, *Charter Schools, Educational Assessment, Educational Change, Elementary Secondary Education, Nontraditional Education, Program Effectiveness, *School Effectiveness

Identifiers—*Colorado

This report seeks to further the debate about the overall reform impact of Colorado's charter schools. It focuses on the characteristics and performance of the first 32 charter schools in the state, ones that have been operating for at least 2 years as of the end of the 1997-98 school year. The document identifies promising trends: the performance of these schools, as a whole, is stronger than state averages and school-district averages; the great majority of the charter schools in the study are meeting—or exceeding—the performance goals defined in their original plans; parent participation and parent satisfaction are high; teachers express high levels of satisfaction; and charter schools are gaining experience in measuring performance. Some concerns identified by the study include the finding that the population of charter-school students is not as diverse as the population of the state; six schools in the study did not provide sufficient data to enable the evaluation team to determine whether these schools were meeting expectations; several schools experienced a high rate of turnover in the building administrator position and/or among members of the governing board; and there has been little transfer of charter-school approaches or experiences to other public schools. This handbook provides information on Colorado's charter-school program. It explains the process for establishing charter schools and discusses the purpose these schools serve. Information on how to apply for a charter is given and includes the required elements of a charter application, such as goals and objectives, educational program and standards, plan for evaluation and performance, proposed budget, waivers, and governance and operation. Other considerations for applicants, such as the length of the charter, the charter-school site, the grounds for denying a charter application, food service, and what is required for special education

are also provided. The guide features a summary of Colorado's regulations for schools in the state, along with a list of federal statutes that affect the establishment of charter schools. Information on organizational and resource persons and additional resources and research information are listed. Nine appendices feature further details on the Colorado Charter Schools Act, a list of charter schools in the state, ways to understand school finance, rules for the administration of the waiver statute, state board appeal procedures, order forms, timelines for Colorado Student Assessment Program, allocating state-administered funds to charters, and Colorado's Basic Literacy Act. Bringing Out the Best in All Our Students. Partnerships/Goals 2000, Consortia Addressing Statewide Systemic Issues (CASSI) Grants and Local Improvement (LIG) Grants Progress Reports, 1995-1998.

Colorado Education Goals Panel, Denver.

Pub Date—1999-01-00

Note—232p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC10 Plus Postage.

Descriptors—Academic Standards, Elementary Secondary Education, Grants, *Incentive Grants, School Districts, School Effectiveness Identifiers—*Colorado, Goals 2000

This report summarizes the accomplishments of local education grants that have balanced the need for high standards, accountability, parent involvement, and flexibility. The document examines results from two funding opportunities supported by the Goals 2000 Educate America Act: the Consortia Addressing Statewide Systemic Issues (CASSI) and Local Improvement grants. CASSI comprised five grants, funded for a 2-year period. They addressed broad issues that are key to implementing standards statewide, whereas Local Improvement grants were designed to build local capacity to implement standards and increase student achievement. The results show that all the grants addressed professional development, with over 1,000 teachers and 20,000 students having been affected by inquiry-based professional development in math and science. Over 80 percent of grantees used the funding to develop or implement assessments linked to academic-content standards, which will prove important in student evaluation. Grantees shared their efforts with educators and communities across the state, and professional development tools that have resulted from these grants were also distributed. The progress report emphasizes ways to sustain the impact of these local grants beyond the funding cycle. Throughout the report, advice on how to implement standards, based on lessons learned by the grantees, is provided. (RJM)

This report contains information on Maryland and its 24 school systems. The data reported here were chosen for statewide reporting because they can be influenced by the school; are comparable across the state; are essential for student and school improvement; can help improve classroom instruction; and can be measured by statewide standards. Each county is represented. The information in the document includes results on the Maryland School Performance Assessment Program (MSPAP), wealth per pupil, per pupil expenditure, staffing per 1,000 pupils, average length of the school day, and

length of the school year. Other information reported is the number and percentage of 1998 graduates who completed minimum course requirements needed to enter the University System of Maryland, the number of students enrolled in grades pre-K through 12, results on Maryland's functional tests, the percentage of students present in school for at least half the average school day during the school year, the percentage of students in grades 9-12 who withdrew from school before graduation, the number of students receiving special services, the number and percentage of 1998 high-school seniors who have indicated that they plan to continue their education, and the number of students identified as having outstanding abilities in areas of general intellectual capabilities. Descriptors—Academic Achievement, *Class Size, Classroom Environment, Educational Research, Primary Education, Small Classes, *State of the Art Reviews, *Teacher Student Ratio

Exploring the class-size issue, this paper focuses on the primary grades and asks questions such as "does a reduction in class size promote an increase in academic achievement?" and "how substantial does the reduction in numbers have to be in order for a significant increase to occur?" The paper surveys debates on class size and the social factors that surrounded these debates. It outlines the results of class-size research and discusses what are considered optimum class sizes. Ways to capitalize on smaller class size are detailed, along with the issues surrounding research on class size. The paper suggests that reducing class size should be matched with a change in teacher behavior and that teachers should receive extensive and continuous training to alter their teaching strategies. The paper concludes that a reduction in class size at the earliest grades offers significant advantages not only in achievement results, but also in other important outcomes. Smaller classes build a sense of belonging in students, enabling them to increase in self-esteem and achievement. It is recommended that future studies on class size should examine the longevity of effects of reducing class size in order to guard against the effects of novelty and other influences. Identifiers—Market Systems Approach

This book examines ways to meet the educational needs of families. The volume is divided into three parts. Part 1 draws together the opinions and aspirations of parents and the general public on issues ranging from curriculum to classroom violence. Using the goals presented in part 1, part 2 reveals which approaches to schooling have been successful and which strategies have been failures. It pro-

vides examples of school systems from 500 B.C. to the late 20th century and answers numerous questions covering the way schools have worked: How was the curriculum set? How quickly did it change to meet the changing demands of families? Who chose the teachers? And How much autonomy were teachers given? For each approach, the successes and failures that resulted are explored with an emphasis on what students learned and how well they were able to apply that learning. The last section, "What Works," distills the ingredients of effective schools identified in part 2 and shows why some school systems have enjoyed continuous innovation and improvement, while others have stagnated or declined. Popular school-reform proposals are closely examined in this section. The last chapter presents a plan for applying the lessons of history and current research to the task of education. (RJM)

Breaking Ranks: A High School Restructuring Initiative.

Pub Date—1998-12-15

Note—25p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Case Studies, Comparative Analysis, Educational Change, *High Schools, Program Effectiveness, Program Evaluation, *School Restructuring

This paper examines Breaking Ranks, a proposal for school reform and restructuring intended to improve the effectiveness of America's high schools. The review drew upon memo writing, a personal interview with an administrator utilizing the Breaking Ranks blueprint, a review of periodicals and books on Breaking Ranks and on school restructuring, a synthesis of data collected from school-restructuring studies, and a comparison of the literature of high-school restructuring efforts. The report discusses: (1) the adoption of Breaking Ranks in one high school and how this reform effort influenced professional culture; (2) the alignment among program offerings, pedagogy, and curriculum; (3) and leadership. Findings indicate that Breaking Ranks and other reform programs all focus on student achievement and visionary leadership that is collaborative and has the capacity to involve others. Breaking Ranks, like other school-restructuring movements, also exhibits some weaknesses: recommendations are conceptual in design and not operational, so no specific or coherent plan exists; costs and the allocation of resources for implementation are not addressed; tracking is difficult because everything must be sorted, discussed, and embodied in teacher actions before it reaches the student; data supporting change initiatives are not defined; and the basic systemic structure of the school does not change. (Contains 20 references.) (RJM)

Descriptors—Educational Attitudes, Elementary Secondary Education, *Instructional Leader-

ship. *Misconceptions. *School Administration, School Supervision, *Superintendents

This report focuses on school superintendents—those currently in the position and those in the pipeline. The report reaffirms the importance of the superintendency, raises concerns about the lack of national data collection on school superintendents, and concludes that Americans need more demographic information about, and increased understanding of, the role of the superintendent. The report opens by criticizing the lack of information that has been generated on superintendents and proceeds to supply details on those who hold this position. It looks at the proportion of women in the job, as well as the race and the age of the job holders. The report discusses how long superintendents stay in the job, longer than the news media suggest, and how much they earn. The report explores the routes to the superintendency and looks at the pool of potential candidates for the position, which includes assistant superintendents, central-office administrators, and principals. The makeup of this pool reflects promising diversity in gender and race, although there is almost a total lack of Asian Americans in the pool. Another feature of this pool of potential superintendents is that secondary school principals are much more likely to become superintendents than are elementary school principals. (Contains 16 references.) (RJM)

The Efficacy of Administrator Preparation Programs: Private School Administrators' Attitudes.

Pub Date—1999-00-00

Note—12p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Administrator Attitudes, *Administrator Education, Elementary Secondary Education, *Instructional Leadership, *Principals, *Private Schools, Program Effectiveness, *School Administration, School Supervision

Identifiers—Administrator Surveys, *California

This report examines divergent views that may exist among administrators based on administrators' demographic characteristics and how these differences affect curriculum design for this group. It looks at factors, such as the person's age, gender, and ethnicity, that might have influenced whether or not an administrator completed a college/university administrator-preparation program and asks if the person found the training program effective. The study population consisted of the chief administrators of 3,881 private schools in California. A total of 256 surveys, which sought to determine what skills are essential to a novice administrator's success, were returned. The findings indicate that the surveyed group was mainly female, predominantly white, with a majority in the 41-60 age group with between 5 to 15 years of experience. Most held at least a master's degree, but only 48.8% percent had completed a college/university-level administrator-preparation program. Those who were most likely to have completed a training program were those who were more educated, who worked at schools with enrollments of 200 or more students, who worked in K-8 schools, and who were older. Among those who had completed a college/university administrator-training program, older administrators reported a higher degree of preparation for their job. (RJM)

Identifiers—League of Professional Schools GA

This book shares the lessons learned by educators as they developed the League of Schools, a democratic, schoolwide collaboration that focuses on instructional and curricular renewal. This process depends on three steps: a covenant of teaching and learning, shared governance, and action research. Chapter 1 explains the League's framework and provides a general overview of the issues. Chapters 2-4 offer suggestions for implementing each of the three sides of the framework. These chapters include case studies, general advice, step-by-step actions to take, and forms to be used. Each chapter also includes a self-monitoring guide to assist schools in charting their progress. The various guides identify traits that indicate high implementation for each part of the framework and trace the progression a school passes through before fully implementing the relevant aspects of the framework. Chapter 5 deals with issues that cut across implementation of the three sides of the framework, including change, finding time for teachers to work outside their classrooms, team building, securing outside facilitation, and building internal capacity. The book concludes with a summary of recent research into the issues of schoolwide change. (Contains a list of 74 titles for recommended readings and references.) (RJM)

The "Prospects" Study of Educational Growth and Opportunity: Implications for Policy and Practice.

Pub Date—1999-04-00

Note—48p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Information Analyses (070) — Speeches/Meetings Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Compensatory Education, *Disadvantaged Youth, Educational Change, Educational Policy, Elementary Secondary Education, High Risk Students, Program Effectiveness

Identifiers—Elementary Secondary Education Act Title I, *Title I Program Analysis and Monitoring

This paper examines results from the Prospects study—a research agenda that explored the federal Title I program's impact on the academic and socio-emotional development of disadvantaged children. The document focuses on the program's strengths and limitations, offering a brief review of educational research and highlighting what may or may not work to alter the largely disappointing results found in Prospects. The paper outlines the history of the Title I program and discusses how a lack of resources and instructional requirements and other problems hindered the program's effectiveness. The paper looks at early evidence on the impact of Title I and then turns to the Prospects study, which was to be a national longitudinal assessment of Title I. The Prospects study found that Title I assistance was usually insufficient to close the gap in academic achievement between advantaged and disadvantaged students. The paper examines what makes a program effective, concentrating on instructional practice, class size, tracking, tutoring, and other strategies. The paper details the argument for improving entire schools, rather than a subset of the school, and concludes that Title I cannot by itself compensate for the substantial educational deprivations associated with child poverty. (Contains approximately 220 references.) (RJM)

Identifiers—*Michigan, Zero Tolerance Policy

This report focuses on the impact of the Federal Gun-Free Schools Act (GFSA) in the Michigan public schools. The research for this study was conducted as a project of the Ann Arbor-based Student Advocacy Center. The study's purpose is twofold: (1) explore the implications of Michigan's zero-tolerance policy for educational equity and equal opportunity; and (2) analyze the impact of state law on the lives of expelled students and their families. The 100 school districts selected for analysis were chosen according to geographic location, diversity of population, and annual rate of per-pupil spending. Freedom of Information requests were sent to all 100 superintendents asking for expulsion data from the 1995-96 and 1996-97 school years, disaggregated according to race, gender, special-education status, and free-lunch eligibility. Sixty-four districts responded with varying degrees of compliance. In addition to the district data, interviews with expelled students and their families were conducted. Civil-rights officials, local law-enforcement officers, superintendents, and mental-health professionals were also consulted for their opinions on the zero-tolerance policy. Results indicate that school officials often apply the policy in an arbitrary and capricious manner. Typically, the grounds for expulsion were not found in the mandatory section of the state law. Descriptors—*Educational Innovation, Educational Policy, Elementary Secondary Education, *Formative Evaluation, *Policy Formation, State Programs

Identifiers—Arkansas, Oklahoma, Study Circles

This document gives an overview of the "Calling the Roll" program, a two-state study-circle program. Study circles employ a public-engagement model that fosters dialogue among diverse individuals and groups. This report explores how participation in study circles affects the education policymaking process, and it examines the process of implementing a statewide program of study circles. The report is divided into five sections. Section 1 provides a summary of the program. Section 2 presents background information on public engagement and the policymaking process and explores deliberative dialogue and how the study-circle model encourages deliberative dialogue about education. Section 3 describes the statewide implementation of the "Calling the Roll" program in Arkansas and Oklahoma. Section 4 presents a description of the study, outlining the key questions and the research approach, along with site and sample selection criteria and data-collection processes. Section 5 provides a brief overview of the collaborative-research effort among the various organiza-

tions involved in the program. The study will provide educators and legislators needed information on the implementation of the program, as well as its short-, mid-, and long-term effects. A bibliography, a glossary, and a list of acronyms appear at the end. (RJM)

Descriptors—*Educational Finance, Elementary Secondary Education, *Finance Reform, Financial Policy, *State Legislation, *Tax Allocation, *Taxes

Identifiers—Constitutional Amendments, *South Dakota

This issue memorandum describes Constitutional Amendment A, an initiative in South Dakota that, if approved, would prohibit taxation of real property for school purposes. The report provides background information on Constitutional Amendment A, which reads as follows: "The legislature shall make such provision by general taxation as with the income from the permanent school fund shall secure a thorough and efficient system of common schools throughout the state. Real property shall not be subject to taxation for school purposes." Supporters began collecting signatures in 1995 and turned in the signed petitions in 1996, in time for the 1998 election. The property tax is the main source of revenue for local units of government in South Dakota and the issue of replacement revenue will become an important issue if the amendment is passed. The sales and use tax is the only current state-revenue source that raises an amount of money equivalent to the amount of property taxed currently levied by schools. Proponents of the amendment believe property taxes are too high and there is too much government waste. Opponents contend that education will be hurt by the amendment because there is no replacement revenue proposed. How the amendment will affect existing bonds is discussed. (RJM)

Measuring Organizational Climate and Organizational Commitment in the Turkish Educational Context.

Pub Date—1998-11-00

Note—45p.; Paper presented at the Annual Meeting of the University Council for Educational Administration (St. Louis, MO, October 30-November 1, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Administrator Attitudes, *Educational Environment, Elementary Secondary Education, Foreign Countries, Instructional Leadership, *Organizational Climate, Public Schools, *Teacher Administrator Relationship, Teacher Attitudes, *Teacher Morale

Identifiers—*Teacher Commitment, *Turkey

This report examines the relationship between each dimension of organizational climate (supportive principal behavior, directive principal behavior, engaged teacher behavior, frustrated teacher behavior) and the organizational commitment of teachers in Turkish public schools. Data were collected from 900 educators in 40 public high schools. Principals and teachers were asked to describe their schools' interaction patterns by responding to statements that described different dimensions of organizational life. Hypotheses included the assertions that there is a relationship between overall organizational climate of the school and teachers' organizational commitment, as well as a relationship between supportive leader behavior and the teachers' organizational commitment. Results indicate the existence of a significant positive relationship

between overall organizational climate of the school and the teachers' organizational commitment. A significant positive correlation was also found between supportive leader behavior and the teachers' organizational commitment, whereas a negative relationship between frustrated teacher behavior and the teachers' organizational commitment was discovered. The findings suggest that many of the schools in the study are not pleasant places for the leaders, the teachers, and the students. Principals are likely to distrust the actions and motives of the faculty, and faculty members are apathetic, self-involved, and uncaring about students. (Contains 70 references.) (RJM)

Descriptors—Case Studies, Educational Assessment, Educational Quality, Elementary Secondary Education, *Instructional Effectiveness, Program Descriptions, *Program Effectiveness, Validated Programs

This volume is part of a series of Idea Books for school-based practitioners who are implementing federal compensatory-education programs. It demonstrates how educators and their supporting communities are implementing a new vision of comprehensive school reform using the schoolwide program option available under the 1994 reauthorization of the Elementary and Secondary Education Act, which requires states and districts to set challenging standards for what students should know and be able to do. The document was completed by consulting with successful school-based educators to learn what it takes to create outstanding schoolwide programs. The volume opens with an overview of promising practices, focusing on vision, leadership, and decision making; student performance results; research-based reform strategies; the professional learning community; parent and community partnerships; and sustaining change. It includes case studies organized by elementary and secondary schools. Examples from the primary grades describe a team approach to literacy acquisition, academic success through a full-service school, ways to ensure success for all students, and making a commitment to teacher development. The two secondary-school case studies discuss ways to prepare students for real-world experiences and how to achieve a world-class standard in a culturally diverse community. (RJM)

Identifiers—*Office for Civil Rights

This brochure describes the activities of the Office for Civil Rights (OCR) in the U.S. Department of Education. The OCR is a law-enforcement agency charged with upholding the federal civil-rights laws that prohibit discrimination on the basis of race, color, national origin, sex, disability, and age in programs and activities that receive federal

financial assistance. The pamphlet describes how civil-rights laws apply to most educational institutions in the nation, including almost 15,000 school districts and more than 3,600 colleges and universities, as well as students and employees. The OCR receives discrimination complaints directly from the public, as many as 5,000 each year, featuring such issues as ability grouping, school desegregation, racial harassment, sexual harassment, treatment of students who are pregnant, accessibility of school facilities and programs, appropriate special-education services, and auxiliary aids for students with impaired sensory, manual, or speaking skills. Also described are the ways that OCR resolves complaints and how the agency carries out compliance reviews. The OCR also offers technical assistance for people and institutions to help them comply with federal law. A brief description of the impact of the civil-rights laws, as well as an overview of the future challenges of the OCR, are provided. (RJM)

Descriptors—*Dropout Prevention, *Dropout Research, *Educational Legislation, High Risk Students, Potential Dropouts, Secondary Education, State Action

Identifiers—*Colorado

This report outlines strategies, developed by a state-legislative committee, for reducing the dropout rate in Colorado. The committee also investigated alternative methods of completing a high-school education program and ways of stressing the importance of education to Colorado youth. To gather information, testimonies provided by students, teachers, administrators, counselors, academic researchers, and Colorado Department of Education officials concerning the dropout problem were secured. Information was also gathered on teacher preparation and training, the truancy process, and research that examined at-risk youth and their needs. Based on findings, the committee recommended six bills for consideration in the 1999 legislative session: (1) end both educational clinics for public-school dropouts and the Second Chance Program for problem students; (2) require school districts to evaluate and determine whether a student has an emotional or communicative disorder; (3) raise the upper age for compulsory education from 16 to 17 years; (4) identify gifted students; (5) require the state board of education to adopt rules requiring better definitions of dropout and district transfers; and (6) implement three dropout-prevention strategies, such as mandating that each school include a dropout-prevention plan in its annual accountability plan. The full text for each bill, along with each bill's fiscal impact for the state and the district, is provided. (RJM)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Change Strategies, *Educational Assessment, *Educational Improvement, Elementary Secondary Education, Program Development, Program Evaluation

This guide was developed to empower individuals and organizations to solve social and educational problems. It is intended for use by anyone

interested in leading groups in developing programs to improve education. The principles and methods that it contains are based on psychological theory and research, and it is intended to stimulate effective action by educational leaders and community organizations. It explains the Program Development Evaluation method, which assists individuals as they develop programs, thus enabling these persons to take advantage of a structure that will help them make useful plans to manage program adoption. The steps it contains encourage needs assessment, and they focus attention on problems that have been ignored so as to help mobilize action. The steps provide a structure to focus problem-solving efforts, using principles from group psychology and the psychology of motivation to overcome obstacles to change. The steps emphasize solutions to problems and promote realism in designating and following up on plans. The document is divided into seven modules: (1) a framework for actions; (2) formulating problem statements and goal statements; (3) preparing action statements; (4) setting objectives; (5) designing the program; (6) implementation standards; and (7) analyzing the force field. A glossary of program-development evaluation terms is included. Contains 10 references. (RJM)

This report profiles legislative action affecting pre-K-12 education in the 50 states during the 1997-98 school year. The information was collected from Lexis-Nexis, legislative staff, state newsletters, school board/teacher associations, and various media. The resulting report, compiled by the Education Commission of the States Information Clearinghouse, has not been analyzed and was rapidly processed to be released in printed form at the earliest possible date. The material is separated by topic and is arranged alphabetically. Each topic features the states affected by the legislation, the status of the legislation, and a summary of the legislation's content. The many topics addressed here include accountability, accreditation, administrators/principals, adult education, assessment/testing, at-risk youth, attendance, bilingual education, business/industry/education, charter schools, child abuse/protection, choice, collective bargaining, community education, community involvement, community service/volunteerism, compensatory education, correctional institution education, counseling guidance, curriculum, deregulation/waivers, discipline, early-childhood education, elementary education, enrollment, equity, extended day, finance, gifted and talented, governance, health, immigrants, incentives/sanctions, instruction methods, interagency collaborations, kindergarten, libraries, literacy, magnet schools, middle schools, neuroscience, nonpublic schools, official English, parent/family, partnerships, postsecondary, privatization, religion, safety/crime/violence, scheduling, school boards, school districts, secondary schools, sexual harassment, site based management, special education, teacher evaluation, technology, textbooks, urban schools, vocational education, and vouchers/tax credits. Comparing Outcomes of an Alternative School Program Offered with and without Intensive Family Involvement.

Pub Date—1999-00-00

Note—34p.; "This paper is based upon the se-

nior author's dissertation research conducted under the supervision of the second author."

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, *Dropout Prevention, Dropout Research, Elementary Secondary Education, High Risk Students, *Non-traditional Education, *Parent Participation, Parent School Relationship, Program Effectiveness

This paper evaluates the effectiveness of an alternative-school program. The research compared 1 year of the program, where there was no parental involvement, with a second year, which included family-based interventions. It was hypothesized that family involvement would generate greater improvement in students' psychosocial functioning, academic performance, and attendance, and would reduce the number of high-school dropouts. Two cohorts of students referred to an alternative-school program for chronically disruptive youth received either the standard program or the standard program with intensive family involvement. Outcome measures included self-esteem, locus of control, depression, grades, attendance, and eventual dropout from school. Although demographically similar to the control group at pretests, the experimental group evidenced statistically significant improvements in locus of control, grade-point averages, attendance, and reduced dropout rate, relative to the control group. However, the overall effects of change within each group for self-esteem, depression, locus of control, grades, and attendance were low for both cohorts, so low as to make it difficult to justify the appreciable resources that went into providing the family psycho-educational services. Nevertheless, the results suggest the importance of family involvement in improving the school performance of chronically disruptive youth. (Includes 54 references.) (RJM)

Descriptors—Board Administrator Relationship, Elementary Secondary Education, Politics of Education, Program Descriptions, *School Based Management, *School Policy, School Supervision

Identifiers—*Kentucky, *School Councils

This report describes the implementation of School-Based Decision-Making (SBDM) Councils. The research drew on a stratified random sample of high schools, middle and junior high schools, and elementary schools geographically distributed throughout the eight service regions of Kentucky. The paper also details the types of decisions being made by the SBDM Councils during the period of July 1, 1996, through November 30, 1997. The population for the study was 1,032 public schools with SBDMs, and a stratified random sampling technique was used. Results show that 34 percent of the principals in the sample were female, that most of the SBDM Councils were formed in 1991, and the length of time the principal had served in the school ranged from 1 to 27 years. It was found that most members of the councils were relatively inexperienced as council members. Councils made many more decisions in the categories of budget, council procedures, and personnel consultation than in the nine areas in which state law required them to have policies. The lack of experience among council members may explain the high percentage of decisions in the council procedure category. The number of curriculum decisions were significantly lower in the elementary schools than in the middle and high schools. Contains 26 references. (RJM)

Ed-Flex Program: Increase in Flexibility Useful but Limited by Scope of Waiver Authority. Testimony before the Subcommittee on Early Childhood, Youth and Families, Committee on Education and the Workforce, House of Representatives.

General Accounting Office, Washington, DC. Health, Education, and Human Services Div.

Report No.—GAOT-HEHS-99-67

Pub Date—1999-00-00

Note—15p.

Available from—U.S. General Accounting Office, P.O. Box 37050, Washington, DC (first copy free; \$2 each additional copy; check or money order made out to the Superintendent of Documents).

Pub Type—Legal/Legislative/Regulatory Materials (090)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Educational Policy, Elementary Secondary Education, Eligibility, *Federal Programs, Government School Relationship, *Program Descriptions, *School Involvement

Identifiers—Ed Flex Program, Waivers

This report discusses the Education Flexibility Partnership Demonstration Program (Ed-Flex), which authorizes 12 states to grant waivers (temporary exceptions from certain federal requirements) to their local school districts. The report focuses on the scope and limitations of the current Ed-Flex waiver authority, as well as opportunities for expansion to more states under current eligibility requirements. It describes how states participating in Ed-Flex have found the program to be useful in achieving flexibility and in promoting educational reform efforts even though it does not address many key concerns about implementing federal requirements. Although Ed-Flex allows waivers from specific requirements within six major education programs, the largest of which is Title I of the Elementary and Secondary Education Act (ESEA), this waiver authority does not address district officials' major concerns, such as their need for accurate and timely information on federal requirements, and the lack of funds to meet their program and administrative costs. If the Ed-Flex program is to be significantly expanded, the current requirement that states must have an approved plan for education reform under Goals 2000 must be modified, and the states must make major changes in their ability to waive state-imposed, education-related requirements. Where Have All the Principals Gone?

Pub Date—1999-00-00

Note—9p.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Administrator Responsibility, Demand Occupations, Educational Administration, *Elementary Education, Labor Needs, Leadership Responsibility, *Needs Assessment, *Principals, School Administration

Identifiers—Principal Shortage

This paper examines the factors underlying the shortage of elementary school principals. It presents the results of a survey of current educational-leadership graduate students regarding factors that would motivate them to aspire to the principalship and those factors that would discourage them from applying for the principalship. The elementary principalship has often been characterized as one of the most demanding, satisfying, and widely sought leadership positions in education. Yet, the responsibilities placed upon elementary principals are as demanding as those at other levels of administration, and a recent study by the Educational Research Service revealed that there is an increasing shortage of administrative candidates for leadership positions. Findings show that the top three inhibitors for becoming a principal are increased time commitments, the influence of outside groups, and too much bureaucratic paperwork. The top three motivating factors are a desire to make a difference, the personal and professional challenges,

and the ability to initiate change. The paper offers five suggestions for change that are needed to encourage talented people to seek administrative positions: (1) restructure job responsibilities; (2) reduce the work week and the work year; (3) add support services; (4) increase the principal's authority and responsibility; and (5) nurture a cadre of future administrators. Document Not Available from EDRS.

Descriptors—*Academic Standards, Criticism, *Educational Policy, *Educational Principles, Elementary Secondary Education, English Instruction, State Standards

This book on educational standards describes how standards create more harm than good, and it takes to task the pro-standards movement. The volume opens with a discussion of what is wrong with standards, claiming that the push for standards generally results in long lists of facts that are freighted with cultural baggage and are typically the product of individuals who lack classroom experience and who believe that all children should be expected to learn the same material, irrespective of a child's ability or interest. The book focuses on standards in English and literature and provides numerous anecdotes to illustrate children's individuality and how standards will undermine this uniqueness. It criticizes standardized tests, the exaggerated promises of packaged curriculums, the use of Ritalin, and the push to make teachers into a uniform body of instructors with similar intent and similar methods. It discusses the hype behind standards and demonstrates how many claims for standards do not withstand close scrutiny. Some of the other aspects of standards that are criticized are the strategy to repeat basic information in the same way, trying to develop students that reflect the standards and not themselves, and the negative influence of California's education standards. Effects of School Choice on Academic Commitment and Academic Achievement: Evidence from NELS:88.

Pub Date—1996-00-00

Note—16p.; Paper presented at the Annual Meeting of the American Educational Research Association (New York, NY, April 8-12, 1996).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, Education, Free Choice Transfer Programs, Longitudinal Studies, Magnet Schools, *School Choice, Secondary Education, Student Improvement

This paper presents a study conducted with two goals in mind: (1) to employ an operational definition of school choice that is more faithful to orthodox choice theory than are extant definitions; and (2) with this definition, to assess possible effects of school choice on students' academic commitment and achievement. Claims for the positive effects of school choice on student achievement deserve serious scrutiny because of increasingly widespread support for school-choice initiatives. Proponents for school choice believe that choice results in a better match between the student and the school, which, in turn, should result in greater academic commitment and academic achievement. To date, however, the research regarding the results of school choice is inconclusive. The definition of school choice captures these three elements: (1) school choice involves a public-school student

selecting another public school; (2) school choice requires active selection from among perceived alternatives; and (3) school choice effects will be greater when the chosen school presents itself as a magnet school or "school of choice." The paper details the methodology of the study, including data sources, dependent and independent variables, and outcomes. The results indicate that school choice had no effect on students' subsequent academic commitment or academic achievement. Contains 23 references. (RJM)

Descriptors—*Administrator Attitudes, Administrator Responsibility, Demand Occupations, *Educational Administration, Elementary Secondary Education, *Labor Needs, *Leadership Responsibility, *Needs Assessment, *Principals, School Administration

This paper examines why experienced administrators are electing not to join educational-administration applicant pools. Research reports that more teachers than ever are pursuing administrative courses and more individuals than ever are administratively certified. However, greater numbers of vacancies for jobs in educational administration exist or will exist than in the past. Additionally, the job has so many rigorous constraints that few people aspire to the position. This report focuses on whether there are gender differences related to the reasons administrators do not pursue other positions, and, if so, it explores the reasons men and women identify for these differences. The study entailed a 15-item survey to collect data from a sample of public-school administrators from New York State. The survey included questions about the respondents' age, gender, and length of time as certified administrators, as well as type and size of districts in which the respondents were employed. The remaining questions sought to determine if the respondents had ever decided against applying for an administrative position and to elicit information about the reasons for their decisions. Findings show that some of the reasons qualified administrators did not apply were lack of experience, relocation, inadequate compensation, district problems, stress, and time demands. Contains 26 references. (RJM)

Identifiers—Hungary

Following up on data compiled in a report issued two years previously, this article discusses the outcomes of a gifted program for children ages 13-14 in Torokszentmiklos, Hungary. It begins by describ-

ing the aim of the program and its main content elements. The program was designed to make learning methods and strategies of pupils effective, and to develop students' self-knowledge, self-image, and social image. Seventy-eight students participated in the program. Results found: (1) pupils participating in the program were talented and had high IQ scores, but had not automatically developed learning strategies; (2) the program lasted 15 weeks and resulted in measurable development; (3) the most intensive development was remembrance of text; (4) methods of attention functioning developed rapidly; (5) learning methods played an important role in effectiveness of learning; (6) development of learning methods and school achievement were positively correlated; (7) there was no significant correlation between learning methods and scores of intelligence; and (8) there was not a strong correlation between students' opinions of themselves and the opinions of their classmates; and (9) there was no correlation between learning methods and self-evaluation and evaluation of other people. Identifiers—Hungary

This article discusses the results of a survey that queried 34 Hungarian teachers of gifted children on the definition of gifted children, developing giftedness, behavior problems of gifted children, enrichment activities, and parent participation. The teachers were attending in-service training on giftedness. Findings of the survey indicate that most teachers believed gifted children had better achievement in some school subject, had outstanding abilities in thinking, and were motivated. Teachers believed the most effective ways of teaching gifted students included individual treatment, announcing school competitions, study circles, optional subjects, grouping according to ability, establishing special classes, visiting bigger libraries, and going to university lectures. Common problems among the gifted were identified as asking a lot of questions, interrupting the teachers' explanations, being too critical of others, finishing a task sooner than others and then dealing with extraneous matters, reading secretly under the desk because the lesson is boring, and forgetfulness. Teacher characteristics that help in teaching gifted children are also discussed and include openness, knowledge of subject, creativity, a good sense of humor, motivation, and ability to adapt to the requirements of the student. Descriptors—*Academic Aspiration, *Career Choice, Foreign Countries, *Gifted, Humanities, Mathematics, Secondary Education, *Self Evaluation (Individuals), *Sex Differences, *Talent, Theater Arts, Visual Arts

Identifiers—*Australia (Sydney)

This study compared the areas of talent and career aspirations of boys and girls in Year 7 (n=398) and Year 11 (n=240) samples in a middle class metropolitan area in Australia. Students nominated the high school subject in which they saw themselves as being most talented, and current perceptions of talent in relation to each of their high school subjects were measured, along with career aspirations. For both age groups, more boys perceived themselves as most talented in mathematics, science, or technical domains, while more girls perceived themselves as most talented in the arts or humanities domains. More boys than girls perceived themselves as multi-talented. Analysis of career aspirations showed that boys more than girls planned to pursue mathematical careers. Theoretical and educational implications are drawn. (Contains 19 references.) (DB)

Descriptors—Attitudes, *Community Based Instruction (Disabilities), *Disabilities, *Early Intervention, Experiential Learning, Family Role, Home Programs, Preschool Education, Questionnaires, Services, Surveys, Teaching Models, Training

A survey of 116 early intervention service providers for young children with disabilities examined their experiences and perceptions of providing services in natural environments such as the home, day-care center, restaurants, play grounds, etc. A questionnaire, "The Natural Environment Questionnaire," was developed which included questions with Likert-type responses, a checklist of services, and open-ended questions. Results indicated that in theory early intervention in natural environments is well accepted; however, different types of services are seen to be more or less appropriate for natural environments. Problems that service providers encountered in natural environments included: lack of private space, distractions, access to supplies/equipment, and transportation for families. Service providers recommended training in the form of workshops on specific topics, peer modeling, and training for families in order to increase the benefits of intervention in natural environments. The questionnaire is appended. (Contains 15 references.) (DB)

Descriptors—Behavior Change, Cerebral Palsy, *Cognitive Development, Developmental Stages, *Infant Behavior, Infants, *Interpersonal Competence, *Language Acquisition, Longitudinal Studies, *Motor Development, *Neurological Impairments

This study examined behavioral development during the first year of life of 41 infants diagnosed with cerebral palsy, hypotonia, or hypertonia. The KID Scale, an empirically normed, caregiver-report inventory which covers behavior in five domains (cognitive, motor, language, self help, and social) was administered at about 5, 9, and 12 months corrected gestational age. Results indicated that motor domain scores were significantly lower than language, self help, and social domain scores whereas cognitive scores were similar to motor scores. It also found that neuromotor diagnostic classification was a significant predictor of longitudinal growth trajectory during the first year. Overall, the infants in the study developed at a significantly slower rate than comparison premature infants (N=14) with no medical complications. However, the growth rate of infants with hypotonia did not differ significantly from the premature control infants. (DB)

Descriptors—Brain Hemisphere Functions, Clinical Diagnosis, Elementary Education, *Handedness, *Learning Disabilities, *Reading

Difficulties, *Remedial Reading, Student Evaluation

This paper describes a series of preliminary and a double blind study on crossed visual laterality and reading difficulties in children. Preliminary studies investigated handedness, eye preference, and ear preference in a total of 196 third and fifth grade students. About 42 percent of the tested students were identified with the Monahan/DeYoung Syndrome, i.e., they were left-eyed (at three different ranges), left-eared, and right handed (or vice versa). Tests of kinesthetic, visual, and auditory processing found that subjects performed significantly better in their sided/natural state. The double blind study examined the effect of the sinistral inverted (hook) reading technique when applied by 43 students with the Monahan/DeYoung Syndrome on standardized accuracy and comprehension reading scores when compared to controls. Results indicated that the sinistral-inverted treatment group showed a significantly greater increase in reading accuracy and in reading comprehension than either of the other three groups, namely, the sinistral non-inverted, the dextral-inverted, and the non-dextral-inverted. The paper concludes that sidedness in children must be determined by identifying the reading-range eye and aligning this eye to the hand for reading. (DB)

This paper describes three classroom settings in which students with disabilities were successfully and fully included. In the first setting, a multi-age classroom has been established for first and second grade students with mild disabilities, students at-risk for academic failure, and typically developing students. A general education teacher, a reading specialist, and a special education teacher collaborate to teach the students. In the second setting, a fourth grade general education teacher and a special education teacher co-teach in an inclusive setting with 28 to 30 students who are typically developing, have mild disabilities, or are considered gifted and talented. In the third setting, a special education teacher and an instructional aide participate on two middle school teams to modify materials and provide additional pull-out support to fifth and sixth grade students with mild to moderate special needs. The importance of professional collaboration in all three settings is stressed. (DB)

This book offers guidelines for designing the cognitive supports to instructional materials for students with disabilities in general education classrooms. Chapter 1, an introduction, describes the contexts of change, including the changing demography of learners, which has increased the curricular and instructional complexity that teachers face in general education classrooms. Chapter 2 defines and describes curriculum design as an important and distinctive requirement to provide cognitive access to general education content for students with disabilities. Chapter 3 offers six principles of effective curriculum design in the modification of general education content. These principles stress big ideas, conspicuous strategies, mediated scaffolding, strategic integration, judicious review, and primed background knowledge. Chapter 4 offers a framework for evaluating and adapting general education curriculum materials and applies the six curriculum design principles to a range of general

education content, including the areas of beginning reading and writing. (Contains 75 references.) (DB)

Descriptors—Disabilities, Educational Principles, Elementary Education, *Inclusive Schools, *Individualized Instruction, *Instructional Design, Instructional Materials, Mainstreaming, Mathematics Instruction, *Mathematics Materials, *Media Adaptation, Reading Instruction, *Reading Materials

This book offers guidelines for elementary school teachers for making adaptations in reading and mathematics instruction for students with mild disabilities in the general education classroom. Following an introductory chapter, Chapter 1 presents eight principles for materials adaption organized according to the acronym FLEXIBLE: F-feasible (adaptations must be feasible in the classroom), L-lively (adaptations must be lively and fun), E-eliminated (adaptations must have the goal of being eventually faded out), X-explicit (adaptations must have a definite explicit purpose), I-intentional (adaptations should be part of a comprehension individualized plan), B-beneficial (adaptations should benefit the student with disabilities without detracting from the learning of other students), L-limelight (adaptations do not place undue attention on the student with disabilities), and E-evaluated (adaptations should be evaluated on an ongoing basis). Chapter 2 applies these principles to suggestions for adapting reading and mathematics materials, which are grouped into four categories: (1) providing direct assistance, (2) structuring lessons to promote learning from materials, (3) simplifying or supplementing existing materials, and (4) teaching strategies for using materials. (Contains approximately 50 references.) (DB)

This book offers teachers guidelines and suggestions for adapting and/or selecting materials for use with students with disabilities in general language arts, social studies, and science classrooms (grades 6 through 8). Following an introduction, chapter 1 offers a nine-step procedure for adapting materials from first, creating a plan for adapting materials, through fourth, determining the need for content adaptations versus format adoptions for adapting materials, to ninth, fading the adaptation when possible. The following three chapters offer examples of material adaptations including adapting existing materials, mediating existing materials, and selecting alternate materials. These 12 contributions are: (1) "Differentiated Textbook Instruction" (Steve Horton); (2) "The Quality Assignment Routine and the Quality Quest Planner" (Jean Schumaker); (3) "S.O.S.: Survey, Obtain Information, Self-Test" (Jean Schumaker); (4) "Content Organizers" (B. Keith Lenz); (5) "Concept Organizers" (Janis Bulgren); (6) "Mnemonic Adaptations" (Margo Mastropieri and Tom Scruggs); (7) "Problem-Solving Prompts for Performance Assessments" (Jerry Tindal); (8) "Title: The Survey Routine" (Jean Schumaker); (9) "Coherent Text Built around Big Ideas" (Bonnie Grossen); (10) "Reasoning and Writing" (Bonnie Grossen); (11) "Science Videodisc Media" (Bonnie Grossen); and (12) "Connecting Math Concepts, SRA, and Core Concepts Videodisc Programs" (Bonnie Grossen). (Individual sections contain references.) (DB)

Available from—Virginia Department of Social Services, Child Protective Services Unit, 730 East Broad Street, Richmond, VA 23219-1849; Tel: 804-692-1259 (\$1.65).

Pub Type—Guides - Non-Classroom (055)

EDRS Price – MF01/PC05 Plus Postage.

Descriptors—*Child Abuse, *Child Neglect, *Disabilities, Elementary Secondary Education, Interdisciplinary Approach, Interviews, Legal Responsibility, Predictor Variables, Prevention, Questioning Techniques, *Symptoms (Individual Disorders), *Teacher Responsibility Identifiers—*Child Abuse and Neglect Reporting

This booklet is designed to help Virginia special educators, law enforcement, and child protective service professionals recognize and understand abuse and neglect of children with disabilities; improve the reporting accuracy when there is suspicion of child abuse/neglect; and provide strategies for interdisciplinary collaboration that will facilitate a sensitive and effective response. Information is provided on: (1) the relationship between child maltreatment and disabilities; (2) risk factors; (3) indicators of abuse/neglect in children with disabilities; (4) disability types; (5) interview techniques; (6) Virginia child abuse and neglect laws; (7) definitions of child abuse/neglect; (8) issues and concerns about reporting; (9) procedures for making a report; (10) a brief explanation of what happens when a report is made; and (11) abuse/neglect prevention strategies for children with disabilities. An appendix includes a glossary of disabilities, information on the continuum of disabilities and developmental language skills, a prevention curricula for children

with disabilities, and a list of local social services departments. Contains 17 references. (CR)

Descriptors—Classroom Observation Techniques, Comparative Analysis, *Disabilities, Elementary Education, Grade 5, Grade 6, *Heterogeneous Grouping, *Inclusive Schools, Intermediate Grades, Interviews, Self Efficacy, *Teacher Attitudes, Teacher Behavior, *Teacher Effectiveness, Teacher Evaluation, Teacher Student Relationship, *Teaching Methods

This report describes the outcomes of a study that examined teacher efficacy in order to generate an exploratory and explanatory theory of teacher efficacy in the context of four heterogeneous fifth and sixth grade classrooms. It investigated how the four elementary teachers identified as being efficacious described the relationships between personal teaching efficacy and teaching and learning. An initial interview, three days of classroom observation and a follow-up interview were conducted with each teacher. Constant comparative analysis was used to concurrently collect and analyze the data. Findings indicated that at the core of the relationship between teacher efficacy and teaching and learning was the teacher's need for continual integration of beliefs and practices. To achieve congruence between beliefs and practices, the efficacious teachers in the study engaged in a continual process of constructing meaning in two essential areas: the quality of teacher relationships (primarily teacher-student relationships) and the effectiveness of instructional practices. The process by which meaning was constructed included creating and sustaining a positive classroom climate, engaging in reflective practices, and continual development of self. The teachers' ongoing use of inquiry and feedback provided the critical link between what meaning was constructed and how meaning was constructed. Contains 20 references. (CR)

Models, *Regular and Special Education Relationship, *Teacher Collaboration, Teamwork

This monograph presents the "Shared Responsibility Framework of Social Interaction for Collective Investment," which offers a perspective on social interaction in the process of change. The framework attempts to integrate the dynamic features of educational reform by attending to components linked with personal and collective investment in reform initiatives. Chapters address: (1) the context that surrounds the framework and learning themes that occur throughout the monograph; (2) the six-year historical development and implementation of one service delivery effort and the challenges encountered as the grant team sought to understand and contribute to the continuing improvement at this school; (3) issues related to the question of how individual and collective investment are affected by interaction patterns and community habits; (4) a description of the Shared Responsibility Framework of Social Interaction for Collective Investment; (5) the Interactive Communication Initiative for facilitating communication and cultivating investment; and (6) strengths and caveats of the model, and suggestions on application and research of the framework. The last chapter presents a responsive series of reflection questions designed to assist readers in applying aspects of the framework in their own school contexts. Each chapter includes references. Descriptors—*Disabilities, Elementary Secondary Education, *Inclusive Schools, Mainstreaming, *Regular and Special Education Relationship, *Teacher Collaboration

This monograph discusses the findings of two federally funded research projects that brought together university, school district, and state education personnel, along with families, to find ways to weave a tapestry of inclusion in the context of general education reform efforts. Among the lessons learned were that there are seven types of threads necessary to create a strong, lasting tapestry of inclusion. These necessary factors include: recognizing and helping others to recognize the contributions each child can make to the school community, commitment to being open to new ways of thinking and doing, recognition of the complexity involved in creating inclusive educational programs, awareness and focus on circle of influence rather than circle of concern, effective communication, courage to speak up in a considerate way, and effective collaboration. The monograph describes the importance of each of these factors, along with personal thoughts from parents, teachers, and students. A chart illustrates traditional and alternative service delivery paradigms. The monograph closes by urging schools to weave these threads to create a tapestry that both sets the stage for creating an inclusive school and sustaining these efforts on an ongoing basis. (CR)

Descriptors—*Ability Identification, *Academic Achievement, *Cluster Grouping, Elementary Education, *Gifted, Grouping (Instructional Purposes), *Homogeneous Grouping, *Instructional Effectiveness, Longitudinal Studies, Research Methodology, Teacher Expectations of Students

In this monograph, a causal-comparative, longitudinal study of cluster grouping at the elementary level is described and recommendations are made based on the findings. This study employed both quantitative and qualitative methodologies. The primary purpose of the study was to examine the effects of an existing cluster grouping program on the achievement and identification of students who participated in the program from third through fifth grade and to compare achievement with similar students who were not involved in a cluster grouping program. Descriptive and inferential statistics were used to address these areas. A secondary purpose of this study was to investigate the practices of the teachers who taught in the school using cluster

grouping to help provide insight into their classrooms and the school, which was done using qualitative follow-up methods. Results included more students being identified as high achieving during the three program years, achievement scores increasing within the school using cluster grouping, and a significant interaction between the treatment and comparison school in favor of the treatment school. Additionally, qualitative findings indicated that teachers used flexible grouping, gifted education strategies, had high yet realistic expectations of their students, and were involved in gifted professional development. Contains approximately 100 references. (Author/CR)

Descriptors—*Acceleration (Education), *Advanced Courses, *Flexible Progression, *Gifted, *Grading, High School Students, High Schools, Interviews, Questionnaires, Secondary Education, Student Evaluation, *Talent

Identifiers—*Waivers

This monograph discusses two studies that investigated weighting grades and waiving classes for gifted students. Data were gathered from 19 interviews with teachers, counselors and administrators in four high schools, questionnaires filled out by 189 high school administrators, 80 school policies on weighting grades and 19 policies on waiving classes, and attitudes of 15 college admission directors. Research results indicated that the majority of schools weighted some classes, although there is no consistency among schools as to which classes or grades are weighted. However, all schools which weighted grades had one thing in common: a commitment to defining excellence and to giving credence to what excellence means to them through the process of weighting grades. Respondents stated a correlation between their decision to weight grades and their interest in reinforcing able students to take demanding courses. The study on waiving classes also showed a lack of national consistency on how classes are waived. One constant did occur: no class is waived unless students show mastery of materials. When students are allowed to skip/wave lower-level classes such classes usually generate no credit and students are often required to take more advanced classes in the same academic discipline. (CR)

Descriptors—Case Studies, *Data Analysis, Data Collection, Databases, Decision Making, Educational Practices, Elementary Secondary Edu-

cation, *Evaluation Criteria, *Evaluation Methods, *Gifted, National Surveys, Program Development, *Program Evaluation, Research Design, Research Methodology

This report presents results of a series of studies documenting current practices in the evaluation of gifted programs and investigating the factors which make evaluation more useful to decision-makers. The investigation involved establishing several databases containing three kinds of information: (1) abstracts of articles relating to evaluation utility and the evaluation of gifted programs; (2) instruments that have been used by other school districts in the evaluation of gifted programs as well as reviews of these instruments; and (3) actual evaluations used across the nation to assess the effectiveness of gifted programs. Studies identified factors which improve the likelihood that results of an evaluation will be useful and will lead to development of a set of guidelines. Chapter 1 provides an introduction to the National Repository databases. Chapter 2 reviews the literature on program evaluation. Chapter 3 reports on a study of current practices in the evaluation of gifted programs. Chapter 4 presents case studies in program evaluation utilization in gifted programs. Chapter 5 offers a summary and conclusions. Ten appendices include tables, the scale developed for evaluation of the program evaluation instruments, a planning guide for program evaluation, the program evaluation guidelines, and the evaluation instruments database form. (Contains 55 references.) (DB)

Descriptors—Beginning Teachers, Curriculum Design, *Diversity (Student), Elementary Secondary Education, *Gifted, Higher Education, *Individualized Instruction, Intervention, *Preservice Teacher Education, Preservice Teachers, Qualitative Research, *Student Teaching, Teaching Methods, Workshops

Identifiers—Differentiated Curriculum (Gifted)

This report presents findings of a three-year study to examine how preservice teachers develop an awareness of the needs of academically diverse learners, including gifted students, and implement and/or modify instruction to meet those needs. Preservice teachers were assigned to one of two treatment groups: either participation in an interactive full-day workshop on differentiation (n=22) or participation in the workshop and work with a curriculum coach during student teaching (n=23). Both groups and a comparison group who received neither treatment were followed through their first year assignments as regular class teachers. Qualitative analysis revealed several themes: (1) preservice teachers used ambiguous criteria for identifying student differences and needs; (2) preservice teachers expressed limited knowledge concerning differentiating instruction and demonstrated limited strategies for differentiation; (3) preservice teachers were influenced by factors, such as the structure of the school curriculum, which complicated and discouraged understanding and addressing student differences and needs; (4) participants in both intervention groups expressed a consistent concern with differentiation as part of their teaching goals and the intervention provided a starting point for changing practice. The curriculum coach was most effective

when the coaching was compatible with the practices of the cooperating teacher or the university supervisor. Contains approximately 150 references. (DB)

Descriptors—*Cognitive Style, Construct Validity, Creativity, Elementary Secondary Education, *Gifted, Labeling (of Persons), Learning Theories, *Teacher Student Relationship, Teaching Models, *Theory Practice Relationship

Identifiers—*Sternberg (Robert), Triarchic Theory of Intelligence (Sternberg)

This report describes four projects that apply Robert J. Sternberg's theories to various aspects of giftedness and gifted performance. Project 1, a construct validation and educational application of Sternberg's triarchic theory of human intelligence, revealed that students who are instructed and whose achievement is evaluated in a way that matches (at least partially) their profile of abilities will perform better in school than children who are mismatched. Project 2, which examined the construct validity of Sternberg's theory of mental self-government, found that teachers tend to: (1) evaluate more positively students who match their own profile or style and (2) overestimate the extent to which students match their own style of thinking. Project 3, construct validation of Sternberg and Lubart's investment theory of creativity, found that creative individuals are people who "buy low and sell high" in the world of ideas. Project 4, an investigation of Sternberg's pentagonal implicit theory of giftedness, found that society labels people as gifted to the extent that the people meet five criteria: excellence, rarity, productivity, demonstrability, and value. Overall, the four projects reveal the value of a theory-based approach to understanding giftedness. Each of the four parts contains references. (Author/DB)

Descriptors—*Ability Identification, *Academic Achievement, *Black Students, Data Analysis, *Gifted, High Achievement, High Schools, Incidence, Interviews, Middle Schools, Parent Influence, Student Attitudes, *Underachievement

Identifiers—*African Americans

This report presents results of a cross-sectional study of achievement and underachievement in middle and high school (grades 6 to 9) African-American students in five mid-Atlantic school districts in 1995. Interviews with 152 African-American students, of whom 44 were identified as gifted,

were conducted. Students were asked about their perceptions of factors that negatively or positively affect their achievement. Nine variables were investigated: racial/ethnic identity, test anxiety, attitudes toward school subjects, support for the achievement ideology, perceptions of the learning environment, and the influence of psychological, social, and cultural/familial factors. Regression analysis identified 62 students as underachievers and 87 as achievers. Half of the males and 37 percent of the females were underachieving. Comparison of three academic groups (gifted, potentially gifted, and average students) and two achievement levels (achievers and underachievers) found that 11 percent were gifted underachievers, 18 percent were gifted achievers, 18 percent were potentially gifted underachievers, 27 percent were potentially gifted achievers, 12 percent were average achievers, and 13 percent were average underachievers. The variables which discriminated best among these groups were: (1) students' attitudes toward reading, math, and science; (2) students' perceptions of parental achievement orientation; and (3) students' own achievement ideology. The interview protocol is attached. Contains 80 references. (DB)

Descriptors—*Ability Identification, Databases, Elementary Secondary Education, Evaluation Methods, *Gifted, *Measures (Individuals), Referral, Screening Tests, Standardized Tests, Standards, Student Evaluation, *Talent, *Talent Identification

This report presents findings of a study of instruments used in the identification of gifted and talented students. The study first examined the published literature, both standardized and locally developed identification instruments and procedures, and strategies used to identify underserved populations. These data were catalogued in the National Repository computer database. The study then reviewed standardized instruments using the "Scale for the Evaluation of Gifted Identification Instruments" for each construct of giftedness named by schools and these reviews were entered into the database. A review of identification procedures led to the compilation of standards for identification. Finally, data were collected on three locally developed instruments with potential for providing unique types of data for screening and identifying talent: the "Diet Cola Test" (better for program evaluation than identification); the "Peer Referral Form" (high reliability and useful with Hispanic populations); and the "Teacher Search List" (reliable in assessing middle school students). Among seven appendices are the database order form, sample database output, a listing of instruments reviewed, the "Scale for the Evaluation of Gifted Identification Instruments" and the "Peer Referral Form." Contains 102 references. (DB)

Identifiers—ERIC Digests, *Individuals with Disabilities Education Act

This digest analyzes the definitions of disability in the Individuals with Disabilities Education Act (IDEA). It notes that, in order to be eligible for special education services under the act, the child must meet two criteria: (1) he/she must have one or more of the specific disabilities listed in the act, and (2) he/she must require special education and related services. Definitions of the following specific disabilities listed in the act are included: autism, deafness, deaf-blindness, hearing impairment, mental retardation, multiple disabilities, orthopedic impairment, other health impairment, serious emotional disturbance, specific learning disability, speech or language impairment, traumatic brain injury, and visual impairment, including blindness. Requirements under IDEA for multidisciplinary evaluation and the inclusion of students with disabilities in regular classrooms whenever possible are also briefly noted. (DB)

Descriptors—Attention Deficit Disorders, Behavior Problems, Classroom Environment, *Classroom Techniques, Elementary Secondary Education, Inclusive Schools, Individualized Instruction, Learning Disabilities, *Neurological Impairments, Special Health Problems, *Student Characteristics, Student Needs

Identifiers—ERIC Digests, *Tourette Syndrome

This digest provides basic information on Tourette Syndrome (TS) as well as guidelines for appropriate classroom accommodations. It reports that about 100,000 Americans have diagnosed TS with symptoms including multiple motor and vocal tics; frequent (daily) occurrence of bouts of tics; periodic changes in the number, frequency, and severity of the tics; and onset before age 18. The paper notes commonly associated behaviors including obsessions, compulsions and ritualistic behaviors, attention deficit disorder, learning disabilities, and difficulties with impulse control. Tips for establishing the proper learning environment include giving permission to leave the classroom when tics become overwhelming and working with other students to minimize ridicule and teasing. Specific accommodations are also suggested for writing problems (such as cutting down on required copying), language problems (such as giving directions only one or two steps at a time), and attention prob-

lems (such as seating the child in front of the teacher to minimize the visual distraction of classmates). (DB)

Tirri, Kirsti Pehkonen, Leila

The Moral Reasoning of Adolescents Gifted in Science: A Case Study.

Pub Date—1998-09-18

Note—11p.; Paper presented at the ECHA Conference (Oxford, United Kingdom, September 1998).

Pub Type—Reports - Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Abstract Reasoning, Adolescents, Case Studies, Foreign Countries, *Gifted, *Logical Thinking, *Moral Development, *Moral Values, *Sciences, Secondary Education

Identifiers—Finland

This study investigated the moral reasoning of 17 Finnish adolescents (ages 14,15) gifted in science. Students completed tests of their scientific and moral reasoning and wrote essays on moral dilemmas in science and everyday life. On the test of moral reasoning, the students' average score was that of the average 18-year-old. On the test of logical reasoning, students scored within the highest 10 percent of their age group. Students wrote essays on scientific moral issues of their choice. The theme most often written about dealt with archaeological research in graves. Students most often used a utilitarian argument in their scientific reasoning. Essays on moral dilemmas in daily life identified teachers' unjust behavior as the most commonly chosen theme. Students most often used a deontological argument (emphasizing the ethics of duties) in reasoning about everyday moral issues. Results suggest that gifted adolescents use different kinds of principles in solving moral dilemmas in science and everyday life. Results may explain the negative correlation found between scores on the tests of logical reasoning and moral reasoning. Contains 13 references. (DB)

Technology: An Enrichment Tool for the Gifted Student.

Pub Date—1998-00-00

Note—11p.

Pub Type—Information Analyses (070)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Appropriate Technology, *Computer Software, Computer Uses in Education, Curriculum Development, *Educational Technology, Elementary Secondary Education, *Enrichment Activities, *Gifted, Selection, *Talent, World Wide Web

Identifiers—Web sites

This paper discusses the use of technology in gifted students' curriculum, methods that have been successfully used in classrooms, and the wealth of technological resources available to both the teacher and student. The paper describes how technology has been used to teach science, art, and enhance other subjects. Internet Web sites and various types of software for enrichment are presented. Identifiers—*Montana

This book with an accompanying 21-minute videocassette is designed for schools and communities who want to change mathematics and science education to address the needs of students with disabilities. After an introduction that describes educational reforms in Montana, chapters include: (1) "Opening Up to All Learners," which discusses the definition of a student with special needs, problems with pulling-out students, and including all students in the general education classroom; (2) "Teaching to All," which describes the Systemic Initiative for Montana Mathematics and Science (SIMMS) that creates innovative, comprehensive curriculum for 9-12 mathematics and provides teacher support through preparation, professional development, and training in technology; (3) "Projects for All," which describes the Six through Eight Mathematics project that is developing a curriculum which incorporates standards promoted by national mathematics and science organizations for middle school students, the Systemic Teacher Excellence Preparation program and the Reach for the Sky program which teach rural teachers how to access information available on the Internet; and (4) "Creating Change," which describes how to create changes in community schools. The accompanying videotape profiles programs that reach out to students with special needs, including inclusive middle and high school classes. (CR)

This report examines policy issues related to the preparation of educators working with children who are blind or visually impaired. Forty-five state directors of special education were surveyed on the status of personnel serving children with blindness and low vision, recruitment and retention efforts, certification and credentialing, accuracy of "child count" reports, and collaboration for personnel preparation. Results indicate: (1) the majority of respondents place a high priority on personnel shortages of teachers of children with visual impairments, orientation and mobility instructors, and teachers of children with deaf-blindness; (2) only 56 percent of respondents indicated that their efforts to minimize shortages were satisfactory; (3) strategies used to reduce shortages include distance education, stipends for course work, scholarships and tuition reimbursements, prioritization of low incidence personnel preparation, inclusion in state improvement plan/grants, reciprocity agreements, Department of Education support of personnel preparation positions, and collaborative programming and funding activities with institutions of higher education (IHEs); (4) only 44 percent of respondents reported their state has a specialized program to prepare personnel for these positions; (5) the majority of respondents believe that the child count data are accurate; and (6) many states are finding it helpful to collaborate with IHE in combating personnel shortages. This document summarizes the key issues discussed at a "Listening Session" on the topic of alternative schools, held on December 8, 1998. The session was convened at the request of the Secretary of Education, Richard Riley, and included practitioners, researchers, administrators, policy makers, and teacher trainers from across the country who have had significant experience in the area of alternative schools and programs. Key issues included: (1) the importance of comprehensive efforts to prevent students from dropping out of school or behaving in a way that gets them kicked out; (2) the need for a continuum of alternative intervention ranging from close monitoring of a student's attendance to placement in a separate school designed to accommodate students whose behavior interferes with having a successful experience in school; and (3) the need for effective alternative intervention programs and for schools to employ qualified and caring staff who have specialized education and experience in the areas of preventive strategies and managing challenging behaviors, appropriate academic credentials, and a desire to work with the students in these settings. Barriers and challenges to effective alternative programs and schools are discussed, along with indicators of effectiveness. The document closes with a list of recommendations for federal support. This issue brief was developed as part of the Consortium on Inclusive Schooling Practices' framework for standards-based systemic reform. The brief focuses on one of the six major policy areas identified by the Consortium, professional development. It first discusses the concept of teachers as lifelong learners, then explores professional development practices to support inclusive schools, and finally describes the move toward inclusive professional development. Three tables summarize information on: (1) how adults learn; (2) essential policy and procedural questions concerning professional development; and (3) issues to consider in preparation for collaborative teaching relationships. The brief concludes with identifying key professional development issues to address at the local level (such as developing teacher and administrator competencies in responding to the needs of all students) and the state level (such as supporting joint professional development opportunities for special and general education personnel). Identifiers—*Combined Health Information Database

This information packet presents materials which focus on early identification of hearing impairment in infants and young children to prevent speech and language delays. A glossary of terms is followed by a summary of results of the National Institutes of Health Consensus Development Conference (1993) concerning early identification of hearing impairment in infants and young children. The next item is a statement of recommendations of the National Institute on Deafness and Other Communication Disorders working group on early identification of hearing impairment and addresses acceptable protocols for use in state-wide universal newborn hearing screening programs. The packet also includes two article reprints: (1) "Early Screening: A Promise for the Future" (Lorraine Short); and (2) "Hearing and the Development of Language and Speech" (Leo V. Deal and William H. Haas). A list of 10 additional resource organizations follows. Next are answers to seven frequently asked questions about Combined Health Information Database information searches. An abstract bibliography of 25 items completes the packet. Contains 25 references. (DB)

Identifiers—Americans with Disabilities Act 1990, *National Council on Disability

The annual report of the National Council on Disability (NCD) describes major activities of 1998 to promote policies, programs, practices, and procedures that guarantee equal opportunity for all individuals with disabilities, regardless of the nature or severity of the disability. NCD's major activities for 1998 are grouped into four areas: (1) broadening participation of youth and minorities with disabilities in the policy process (e.g., hearings on culturally diverse populations and on children and youth with disabilities from minority and rural communities); (2) working to monitor and improve enforcement of civil rights laws for people with disabilities (e.g., commemoration of the Americans with Disabilities Act anniversary and a statement on discipline of students with disabilities); (3) working to reorient public programs to support work (e.g., the Presidential Task Force on Employment and communication with the Rehabilitation Services Administration); and (4) bringing disability perspective to generic policy discussions (e.g., reports

on disability policy and research and the United Nations International Day of Disabled Persons). Also noted are congressional testimony provided by NCD, information gathering and dissemination activities, NCD representation, and NCD quarterly meetings. Appendices include NCD member and staff biographies, a list of NCD publications, and the NCD mission statement. (DB)

Identifiers—African Americans, *Disproportionate Representation (Spec Educ), Latinos, *Minnesota

This document is the report of one phase of a Minnesota study to examine the problem of misrepresentation and overrepresentation of African American, American Indian, and Latino students in special education. This phase of the study involved eight professional focus groups who examined four broad areas: factors contributing to minority misrepresentation; current material and human resources available; promising solutions to minority misrepresentation; and development of an action plan. The groups were designed to represent all three minority cultural groups as well as various geographic locations in the state, rural and urban areas, and various professional roles in the disability area. Focus groups addressed questions concerning what works, what doesn't work, what the contributing factors are, and what needs to be done. All focus groups emphasized the need to promote cultural awareness and sensitivity among education personnel. An action plan was developed with five objectives: (1) to promote awareness of cultural and social dynamics that affect school achievement; (2) to develop and implement effective home and school communication links with minority families; (3) to promote practices which increase the availability of minority staff at all levels of the educational system; (4) to clearly define the roles and responsibilities of regular and special education in the provision of services to minority students; and (5) to develop and implement assessment models and identification which meet the needs of minority students. An annotated bibliography is attached. Contains 28 references. (DB)

Identifiers—African Americans, *Disproportionate Representation (Spec Educ), Latinos, *Minnesota

This document is the report of one phase of a Minnesota study to examine the problem of misrepresentation and overrepresentation of African American, American Indian, and Latino students in special education. Phase 2 of the study involved seven focus groups comprised of minority parents throughout rural and urban areas of Minnesota. Focus groups addressed questions concerning what works, what doesn't work, what the contributing factors are, and what needs to be done. All focus groups felt that individualized instruction and support services provided in a small classroom setting were two of the most effective aspects of special education. Most participants also expressed strong support for the Individual Education Program process, the value of staff training in cultural awareness, and activities to promote parent involvement. Specific group emphases included: discrimination and racism (African American); the lack of communication between home and school (American Indian); and the lack of cultural awareness and sensitivity (Latino). Comparison with outcomes of the professional focus groups of Phase 1 found that both professionals and parents supported tutorial and small group instruction and staff training in cultural awareness as effective. However, where professionals emphasized the use of a team approach to decision-making, parent groups indicated they rarely saw themselves as contributing members of their child's educational planning team. Contains 37 references. (DB)

Identifiers—*Disproportionate Representation (Spec Educ), *Minnesota

This document is the report of one phase of a Minnesota study to examine the problem of disproportionate representation in special education of African American, American Indian, Latino, and Asian American students. Phase 3 of the study focused on factors which have led to the underrepresentation, rather than overrepresentation of Asian American students in special education. Two focus groups were conducted, one of professionals who serve Asian American populations and the other of parents of Asian American students with disabilities. Focus groups addressed questions concerning

what works, what doesn't work, what the contributing factors are, and what needs to be done. Two main themes were found in responses of both groups concerning "what works": first, the importance of involving parents in the special education process and, second, the due process system approach to ensuring input from parents. Themes concerning what doesn't work that contribute to disproportionate representation focused on the complexity and overall effectiveness of the system; referral and assessment practices; differing cultural perceptions; language barriers; and lack of knowledge by parents of due process rights. Concerning what needs to be done, the groups stressed training initiatives for both parents and education staff, a need for parent advocates to facilitate home school communication, and more community outreach efforts. Appended are a summary of key issues from the study's three phases, the action plan of Phase 1 and 2, and an annotated bibliography. Contains 46 references. (DB)

Identifiers—*Connecticut

This guide offers assessment and intervention guidelines for the Connecticut Birth to Three system concerning the emotional and psychological well-being of infants and toddlers in the system. Emphasis is on infants and toddlers who exhibit symptoms of traumatic stress disorder, depression or other affective disorders, regulatory disorders, sleep and eating disorders, and disorders of relating and communicating. Guidelines address the definition of infant mental health; stages of social and emotional development (from birth to 8 months, from 9 to 16 months, and from 16 to 36 months); integrated approaches to healthy emotional and social development; assessment, including recommended areas for assessment and diagnostic guidelines for infant mental health; and services and resources including those available to all families in the Birth to Three system, services for children with identified mental health needs, and other family programs and support services. Training needs for early interventionists are also identified. Appendices include the Birth to Three System mission statement, statements from the Connecticut Progress Council and the Connecticut Department of Education, a list of instruments useful in examining social and emotional development, a list of agencies and services in Connecticut to help families of children with emotional and behavioral disorders, and an outline of training outcomes and content. Contains 22 references. (DB)

Descriptors—Delivery Systems, Elementary Secondary Education, Ethics, Integrated Services, *Learning Disabilities, *Minimum Competencies, *Paraprofessional School Personnel, Post-secondary Education, *Professional

Development, Program Development, *Staff Role, *Supervision, Teacher Role

Identifiers—National Joint Committee on Learning Disabilities

This paper provides a framework for use by education agencies in developing rules and guidelines for use of paraprofessionals within programs serving individuals with learning disabilities, by post-secondary institutions and related agencies in developing education and professional development programs, and by administrators and teachers/service providers responsible for developing comprehensive systems of services. It addresses: (1) principles for a foundation for successful paraprofessional services; (2) ethical responsibilities; (3) educational requirements for paraprofessionals; (4) roles and responsibilities of paraprofessionals in a learning disabilities program; (5) activities outside the scope of responsibilities for paraprofessionals; (6) responsibilities of the qualified teacher/service provider with regard to use of a paraprofessional; and (7) guidelines for supervision of paraprofessionals. Appendices include recommended competencies for paraprofessionals and recommended competencies for the qualified supervising teacher/service provider. (CR)

Descriptors—Elementary Secondary Education, Family Influence, *Gifted, *Performance Factors, *Student Motivation, *Teacher Role, Teacher Student Relationship, *Underachievement

This brochure for educators discusses underachievement and gifted students. The causes of underachievement are reviewed, which include parents who do not stress the importance of academic achievement and do not set high standards, divorce or strained relations between the family members, peer group pressure, an unchallenging and unmotivating curriculum, teachers who do not appreciate or recognize the student's unique talents and abilities, and gifted students who may not believe that they can do well. Strategies that teachers can use to reverse the underachievement process are outlined, such as: (1) ensure that opportunities are provided for academic challenge within the classroom; (2) provide opportunities for students to pursue topics of interest through independent projects; (3) help underachieving students set realistic goals that they can eventually reach; and (4) encourage students to pursue out of school interests. What Educators Need To Know about Bilingual Students and...Talent Development. Practitioners' Guide A9713.

National Research Center on the Gifted and Talented, Storrs, CT.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—1995-00-00

Note—6p.

Available from—National Research Center on the Gifted and Talented, University of Connecticut, 362 Fairfield Road, U-7, Storrs, CT 06269-2007.

Pub Type—Guides - Non-Classroom (055)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Bilingual Students, Bilingualism, Cultural Awareness, Educational Assessment, Elementary Secondary Education, *Enrich-

ment Activities, Family Role, *Gifted, Mentors, Student Evaluation, *Talent, *Talent Development, *Teacher Role, Teacher Student Relationship

This brochure for educators discusses bilingual children and talent development. It defines the optimal level of bilingualism as balanced bilingualism, in which the bilingual student shows age-appropriate abilities and feels at ease in both languages. At this level bilingual children may be more flexible in their thinking mainly because of the constant switching and awareness of using both languages. It is stressed that the development and nurturance of both languages is needed to contribute to talent development in all domains. Educators are urged to: (1) provide a learning environment that encourages bilingualism, values cultural differences, and supports these students' expressions of their strengths and interests; (2) show positive and high expectations of their bilingual students as well as an awareness of the family culture; (3) use flexible and diverse assessment procedures for the identification of cognitive strengths, abilities, interests, and learning styles of bilingual students; (4) establish programs that provide enrichment opportunities in both languages to promote talent development; (5) allow students to develop individual and group projects by selecting an interest topic or area of study; and (6) encourage family and community members to participate as facilitators of enrichment clusters, and exploratory and investigative activities, and as mentors. Descriptors—Adolescents, *Attention Deficit Disorders, Children, *Clinical Diagnosis, *Creativity, *Gifted, *Hyperactivity, Parent Role, Psychological Evaluation, *Symptoms (Individual Disorders)

This brochure for educators and parents discusses gifted children, creativity, and attention deficit hyperactivity disorder (ADHD). The overlapping symptoms of ADHD and creativity are identified, which include: inattention, hyperactivity, impulsivity, difficult temperament, deficient social skills, and academic underachievement. The possibility of a misdiagnosis of ADHD is stressed and recommendations for teachers and parents are provided. Educators and parents are urged to learn as much as possible about diagnostic criteria for both creativity and hyperactivity, observe and record which conditions intensify or reduce the key diagnostic signs, and ask a disruptive or daydreaming child what he or she is thinking about right after the occurrence. If the child is referred for psychological screening, it is recommended that parents choose a psychologist who either knows about giftedness and creativity as well as ADHD or who is willing to learn. If a child is diagnosed as having ADHD, parents are urged to seek a second opinion, consider medication very carefully, and make a special effort to provide opportunities both within and outside of school to enhance creativity and build self-esteem. Descriptors—*Admission (School), Admission Criteria, *Charter Schools, *Disabilities, Educational Legislation, Elementary Secondary Education, Federal Legislation, Financial Support, National Surveys, Policy Formation, School Districts, *Special Education, *State Regulation, Student Rights, Supervision

This report reviews state policy documents, other than state laws, that pertain to students with disabilities in charter schools. It includes background information on charter schools in general and relevant federal legislation, a report of a survey on state policy documents, and a discussion of four areas of critical issues related to this topic. The survey was conducted in the spring of 1998. It revealed that about half of the states reported having no written policy document relating to students with disabilities in charter schools. In addition, it is apparent that little, if any, thought was given to conflicts between charter school statutes and existing special education requirements prior to the passage of any state's legislation allowing for the establishment of charter schools within the public education system. The major areas of policy identified and discussed are: (1) the meaning and implications of a charter school's status as a local education agency; (2) the monitoring of charter schools for compliance with special education requirements; (3) funding for students with disabilities in charter schools; and (4) the interface between special education requirements and charter school admission policies. This document also contains two appendices—a summary of existing state charter school regulations and a list of the state policy materials used in the study—and 13 references. (Author/CR)

Descriptors—*Attention Deficit Disorders, *Classroom Techniques, *Clinical Diagnosis, *Disability Identification, Drug Therapy, Educational Strategies, Elementary Secondary Education, *Family Environment, *Intervention, Outcomes of Treatment, Symptoms (Individual Disorders)

This 28-minute videotape discusses the diagnosis and treatment of children with attention deficit disorder (ADD). Psychiatrists John Ratey and Ned Hallowell provide background and perspective on the problem of ADD in children. The video shows how ADD is diagnosed, and describes a number of treatments. It follows children with ADD, both on and off medication, at home and at school, and discusses ways to restructure these environments to better support children with ADD. An alternative school program for young people with ADD is also profiled. (CR)

Children's Literature about Disabilities Enhancing Multicultural Education in Elementary Schools.

Pub Date—1998-00-00

Note—13p.

Pub Type—Information Analyses (070)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Childrens Literature, *Disabilities, Elementary Education, *Evaluation Criteria, *Multicultural Education, *Peer Acceptance, *Reading Material Selection Identifiers—*Multicultural Literature

This paper describes the use of unbiased stories featuring children with disabilities as a part of presenting a multicultural perspective in elementary schools. It emphasizes that the inclusion of a multicultural perspective will help teach social acceptance rather than separation, and laments that current children's books about disabilities tell little about true experiences of people with disabilities and have had the ultimate effect of dehumanizing the people. Teachers are urged to use their creativity to provide meaningful, literature-based experiences and to promote discussion from the content of the story into other areas of the curriculum. Criteria for selecting books featuring characters with disabilities are provided and include avoiding books when characters are portrayed as clumsy, foolish, evil, or malicious, and selecting books in which people with disabilities are portrayed as individuals with similarities and differences to typical peers. (Contains 14 references.) (CR)

Identifiers—ERIC Digests, Individuals with Disabilities Education Act

This digest discusses the need for troubled students to receive rehabilitative services instead of haphazard punishment, then outlines sources of frustration for aggressive students and stages of frustration (anxiety, stress, defensiveness, physical aggression, and tension reduction), and appropriate responses. Teachers are advised to prevent antisocial behavior by using available curriculum to divert antisocial children from a path leading to adjustment problems by tailoring interventions to students who show at risk status with individual counseling and one-on-one behavior management plans and providing wraparound services that extend beyond the school building to encompass family and social support services. The digest also provides strategies to cope with students with aggressive and violent tendencies, including: (1) practice for a crisis; (2) train all staff to respond to student aggression; (3) dress appropriately by wearing low heels, loose-fitting garments, and omitting dangling earrings and sharp jewelry; (4) move items of value out of reach; (5) establish trust and rapport with students; (6) define behavioral expectations

and apply consequences for rule compliance and noncompliance; (7) remain calm and in control; and (8) maintain a therapeutic attitude. The digest closes by reviewing relevant requirements under the Individuals with Disabilities Education Act. (CR)

Identifiers—*Behavioral Assessment, ERIC Digests, *Functional Assessment, Individuals with Disabilities Education Act

This digest discusses the new requirement under the Individuals with Disabilities Education Act that Individualized Education Program teams conduct a functional behavioral assessment (FBA) and implement behavior intervention plans that include positive behavioral interventions and supports for students with disabilities. It describes the purpose of a functional assessment and outlines key steps that are common to most FBAs, including: (1) verify the seriousness of the problem; (2) define the problem behavior in concrete terms; (3) collect data on possible causes of problem behavior; (4) analyze the data; and (5) formulate and test a hypothesis. The digest then addresses behavior intervention plans and the need to implement intervention plans that emphasize skills needed by the student to behave in a more appropriate manner and that provide proper motivation. Tips for evaluating the plan are also included. (CR)

grams, Program Design, Program Implementation, School Community Relationship, School Involvement, School Responsibility, *School Role

This is the third volume in a series of monographs from the Comprehensive Community Mental Health Service for Children and Their Families Program, which currently supports 41 comprehensive system of care sites to meet the needs of children with serious emotional disturbances (SED). This volume explores sites that are overcoming obstacles to educating children with SED and establishing successful school-based systems of care. Chapter 1, "Background: Children with Serious Emotional Disturbance, Schools, and Systems of Care," discusses promoting practices that involve education in a system of care and meeting the needs of children with SED in school. Chapter 2, "Program Descriptions," describes the South Philadelphia Family Partnership, the East Baltimore Mental Health Partnerships School-Based Program, and Project REACH in Rhode Island. Chapter 3, "Cross-Site Findings: Practices and Lessons for Developing a System of Care," discusses principles of effective school-based systems of care, design features of effective systems, and approaches to implementing an effective school-based system of care. Chapter 4, "Overcoming Barriers To Establishing Comprehensive, Collaborative Systems of Care," reviews barriers such as school structure, decision-making, mandates, financial support, and accountability. Chapter 5 reviews necessary components to creating a system of care. Two appendices contain program contact information and materials, and the National Agenda for Achieving Better Results for Children and Youth with Serious Disturbance. (Contains approximately 80 references.) (CR)

This is the fourth volume in a series of monographs from the Comprehensive Community Mental Health Service for Children and Their Families Program, which currently supports 41 comprehensive system of care sites to meet the needs of children with serious emotional disturbances (SED). This volume identifies the essential elements of wraparound services, provides a meta-analysis of the research previously done on the topic, and examines how three sites are turning wraparound into promising practices in their system of care. Chapters address: (1) the history of the wraparound process, including significant legal cases, programmatic roots of the wraparound process, community involvement concepts, and the rapid growth of wraparound; (2) the conceptual framework for wraparound, including the 10 essential elements and 10 requirements for implementation of wrap-

around at the practice level (requirements for a referral mechanism, resource coordinators, formation of the child and family teams, and an interactive team process and formation of partnerships to develop individualized plans); (3) 3 wraparound model sites; (4) the findings of the state/territory wraparound survey (n=55) that indicate 88 percent are providing wraparound services; (5) training and quality monitoring; and (6) case studies of wraparound services. Appendices include values and principles for the system of care, wraparound survey of state child mental health directors, and potential elements essential to the wraparound process. (Contains approximately 50 references.) (CR)

Identifiers—American Institute of Architects

The failure of the "open classroom" concept of the 1960's has not diminished the need for researchers to continue to look at learning and teaching to better understand how educational spaces can be improved for everyone that uses them. This document summarizes presentations made at the 1997 American Institute of Architects (AIA) conference on the importance of school design to those who work and learn within them. The following topics are covered: the learning process; educational technology; storage space; space allocated to other professionals visiting schools and the general community; changes in school design brought on by educational change and facility uses; and use of natural lighting. An additional presentation examines one school's efforts in meeting the diverse needs now demanded of it. A concluding section provides a list of resources resulting from a search of the AIA library and archives that address K-12 schools and architecture. (GR)

Identifiers—American Institute of Architects

The American Institute of Architects convened a 1997 conference to explore the issues specific to designing specialties in educational facilities

caused by educational reform's emerging methodologies and teaching philosophies. This document discusses the presenter's views of these issues in the following areas: creating engaging learning environments for a technology savvy student body; reforming educational curricula to meet 21st century job demands; planning educational facilities, performance spaces, libraries, and media learning centers that include participation from and consideration of its users; and the growing presence of new media technology into the learning environment. Final comments address how specialties in educational facilities are changing the architectural profession. (GR)

Financing Facilities in Rural School Districts.

Pub Date—1998-05-00

Note—34p.; Paper presented at the Invitational Conference on Rural School Facilities (Kansas City, MO, May 1-2, 1998).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Comparative Analysis, *Educational Finance, Elementary Secondary Education, Government School Relationship, *Public Schools, *Rural Schools, School District Size, *School District Wealth, School Funds
Identifiers—*Arkansas

While education is an important legal function of state government, a major portion of school facility funding is still at the local level, and the quality of school buildings varies across most states. This paper addresses how rural school facilities are financed. It provides an overview of school facilities funding in the United States as summarized by the literature, a mini study of school facilities funding in Arkansas, and comments from practitioners and researchers on the issues presented. It argues that the same equity issues raised on expenditure per pupils and equal educational opportunity should be raised in school facility funding too; and educational quality, including that of school facilities, should not rely on the wealth of the local community. Arkansas, one state that does depend on local wealth for the quality of school buildings, is examined in terms of its great diversity between quality and ability to support school facilities. The paper explains the multiple school funding problems faced by Arkansas' rural, small school districts, such as district size and the size of a supportive tax base and how these problems contribute to a wide range of allowable amounts of state aid available to rural versus urban school districts, thus creating vast quality differences in school facilities. Descriptors—Administrator Attitudes, Educational Needs, Elementary Secondary Education, *Equipment, *Food Service, *Public Schools, Staff Development, *Surveys

Identifiers—*Dietary Guidelines For Americans

A multi-year project was initiated to examine production equipment issues related to implementation of the Dietary Guidelines for Americans (DGA). The purposes of the research project were to determine foodservice directors' opinions regarding use and appropriateness of equipment in school

foodservice, to identify the number and variety of menu items offered in elementary, middle/junior high, and high schools, and to examine the foodservice equipment currently available in school kitchens. A mail questionnaire was sent to a national, random sample of 4000 school foodservice directors; 2245 (fifty-six percent) returned the questionnaire. Findings reflect an increased awareness of preparing school meals that implement the nutrition principles of the DGA, and that a greater percentage of schools are offering menus with more meal choices. Additionally, data show that 96% of the directors rated convection ovens the highest among 31 food service equipment items as appropriate for implementing the DGA, and 89% agreed that there was a need for greater refrigerated space when fresh fruits and vegetables are offered. The report recommends greater training on appropriate equipment for implementing dietary guidelines, more research on the type and amount of additional space needed by expanding menu choices to meet the DGA, and that the National Food Service Management Institute establish a partnership with the North American Association of Food Equipment Manufacturers to develop strategies for educating food service directors about new food preparation equipment. An appendix provides the Equipment Issues Questionnaire. (GR)

Descriptors—Elementary Secondary Education, *Energy Conservation, *Energy Management, *Food Service, *Guidelines, Public Schools
Identifiers—*Cost Containment

Energy cost management is important in all school food service operations, particularly at times when rising energy costs threaten budgets. This document is designed as a reference manual on energy and provides information about monitoring energy use and developing energy improvement and conservation plans. The manual offers energy conservation ideas at two levels for existing school food service production and service: (1) non-technical and low cost enhancements; and (2) capital investment and systems changes. The manual is adaptable to the needs of food service managers so they can more easily and efficiently run their operation by learning how to organize an energy planning team as well as conduct audits of utility bills in order to lower production costs. Concluding sections provide a glossary of terms and equations, sample energy records forms, and technical information regarding reading utility company meters and BTU Rating lists for various equipment. Descriptors—*Architects, *Construction Management, *Consultants, Directories, *Educational Facilities Planning, Elementary Secondary Education, Public Schools, School Construction

Identifiers—Council of Educational Facility Planners Intl

The Council of Educational Facility Planners, International has published a directory to serve as a resource to school districts, colleges and universities, and others who seek professional assistance in some phase of educational facility work. The directory is organized into the following two sections: a list of firms by region and specialization; and an alphabetical listing of each firm including a personal statement reflecting the firm's philosophy, experience, and approach to educational facility projects, and a description of their areas of specialization. An index of company names is included. (GR)

Charter School Facility Financing: Constraints and Options. A Study for the Massachusetts Charter School Resource Center. Pioneer Inst. for Public Policy Research, Boston, MA.

Pub Date—1998-02-00

Note—27p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Charter Schools, Educational Legislation, Elementary Secondary Education, *Financial Support, *Money Management, Public Schools, School Administration, *School Funds

In 1991, the charter school movement began in Minnesota and since then, 28 more states and the District of Columbia have passed similar versions of charter school law. This paper examines a facility planning model designed to help charter schools maximize their chances of succeeding in the effort to secure permanent facilities. The model includes a facility feasibility element that sets the scale and quality towards which project charter schools can, and should, realistically aim to accomplish; an occupancy cost element that determines the level of total facility cost charter schools can, and should, bear; and a credit standards element that determines key financing and operating criteria that charter schools must be willing and able to meet to acquire permanent facilities through either leases or mortgages. The paper also includes a summary of leading facility financing arrangements currently in use by charter schools, and presents recommendations for enhancing charter school facility financing alternatives to benefit more charter schools and to

advise prospective facility financing providers. (GR)

Identifiers—*Educational Facilities Evaluation

The Design Assessment Scale for Elementary Schools (DASE) assists educators and architects in planning and designing developmentally appropriate learning environments for elementary schools. This article examines DASE, its introduction and development, the first step in the instrument's validation process, and the initial reliability coefficients. Also described are each of the DASE facility design assessment components for measuring the degree of functionality, safety, adequacy, quality, pattern, and overall impression. The article concludes by describing a design assessment scale for elementary schools in terms of validity and reliability. Contains 23 references. (GR)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Computer Uses in Education, *Educational Change, Educational Improvement, Educational Technology, Educational Trends, *Electronic Classrooms, Elementary Secondary Education, Learning Strategies

Identifiers—*Schank (Roger), *Virtual Classrooms

Roger Schank's ideas regarding the abandonment of classrooms as the central learning environment and changing the delivery of education are examined. Schank believes today's learning cycles should be divided equally between working at a computer, talking with others, and making something—none of which requires a formal classroom. Emphasis is placed on doing something as the best way for learning to occur, and computer simulations that engage students to take action, wrestle with failure, and develop emotional connections with the experience are the best solution for this task. Further, Schank believes that virtual universities via the Internet will eventually be in direct competition to the existing secondary and university system. (GR)

Four articles on language, culture, and interlanguage are included in this volume. The first by Karen Risager, "Sprog, kultur, og internationalisering" ("Language, Culture, and Internationalization") takes issue with the very broad perception that foreign language and culture cannot be separated in instruction. The second article, "Kulturforståelse som eksamenkrav—dansk som et andetsprog for voksne" ("Cultural Awareness as an Exam Requirement—Danish as a Second Language for Adults"), by Anette Hagel-Sørensen and Inger Jacobsen, is drawn from observations at Studeskolen in Copenhagen, where the purpose of instruction is to prepare second language learners of Danish for a language test they must take to participate in further education. "Dansk kultur formidlet gennem Test 1 og Test 2—en kritisk analyse af den skriftlige eksamen i dansk for voksne indvandrere" (Danish Culture Communicated Through Test 1 and Test 2—A Critical Analysis of the Written Exam in Danish for Adult Immigrants), by Karen-Margrete Frederiksen, examines the cultural aspects of two specific Danish tests (Test 1 and Test 2) for immigrant adults. The last article, "Interlanguage Pragmatics," by Gabriele Kasper, focuses on the field of interlanguage pragmatics, reviewing research, discussing problems in establishing pragmatic norms for language teaching and research, and discussing studies examining the effect of instruction on the development of pragmatic competence. Descriptors—*Communication (Thought Transfer), Foreign Countries, Grammar, *Illustrations, *Languages, Psychology, Semantics, *Structural Analysis (Linguistics), *Syntax

This analysis focuses on the question of whether or not pictures or illustrations are language. Discussion focuses on the differences between pictures and language, with attention to structure, geometry, grammar, rules of interpretation, and semantics. The case is made that pictures are not language essentially because: (1) they do not have symbols that are not arbitrary; (2) their interpretation is not dependent on code; (3) and they do not have syntax. Further discussion looks at what pictures are and whether they are a form of communication, as well as at the psychological differences between language and pictures. A list containing 24 differences between language and pictures is appended. Contains 34 references. (VWL)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Discourse Analysis, Foreign Countries, *Interpretive Skills, *Language Patterns,

*Language Processing, *Psychological Patterns, Second Languages, *Translation Identifiers—*Gestalt Psychology

This paper explores the issue of unconscious manipulation in translation. The translator engages in creating new text subject to the principles of totality and part-whole relations. The closer the parts and relations to those of the source text (ST), the more related this new whole will be to the former one. In attempting to preserve ST semantic content, the translator builds on his or her own interpretation of it, which is subject to his or her previous pattern completion attempts: adding and deleting parts and assuming new relations between them to compensate for whatever is vague or implicit, or whatever he or she missed in the ST. The translator shapes the target text (TT), its parts and relations to produce a text conforming to all standards of textuality. All types of over-translations, under-translations, and manipulative shifts are affected not only by linguistic mismatches, but also by the translator's pattern completion attempt and tendency to create a whole. When he or she fails to complete the whole, he or she experiences cognitive dissonance. Then, motivated by the Gestalt theory of tendency and the desire to move toward consonance, he or she fills in the gaps, completes the parts, and even exerts new relationships between them to create a whole and satisfy the need for stability and consonance. Contains 13 references. (MSE)

Identifiers—*Canada

This book offers an overview of the events surrounding the development of the two official language communities (English and French) of Canada during the last 30 years and the establishment of a model of official bilingualism. The text is provided in both languages. Chapter 1 describes the context

of language change: historical origins of populations speaking English and French; the current distribution of official language groups across the country, and the context for policy making in a bilingual country. Chapter 2 outlines the objectives pursued by federal and provincial governments for official languages, and the long-term action of the federal government to improve the status and use of official languages in federal institutions, to support the development of official language minority communities, and to promote English and French throughout Canadian society. Chapter 3 reviews the major shifts in provincial policies and programs for official language minorities. The final chapter presents the results of three decades of sustained effort to give English and French equal status in Canadian society, outlining provincial achievements, minority community development, and growing public support for the official languages and policies to promote them. Contains 47 references. (MSE)

This text examines the ties that bind Francophones across Canada to illustrate the diversity and depth of the Canadian Francophone community. Observations are organized into seven chapters. The first looks at the kinship ties of Canadian Francophones, including common ancestral origins, settlement of the Francophone regions, and existence of two particularly large French Canadian families, one in Acadia and one in Quebec. The second chapter outlines patterns of mobility in migration, tourism, and educational exchange. Chapter three looks at the circulation of information within and among Francophone communities through the mass media, both print and telecommunications. The status of cultural exchange (literary, musical, and theatrical) is considered next. Economic affairs within and among economic groups are addressed in chapter five, including banking, cooperation among groups, partnerships and expansion into new markets, and labor mobility. Chapter six explores the sharing of scientific and educational resources, including student and faculty mobility and distribution of courses and teaching aids. Finally, networking among varied Francophone groups is discussed. The text is presented in both English and French. (MSE)

Identifiers—Canada

This book analyzes the evolution of the language situation in Canada over the last 45 years, drawing heavily from census data taken between 1951 and 1996. Chapters discuss: the evolution of the English language in Canada, including the size and distribution of the English native-language population, use of English as a home language, knowledge of English among the Canadian population, and use of English as the first official language spoken; changes in the French language group and the French language itself, including the decline in the proportion of Canadians with French as a native language; the growth and decline of various non-official languages in Canada, largely influenced by immigration patterns; growth in numbers and percentage of Canadians who speak both official languages, including geographic distribution patterns, comparison of patterns among Anglophones and Francophones, and growth in the number of Canadians who speak neither official language; and the main factors contributing to changes in the country's language situation during the period in question. The text is presented in both English and French. (MSE)

Identifiers—Mexico

This paper examines the rationale for introducing popular culture into college-level English-as-a-Second-Language instruction in Mexico, drawing on research and theory in second language instruction, and it offers specific suggestions for classroom presentation of popular cultural content. It is argued that content in popular culture can enhance both the appreciation of Anglophone culture in general and contemporary culture in particular, improve cross-cultural understanding, and provide opportunities for critical examination of the language and critical thinking about cultural issues. Films such as "Breaking Away," "Do the Right Thing," and "Jungle Fever" are recommended as vehicles for introducing popular Anglophone culture and examining of these issues. Several short stories are suggested as a means of opening discussion of feminist, ethnic, and other current social issues. Contains 37 references. (MSE)

Identifiers—Acadians, *Canada, Gaspé Peninsula, Prince Edward Island, Quebec

Socioeconomic profiles of two Canadian communities are presented in which the language spoken, an official language, is also a minority language: the French-speaking Acadian minority in an area of Prince Edward Island, and an anglophone minority in the Gaspé Peninsula. The profiles are designed to establish a comparative base from which to assess the relative economic vitality of each minority in its regional context. The study has three phases. The first consists of community profiles; information given about each community includes: demographic data and the relationship between demography and linguistics; the labor market; economic structure; education; income level and source; characteristics of the female labor force; and the comparative status of the minority group in this context. The second phase consists of interviews conducted in selected linguistic minority communities (francophone and anglophone) in Prince Edward Island and Quebec. Responses to the survey questions are summarized for each area covered. The third phase is a summary and conclusions drawn about the two communities profiled and analysis and action framework for linguistic minority communities in general. Contains 23 references. (MSE)

Identifiers—*Scotland

A study of the decline in second language enrollments in Scotland's upper secondary schools is summarized. A survey conducted in 1998, sent to a random sample representing 25 percent of all secondary schools in the country, elicited administrator and language teacher opinions concerning factors influencing language enrollments. Some students were also invited to comment on their experiences of modern language learning and factors influencing their choice of courses. Data summarized here include: trends in the number of students taking advanced tests in the languages in 1976, 1986, and 1996; changes in the popularity of languages in relation to other top-enrollment subjects during that period; and the perceived contributions of public policy, school policy, school practice, and student attitudes to the enrollment decline. Potential for reversing the decline is con-

sidered, and specific recommendations are made. (MSE)

Identifiers—University of Dublin (Ireland)

The report details results in the fifth year of implementation (1997-97) of a set of French, German, and Italian instructional modules designed for non-foreign-language-majors at the University of Dublin (Ireland). Focus is on the chief developments during that year (further refinement of the curriculum, production of a guide to independent language learning, and introduction of an identity cards to monitor access to language learning facilities and resources), rates of course enrollment and completion, and the generally high level of achievement in the courses. Research and development activities are outlined, changes in language program personnel are noted, and the piloting of a European Language Portfolio that records the student's language qualifications, background, and work is explained. Prospects for the language program's further development in the future are also discussed. (MSE)

Identifiers—*Canada

The Canadian Charter of Rights and Freedoms (1982) brought to the Canadian education system the right to instruction in the minority language. However, it is the province that must establish the appropriate school structures for exercise of that right. The study reported here outlines the current situation in the Canadian provinces and territories with respect to minority-language instruction and the management of educational facilities by official-language minority groups. First, it looks at the parameters within which those rights are exercised, and examines the current situation in each province and territory (Newfoundland, Nova Scotia, Prince Edward Island, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta, British Columbia, Northwest Territories, Yukon), presenting the relevant legislative provisions. The study is intended to be a useful reference on language rights in education in Canada. Enabling statutes are also summarized in an appended list. (MSE)

This paper discusses factors contributing to differing translations of the same source text, arguing that translation occurs on a continuum rather than having absolute criteria and procedures. Issues examined include the formal properties of the text, the text's "invariant core of meaning," stability in the semantic elements of the text, the text as both product and process, sources of differing interpretations, socialization of the translator, and the varying translations' degrees of dependence on the source text. Contains 19 references. (MSE)

Second Language Instruction, *Second Languages, Skill Development, Teaching Methods Identifiers—Chomsky (Noam), Cognitive Grammar, Direct Instruction Model, Situational Method, Structural Learning

This paper describes and compares six models for teaching second languages developed and adopted since 1840 (grammar-translation, direct, structural, situational, audiolingual, and communicative methods), and proposes a seventh, the cognitive-linguistic method, incorporating Noam Chomsky's theory of learning. The model takes both extralinguistic and intralinguistic factors into consideration, and is seen as: being more learner-oriented; promoting autonomous rather than dependent learning; teaching linguistic knowledge and behavior based on the student's cognitive system; balancing language skills better than previous methods; decreasing the discrepancy between second language knowledge and behavior; and incorporating better an understanding of interlanguage and how it functions. Contains 39 references, seven in Chinese. (MSE)

The report compiles information on Arizona's public school programs serving limited-English-proficient (LEP) students, including both bilingual education and English-as-a-Second-Language programs, as mandated by state law. It contains data submitted by school districts, schools, and charter schools concerning primary home language identification, student assessment, program services, program participation, achievement test results and exemption by program model, reassessment, program staff and qualifications, and funds used by districts and charter schools for LEP students. An introductory section provides background information and statewide summary data. Detail tables, arranged by district or school, and a glossary are included. (MSE)

Learning Styles and Error Correction: How Do Learning Styles Affect Students' Perceptions towards Error Correction in a Foreign Language Classroom?

Pub Date—1998-00-00

Note—19p.

Pub Type—Reports - Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Cognitive Style, College Students, *Error Correction, Higher Education, *Japanese, Measurement Techniques, Oral Language, Questionnaires, Second Language Learning, *Second Languages, Student Attitudes, Written Language

Identifiers—Myers Briggs Type Indicator

A study investigated: (1) the distribution of learning styles of students of Japanese as a second language, as measured by the Myers-Briggs Type Indicator, (2) students' preferences for error correction in speaking and writing, as measured by a researcher-developed questionnaire, and (3) relationships between students' learning styles and their preferences for error correction. Items were divided into three categories of error correction: explicit; implicit; and self-correction. Subjects were 38

undergraduate students in four second-semester Japanese classes. Results indicate that students fell into 12 of the 16 Myers-Briggs learning style categories, with extraverted students outnumbering introverted students significantly. A large majority of students (89.5 percent) preferred self-correction to explicit or implicit correction. One subject preferred explicit correction, two preferred implicit correction, and one rated implicit and self-correction equally. No statistical significance was found in the relationship between learning style and error correction preference. Implications for teacher's expectations and classroom instruction are discussed briefly. Contains 23 references. (MSE)

Descriptors—*Bilingual Education, Case Studies, Classroom Communication, Classroom Research, Classroom Techniques, Curriculum Design, Educational Environment, *English (Second Language), Haitians, Learning Processes, *Literacy Education, Personal Narratives, Preschool Children, Preschool Education, Reading Instruction, Second Language Learning, *Second Languages

This book details the experiences of a teacher in a Haitian-populated preschool in an urban area of the United States, focusing on the development of literacy and English as a second language. An introductory chapter describes the children, some of their personal and cultural background, their classroom demeanor, and the context in which they were taught. The second chapter describes the traditions and practices of classroom research as experienced by the teacher. The third chapter further examines the school, the families, and the patterns of family life of the students. The next four chapters discuss the difficulties encountered in teaching literacy and managing student behavior. These include the differences between the teacher's assumptions about how adults should control or influence student behavior and the assumptions of the children and their families; varying student and teacher approaches to early literacy activities; and storybook reading and the ways students participated imaginatively with stories. The final chapter considers the value of classroom research, noting how the insights it offers differ from other forms of educational research. (MSE)

Descriptors—Affixes, African Languages, Cognitive Processes, Comparative Analysis, Contrastive Linguistics, *Creoles, Determiners (Languages), *Diachronic Linguistics, French, Grammar, *Haitian Creole, *Language Patterns, *Language Processing, Language Research, Linguistic Theory, Nouns, Pronouns, Syntax, Tenses (Grammar), Uncommonly Taught Languages, Verbs
Identifiers—Clauses, *Fongbe

The research reported here focuses on the cognitive processes involved in creole genesis: relexification; reanalysis; dialect levelling; and parameter setting. The role of these processes in creole genesis is documented in a detailed comparison of Haitian Creole with two of its major source languages: French, its main lexifier language, and Fongbe, one of its West African substratum languages. Chapter topics include: the complex process of creole genesis and linguistic theory; cognitive processes involved in creole genesis; background and methodology of the current study; functional category lexical entries involved in nominal structure; the preverbal markers encoding relative tense, mood, and aspect; pronouns; functional category lexical entries involved in the structure of the clause; the determiner and the structure of the clause; the syntactic properties of verbs; relexification of derivational affixes; concatenation of words into compounds; parameters; an evaluation of the hypothesis; and theoretical consequences. Appended materials include a list of available Haitian Creole texts from 1776-1936, notes on phonemic inventories and orthographic conventions, and

a sample of non-matching derived words in Haitian and French. A list of abbreviations and indexes of authors, language/language families, and subjects are also included. (MSE)

Identifiers—Los Angeles City Schools CA

In January 1995, John Marshall High School (Los Angeles, California) implemented a 3-year bilingual special alternative instructional program, Redesign of Educational Services Providing Enhanced Computer Technology (Project RESPECT). The federally funded program was to prepare limited-English-proficient (LEP) high school students for higher education, job training, or work. Specific objectives were for interdisciplinary teams to create instructional units while delivering structured English language instruction to this population, design a multimedia instructional program, offer parent training to foster partnerships with parents, and develop a peer support network of advanced LEP students to help newly-enrolled students gain access to available resources. The third-year evaluation of the project, presented here, measures levels of attainment of seven specific objectives and the success of project procedures, focusing on the goal of full English competence for participating students to meet grade promotion requirements and maximize school and community participation. All objectives were met except for two whose measurement was found to be impossible. Substantial appended materials include three samples of language production by participating students. (MSE)

This paper reports on a project to develop and implement an interdisciplinary, thematic high school curriculum combining instruction in Spanish language and four arts disciplines. Additional targeted skills included: accessing and using new information effectively; thinking critically about art; development of global responsibility and cross-cultural understanding; use of creativity; development of interpersonal skills, self-understanding, and ethical conduct; and establishment of personal wellness practices. The report describes the origins

of the project, participating teachers and students, methods of evaluating project success, and study conclusions. It was found that the project had a positive effect on student achievement in language and art and persistence in Spanish language learning. Factors in the interdisciplinary classroom environment that facilitated achievement are also analyzed. Contains 19 references. (MSE)

The Adoption of Process Writing To Develop Learners' Competence in the Use of More Refined Forms of "But."

Pub Date—1999-00-00

Note—27p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Administrator Education, *Business Communication, Classroom Techniques, Communicative Competence (Languages), *English (Second Language), *English for Special Purposes, Foreign Countries, Language Proficiency, Portuguese, Teaching Methods, *Writing Instruction, *Writing Processes
Identifiers—Brazil

This paper examines the effectiveness of process writing instruction in English as a second language to foster contextualized situated learning of adverbial clauses of contrast (e.g., "although, even though, however, nevertheless, in spite of, despite, on the other hand"), as demonstrated in a group of six Brazilian upper-intermediate students of English for Special Purposes (ESP), all executives at a multinational company. The students' objective was better use of alternatives to "but" in written business communication. The report chronicles the development of a needs assessment form and elicitation of student views and goals, describes the process writing approach and its use in second language learning, compares Portuguese and English use of adverbial subordinate clauses of contrast, describes classroom procedures and activities, and evaluates results. Students pointed to the consistency of this approach with the principles underlying the ESP program (situated learning and communicative language teaching), and were able to identify their own progress. Their speech was found to be better organized and their ideas were expressed more accurately, appropriately, and coherently. The method is recommended. Materials documenting the classroom approach are appended. Contains 38 references. (MSE)

Identifiers—Costa Rica

Reports on the evaluation process and results of an in-service training program for English-as-a-foreign-language (EFL) teachers in Costa Rica. The program was developed in response to new public policy concerning EFL instruction. The project itself is described, but focus here is on the evaluation process, which was designed to examine participants' expectations, perceptions, and reflections on the program's success, and provide information useful in improving the program and informing stakeholders of its effectiveness. Subjects were nine participating instructors and 118 participating EFL teacher trainees from five regions of Costa Rica. Students were tested using an English language measure and writing samples and both instructors and students completed a course evaluation questionnaire. Course grades were also

used is the assessment. General results indicate a high level of participant and instructor satisfaction. The method used to triangulate results is also recommended as a means for developing participant and regional profiles. The course evaluation questionnaire and study data summaries are appended. Contains 11 references. (MSE)

Identifiers—*Access to Computers, Taiwan

A study investigated the use of the Internet in writing instruction in English as a foreign language (EFL). Subjects were 24 students majoring in English at a Taiwan college. At the beginning of the writing course, several Internet program were introduced to all the students, and students were reminded of the potential for use of the Internet throughout the course, although only one Internet-related assignment was required. Participating students answered an open-ended questionnaire at semester's end. Results indicate positive student attitudes toward use of the Internet for writing instruction, with access to computers and the nature of assignments seen as significant factors in Internet use. It is recommended that the school make Internet-access facilities more accessible and reliable, and that teachers modify assignments to take advantage of student enthusiasm and communication and research needs. The questionnaire is appended. (MSE)

The report explores the situation of francophone minorities in Canada and outside Quebec, focusing on the concepts of assimilation and community vitality in language-minority communities. Chapter 1 looks at the concepts of assimilation and community vitality both in Canada and internationally. Chapter 2 gives a broad description of the policy context at the federal level in Canada. Chapter three examines the use of those concepts within the public debate in Canada, including Quebec, and chapter four presents demographic data on the current health of francophone communities outside Quebec, looking at a wide variety of data. Chapter 5 draws some conclusions and offers suggestions for further inquiry. Appended materials include the texts of the Canadian Charter of Rights and Freedoms and the Official Languages Act of 1988. The

full text is presented in both English and French. Contains 32 references. (MSE)

Identifiers—City University of New York City College

This paper describes the evolution and implementation of an interdisciplinary freshman program in world civilization designed to integrate history content with advanced English-as-a-Second-Language (ESL) composition, focusing on academic language use. In it, a three-credit history course is paired with a six-credit ESL composition course. The program is also intended to help shorten the time ESL students spend in non-credit, developmental/remedial courses and to save these students' financial aid to pay for required courses. The history course consists of a large lecture section of approximately 100 students, about half of whom are freshman ESL students. The role of the ESL composition teacher is to show students how to conceptualize and manipulate major historical themes while expanding their English language skills. The history teacher is required to prepare for and accom-

modate ESL students in the syntax and vocabulary of lectures, assignments, and tests. The program brought 62 percent of ESL students not eligible for core courses safely through the history course with grades of C or better, compared to 54 percent for core-eligible students concurrently enrolled in freshman composition, and generally fared better than other comparison groups. The writings of both teachers and students participating in the New Americans Homeowners Project, a project combining English-as-a-Second-Language (ESL) instruction and information on first-time home-buying for immigrants in language minority groups are presented. The project provided training and technical assistance to ESL teachers, and reached over 200 students of widely varying linguistic backgrounds in the Boston (Massachusetts) area. Teachers' journal entries address these topics: teaching first-time home-buying; exploring content through language; expanding the curriculum and creating new materials; consumer awareness; learning how to stop moving and paying rent; exploring the conflicts of home-owning and home-buying; the consumer culture; using instructional materials; and the project itself. Students' writings discuss: using real estate ads to imagine a

dream house; students' imaginings about home-ownership in the United States; the advantages and disadvantages of home-ownership; homesickness; and writing about buying a home. Notes on interviews with students and materials developed for the project are also included. A list of resource organizations is appended. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Identifiers—California

The report presents findings and recommendations from a 1996 statewide study of the adult education needs of limited-English-proficient (LEP) adults in California, designed to help in planning and policy initiatives. The study explores three broad areas of concern: patterns of need (the extent of services needed by the LEP population, by county and linguistic background); learning needs and objectives (skill development needs, methods for assessing them, and strategies for assessing service outcomes); and systems responsiveness (the adequacy of current state response). Data were gathered from existing sources and field research in three representative communities in diverse geographic areas. The report outlines 22 specific action recommendations in four areas of effort: improved resource mobilization and rational resource allocation; realignment of program mission and guidelines to increase responsiveness and accountability; continued efforts in staff and organizational development; and applied research, planning, and collabora-

tive service delivery initiatives. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

The guide is designed to familiarize adult basic education (ABE) English-as-a-Second-Language (ESL) teachers with the obstacles faced by adult students from other culture in the adult education classroom. An overview of these challenges and an outline of suggested teaching strategies and cultural activities are presented as a basis for developing a multicultural ABE/ESL curriculum. The beginning of the guide looks at the nature of culture shock experienced by an immigrant population and common individual responses to it. The process of second language acquisition is then discussed, and the important role of nonverbal communication is examined. A series of 16 classroom teaching strategies and teacher behaviors that support learning in this population is presented, and 8 classroom cultural activities are described briefly. Contains 11 references and resources. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Identifiers—Eastern Kentucky University, *Faculty Attitudes

This study examined college instructors' and students' perspectives on the effectiveness of team teaching an undergraduate educational foundations course. A course entitled "School and Society" at Eastern Kentucky University was team-taught by an African American male instructor and a Caucasian female instructor. A total of 10 male and 22 female students, all Caucasian and mainly freshmen and sophomores, completed course evaluation instruments. Specific advantages associated with team teaching included the following: particular talents of instructors were used to their fullest in their specific areas of specialization; the team benefited from reciprocal sharing and critiquing; and instructors complemented each other's method of teaching. Perceived disadvantages that could imperil the process were considered by the team prior to teaching the course and included the following: planning may be time consuming; personal clashes could

deter progress; inadequate planning could degenerate into large-group instruction with "turn teaching" rather than team teaching; team members must want to participate and not be forced. Student perspectives on the team teaching of the course were highly positive. (Contains 20 references.) (MDM)

Descriptors—*Case Method (Teaching Technique), College Instruction, *Cooperative Learning, *Distance Education, *Educational Administration, Electronic Mail, Graduate Students, Graduate Study, High Schools, Higher Education, *Internet, Linking Agents, Listservs, Principals, School Administration, Teaching Methods, Technology Transfer, Telecommunications

Identifiers—*Southern Illinois University, *University of Southern Mississippi

This paper describes an alternative instructional concept—a distance learning/cohort teaching/cohort student grouping—that used the Internet to deliver instruction. Twenty graduate students at two universities, Southern Illinois University and the University of Southern Mississippi, subscribed to a listserv and worked cooperatively on a case study problem in which an experienced teacher applying for a position as a high school principal in an expanding school district is asked to develop a first-year plan to demonstrate his or her qualifications for the new job. Outcomes expected from this learning experience included: the opportunity to work collegially even though separated by a significant distance; learning to function as a single entity and to identify the information necessary to address and reach a solution; awareness of the commonality of administrative problems and issues; choosing to form a cohort network for professional career support; and evolving into a community of life-long learners. It was concluded that for such a method of instruction to be effective, courses must have clearly stated outcome expectations, the case studies must be viable and relevant, and there must be reliable technological resources. Effect of Introductory Counseling Course on Retention Rates.

Pub Date—1998-11-00

Note—13p.; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (New Orleans, LA, November 4-6, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Persistence, College Freshmen, College Sophomores, *Counseling Courses, Higher Education, *Introductory Courses, *School Holding Power, *School Orientation, State Universities

Identifiers—*Western Kentucky University

This study examined the effects of an introductory counseling course on retention rates of students at Western Kentucky University (WKU). Rates of graduation after 4, 5, and 6 years for 400 freshmen and 474 sophomores enrolled in an academic orientation and preparation course between 1990 and 1994 were compared with WKU and regional rates during the same time frame. It was found that of the 107 freshmen enrolled in the course in 1990, 41.1 percent graduated within 6 years of enrollment, and that of the 101 freshmen enrolled in the course in 1991, 38.6 percent graduated within 6 years. This compares with overall WKU 6-year graduation rates of 39.1 percent in

1990 and 38.8 percent in 1991. Graduation rates for the 32 regional universities in the Southern region, according to "U.S. News College Rankings" (1998), varied from 30 to 59 percent, with a mean of 43.5 percent and a median of 42 percent. Thus the 6-year graduation rates of the freshmen in the study did not differ significantly from university-wide rates, and did not surpass regional rates. Contains 16 references. (MDM)

Developing a Measuring Instrument To Study Student Perceptions of Good College Teaching from a Cross-Cultural Perspective.

Pub Date—1998-00-00

Note—12p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*College Instruction, Cross Cultural Studies, *Cultural Differences, Educational Attitudes, *Educational Quality, Higher Education, Questionnaires, *Student Attitudes, *Student Evaluation of Teacher Performance, *Test Construction, Test Reliability, Test Validity

This study sought to develop a valid and reliable instrument to measure student perceptions of good college teaching from a cross-cultural perspective. A total of 63 graduate and undergraduate students from various ethnic and racial groups (Caucasian, African American, Hispanic American, and Asian American) completed a set of open-ended questions regarding their perceptions of good teaching practices and their perceptions about learning. The results of these responses were used to develop a closed-end survey questionnaire that focused more narrowly on identifying the similarities and comparing the differences in perceptions of students from different cultural backgrounds. Test-retest reliability was examined using a group of 30 students who completed the survey twice in a 2.5 week interval. A copy of the questionnaire is included. (MDM)

Descriptors—Career Counseling, *College Environment, *College Freshmen, Cultural Pluralism, Diversity (Institutional), *Educational Attitudes, Higher Education, Peer Relationship, *Photography, Physical Environment, State Universities, *Student Attitudes, Student Personnel Services, Teacher Student Relationship

Identifiers—*University of Southern Indiana

This study used reflexive photography to examine the perceptions of college freshmen at the University of Southern Indiana. A random sample of 10 first-time, full-time, degree-seeking freshmen completed an initial interview and background questionnaire and were given a 27-exposure disposable camera to take pictures that would illustrate their impression of the university or help to describe their impressions. The participants were also asked to record their thoughts while taking the pictures, participate in a structured photo elicitation interview, and participate in a focus-group interview. A number of primary themes emerged in the students' photographs and in their discussions of them, including perceptions about the university's physical environment, interactions with faculty, interactions with other students, student support services, and career counseling and preparation for the future. Some of the positive aspects of the university experience cited were frequent and meaningful interactions with faculty, the development of deep friendships with peers, and the accessibility of the campus. Negative aspects of the university experience included the low level of racial diversity among stu-

dent and faculty populations, the disruption of the on-campus flow of automobile traffic to accommodate construction, and the perceived lack of computer labs on campus. (Contains 36 references.) (MDM)

Descriptors—*Educational Attitudes, Educational Change, Educational Quality, *Educational Trends, Futures (of Society), Global Approach, *Higher Education, Leadership, Research, School Restructuring, Social Change, *Strategic Planning, *Universities

This paper discusses the future of higher education in the United States, focusing on societal changes and strategies for universities in coming decades. It examines population aging, shifting demographics, life-style and other social changes, and workforce changes such as the growth of the service sector in the economy, noting their effects on higher education. The paper reviews the growth of community and junior colleges, and the impact of rising tuition and budget constraints on public institutions. It suggests that higher education institutions focus on quality; restructure to become more competitive; internationalize and globalize their campuses and curriculum; emphasize technology, knowledge production, and knowledge availability; develop and retain intellectual assets; and assert the importance of moral leadership. The paper concludes that higher education administrators who manage the intellectual capital and human resources of their institutions most effectively will provide the model for colleges and universities of the future. Rank and Degree in Czech Universities.

Pub Date—1994-00-00

Note—8p.

Pub Type—Reports - Descriptive (141)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Academic Rank (Professional), Degrees (Academic), *Doctoral Degrees, *Educational History, Educational Trends, Foreign Countries, *Higher Education, Tenure

Identifiers—*Czech Republic, *Czechoslovakia, Soviet Education

This paper examines the history of academic degrees and rank in the Czech Republic since World War II. Before the communist period, degrees and rank in Czechoslovakia were influenced by the German and Austrian systems, with the PhDr. degree in the humanities and philosophy and the RNDr. (rerum naturalium doctor) degree in the sciences and mathematics awarded upon completion and defense of a dissertation. Habilitation, the achievement of a permanent post at the university, was obtained by completion of a "great dissertation," and was similar to the tenure process in American universities. After 1950 the Soviet system of higher education was introduced, with the creation of independent academies and the Candidate of Science (CSc.) and Doctor of Science (DrSc.) degrees. After 1964 the Soviet-style system was modified somewhat, becoming a hybrid of traditional Czechoslovak and Soviet systems. The end of communism and the 1990 law on higher education led to a return to the former Czechoslovak system of PhDr. and RNDr. degrees and habilitation, with the process now more similar to the attainment of the American Ph.D. degree. Identifiers—Nova Southeastern University FL

This study examined differences in final course grades for campus-based and distance education students at Nova Southeastern University (Florida). Data on over 26,000 course grades for winter term 1997 were obtained from university records. It was found that students enrolled in courses offered through distance education received a significantly greater frequency of successful grades (A, B, C, or Pass) than their campus-based counterparts enrolled in the undergraduate studies program, the School of Education and Human Services, and the School of Business and Entrepreneurship. However, in the Center for Psychological Studies, there was no significant difference in the frequency of successful grades awarded in campus-based courses and courses offered through distance education. For courses taught by faculty who concurrently taught the same course to campus-based students and distance education students, there was no significant difference in the frequency of successful grades awarded in campus-based courses and courses offered through distance education. An appendix contains 9 references and 4 tables. (MDM)

Identifiers—*Nova Southeastern University FL

This study profiled the First Time in College (FTIC) freshmen students at Nova Southeastern University (Florida). It was found that for fall term 1997, the university had 442 FTIC freshmen, up from 215 for fall term 1995. Approximately 70 percent of all 1997 FTIC freshmen were female, and nearly 85 percent were permanent residents of Florida. White, non-Hispanic FTIC freshmen were in the majority in the College of Professional and Liberal Studies; black, non-Hispanic students were the most widely represented ethnic/racial group in the College of Career Development. Life sciences was the most frequently identified major for FTIC freshmen in the College of Professional and Liberal Studies, while professional management and elementary education were the most frequently identified majors in the College of Career Development. Nearly all of the FTIC freshmen in the College of Professional and Liberal Studies were full-time students, while nearly half of the FTIC freshmen in the College of Career Development were part-time students. The modal age of FTIC freshmen in the College of Professional and Liberal Studies was 18, while the modal age for FTIC freshmen in the College of Career Development was 30. (Contains 10 references.) Descriptors—*Academic Achievement, Academic Persistence, *College Freshmen, Community Colleges, *Early Intervention, Educational Attitudes, *High Risk Students, *Minority Groups, *Predictor Variables, Remedial Instruction, Remedial Programs, Student Attitudes, Two Year Colleges

Identifiers—Prince Georges Community College MD

This study examined factors affecting academic achievement of at-risk minority students to evaluate intervention strategies designed to assist such students. Data were obtained on 2,386 first-time college students entering Prince George's Community College (Maryland) in fall 1990. Factor analysis

identified 10 variables that explained a significant proportion of the achievement variances among students; these included: academic commitment, persistence, early term survival and progress, academic standing, financial and academic support, course load carried, college preparedness, need for remediation, job-related attendance motives, and desire for a bachelor's degree. Cluster analysis then identified 10 student profiles, three of which were particularly relevant to minority student achievement: a "true grit" group, comprising nearly 10 percent of the students, which overcame basic skills deficiencies and below-par high school backgrounds to attain above-average achievement levels; "full-time strugglers," the least-advantaged, lowest socioeconomic status, poorest high school background group, one-fourth of whom managed to achieve with institutional assistance; and "unprepareds," similar to the full-time strugglers in socioeconomic background, but with less than 1 percent classifying as achievers. Based on these findings, in the fall of 1997 the college launched a pilot program for 48 students needing remedial instruction in math and English. (Contains 17 references and 3 tables.) (MDM)

Identifiers—Oklahoma State Regents

This report provides financial data on the value of obligations of any supplemental pension plans and the annual cost of any post-employment benefits for employees of state universities, colleges, and community colleges in Oklahoma. Attachment 1 summarizes information on supplemental pension plans that have been reported by state system institutions for the fiscal year (FY) ending June 30, 1997. Fifteen institutions reported having a supplemental plan, while 10 reported no information on any supplemental plan. This attachment also reports the amount of funding that seven institutions have reserved to meet their future obligations. Total supplemental pension obligations as of June 30, 1997, included \$1,368,000 for the University of Oklahoma and Cameron University, \$8,770,817 for Board of Regents of Oklahoma A&M Colleges, and \$13,562,825 for the Board of Regents of Oklahoma Colleges. Attachment 2 summarizes the costs that 15 institutions have incurred in FY 1997 for post-employment benefits other than pensions. These benefits included the cost of medical and/or life insurance for retired employees and amounted to \$2,238,395 during FY 1997. (MDM)

Identifiers—University of Maine

This case study examined the benefits and costs of instructional television as employed by the Education Network of Maine (ENM) through its distance learning initiative. Data were obtained from the 1995-96 and 1996-97 academic years. In fall term 1996, there were 3,264 students enrolled in network courses, about 10.6 percent of system enrollment. A total of 779 students who were enrolled in 23 network courses at either a receiving site (remote) or a studio broadcast site (where students were in the classroom with the instructor) during spring 1996 were surveyed. It was found that responses from both sites were generally favorable toward the courses and the logistical arrangements. A significant difference in average grades was found in only one course. Cost estimates indicated that classroom instruction was the least expensive mode for low enrollment courses (25 students), and that the costs of moderate enrollment courses (110 students) were essentially equal for classroom and network instruction. In high demand courses (220 students), network instruction was estimated to be 47 percent less expensive than classroom instruction. (MDM)

Examining Both Race and Gender in the Experiences of African American College Women.

Pub Date—1998-04-00

Note—17p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Diego, CA, April 13-17, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Black Colleges, Black Students, Colleges, Educational Experience, Females, Higher Education, Qualitative Research, Racial Attitudes, Racial Differences, Sex Differences, Sexual Identity, Single Sex Colleges, Student Attitudes

Identifiers—African Americans

This study examined how African American women defined who they were in their respective college contexts, focusing on the roles of gender, race, and institutional type. A total of 20 women from a white coeducational institution, a predominantly white women's college, and a coeducational, historically black college participated in in-depth interviews. The results revealed that the participants believed that being an African American woman meant struggle, being an African American could be problematic, and being an African American meant being conscious of one's identity. Participants from the historically black college most often referred to the struggle of being an African American woman in the larger society, while participants at the predominantly white schools reflected on the issue of being a woman who is different from what the school environment considers "woman." Participants at the predominantly white schools spent much of their energy fighting race-based stereotypes and demanding to be identified, recognized, and respected for both their race and their gender. (Contains 40 references.) (MDM)

The Affective and Academic Benefits for Mentors in a Minority Engineering Program.

Pub Date—1998-11-00

Note—17p.; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (27th, New Orleans, LA, November

4-6, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, Affective Behavior, Black Students, College Students, Engineering Education, Higher Education, Journal Writing, Mentors, Minority Groups, Peer Teaching, Self Esteem, Student Attitudes, Tutoring, Universities

This study examined the academic and affective growth of peer mentors in a minority engineering program which encouraged relationships between freshmen pre-engineering students and upperclass division mentors at a large, land-grant university in the Southeast. A total of 14 mentors in a newly established minority mentoring program, who were themselves minorities, completed weekly journal entries on their experiences. One primary pattern that emerged from the journals was the reinforcement and improvement of the mentors' already existing academic skills that occurred as a result of their tutoring experiences in interactive learning laboratories and involvement in problem-solving workshops. The simple and constant review of fundamental principles common to the engineering core of study helped the mentors in their own academic pursuits. The journals also captured affective change in confidence and sense of purpose within the mentoring community. The results suggest that although the upperclass peer mentors were not the target population of the minority engineering program, they benefited both academically and affectively from their roles as mentors within the program. An appendix provides the weekly prompts for journal entries. (MDM)

A Summary of Two Studies on Pay Disparities by Race and Gender: Evidence from the 1988 and 1993 NCES Surveys.

Pub Date—1998-05-00

Note—30p.; Paper presented at the Annual Meeting of the Association for Institutional Research (38th, Minneapolis, MN, May 17-20, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Black, College Faculty, Comparable Worth, Comparative Analysis, Higher Education, Hispanic Americans, National Surveys, Racial Differences, Salary Wage Differentials, Sex Differences, Teacher Salaries, Trend Analysis, Whites

Identifiers—National Study of Postsecondary Faculty

This paper summarizes the key findings of two separate studies of issues pertaining to pay equity for faculty by race and gender. Data were obtained from the 1988 and 1993 National Studies of Postsecondary Faculty, which contain information on 11,013 and 31,354 faculty, respectively. It was found that the unexplained wage gap between men and women was between 8 and 10 percent, which is comparable to findings from earlier national studies conducted in the 1970s and 1980s. It was also found that the unexplained wage gap for younger women in academe was much lower than that for older women. These results suggest that the unexplained wage gap between men and women should fall as younger women enter the profession and replace more senior faculty. Significant pay differentials were also found between white and Hispanic faculty, although there was no evidence of an unexplained white/black pay differential after controlling for relevant factors. A National Profile of Faculty Governance Leaders in Higher Education.

Pub Date—1999-00-00

Note—14p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Rank (Professional), *College Faculty, *College Governing Councils, Colleges, *Communication Skills, Community Colleges, Demography, *Higher Education, *Leaders, National Surveys, Questionnaires, Sex Differences, Universities, Verbal Communication, *Writing Skills

Identifiers—Faculty Attitudes

This study explored the current demographic profile of faculty governance leaders, focusing on communication style. A total of 223 faculty senate leaders (or equivalent faculty governance leaders) completed a mailed questionnaire requesting information on demographic variables and communication behaviors. The questionnaire included the Personal Report of Communication Apprehension instrument and the Writing Apprehension Test. The respondents represented 76 research or doctoral-granting universities, 64 comprehensive universities and liberal arts colleges, and 83 community colleges. While it was found that the majority of the respondents were male full professors teaching in the liberal arts, females held the majority of leadership positions in the governance units of both research and comprehensive universities and in the liberal arts colleges. It was also found that the participants had moderate levels of apprehension for both oral and written communication encounters. Community college faculty governance leaders had the highest oral communication apprehension, followed by comprehensive university and liberal arts faculty leaders. Comprehensive university and liberal arts college faculty leaders, however, had the lowest writing apprehension level. (Contains 12 references.) (MDM)

The Effects of Entering Characteristics and College Experiences on Student Satisfaction and Degree Completion: An Application of the Input-Environment-Outcome Assessment Model.

Pub Date—1998-05-00

Note—20p.; Paper presented at the Annual Meeting of the Association for Institutional Research (38th, Minneapolis, MN, May 17-20, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*College Students, Commuting Students, Educational Attainment, Grade Point Average, Group Instruction, Higher Education, *Outcomes of Education, *Predictor Variables, *Satisfaction, Self Efficacy, *Student Attitudes, Study Habits

Identifiers—Astin (Alexander W), *Input Environment Outcome Model

This study investigated the contributions of entering characteristics and college experiences on student satisfaction and degree completion using the input-environment-outcome assessment model developed by A. W. Astin (1995). A total of 594 college students who had started college about 5 years previously completed a survey about their college experiences. Data from this survey was merged with data provided by the students at the time they began college. It was found that students who spent more hours commuting tended to spend fewer hours per week studying and doing homework. Students who spent more hours per week studying and doing homework and who worked on a group project in class were more likely to be satisfied with their overall instruction in college. It was also found that students with higher high school grade point averages tended to have higher self-ratings of their overall academic ability and higher expectations of graduating with honors. Students with higher high school grades, higher self-ratings of their academic ability, and greater expectations of graduating with honors were more likely to earn a bachelor's degree and to be satisfied with their college experience. Identifiers—*Georgia, University of Georgia

This essay discusses the effects of technological innovation on instructional innovation. It is noted that the impact of technological innovation in instruction is cushioned by inherently conservative forces in academe, including the incentive-and-reward system that rewards research over teaching as well as the reluctance of many faculty to adopt such technology. Programs at the University of Georgia and those of the Georgia Governor's Teaching Fellows Program are reviewed as examples of initiatives that support the innovative use of technology in the undergraduate classroom. The effects of learning theory on technological innovation over the last several decades are also reviewed. It is argued that while there is no best way for all students to learn, and there is no single method, process, or technique that is best for all teachers, the improvement of undergraduate education would benefit immensely from a more effective blending of learning theory, teaching practices, and the innovative uses of technology. This essay reviews 10 imperatives for higher education planning that are needed to meet the challenges of the next century. It is argued that higher education leaders must: (1) reaffirm the development of the human mind and character as education's major goal; (2) accept responsibility for educating and developing institutional leaders; (3) apply organizational know-how and technological competence to the problems of education; (4) recognize and complete the business of the twentieth century, including equal access for all and improvement of undergraduate instruction; (5) develop and use more effective concepts and methods of policy planning and decision making; (6) clarify the purposes, values, and public expectations of higher education in an increasingly pluralistic and multinational society; (7) use more effectively the knowledge and experience already available; (8) use more effectively the problem-solving resources and capabilities routinely applied in basic and applied research; (9) define the alternatives and options that are open today but which may be closed five years hence; and (10) learn to think, write, and speak in plain English. Co-Mentoring Support Groups in Higher Education.

Pub Date—1999-02-28
Note—32p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Case Studies, *College Faculty, Educational Research, *Graduate Students, *Group Dynamics, *Higher Education, Interpersonal Relationship, *Mentors, Models, Qualitative Research, Schools of Education, *Social Support Groups, Teacher Student Relationship

This paper presents a model for a co-mentoring support group among graduate students and faculty, using as a case study the development of a faculty-student support group in a college of education at a university. This support group began in 1995 and consisted of 11 participants who met formally for one year and have continued to meet informally since that time. Over time, the members created solidarity by describing personal research questions and preferred methodologies, and by sharing the impact of the changing direction of school leadership on their work. It is concluded that faculty-student support groups can provide a viable context for identifying salient mentoring themes, for envisioning them in constructive and holistic terms, and for experimenting with role playing as co-mentors. In addition, an expanded definition of mentoring can facilitate mentor identity development and deepen the capacity for human connection, and an understanding of broader socialization patterns can make explicit issues of mentorship and identity formation. A focus on self-study with others can create conditions for heightened motivation and ongoing learning. (Contains 43 references.) (MDM)

Linking Research and Teaching in Qualitative Courses.

Pub Date—1999-02-28

Note—30p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Case Studies, *College Instruction, Cooperation, Experimental Teaching, *Graduate Students, Higher Education, Interpersonal Relationship, Models, *Qualitative Research, *Research Methodology, Student Attitudes, Teaching Methods

This paper presents an approach to the improvement of qualitative research courses in graduate schools, based on the case study of a graduate class. The study sought to link research to teaching through a qualitative research workshop. The course was developed to promote two goals: (1) community-building among graduate researchers, and (2) creative flexibility in how data is interpreted, and employs the use of conventional (systematic, analytical, and exploratory) and alternative (artistic, interpretive, and impressionistic) approaches to present qualitative data. Twenty-two graduate students from various fields participated in a classroom study in 1998 of a research workshop that included reflection on alternative data sources and techniques such as collages, poems, videos/films, photographs, stories, and conversations. It is argued that experimental forms of inquiry can advance the research workshop as a place for stimulating fresh ideas that engage the qualitative development of graduate students and their texts, and can provide a context and methodology for studying and guiding collaborative, self-directed learning. Students' comments from course evaluations indicated that they benefitted from the quality of the course experience, interpersonal growth, professional and intellectual development, and creative experimentation. Descriptors—Asian Americans, Blacks, *College Students, *Educational Experience, Higher Education, Hispanic Americans, *Racial Differences, *Satisfaction, State Universities, *Student Attitudes, *Student Personnel Services, Whites

Identifiers—Mixed Race Persons, University of Massachusetts Amherst

This study examined racial and ethnic differences in student satisfaction with campus services at a state university. In March and April 1997, a total of 841 students at the University of Massachusetts Amherst completed a 19-item survey on their campus experiences and satisfaction with various services. The sample included 521 white, 105 Asian, 96 African American, 76 Latino, and 43 multiracial students. It was found that larger proportions of African American students expressed dissatisfaction with social life compared to other groups, with 20 percent of African American students either very or somewhat dissatisfied compared to 13.9 percent of multiracial students, 13.5 percent of Asian students, 10.7 percent of Latino students, and 6.6 percent of white students. African American and Latino students also reported the highest levels of dissatisfaction with security in residence halls. African American students were also the most dissatisfied group in regard to financial aid and the overall university experience, while white students were the least dissatisfied group, with 57.8 percent of African American students and 30.8 percent of whites dissatisfied. It is concluded that institutions need to take positive steps, such as diversity workshops, to foster better racial and ethnic understanding. (Contains 51 references.) (MDM)

Descriptors—*College Faculty, *College Instruction, *Educational Attitudes, Faculty Development, *Focus Groups, Higher Education, Rewards, Teacher Evaluation

Identifiers—*Emory University GA, Faculty Attitudes

This study examined faculty views in regard to support for teaching at Emory University. Data were obtained from 24 small focus groups of faculty who discussed their reactions to a report on teaching at the university. The data were analyzed using HyperRESEARCH software to generate detailed reports on frequencies of categories, subcategories, and Boolean combinations of these. It was found that the most frequently discussed themes included evaluation, making teaching a priority, faculty development, infrastructure, and rewards for teaching. Faculty seemed to view evaluation of teaching as either an impossible mission or an activity with a questionable potential for teaching improvement. In nearly a third of the focus groups, faculty called on the university to increase its commitment to redefine the role of teaching. In nearly half of the discussions, faculty affirmed support for the concept of central resources to improve teaching, while some faculty felt that the school's existing facilities did not support excellent teaching. In nearly half of the focus groups faculty noted that the incentives seemed insufficient to reward

excellent teaching. (Contains 27 references.) (MDM)

Descriptors—Academic Rank (Professional), *Administrators, Compensation (Remuneration), Conflict, *Higher Education, Interpersonal Relationship, *Job Satisfaction, *Predictor Variables, *Private Colleges, *Public Colleges, Rewards, School Size, Teamwork

This study examined job satisfaction among administrators in public and private higher education. Data on nearly 1,200 administrators, ranging from directors to presidents, was obtained through surveys of 120 public and private universities. It was found that both public and private higher education administrators were most satisfied with the intrinsic rewards of their positions and least satisfied with the extrinsic rewards and working conditions. However, administrators from private universities were significantly more satisfied than administrators from public universities on the extrinsic rewards dimension (salary, benefits, and promotion). It was also found that, controlling for all other variables, an absence of interpersonal conflict and an atmosphere of teamwork accounted for most of the explained variance in overall satisfaction among both populations. Holding a higher administrative rank was significantly associated with both intrinsic and extrinsic satisfaction in both groups. In public universities, campus size tended to reduce administrators' satisfaction with the quality of their relationships with others in the work place, while undergraduate quality tended to promote satisfaction in both groups. Descriptors—College Faculty, *Distance Education, Educational Technology, *Faculty Development, Higher Education, Teaching Models, Theory Practice Relationship, *World Wide Web

Identifiers—*Kuhn (Thomas S.), *Lewin (Kurt)

This paper offers a model of faculty staff development for distance education that does not require, or permit, continuous change in instructional design. The model is based on the paradigm shift ideas of Thomas Kuhn and the reeducation model of Kurt Lewin. In the model offered reeducation implies not simply education or training, but involves changing basic human behavior patterns and thus changing the values (core beliefs) and valences (connections and relationships) that make people behave the way they do. Lewin's based his concept of change on eight principles and believed that reeducation requires both "unfreezing" so that the culture can change and "refreezing" within a new culture; the trainer's role is seen as balancing the threat from change with a zone of safety. Faculty trainers for distance education are urged to: (1) understand the role of theory and stereotype; (2) keep needs assessment safe; (3) remember the differences between skills training and reeducation; (4) establish teams of learners for mutual support and to diminish individual threat; (5) earn and pre-

serve trust; and (6) be clear about unfreezing and refreezing. (DB)

Identifiers—*Auctions, Family Education Loan Program, Federal Direct Student Loan Program

This report reviews auctions used by various federal agencies to examine the feasibility of using similar auctions to determine interest rates for student borrowing through the Federal Family Education Loan Program (FFELP) and the William D. Ford Federal Direct Loan Program. The review identified 31 different auctions, divided into two major categories, used by federal agencies to sell assets. In the first category are 12 auctions classified as auctions of specialized items (such as rights or financial assets); the 19 other auctions are classified as auctions of assets of interest to the general public (such as real estate or consumer goods). Background discussion focuses on interest rates and government costs in FFELP and the general characteristics of these auctions. A table summarizes features of the federal auctions for rights or financial assets conducted by 12 different agencies, and a second table summarizes features of the 19 federal auctions for real estate or consumer goods. An enclosure describes individually the 12 federal auctions for rights or financial assets. (DB)

Identifiers—*National Institute of General Medical Sciences

This study evaluated professional outcomes for graduates of the 32 programs supported by the National Institute of General Medical Sciences under the Medical Scientist Training Program (MSTP). Specifically, it evaluated the success of MSTP graduates in establishing research careers and the types of careers and research activities followed compared to graduates of other combined-degree or Ph.D. programs. Data were from National Institutes of Health data bases and curricula vitae provided by graduates of MSTP programs and members of comparison groups. Findings indicated that MSTP graduates are more likely than comparison groups to have received postdoctoral research training support, to hold academic appointments, to

have received research support, to have applied for and obtained NIH research grants, and have more total publications and more recent publications. Analysis indicated MTSP graduates are most similar to non-MSTP M.D.-Ph.D.s from the same institutions. Overall, the comparison suggests that MTSP graduates more closely integrate their research activities with medical practice. Individual sections of the report provide background information, detail on the study design, and present findings on educational and career outcomes and professional and research activities. Four appendices include a list of academic department classifications, additional methodology information, definitions and criteria, and statistical tables. (Contains 32 references.) (DB)

Descriptors—Accountability, Compliance (Legal), Federal Aid, Federal Programs, Higher Education, *Student Loan Programs

Identifiers—Department of Education, *Federal Direct Student Loan Program

This report addresses concerns that the Department of Education may have erroneously made overpayments of as much as \$400 million to schools participating in the William D. Ford Federal Direct Loan Program (FDLP) during the Department's conversion to a new computerized payment system. The investigation found that because the transition to the new system took substantially longer than anticipated, schools were authorized to draw down within existing guidelines as many funds as they expected to disburse during the transition period. The \$400 million was the approximate amount that FDLP schools drew down to meet their needs during this transition period. However, overpayments of \$6 to \$10 million were made when a payment list was erroneously processed twice. The Department is currently in the process of recovering these overpayments. (DB)

Identifiers—*University of North Carolina Wilmington, *Virtual Universities

This article recounts the development of a paradigm for a virtual university that is, one in which delivery is inextricably linked to the political, technological, social, and economic context of the institution at the University of North Carolina (Wilmington). It explains how, in just five years, a conservative, traditional, regional institution made the transition from a few professors experimenting with computer-enhanced instruction to development of a framework for virtual instruction and experimentation on an international scale. The essential factors identified include: a well articulated vision, strategic committees or key innova-

tors, availability of technological advancements, promotion and publicity, institutionalization of enabling policies, and dissemination of information regarding the results of new approaches. A major step was the design of a technology college, characterized by use of computer-assisted instruction, the World Wide Web, two-way interactive video conferencing, and individualized instruction using various technologies. The implementation of this technology college led to the Chancellor's Steering Committee on Information Technology which recommended that a high-level administrator be identified and made responsible for coordinating technological services, initiating technological innovations, and seeking partnerships and alliances. Specific events and the interactions of individuals over different approaches during this process are recounted. (DB)

Descriptors—Cultural Differences, *Distance Education, Foreign Countries, Higher Education, International Cooperation, International Education, *International Programs, State Universities

Identifiers—*Japan, *University of North Carolina Wilmington

This paper describes the participation of the University of North Carolina at Wilmington (UNCW) in the virtual university component of the Digital Communities Project in Japan. It examines the characteristics of an experimental, international, distance-learning collaboration and explores the politics and practicalities related to international outreach and global collaborations. It stresses that quality international distance education collaborations must be linked to the political, technological, social, and economic context of the distinct countries involved. The paper recounts the origins of the Digital Communities Project in Japan and the university's decision to collaborate with a Japanese industry group and four Japanese universities to identify the cultural, political, and quality issues surrounding distance education on an international scale. The importance of recognizing and working within cultural differences is stressed. Three courses were developed for the demonstration project: Network Multimedia; Japanese Cinema and Cultural Comparison; and Nursing in the United States and Japan. Fifty-seven Japanese and 19 UNCW students registered for the courses in fall 1998. A variety of technologies, including electronic mail, discussion forum software, and software for student assessments, were utilized. Feedback from participating institutions was gathered and plans for a pilot project with five courses in fall 2000 are underway. (DB)

Descriptors—*Delivery Systems, *Health Services, Higher Education, Long Range Planning, *Medical Education, Physicians, *Statewide Planning

Identifiers—*Access to Health Care, *California This report responds to a California Senate directive to the state's postsecondary education commission to examine the extent to which health care is accessible and equitably distributed throughout the

state. The Commission, in conjunction with several state agencies and the University of California, conducted an analysis and offered 11 recommendations to achieve the policy goal of access to medical care for all California residents and communities. Recommendations emphasize the link between educational experiences and the supply and choice of physicians. Introductory material describes the collaborative process of the study and the context for the Commission's recommendations and is based on equity as the fundamental Commission principle. The recommendations on expanding accessibility of health care are grouped into six categories: (1) precollege strategies; (2) undergraduate education; (3) admission to medical school; (4) medical school; (5) transition to practice; and (6) evidence of effectiveness. Appended are the text of the Senate resolution authorizing the investigation and an executive summary which groups recommendations into those for the short-term, mid-term, and long-term. (DB)

Descriptors—*College Faculty, College Instruction, *Courses, *Faculty Workload, Higher Education, *Productivity, State Surveys

Identifiers—*University of Maryland System

This report responds to a request from the Maryland legislature for information on the instructional workload of faculty in the University System of Maryland (USM), especially at the University of Baltimore, the University of Maryland (Baltimore County), and the University of Maryland (College Park). Following an introduction, the report summarizes data from fall 1997 to spring 1998 concerning faculty workload data in terms of faculty exceptions from teaching the "standard load," analysis of course exceptions by type, student credit hours generated by the core faculty, noninstructional productivity, faculty who did not engage in credit-bearing teaching, and instructional outcomes per full-time equivalent faculty. The following conclusions are highlighted: at each of these institutions, the proportion of faculty teaching the standard load increased from the prior year's level, and 27 percent of the faculty taught more than the standard load. However, the report criticizes the emphasis on faculty exemptions and notes that USM faculty productivity, as measured by the number of course units produced, the external funds attracted, and scholarly productivity, all continue to increase. Six tables provide detail on the investigation's findings at the 10 institutions comprising USM. An attachment presents the instructions followed by institutions in completing the report on faculty teaching load. (DB)

Descriptors—Compliance (Legal), *Educational Finance, *Federal Aid, Federal Programs, Higher Education, *Loan Default, Loan Repayment, Statistical Data, Student Financial Aid, *Student Loan Programs, Tables (Data)

Identifiers—*Perkins Loan Program

This collection of tables is a compilation of 1998 default rates of institutions of higher education participating in the federal Perkins Loan program and is based on the cohort of borrowers who entered repayment status in the 1996-97 reporting period. Data are presented by state and by individual institution and include: (1) number of borrowers who entered repayment status in 1996-97; (2) number of

borrowers in default on June 30, 1998; (3) cohort default rate; (4) total number of borrowers in default 240 days or more; and (5) total principal amount outstanding on loans in default 240 days or more. (DB)

Identifiers—*Germany, Time To Degree

Four million people are unemployed in Germany and this is having an impact on the country's universities. Many youngsters who hold university qualifying certificates claim their legal right to attend not because they want a higher education but because they cannot find employment. This booklet tries, by going beyond the facade of "university," to explain why studies drag on so long in Germany. Using case studies and anecdotes to illustrate actual student life in institutions of higher education, the study notes the following: (1) A large number of registered students do not attend lectures, a situation abetted by very low tuition fees; (2) delayed entry due to compulsory military service and the practice of taking internships or apprenticeships to enhance later employment prospects before enrolling in university; (3) "jobbing," or part-time employment, another way in which two-thirds of German college students obtain practical job experience and money; (4) a common attitude that student life should be a period of fulfillment rather than a period of self-denial; (5) almost half of the foreign students (6.8 percent of all students) have no German citizenship but have lived in Germany for extended periods; (6) and the practice by 10 percent of German students of attending a foreign institution for at least one sabbatical year. Descriptors—*Correctional Institutions, *Drug Legislation, *Educational Finance, Government School Relationship, *Higher Education, *Resource Allocation, *State Aid, State Legislation, Trend Analysis

Identifiers—*New York

This paper examines trends in the support of public higher education versus that for prisons in New York State over the last decade and concludes that the dramatic rise in funding for prison expansion has come at the expense of higher education. The paper notes that (1) since fiscal year 1988, operating budgets at New York's public universities have plummeted by 29 percent while funding for prisons has increased by 76 percent, a nearly equal trade-off in actual dollars; in 1995 New York ranked forty-fifth among states in per capita state appropriations for higher education, even though the state has the fourth highest per capita income in the nation. Also noted is that the Rockefeller drug laws and the second offender law have resulted in fully 62.5 percent of the people sent to prison in 1997 being committed for nonviolent offenses at a cost to the state of \$680 million yearly; during the same period substantial tuition hikes at the State University of New York and City University of New York were imposed to compensate for the \$615 million reduc-

tion in state higher education funding. The paper urges that these laws be repealed and replaced with cheaper, more effective drug treatment programs. (Contains 18 endnotes.) (DB)

Identifiers—*North Carolina

This report presents comprehensive data on higher education activities in North Carolina in 84 tables and 17 graphs. Data were compiled from forms completed by the individual institutions in the summer and fall of 1998. Data are usually presented separately for individual institutions by institution type public institutions, private institutions, community and technical colleges, junior colleges, and seminary/bible colleges. Tables and graphs are grouped into the following categories: (1) current enrollment, (2) enrollment trends, (3) undergraduate transfers; (4) degrees conferred, (5) faculty, (6) library resources, (7) costs to students, (8) admissions, (9) student financial aid, and (10) student housing. This report presents the results of a fall 1997 survey of U.S. colleges and universities that offer doctoral, master's, and bachelor's degrees in physics and astronomy, focusing on degree production and current student enrollment. Highlighted are the following: (1) although enrollments in physics degree programs have been declining, the number of students taking introductory courses has remained fairly stable; (2) the number of Ph.D.s conferred during the 1996-97 academic year declined 2 percent from the previous year, with a cumulative drop of 6 percent over the last three years; (3) bachelor's degrees in physics continue to decline, with the class of 1996-97 totaling 3,826 degrees (the lowest since the late 1950s); (4) the number of U.S. citizens enrolling as first-year graduate physics students is the lowest ever seen; and (5) the proportion of women physics bachelor's recipients has

increased, on average, about 1 percent a year for the last four years, although women still represent only 19 percent of the undergraduate physics class of 1997. Text, figures, and tables present data on introductory enrollments; undergraduate enrollments and degrees; graduate enrollments and degrees; gender, race, and citizenship; and astronomy. An appendix provides trend data on degrees and enrollments over the last 10 years. (DB)

Descriptors—*Adult Education, Cooperative Learning, *Curriculum Development, Faculty Advisers, Focus Groups, Higher Education, Humanistic Education, Leadership Training, Medical Education, *Medical Students, Professional Development, Program Effectiveness, Program Evaluation, School Counseling, Socialization, *Student Adjustment, Student Attitudes, Student Development, Student Needs, Student School Relationship

This study evaluated an innovative curriculum for first-year medical students which was designed to render the undergraduate curriculum more humanistic in socializing students into medicine. The Personal, Professional, and Leadership (PPL) development program provides guided, semi-structured opportunities to create "communities of learning" by forming heterogeneous groups of nine students who meet regularly with volunteer faculty facilitators throughout the four-year curriculum to explore personal, professional, and leadership development in the practice of medicine. The evaluation was conducted with the third cohort of students in the program and involved focus groups comprised of two students from each of eight PPL groups. Analysis of focus group interview data identified three major themes: (1) PPL participants found social support; (2) PPL participants found academic support; and (3) PPL participants struggled with unmet adult learning needs. A questionnaire completed by the 12 of the 16 faculty facilitators indicated that respondents felt the program was generally effective and fostered peer support and a sense of community. Overall, analysis suggests that although the PPL program provides important benefits to first-year medical students, it lacks several elements fundamental to adult education programming, such as a needs assessment and attention to the special needs of introverted students. An Analysis of Contemporary Academics and John Galbraith's "Tenured Professor."

Pub Date—1999-00-00

Note—34p.

Pub Type—Opinion Papers (120) — Reports - Evaluative (142)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Academic Freedom, *College Faculty, Fiction, *Higher Education, *Institutional Characteristics, Mass Media, Novels, *Politics of Education, *Tenure

Identifiers—*Galbraith (John Kenneth)

This paper analyzes the novel, "A Tenured Professor," by John Kenneth Galbraith, in an exploration of the impact of fictional writing and other popular and mass media on public perceptions of higher education. In the book Galbraith offers his views on his own experience as a leading educator and on the world of higher education. The book tells about the career and personal development of a professor of economics who pursues wealth in order to influence society on the stage of higher education. The book is seen to address four main issues prominent in contemporary higher education: (1) institutional prestige and elitism, (2) faculty autonomy, (3) university politics, and (4) the debate over tenure. The paper examines each of these issues, as developed by Galbraith, using excerpts from the book as examples. It then compares the book's treatment of these issues with Galbraith's treatment of the same issues prior to writing this novel. (Contains 20 references.) (DB)

The Need for Undergraduate Computer Science Programs Graduates within the Central Oregon High-Technology Business Community.

Pub Date—1998-11-15

Note—18p.

Pub Type—Reports - Evaluative (142) — Tests/Questionnaires (160)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Computer Science, Educational Demand, Employment Opportunities, Higher Education, Majors (Students), *Needs Assessment, School Business Relationship, *School Community Programs, Surveys, *Undergraduate Study

Identifiers—*Oregon

This report summarizes the methodology and response to a survey used to determine the need for university-level undergraduate computer science education in Central Oregon and how best to address this need. Fifty Central Oregon businesses completed a survey intended to verify the perceived community need for computing graduates. Findings indicated that 22 of the responding businesses intended to hire a total of 95 new employees in computer science during the next two to three years; respondents were most interested in hiring employees trained in network administration and computer systems management; most respondents supported continuing education for their current employees; and 23 businesses were interested in hiring individuals trained in hardware maintenance, a new associate degree program at Central Oregon Community College. The paper concludes that there is sufficient demand to justify development of broad and basic computer science programs. Five computer and information science programs under consideration

are noted. These would be located at Eastern Oregon University, Oregon Institute of Technology, Oregon State University, Portland State University, and the University of Oregon. Appendices include the survey form, tabular and graphic analysis of responses, and additional comments offered by survey respondents. (DB)

Descriptors—College Administration, *College Outcomes Assessment, *Educational Assessment, Educational Planning, Governance, Higher Education, Institutional Administration, Institutional Environment, Institutional Research, Long Range Planning, Models, *Student Evaluation

This paper reviews and synthesizes the literature on institutional support for student assessment, offering an organizing framework for using this information to shape institutional policies, processes, and practices in ways that lead to both improved student performance and institutional functioning. The framework, first, involves the overall institutional approach to the content and methods of student assessment. Next, it examines external influences on student assessment, including national efforts, state-level initiatives, regional and professional accreditation associations, private sector influence and support, and professional associations. Discussion of the framework's next component, organizational and administrative support, considers student assessment support strategy, leadership and governance patterns for student assessment, academic management policies and practices, institutional culture and climate, evaluation and revision of student assessment approaches, and the influence of institutional context dimensions. The final component of the model is institutional utilization and the impact of student assessment on academic decision making, on the institution, and on the relationship between an institution and its external environment. Descriptors—Epistemology, Futures (of Society), *Higher Education, *Institutional Research, Models, Organizational Development, Research Needs

This paper argues that establishing a research agenda to study the changing nature of postsecondary institutions as organizations is best done by examining their organization-environment interface, and it suggests an agenda based on historical perspective; a contingency model, or framework, of the organization-environment interaction; and a discussion of implications for the future. The paper is organized into five broad sections: (1) the contingency model of the organization-environment interface; (2) an historical analysis, based on this model, of the evolution of our conceptual understanding of colleges and universities as complex organizations since World War II; (3) a presentation of several emerging societal conditions that influence the current higher education environment and provide a contrast to recent history; (4) discussion of the key characteristics and institutional implications of the emerging postsecondary knowledge industry; and (5) a proposed research agenda that examines this emerging postsecondary knowledge industry and its impact on postsecondary institutions as organizations, the focus of which is on redefining the industry, redirecting relationships and mission,

reorganizing institutions, and renewal of the academic workplace. (Contains 65 references.) (DB)

Identifiers—Astin (Alexander W), *Input Environment Outcome Model

This report analyzes existing national data sets to determine their utility in studying teaching, learning, and assessment issues as they affect postsecondary student outcomes. The analysis used Astin's Input-Environment-Outcome model to evaluate student and faculty databases that are intended to be nationally representative, are recent or continuing, have a major focus on undergraduate postsecondary participation, and cover teaching and learning topics. The seven student-centered data sets reviewed are: Baccalaureate and Beyond Longitudinal Study; Beginning Postsecondary Student Longitudinal Study; High School and Beyond; National Education Longitudinal Study of 1988; National Longitudinal Study of the High School Class of 1972; National Postsecondary Student Aid Study; and Recent College Graduates Study. Also reviewed are four iterations of the Cooperative Institutional Research Project surveys. Faculty-centered data sets included are the American Council on Education Faculty Survey, the Higher Education Research Institute Faculty Survey, and the National Study of Postsecondary Faculty. Strengths and limitations of each data set are discussed and data sets are compared for inputs, teaching/learning, environments, and outcomes. Attached tables detail study findings. An appendix summarizes limitations of the data sets cited in empirical studies. (Contains 25 references.) (DB)

Descriptors—Accreditation (Institutions), *Accrediting Agencies, Benchmarking, *College Outcomes Assessment, *Educational Assessment, *Educational Policy, Educational Practices, Educational Quality, Government School Relationship, Higher Education, *State Standards

This report presents first-year results of a multi-state research study that examines the progress made during the past decade by the 50 states and six regional accrediting associations toward establishing and implementing higher education teaching and learning assessment policies. The report pro-

vides a history of state and regional assessment policy development, a review of the published and unpublished findings of prior research, and an analysis of the status of assessment policies and practices across the 50 states and six regional accrediting associations. Each state and each regional accreditation policy related to outcomes assessment is examined within a policy analytic framework that describes the policy and presents its major components. Three themes emanating from the patterns and trends in the state analyses are discussed: the extent and implications of state use of common assessment practices, the relationship between state assessment policies and governance structures, and the use of incentives and consequences in assessment policies. For the accreditation associations, the issues identified include: the nature of the assessment of student learning and teaching effectiveness, the influence of institutional autonomy on policy formation and implementation, and the relationship between state and accreditation assessment policies and practices. The policy analysis for each state and accreditation association is appended. (Contains 38 references.) (DB)

Descriptors—Age Differences, *Aging in Academia, *College Faculty, Higher Education, Older Adults, Seniority, *Teacher Retirement, Trend Analysis

Identifiers—*University of Wisconsin System

This research brief examines changes in the age distribution of faculty in the University of Wisconsin (UW) system over time and trends in faculty retirement. Findings indicate that: (1) in 1997-98, 35 percent of faculty were age 55 and older, 51 percent were between 40 and 54, and fewer than 15 percent were under 40; (2) on average, faculty at the UW comprehensive institutions were somewhat older than faculty at UW-Madison and UW-Milwaukee; faculty at the UW colleges were older than faculty in other system institutions; (3) faculty age distribution varied across academic disciplines, with engineering and physical sciences having both the highest percentage in the 55 and older age group and the highest percentage of faculty under 40; (4) between 1985-86 and 1997-98 the total number of UW system faculty declined by 9.8 percent; however, the number of faculty 55 and over increased by 18 percent and the number under age 40 declined by 41.4 percent, which changed the age distribution. Based on historical retirement rates, it is projected that 2,384 faculty members (close to 40 percent) systemwide will retire over the next decade. Text, figures, and graphs present the detailed analysis. Appendices include technical notes, additional tables, and notes on the projection methodology used. (DB)

Identifiers—Hispanic American Students, *Latinos, Puente Project CA

This paper describes the Puente Project, a program developed to provide support services to Latino students attending California community colleges. A discussion of the organizational response to students of color and of organizational socialization practices is followed by a description of the development of the Puente Project. The project's success is described with examples. An analysis of the program based on semi-structured interviews with administrators, faculty, and Puente Project staff at two community colleges, telephone interviews with Puente Project staff at the state

level, and a review of the research literature and archival data follows. The Puente Project cultural model is intended to produce successful academic outcomes, increased self-esteem, and greater self-confidence for Latino students through three program components: the writing component (a two-course sequence of accelerated writing instruction), the counseling component (which provides daily contact between the counselor and students), and the mentoring component (which fosters ongoing contacts between students and volunteers from the Latino professional and academic community). Evaluation results are highly positive program participants persisted at community colleges at a 97 percent rate and at least 48 percent of program participants transferred to four-year institutions. Examples of the program's replication and expansion into four-year institutions and high schools are offered. (Contains 31 references.) (DB)

Descriptors—Access to Education, College Outcomes Assessment, *Distance Education, Educational Technology, *Higher Education, *Instructional Effectiveness, *Research Methodology, Research Needs, Student Attitudes, Teacher Attitudes, Test Reliability, Test Validity

This report presents findings of a review of the current research on the effectiveness of distance education in higher education. Major findings indicate, first, there is a paucity of truly original research dedicated to explaining or predicting phenomena related to distance learning; and, second, although most studies indicate that distance learning courses compare favorably with classroom-based instruction, the overall quality of the research is questionable and thereby renders the findings inconclusive. Key shortcomings of the research identified include: (1) much of the research does not control for extraneous variables and therefore cannot show cause and effect; (2) most of the studies do not use randomly selected subjects; (3) the validity and reliability of the instruments used to measure student outcomes and attitudes are questionable; and (4) many studies do not adequately control for the feelings and attitudes of students and faculty. Among specific research gaps identified are outcomes of complete programs rather than individual courses and reasons for high drop-out rates in distance courses. Implications drawn concern what "access to college" means, the importance of human contact in education, and the relatively limited importance of technology. Appended are an overview of the original research and other research syntheses. (Contains 70 references.) (DB)

Descriptors—Cost Effectiveness, *Developmental Studies Programs, High Risk Students, Higher Education, Intervention, Postsecondary Education, Program Costs, *Remedial Instruction

This examination of remedial instruction in institutions of higher education provides an analysis of the functions and purposes of remediation; a discussion of the types of remediation, who participates, and how well it serves them; an examination of the financial costs of remediation; an appraisal of the economic and social consequences of not providing remedial education; and a proposed set of strategies designed to reduce the need for remediation while enhancing its effectiveness. Among the report's conclusions are the following: (1) remediation is a core function of higher education; (2) there are no consistent standards about what constitutes "college-level" work; (3) because remedial instruction is stigmatized, the amount of remediation occurring in colleges is probably understated; (4) there is no evidence that remediation is expanding in size or scope; (5) the financial costs of remediation are modest and generally comparable to or lower than the costs of other academic programs; (6) the financial or academic merits of "outsourcing" remediation to private vendors are not readily apparent; and (7) the social and economic consequences of not providing remedial education are high. Recommended strategies are grouped into those designed to reduce the need for remediation and those designed to improve its effectiveness. (Contains 38 references.) (DB)

The 1997 WebNet conference addressed research, new developments, and experiences related to the Internet and intranets. The 257 contributions of WebNet 97 contained in this proceedings comprise the full and short papers accepted for presentation at the conference. Included are positions papers by leading experts in the field; descriptions of ideas that are on the borderline between an idea, a prototype, and products; and reports on concrete applications of the World Wide Web, its impact on various aspects of life, and thoughts on how society might adjust to the resultant changes. Major areas covered include: advances in multimedia; browsing and navigation tools; computer-human interface

issues; courseware development; educational multimedia on the Web; electronic publishing and the Web; industries and services; legal issues; psychology of Web use; security and privacy; statistical tools and user tracking; training; Web servers; application development tools; collaborative learning and work; country specific developments; data and link management; electronic commerce; future issues in WebNet technology; integration of Web applications and services; Internet-based multimedia/hypermedia systems; search engines; social and cultural issues; teaching; virtual reality; and Web site tools. Identifiers—*Learning Environments, Metadata, *Technology Integration, Virtual Classrooms

The accessibility of the World Wide Web and its flexibility for conveying digital information in various forms makes it a convenient mode of communication for education. With the help of a distance learning application called "Easy Ed," this paper demonstrates how these properties of the Web along with a data model can be used to provide a classroom environment on the Internet. Easy Ed provides a rich medium for education that is achieved by integrating information across the different media types (text, video, audio, and graphics) in hypermedia form. Metadata conforming to the data model about different media types is stored in a relational database, which not only facilitates authoring, but also makes it possible to reuse existing instructional material. Another concept of Easy Ed is the dynamic repurposing of content at the time of access. Dynamic information generation helps to customize information according to a user's level of comprehension, the information medium, and hardware compatibility. Five figures present customization and page composition, the system architecture of Easy Ed, object hierarchy in a topic, an example of tour formation, and the interface for display of course views and contents. Identifiers—Cornell University NY, High Performance Computing, Java Programming Language, Learning Environments, *Virtual Classrooms, Web Sites

The Virtual Workshop is a World Wide Web-based set of modules on high performance comput-

ing developed at the Cornell Theory Center (CTC) (New York). This approach reaches a large audience, leverages staff effort, and poses challenges for developing interesting presentation techniques. This paper describes the following techniques with their technical implementation, application in the workshop, and assessment by the audience and staff: (1) Web-based editing and program submission using a combination of Java programs and Perl scripts; (2) the glossary, created with JavaScript; (3) using Common Gateway Interface (CGI) scripts to write interactive quizzes; (4) Netscape frames for personalizing navigation; (5) gifmerge for creating simple animations and a QuickTime movie to demonstrate and compare speedup achieved through Message Passing Interface (MPI) and High Performance Fortran (HPF); (6) a lab exercise design using HTML links; (7) a set of audio-tagged foils to diversify and increase comprehension of the module; and (8) MOO/chat discussion forums. Three figures illustrate the Web-based editing/program submission screen, the glossary, and a graph of the Quick Time movie. Related Web sites are listed. (Author/AEF)

Identifiers—Collaborative Learning, *Digital Imagery, *Learning Environments, Northwestern University IL

This paper reports on the evolution of a software environment called ClassACT (Class Annotation and Collaboration Tool) from a simple multimedia annotation program to a multi-domain archival database management system. ClassACT was developed at Northwestern University (Illinois) for instructional use, and, although its original goal was to solve a specific problem for a single instructor, it has grown in breadth of functionality and gathered a following of users and supporters from varied disciplines. An overview is provided of ClassACT's utility in the context of its evolution over 4 years, and its future is contemplated. Topics discussed include: history of ClassACT, including the development of an image database for a multi-disciplinary course in English and American History, and conversion to a World Wide Web-based system; features of ClassACT, which include a hypermedia document management system, searchable media database, and groupware tailored for class-based projects; application of ClassACT to provide annotation, collaboration, and archiving tools that allow an instructor to create an interactive learning environment; the basic notebook display, as well as student and instructor viewpoints; librarian and administrator functions; searching; instructor, student, and developer/support benefits; and challenges for the future, including two diverging application models—the shared archive and cognitive process models. Five figures illustrate ClassACT displays. (AEF)

Identifiers—*Course Development, *SGML, University of Waterloo (Ontario), Web Sites

This paper describes the research and development of a fully World Wide Web-based credit course in the English Department at the University of Waterloo (Ontario). One hundred students from across Canada complete four exercises in technical writing over a four-month term. In the process, they learn to understand and apply the principles of SGML (Standard Generalized Markup Language) design in their assignments and in the profession generally. Their assignments are converted and displayed on the course Web site for markers' assessments and for their shared use. Students employ the same tools, software and designs that the instructors use to create all aspects of the course materials. Through this exposure, they are able to evaluate instructional methods by practicing them in their own work. Half the course grade is derived from students working entirely online in groups of three. All aspects of instruction are supervised and integrated by instructors using newsgroups, chat, online tutorials and instructor comments. A commercial version of the course is available to organizations for their training needs. (Author/AEF)

Identifiers—Monash University (Australia), Technology Integration

In 1996, the Department of Computer Science at Monash University (Australia) implemented a First Year Advanced Students' Project Scheme aimed at extending and stimulating its best first year students. The goal of the scheme was to give students the opportunity to work on a project that best suited their needs and captured their interests. One of the projects, which became known as CADAL (Computer Aided Dynamic Assessment & Learning) Quiz, involved designing and implementing a World Wide Web-based multiple choice quiz generator and assessment tool. At the same time, there were several academics wishing to move away from the traditional mode of educational assessment toward interactive, computerized assessment. As a result, CADAL Quiz was incorporated into the First Year Computer Programming unit and used by lecturers, tutors, and students. This paper reports on a pilot project for developing and integrating CADAL Quiz into the curriculum. It highlights the unique quiz features and its use by students and staff. The paper describes how the quiz was incorporated into the unit and presents a conduit of attitudes useful to those planning to use the Web as a resource for educational assessment. (Author/AEF)

Identifiers—*Authenticity, Collaborative Learning, Deschooling, *Situational Learning, Technology Integration

The Internet has tremendous potential for K-12 education. However, learning how to exploit that potential remains an important problem. This paper uses ideas from situated learning and the deschooling movement to address the argument that there has been no significant reform (technology-based or otherwise) of public education for over a century. A preliminary educational model, focusing attention on the need for engagement with authenticity, is presented. The notion of authentic collaborative learning is introduced, and a number of requirements that are desirable in a technological system to support such learning are suggested. Contains 13 references. This paper traces the development and maintenance of an introductory workshop delivered over the Internet, called the ALN (Asynchronous Learning Networks) Workshop on Internet Basics held at the Vanderbilt University Center for Innovation in Engineering Education (CIEE). The first section discusses creation and implementation issues, including software used, target audience, and course content. World Wide Web site design issues are addressed in the second section, including consistency in fonts, colors, and backgrounds, maximizing readability and minimizing download time, and presenting interactive examples. Data on usage are presented in the next section, including numbers of visitors, numbers of countries that visited the site, and most popular pages. The fourth section summarizes feedback obtained on the Internet Software Tutorials, including questions asked on the feedback form, sample comments, suggestions for improvement, and occupations of workshop users; most of the feedback focused on the Eudora e-mail tutorial. Modification, including addition of new tutorials and revision of incorrect/unclear information, is discussed in the fifth section. The final sections consider future plans and conclusions. A figure illustrates the FTP (file transfer protocol) tutorial screen. (AEF)

This paper describes the experience and the problems solved in the process of developing and integrating advanced World Wide Web-based services into the University of Patras (Greece) system. In addition to basic network services (e.g., e-mail, file transfer protocol), the final system will integrate the following set of advanced services: a Web-based information service, intranet services to support administrative operations within the campus, distance learning by means of online teletraining via the Web, teleworking facilities, videoconferencing facilities, and applications supporting collaborative work. The paper describes in detail the services provided by the system, system architecture, and the implementation and introduction of the services to users. This project has shown that the development of the services, as well as their integration and introduction to the users, has to follow a well-defined, user-oriented implementation plan. Two figures present the representation of Web servers in the campus network and the intranet architecture. Contains 19 references. (AEF)

Identifiers—*Adaptive Instructional Systems, Fractals, *Learning Environments

This paper presents a framework for producing learning environments (LEs) on the World Wide Web that improves productivity and quality at a reduced cost for both designers and learners. The resulting LEs are germane to fractals. Changes in scale are likened to levels in LEs; each level expresses a given viewpoint on knowledge. Self-similarity establishes a classification from which to derive a grammar. Texts and activities are highly fragmented, and interfaces rely on the fractal structure to provide for "spatial" landmarks. The LEs are adaptive with respect to learners' objectives, background, and cognitive style and are agile with respect to design, implementation, and maintenance. The fractal design and the underlying grammar set up the formal grounds required to code procedures that generate LEs, extend them, manage

updates, and maintain the site. Topics discussed include: the hypotheses underlying the design; the fractal structure that is at the heart of the systems; how to take advantage of this structure from the standpoint of the learner to adapt the LE to his/her needs and cognitive style, and from the point of view of design and implementation; how the hypermedia structure can provide agility to production; benefits and drawbacks observed in situ utilization of the LEs; and future works and conclusions. Identifiers—Access to Technology, *Course Development, Iowa State University

Iowa State University, through a program called Project BIO, is using an innovative new approach to offer biology courses via the World Wide Web. The approach features online lectures similar to those a student might experience in a traditional classroom. Students listen to the lectures using RealAudio while viewing lecture materials with a Web browser. The program, which began in Fall 1996 with two courses, has grown to eight courses for the 1997/98 academic year. The market for these courses includes on-campus Iowa State University students, high school juniors and seniors, community college students, high school and community college biology teachers, and employees of life science companies. Topics discussed in this paper include: course approach and technology; course descriptions and target audiences; student access; authentic learning experiences; course administration; and course development, including the Project BIO Resource Center (designed to assist faculty in the development of online courses by providing technology resources, technical assistance, and training). Web page authoring, and audio technology. Figures illustrate a typical lecture window, the RealPlayer control panel, plans for the Project BIO Resource Center. Two tables present enrollment for 1996/97 courses and target audiences for 1997/98 courses. (Author/AEF)

Identifiers—Germany

The quality of World Wide Web-based learning depends on several critical success factors. In particular, course materials on the Web should not represent a one-to-one transfer of written lecture notes; added values (e.g., interaction and dialogue components, training modules) should be provided. This paper introduces the approach of multimedia Web-based teachware packages taking these demands into consideration. Applications are based on a series of modular reusable components providing core functionalities—especially flexible navigational guidance—and serving as a framework for developing Web-based teachware packages with any type of content. The first section discusses motivation, including advantages of Web-based learning compared to traditional computer-based training, and a project to create a "virtual campus," at the University of Erlangen-Nuremberg (Germany). A framework for Web-based teachware packages is presented in the second section, including flexible navigational guides, orientation guides, interactive components, annotations, glossary, online manual, assistance by the tutor and technical support staff, and learner-learner communication. The third section addresses reusability and course generation, including integrated guided tour definition and separated guided tour definition. Figures illustrate the control panel, navigational guides, and separated guided tour definition. (AEF)

Identifiers—Collaborative Learning, *Learning Environments, *Problem Based Learning, Prototypes, University of Pittsburgh PA

This paper presents interface guidelines from research at the University of Pittsburgh (Pennsylvania) School of Information Sciences in developing a collaborative, problem-based learning environment for the World Wide Web. The lessons learned are based on student use and evaluation of three interface prototypes over the course of 3 years and spanning several domains: (1) CALE I, an X-Windows application that includes functionality to support synchronous as well as asynchronous collaborative problem-based learning; (2) CALE II, a Web-based version of CALE I; and (3) CoMMIT, a frames-based Web application. Insights into appropriate windowing strategies, choice of menu structure and presentation, menus as a group coordination mechanism, and group annotation mechanisms are discussed. Extensions to the interface based on these findings are discussed, and directions for future research are given. Three figures illustrate the CALE I, CALE II, and CoMMIT interfaces. Identifiers—*Course Development, Worcester Polytechnic Institute MA

The purpose of the Web Retargetable Course Generation System, or "ReCourse," developed at Worcester Polytechnic Institute (Massachusetts) is to facilitate both distance and on-campus learning via the World Wide Web. ReCourse's features include the ability to retarget a Web course for different levels of students, multi-user chat rooms, a secure grading system, bookkeeping tools, a map generator that allows students a birds-eye view of where they are in the course pages, a quiz feedback system, and a course bulletin board (news group). This paper discusses the experience of teaching two online Web courses using these tools and describes the assessment procedures for evaluating the courses. Results are summarized related to computer knowledge background, student behavior, student attitude, student satisfaction, and course material. It is concluded that, while class satisfaction remained high, the formal assessment procedures indicated possible areas of improvement. (AEF)

Identifiers—FirstClass, *Learning Environments, Open University (Great Britain)

This paper discusses the concept of diversity of course components in the context of an online staff development course at the United Kingdom Open University. In addition to FirstClass computer conferencing and Web content, RealAudio was used in both synchronous and asynchronous modes. The purpose of its use was to add diversity and focus, which would maintain active participation until the end of the course. Following a description of the aim and components of the course, this paper presents an evaluation of its effectiveness and draws conclusions about an appropriate level of media diversity. Two figures present a snapshot of one of the audio annotations of the course materials and the opening screen of the FirstClass course area. (AEF)

Identifiers—*Collaborative Research

The William R. Wiley Environmental Molecular Sciences Laboratory (EMSL) at the Pacific Northwest National Laboratory (Washington) is a collaborative user facility with many unique scientific capabilities. The EMSL expects to support many of its remote users and collaborators by electronic means and is creating a collaborative environment for this purpose with capabilities ranging from chat and videoconferencing to shared applications, electronic notebooks, and remote-controlled instruments. This paper describes some of the particular capabilities required to support scientific collaborations, the status and direction of the EMSL tools, and several early uses of the EMSL software in both research and education collaborations. The first section presents a taxonomy of the types of research collaborations that currently exist (peer-to-peer, mentor-student, inter-disciplinary, producer-consumer) and evaluates the communications needs for each type. EMSL's real-time Collaborative Research Environment (CORE) is described in the next section, and the following capabilities/components are summarized: WebTour, file sharing, chat box, TeleViewer, Electronic Laboratory Notebook, on-line instruments, whiteboard, and audio/video conferencing. The third section describes the use of CORE in research and education settings. Together, these topics define a vision for natural, in-depth, virtual partnerships in research and education. A figure presents the CORE World Wide Web interface. (Author/AEF)

Identifiers—Conceptual Frameworks, Prototypes

This paper addresses issues and cost benefits of World Wide Web-based education systems. It presents the results of an effort to identify problems that arise when considering this media and suggests conceptual solutions to some of these problems. To evaluate these solutions, a prototype system was built and tested in an engineering classroom; the system was used to test the knowledge transfer and attitude of students as compared to the traditional classroom system. The primary conclusion was that the Web-based system resulted in significantly better learning as measured by an average of 10 more points on a 75-point quiz. Students working with the Web-based system spent more time studying the subject, which did affect their performance; how-

ever, a regression analysis showed that students using the traditional method improved their grade more per hour of study than did students using the Web method. Three figures illustrate the course assignment/team-communication page, course homepage, and course presentation page. (AEF)

Identifiers—Carnegie Mellon University PA, Course Development, *Technological Infrastructure

The goal of the Carnegie Mellon Online project is to build an infrastructure for delivery of courses via the World Wide Web. The project aims to deliver educational content and to assess student competency in support of courses across the Carnegie Mellon University (Pennsylvania) curriculum and beyond, thereby providing an asynchronous, student-centered approach to education. The system centers on a formal data model, supported by commercial database technology. This paper provides a technical overview of the system and its features, including system architecture, course and content model, pedagogical elements, database, interface, and technology base. The use of Carnegie Mellon Online in a large introductory computing competency course is discussed, as well as plans to use the system for other courses. Two figures present the Carnegie Mellon Online System Structure and the course model. (AEF)

Identifiers—HTML, University of Windsor (Canada)

This paper discusses the use at the University of Windsor (Ontario) of a small World Wide Web-based tool for course delivery and administration called HAL (HTML-based Administrative Lackey), written in the Scheme programming language. This tool was developed by the author to provide Web-based services for a large first-year undergraduate course in computer-aided design. Various problems encountered in administering the course are discussed, and a solution is proposed that includes formation of student design groups, maintaining registration information, facilitating communications, disseminating information, and assigning and recording grades. The design and implementation of HAL is then briefly described, and examples are given. Based on the success of HAL, it is concluded that—although larger and more complex course delivery systems are suitable in some circum-

stances—there are situations in which simpler and smaller systems are better suited. Three figures present plain scheme code for an HTML (Hyper-Text Markup Language) unordered list, an HTML unordered list using the Scheme CGI (Common Gateway Interface) library, and construction of a whole HTML page using the Scheme CGI library. Identifiers—*Barriers to Implementation, Connectivity, Infrastructure, Pittsburgh School District PA, Technology Implementation, *Technology Utilization

Based on a four-year study of the Common Knowledge: Pittsburgh (Pennsylvania) project—one of four national "testbeds" for the exploration of the Internet's potential for improving education, this paper explores the factors that delayed, shaped, and constrained Internet use in a large urban school district. Although a substantial amount of use occurred, problems in interfacing with the district's pre-existing physical infrastructure, its bureaucratic procedures, and the culture of its schools all influenced use markedly. Infrastructure problems included difficulties retrofitting old buildings, including asbestos in school walls, and lack of needed power outlets, space, and furniture. Bureaucratic problems included incompatibility between rigid bell schedules and the unpredictability of access to Internet sites. Finally, cultural factors including the teachers' role as dispenser of knowledge, the image of a well-run classroom as one in which students sit quietly in their seats, the tendency to emphasize basic skills and to conceptualize learning along disciplinary lines, and concerns about ensuring that the materials students access in school are consistent with community beliefs and standards also shaped and limited Internet use. Contains 10 references. (Author/AEF)

Identifiers—*Intranets, *Learning Environments

This paper makes basic assumptions regarding the development of an intranet architecture that will

actively promote the cognitive apprenticeship of a new community of learners. The authors consider the intranet as a dynamic and virtual environment in which individuals may communicate, share resources, and reciprocally generate and organize learning strategies leading to knowledge and self efficacy. First, the paper describes a proposed architecture supported by an exemplar called SAGE-ISO that includes the following cognitive tools: browsing for information regarding ISO 9000 standards, as well as a company's quality system; advising the user on deploying the quality procedures; and training through a set of learning resources. Secondly, it highlights the following cognitive variables that can act as building blocks towards an efficient intranet foundation: learning should be an active and not a passive experience; learning can be facilitated by situating the learner within an authentic setting; and learners should take charge of their own learning. The final section provides a brief overview of development issues regarding Internet/intranet technologies and tools and presents a proposed architecture. Two figures illustrate the architecture of the intranet training environment and the proposed internal architecture, and a table presents examples of tools and technologies. Contains 13 references. Materials, Teacher Attitudes, Teleconferencing, *World Wide Web

Identifiers—Dependents Schools, Learning Environments, *Technology Integration, Virtual Classrooms

This paper describes the Online Learning Academy (OLLA), a World Wide Web-based presence that supports the use of telecomputing in the classroom by: connecting teachers to each other and Internet educational resources; fostering the use of online resources and collaboration; encouraging and enabling the sharing of classroom experiences; and supporting and mentoring educators. Through a partnership among the application developers, educational technologists, curriculum specialists, and end users (teachers), the success of OLLA is based on the deployment of its three important components—appropriate content, continual professional development, and technology. The OLLA environment includes a personalized virtual classroom, "Kids Did This!" (collection of Web publications and student projects), resource center, mailing list, and personal journals. Units of study include selected and organized Web resources, presented around a theme. Initial results from pilot use with 20 elementary school teachers within the Department of Defense Educational Activity (DoDEA) schools during the 1996-1997 school year indicated OLLA's success. Teachers reported that OLLA: provided the means for communicating with other classrooms and teachers located at a distance; helped them to reach students who were difficult to reach using other approaches; is a great motivator for students and teachers alike; and is changing the way teachers think and teach. Descriptors—Access to Information, *Computer System Design, Databases, Expert Systems, Foreign Countries, Information Retrieval, Librarians, *Online Searching, Optical Data Disks, Search Intermediaries, Search Strategies, User Needs (Information), *World Wide Web

Identifiers—*Search Engines

Information retrieval on the World Wide Web has a major obstacle: although data is abundant, it is unlabeled and randomly indexed. This paper discusses the implementation of a consultative Web search engine that minimizes the expertise level that is required from a user to accomplish an advanced search session. The system takes advantage of the meta-knowledge (Selection Routine), used by expert librarian searchers and applies it to a heterogeneous search space such as CD-ROM databases and Web-based environments acting as an intermediary expert system. Topics discussed include: (1) the Selection Routine, including the three basic stages of a typical online search—definition of query structure, selection of search keys, and feedback review; (2) system description, including the Web-based interface, spell checker, consultative core, and retrieval component, as well as examples of the Selection Routine and Meta-knowledge rule sets; and (3) implementation issues. Three figures present components of an online search, the decision tree of the Selection Routine, and system description. (AEF)

Descriptors—*Computer Mediated Communication, *Computer System Design, *Cooperative Learning, Cooperative Programs, Distance Education, Foreign Countries, *Group Activities, Interaction, User Needs (Information), Users (Information), *World Wide Web

Identifiers—Design Methodology, Web Browsers

This paper describes a communication system accessible by a World Wide Web browser. The main advantage of this system is to encourage a collaborative way of learning using asynchronous communication channels. The conversation is strongly structured by the system itself which helps the users to coordinate their actions, playing their respective roles within a task. A conversation always occurs in the context of a task where each user plays a particular role. The system is built around the notion of active form, which is the single way for the user to communicate with the system. This system can be used by the actors of the educational process to organize their work. Globally, the basic services provided by this asynchronous communication system are informal exchanges, question-answer exchanges, date negotiation, pro-con argument production, action negotiation, and opinion collection. These basic services are enhanced by a subset of complementary services which are needed to manage, adapt, and integrate the system using existing communication tools to meet users' needs. A participative design approach has given the system a good degree of usability. Contains 19 references. (AEF)

Identifiers—Authentic Assessment, de Bono (Edward), Postman (Neil), *Technology Assessment, Virginia

This paper describes a technology assessment curriculum developed at Auburn High School (Virginia). The program was used in Honors Biology and General Chemistry classes and is based on Neil Postman's ten principles of interaction between technology and society and Edward de Bono's "Six Thinking Hats," a system of approaching a problem that provides a formalized framework to focus thinking. Objectives of the programs were for students to: analyze local and recent technological, economic, scientific, and cultural interactions; address these technologies from the points of view of de Bono's and Postman's frameworks; and produce a portfolio of products according to principles of authentic assessment that document an understanding of Postman's principles and the technologies investigated. Topics discussed include: (1) rationale for the project and an introduction to de Bono's and Postman's techniques; (2) standards and technology education, including Virginia and national standards/frameworks; (3) the importance of technology assessment to contemporary society; (4) the amount of technical knowledge needed to make intelligent decisions about technology; and (5) basic skills necessary in order to be comfortable with investigations into technology/science/society issues, including understanding of the foundations of scientific reasoning, and science, humanities, and social sciences problem solving skills. Sample

student handouts and assignments are included. (DLS)

Identifiers—Concordia University PQ, *Technology Integration, Technology Utilization, Web Pages, *Web Sites

One of the issues surrounding the successful integration of technology into teaching practices is teachers' lack of time to develop or modify lesson plans, units, or curricula to incorporate technology. The Education Forum Web site, http://education.concordia.ca/~heidi_schnackenberg/educationforum, developed as a project for a graduate course on educational computing at Concordia University (Quebec), was created to solve this problem by: (1) saving teachers the time and frustration it takes to do a general search for technology lesson plans; (2) saving teachers time by evaluating the lessons and only including instructionally sound lesson plans; and (3) saving teachers time by pre-categorizing technology lesson plans according to subject matter area, in order to facilitate the choosing of technology-based lesson plans. The overall organization of the site includes links to many teacher information resources, search engines, and technology-based lesson plans. The lesson plan page constitutes a major focus of the site and is divided into Language Arts, Social Studies, Mathematics, Science, Art, Music, and Foreign Language, specifically targeted for K-12 teachers. The Education Forum was included as a resource in an inservice teacher workshop on basic principles of effective incorporation of technology into teaching practices. Examples of Educational Forum pages are appended. (DLS)

Identifiers—Quebec, Teacher Needs, *Technology Integration, *Technology Utilization, Training Needs

This paper reports on a needs assessment, conducted in two elementary schools in Quebec, that examined the use that teachers are making of the

computer facilities, as well as their skill and confidence levels in this area. The first section provides a general description of the project, details the sources of information, and discusses the reasons for performing the assessment. Results of the analysis are presented in the second section, including summaries of: interviews with the school board director, the regional technology coordinator, principals, computer resource teachers, and the technology integration specialist at the Quebec Ministry of Education; teacher focus groups; and teacher surveys. The third section presents recommendations, including: description of the performance gap (i.e., the gap between teachers' current use of technology and the ideal vision described by various members of the school community); general recommendations in the areas of professional development, pedagogical support, and technical support; and a format for a workshop to enable teachers to incorporate technology into their teaching. An appendix contains the teacher survey, including results. (DLS)

Identifiers—Concordia University PQ, Gagne (Robert M.), *Instructional Theory, Web Pages, *Web Sites

This paper describes a World Wide Web site on learning theories, developed as a class assignment for a course on learning and instructional theories at Concordia University (Quebec). Groups of two to four students developed pages on selected theories of learning that were then linked to a main page developed by the instructor and a doctoral student. Overall, the Web site examines issues and applications of learning theories, including behaviorism, cognitive information processing, meaningful reception learning, schema theory and mental models, Piaget's genetic epistemology, interactional theories of cognitive development, motivation theory, Gagne's theory of instruction, and constructivism. Each page or series of pages summarizes the main points of a particular theory, provides practice-with-feedback questions for the user, gives examples of how the theory is used in actual practice, and includes related articles so that the user can further pursue the topic. The aim of the site is to provide an understanding of theoretical and practical issues related to the numerous theories of learning so students can engage in high-level discussions in the course. An appendix illustrates the course home page and the pages on interactional theories of cognitive development and Gagne's theory of instruction. (DLS)

Identifiers—Quebec, *Technology Integration, Technology Utilization

This paper describes the teacher inservice training that was developed as the result of a technology needs assessment at two elementary schools in Quebec. The workshop was developed as an initial vehicle for enabling teachers to incorporate technology into their teaching. The six days of the workshop are sketched, and the materials used in the workshop are summarized. Workshop objectives are for the participants to be able to: (1) analyze an existing lesson plan to verify that it is instructionally sound, and modify it when necessary; (2) determine if an existing traditional lesson plan is suitable for the incorporation of Internet resources; (3) identify types of Internet resources available and relevant for the elementary classroom; (4) locate World Wide Web resources that can be incorporated into lesson plans to make them technology lesson plans; (5) state ways of modifying current classroom management techniques to adapt to technology lessons; (6) successfully implement a lesson plan incorporating technology; (7) utilize methods of limiting student access to the Internet; (8) apply appropriate consequences to students who misuse the Internet; and (9) create a long range plan for using technology in the classroom. The field testing of the workshop and its implications are also discussed. (DLS)

Descriptors—*Adoption (Ideas), Art Education, *Computer Uses in Education, *Curriculum Development, Educational Technology, Elementary Secondary Education, Information Technology, Instructional Design, *Instructional Development, Literature Reviews, Models, Postsecondary Education, *Teacher Education, Teacher Surveys, Teaching Methods, Use Studies

Identifiers—*Barriers to Implementation, *Technology Implementation, Technology Integration, Technology Utilization

This article examines barriers to technology adoption based on the literature and data from two studies. A five-step hierarchical model (familiarization, utilization, integration, reorientation, evolution) of adoption of technology in the classroom is presented, and internal and external barriers to technology adoption are examined. The two studies are then described. In the K-12 study, 1,000 art teachers were surveyed to: ascertain current levels of technology adoption; characterize teaching strategies used for learning in computer-based art classrooms; identify barriers to technology adoption; and propose an instructional model. In the second study, information on the impact of a large-scale initiative, the Electronic Academy, implemented at two- and four-year institutions in a Midwestern state postsecondary system, was collected from instructional technology coordinators. A product of this examination is a visual representation of the interactions and interdependence of elements that contribute to the construction of barriers to technology adoption. The model is intended to clarify internal and external obstacles and to serve as an aid to pre-service and in-service teacher education curriculum designers and developers as they plan for the successful infusion of newer technologies in the curriculum. Three tables contain a summary of research on barriers to technology adoption and data on barriers to technology adoption at the elementary, sec-

ondary, and postsecondary levels. (Contains 28 references.) (DLS)

Identifiers—Information Value, Technology Integration, Technology Utilization, Training Needs

This practicum was designed to provide more comprehensive access to current and relevant information for students and teachers in an elementary school for curricular augmentation, research, and classroom projects. The printed materials and electronic databases in the library (media center) did not have the information needed because of their age, scarcity, or insufficient subject matter. Teachers and students needed to learn how to access and use the Internet to find information. An Internet training program was developed for both teachers and students at the elementary level. Weekly lessons in the library instructed teachers and students on the basics of the Internet, conducting an effective search, validating found information, augmenting the curriculum with this information, and locating current and relevant information for classroom projects and research. Analysis of the data revealed that both teachers and students were more likely to use the Internet after an extensive training program. All teachers and students showed a marked increase in Internet usage throughout the training program. The most important element in increasing Internet usage among teachers was the continuous, ongoing support they received throughout the training. This support lessened the anxiety most teachers experience after training. Subsequently, they are utilizing the Internet for curricular augmentation regularly. (Contains 53 references.) (DLS)

Giving Psychology Away through Technology-Based Distance Instruction.

Pub Date—1998-00-00

Note—10p.; Paper presented at the Annual Convention of the American Psychological Association (106th, San Francisco, CA, August 14-18, 1998).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Access to Education, Computer Uses in Education, *Distance Education, Educational Principles, *Educational Technology, Educational Trends, Guidelines, Higher Education, *Information Technology, *Instructional Design, Lifelong Learning

Identifiers—Learner Centered Instruction, *Technology Based Instruction

This paper outlines key features of good distance education, drawing upon principles for good practice in undergraduate education and recorded experiences with distance learning programs in a number of content areas. The first section defines distance education and provides a historical perspective. Five interrelated phenomena that have accompanied the rapid growth of information technology to promote widespread use of distance learning are described in the second section, including the emergence of lifelong learning, learning centered instruction, providing access, rapid advances in technology and the psychology of learning, and increased interest in part-time study. The third section offers recommendations for good

distance education, and the last section summarizes the following lessons learned as a result of offering both undergraduate and graduate courses via distance learning: include adequate details in the syllabus; break the course into modules; conduct periodic assessment; encourage contact between students and faculty; and promote interaction between students. One figure presents a historical perspective of the phases of distance education. (DLS)

Nebraska Internet Evaluation Report, Year 5.

Pub Date—1998-12-00

Note—8p.

Pub Type—Reports - Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Access to Information, *Computer Uses in Education, Educational Technology, Elementary Secondary Education, *Internet, Principals, State Surveys, Teacher Attitudes, Teacher Surveys, Training, Use Studies

Identifiers—Administrator Surveys, Connectivity, Impact Evaluation, *Nebraska, *Technology Utilization

This final report of a comprehensive five-year evaluation process focused on examining the progress of the statewide implementation of Internet technology, as well as the general impact on teachers, students, and schools of statewide connectivity and training efforts in K-12 schools in Nebraska. The evaluation process was based on three primary types of data—teacher/principal survey data, machine-based Educational Service Unit (ESU) support data, and observed classroom uses and projects. Results are reported in the following areas: teacher use of the Internet; principal use of the Internet; student use of the Internet; the impact of Internet on classroom settings; example teacher statements related to their use of the Internet; and general implications of the Internet implementation efforts. The following general implications revealed by the evaluation process are summarized: (1) significant progress has been made in the process of connecting schools and classrooms to the Internet; (2) teachers and students are using the resources on the Internet in day-to-day classroom operations; (3) the Internet is becoming a valued tool for educators and students; (4) community interest is starting to parallel educational interest; (5) statewide dialogue, cooperation, and planning are becoming increasingly important; and (6) Nebraska continues to play a national leadership role. Descriptors—Annotated Bibliographies, Computer Uses in Education, *Educational Resources, Elementary Secondary Education, Evaluation Criteria, Glossaries, Information Policy, Information Retrieval, *Resource Materials, Safety, Search Strategies, *World Wide Web

Identifiers—Technology Integration, *Web Sites

This resource, designed to help K-12 teachers find relevant information on the Internet for both themselves and their students, lists educational World Wide Web sites that have been selected based upon their content and relevance to the curriculum. Each entry includes: the URL; comments describing how the site relates to the specific area of the curriculum and how teachers might use the site in the classroom; a rating for the quality of the presentation; a rating for the quality of the content and its

relevance to the curriculum; and appropriate grade levels. Subjects areas included are: foreign language; general; health and wellness; information technology; language arts; mathematics; music and performing arts; science; social studies; technology education; and visual arts. Selection criteria are listed in the introduction. The publication also includes instructions for searching the Web, hardware and software recommendations, guidelines for safety on the Internet, a sample school Internet policy and application for a school Internet license, and a glossary of Internet terms. Descriptors—Audiovisual Aids, Computer Uses in Education, Educational Technology, Higher Education, Inservice Teacher Education, *Multimedia Instruction, *Multimedia Materials, Portfolio Assessment, Problem Solving, Science Teachers, Secondary Education, Secondary School Science, Teacher Attitudes, Teacher Surveys, *Workshops

Identifiers—Confidence, Microsoft PowerPoint, QuickTime, *Situated Learning, Technology Implementation

This paper is based on observations of ten middle and high school science teachers in a multimedia workshop during the fall semester of 1997 in a large Northeastern public university. The workshop objective was implementation of multimedia technology in teachers' classrooms. The following methods were employed in this project: multimedia portfolio assessment, field notes, interviews, and questionnaires. Results were viewed from the situated learning perspective. Analysis revealed the following: teachers experienced positive conceptual change in their perception of PowerPoint, from it being a tool for teachers to it being a tool for students; goals of participants changed from more general to more specific; participants' confidence in video and computer skills improved; a collaborative environment developed among participants; participants showed emotional attachment to their workstations; teachers' reported understanding of the educational value of QuickTime movies improved; teachers' understanding of the educational value of PowerPoint presentations did not change; and teachers developed dependency on workshop staff. Nine tables illustrate the confidence decision tree from the information processing point of view, and results of selected questionnaire and interview responses. (Contains 25 references.) Identifiers—Access to Technology, Connectivity, *Information Value, Technology Integration, *Technology Utilization

This report provides data from a survey of a nationally representative sample of more than 2,000 public- and private-school teachers of 4th through 12th grade regarding Internet use by teachers and students. Information is provided about: (1) teachers' access to the Internet; (2) frequency of different Internet uses, including teachers' uses and teacher-directed student use; (3) the Internet's perceived value for teachers; (4) correlates of Internet use and perceived value, including measures of use employed, association between Internet access and use, teaching responsibilities and Internet use, experience and expertise, school support for teaching using technology, and pedagogical beliefs and practices; and (5) multivariate analysis of all predictors considered together (i.e., Internet access, teaching responsibilities, technology expertise, professional experience, school support for teaching, and pedagogical beliefs and practices) and of the factors that most differentiate users and non-users; and (6) conclusions. Data are presented in 28 tables and figures throughout the report. A summary of the study methodology is appended. (AEF)

Virtual Learning Environments.

Pub Date—1999-00-00

Note—12p.; Small print in figures may not reproduce clearly.

Pub Type—Reports - Descriptive (141)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Computer Mediated Communication, *Computer Uses in Education, Curriculum Development, *Distance Education, *Educational Technology, Educational Trends, Electronic Mail, Higher Education, Information Technology, *Internet, Teleconferencing, Training, World Wide Web

Identifiers—Access to Technology, Learner Centered Instruction, *Learning Environments, Newsrooms, *Technology Utilization, Video Teleconferencing, Virtual Classrooms, Web Sites

Focusing on online learning opportunities in higher education, this paper reviews the various tools of virtual learning and electronic synchronous and asynchronous communication, discusses their strengths and weaknesses, presents strategies for their best use, and warns against potential pit-

falls. Implementation issues, including cost and training requirements, are also discussed. An overview of Internet access and synchronous and asynchronous communication modes is provided. The following virtual learning tools are then described: World Wide Web pages, electronic mail, newsgroups, chat rooms, and videoconferencing. The paper concludes that the main challenge associated with virtual learning environments is to overcome the tendency to replicate traditional classroom practices in the virtual environment and to establish a more learner-centered curriculum. Four figures illustrate the Netscape Internet browser, Eudora Pro electronic mail software, newsgroups at Pepperdine University (California), and virtual meeting rooms. (AEF)

A Virtual Classroom for the Homebound Student.

Pub Date—1999-02-00

Note—6p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Access to Education, *Audiovisual Communications, Audiovisual Instruction, *Computer Assisted Instruction, Computer Mediated Communication, Computer Software, *Computer System Design, *Distance Education, Higher Education, Homebound, Program Implementation, Teleconferencing, *Visual Stimuli

Identifiers—Image Transmission, *Virtual Classrooms

This paper describes the implementation of data conferencing to provide visual stimuli to students in the Homebound Program, a college degree program designed to accommodate students who are unable to come to campus for classes. The data conference system, a simpler, more cost effective alternative to video conferencing, transmits still images as opposed to the moving images of a video conference. During the lecture, the remote student "audio attends" via speakerphone. The teacher writes or draws on the input tablet; the image is displayed on the teacher's computer monitor and is projected on a screen for the students in the classroom, while the host broadcasts the image via the network to designated workstations. Hardware and software requirements are listed, and how to set up the system is described. A figure illustrates the data conferencing system. (AEF)

Identifiers—Alberta, *Technology Integration

The Illustrative Examples are a companion resource to Alberta Education's 1998 "Information and Communication Technology, Interim Program of Studies." Purposes of the examples are to: clarify the intent of the general and specific outcomes of the program of studies; suggest ways to integrate the general and specific outcomes with programs of study in the core subject areas for grades 1-6; and suggest tasks and activities that may help students

achieve the outcomes within core subject areas. Each illustrative example includes a background or context, the task or activity, a scoring guide or rubric, specific outcomes, and related curriculum outcomes. Preceding the examples is an outline of information and technology general outcomes in the following categories: foundational operations, knowledge, and concepts; processes for productivity; and communicating, inquiring, decision making, and problem solving. A checklist for selected specific outcomes related to file management and basic procedures, text-data entry procedures, and computer workstation components for Divisions I (grades 1-3) and II (grades 4-6) is appended. Identifiers—*Alberta, Technological Infrastructure, *Technology Plans

This study examined how technology funding is planned, deployed and managed in six Alberta school jurisdictions and identified best practices and recommended strategies. Specific objectives were to research and examine, via interviews with technology personnel in each jurisdiction, the funding frameworks in place, and to report on commonalities, problematic areas, and recommended practices with respect to establishing and managing technology funding. The use of site-based, moderately site-based, and centralized funding models to equip schools with modern technology infrastructures is discussed. Best practices and recommended strategies are summarized in the following areas: (1) technology governance (establishing clear guidelines for managing technology, thereby maximizing return on investment and minimizing support costs); (2) managing the impact of computer networking (reshaping technology management and expenditure streams to reflect changes in how computers are used); (3) technology planning; (4) technology investment (addressing the major challenge of ensuring the long-term viability of technology investments); (5) accounting for investment (identifying the other costs involved in technology investment); and (6) technology funding sources (ensuring consistency across jurisdictions regarding sources of funding). A list of related Alberta Education resources is appended. (AEF)

Identifiers—Alberta, *Technology Integration, *Technology Plans, Visions

The successful implementation of Alberta's learner outcomes in information and communication technology will depend on the ability of educators across the province to understand how change occurs and what change means for those who are involved. Schools and school jurisdictions also must have a clear vision for the future and provide effective leadership and ongoing support for staff development. This report presents a review of the literature, focusing in the following areas related to the successful implementation of new curriculum and classroom projects: (1) understanding change theory; (2) vision, including technology as a higher-order thinking skill; (3) leadership; (4) technology integration plans, including overview, scope and sequence, instructional models and organizational issues, curriculum integration, and resources (i.e., software, hardware, and human resources); (5) planning for staff development, including assessing professional development needs and meeting individual needs; and (6) assessing progress. Appendices include: Alberta Education technology planning requirements; a list of 17 related Alberta Education resources; a best practices project template; and examples of the best practices for implementing Alberta's relatively new technology outcomes, as exemplified by 12 schools. (Contains 46 references.) (AEF)

This paper provides a snapshot of the computer network security industry and addresses specific issues related to network security in public education. The following topics are covered: (1) security policy, including reasons for establishing a policy, risk assessment, areas to consider, audit tools; (2) workstations, including physical security, protecting workstation components, and computer viruses; (3) the local network, including the OSI (Open Systems Interconnection) reference model, protocols, network segmentation, network management, network sniffing, and data encryption; (4) servers, including UNIX and other server operating systems; (5) remote access, including technologies, remote access servers, protocols, and authentication/authorization; (6) crackers and hackers, including threats and hacking tools/techniques; (7) Internet firewalls, including functions, issues and problems, types, rules, logs, firewall accessories, buying a firewall, and firewall administration; and (8) applications, including e-mail, directory services, the World Wide Web, and single sign on. Each section highlights unique requirements of school jurisdictions and contains a list of relevant web sites. A glossary of terms is provided, and appendices include descriptions of Windows NT Workstation and Server, Novell NetWare, and Apple Macintosh, as well as a security checklist and evaluation form and a list of related Alberta Education resources. Identifiers—Alberta, *Technology Integration, Visioning

This report focuses on promising practices in professional development as they relate to implementation of Alberta Education's 1998 "Information and Communication Technology, Interim Program of Studies." The first chapter examines fundamental issues, challenges some assumptions, and offers suggestions related to professional development and information technology. Professional development and growth planning are addressed in the second chapter, including forms that can be used in a structured approach to developing a professional growth plan; a more holistic approach, "vision building," is also defined, and an example of a vision building model is given. The third chapter focuses on the institutional face of professional development, discussing roles of professional developers, formats for professional development, mentoring, a functional model of professional development, the four catalytic functions of the model (stimulating interest, facilitating skill building, facilitating script building, dissemination), and technology within professional development. Critical success factors are discussed in the fourth chapter, including social factors (communication, social interaction), motivational factors (learning styles, self-confidence, relevance, incentives), and other environmental factors (time, school facilities/equipment, funding, technical support). Descriptions of 20 successful professional development workshops and projects are appended, as well as a list of related Alberta Education resources. (AEF)

Descriptors—Computer Interfaces, *Computer Networks, *Computer System Design, *Computer Uses in Education, Elementary Secondary Education, Foreign Countries, Glossaries, Information Networks, Models, Online Systems, Performance Factors, Systems Analysis, World Wide Web

Identifiers—Alberta, Computer Industry, Web Sites, *Wide Area Networks

This report examines subsections of the computer network topology that relate to end-to-end performance and capacity planning in schools. Active star topology, Category 5 wiring, Ethernet, and intelligent devices are assumed. The report describes a model that can be used to project WAN (wide area network) connection speeds based on user traffic, describes end-to-end performance issues, characterizes and identifies tools for online analysis, describes how network traffic has an impact on network design as well as computer architectures, provides basic metrics where available, and identifies industry trends. The introduction discusses end-to-end performance, WAN connection, and bandwidth model. A WAN analysis is then presented, describing: tools; packet size; performance monitor; WAN traffic; WAN equity; shared bandwidth; cache server; multiple WAN connections; subnets and filters; case analysis; pornography, hackers, and other problems; and diagrams and documentation. A section on layers and computer performance covers the central processing unit, memory, network interface card, greening, hard disk subsystem, graphics subsystem, and motherboards. A glossary of terms is provided. Links to relevant World Wide Web sites, the structure of the Alberta Education home page, and a list of related Alberta Education resources are appended. Also appended are several configuration diagrams and illustrations of displays. (AEF)

Descriptors—Academic Achievement, *Achievement Gains, Achievement Tests, *Basic Skills, *Computer Assisted Instruction, Computer Attitudes, Computer Literacy, Computer Software, Educational Policy, Educational Technology, Faculty Development, Grade 5, Intermediate Grades, Models, Program Effectiveness, Program Implementation, Scores, Skill Development, *State Programs, Student Surveys, Tables (Data), Teacher Surveys, Training

Identifiers—*Access to Computers, Computer Use, Stanford Achievement Tests, Technology Integration, *Technology Utilization, West Virginia

This report describes West Virginia's Basic Skills/Computer Education (BS/CE) program and connects its features to gains in student test scores that are practically and statistically significant. The program consists of three components: (1) software that focuses on the state's basic skills goals in reading, language arts, and mathematics; (2) enough computers in the schools so that all students will be able to have easy and regular access to the basic skills software; and (3) professional development for teachers in the use of the software and the use of computers in general. Data were collected from all fifth graders (n=950) in 18 elementary schools selected to represent the range of variables that might influence technology use and student achievement. Survey data were also collected from 290 teachers. Results were analyzed using a model that includes access to software and computers, atti-

tudes toward technology, and teacher training and involvement. The relationship of BS/CE to student achievement, as measured by the Stanford-9 achievement test, is examined. Findings suggest that the BS/CE program had a powerfully positive effect, especially in those schools that used it most intensively. Ten figures and tables illustrate findings. (AEF)

Identifiers—Alberta, Technology Implementation

This study provides suggestions and best practices for superintendents, Freedom of Information and Protection of Privacy (FOIPP) coordinators and school information technologists in dealing with the impact of Alberta's FOIPP Act on the application of information technologies within their organizations. The study explores the relationship between the requirements of the legislation and the ongoing application of technology within school organizations, as it relates to accessing information, protecting individual privacy, and managing electronic information. The study is divided into six parts: (1) FOIPP overview and checklist for senior managers; (2) introduction, covering the scope of the FOIPP Act and definitions; (3) accessing general information, including policy principles for information access; (4) accessing personal information; (5) protecting personal privacy, including privacy requirements, implementing privacy protection for information systems, planning new and modified personal information systems, privacy impact assessment, security of personal information, and contracting; and (6) FOIPP and information management, including managing electronic records, security, and e-mail. Appendices include strategies for school jurisdictions, basic questions for school jurisdictions, and related Alberta Education resources. (AEF)

Descriptors—*Computer Uses in Education, Consortia, Databases, *Educational Resources, Educational Technology, Elementary Secondary Education, Information Technology, Learning Activities, Learning Processes, *Material Development, Models, Multimedia Instruction, *Multimedia Materials, Student Developed Materials, Student Role, Teacher Developed Materials, Teacher Role, Teaching Models, Visual Literacy, *World Wide Web

Identifiers—*Engaged Style, Utah, Web Sites

This paper discusses the changing role of teachers and students working on the World Wide Web and outlines the following eight characteristics and associated descriptors of the engaged learning model: (1) vision of learning (responsive, strategic, energized, collaborative); (2) tasks (authentic, challenging, multidisciplinary); (3) assessment (performance based, generative, multiple measurements); (4) instructional model (interactive, generative); (5) learning context (collaborative, empathetic); (6) grouping (heterogeneous, flexible, equitable); (7) teacher roles (facilitator, guide, co-learner); and (8) student roles (explorer, apprentice, teacher/mentor, producer). SURWEB (State of Utah Resource Web), an Internet-based multimedia tool and resource database for directly involving both teachers and students in these types of engaged learning activities, is described. SURWEB was initiated in 1995 by a consortium of public and private agencies including Utah's K-12 educational service centers, institutions of higher education, West Ed Regional Education Laboratory, museums, state and national parks, and Native American tribal councils and agencies. Its growing database provides teachers with hundreds of media shows, electronic field trips, and standards-based learning units. Furthermore, the tool enables students and teachers to create and produce multimedia presentations. Web sites for a sampling of student/teacher produced media shows are listed, and guidelines for successful classroom instruction using the Web are provided. (AEF)

Identifiers—Americanization, Connectivity, Globalization, *Portugal, *Technology Implementation, Web Sites

This paper describes three government-funded technology programs in Portugal and the changes they brought about in Portuguese schools: (1) Project MINERVA (Computing Means in Education: Rationalization, Valorization, Actualization), launched in 1985 and ended in 1994, was an innovative program to introduce new technologies in schools; (2) Program Internet in School, launched in the 1997-98 academic year, aims to connect all private and state schools to the Internet; and (3) Program Nonio-21st Century, created in 1996, has the priority of developing modern, updated schools that strive for precision, quality, and autonomy. In concluding remarks, the paper notes that the Portuguese government, through the Secretary of Science and Technology, announced the intention of distributing one million free e-mail addresses and of increasing one thousand-fold the production of Portuguese sites on the Internet with the contribution of different partnerships. Also discussed are the Internet as a vehicle for the transmission of American culture and the positive and negative effects of globalization. (AEF)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Computer Assisted Instruction, Curriculum Development, Educational Development, Educational Objectives, *Educational Research, Educational Technology, *Elementary Secondary Education, Research Needs, *World Wide Web

Identifiers—Technology Integration

This paper proposes three criteria for developing research questions that have the potential to illuminate the understanding of Web-supported learning in K-12 classrooms: (1) questions should be situated in progressive instructional contexts; (2) questions should focus on what is happening in the Web-supported learning environment in addition to measuring outcomes; and (3) questions should emphasize unique capacities of the Web as a tool or medium. These criteria are offered as a starting point for dialogue among researchers about questions sensitive to progressive education goals. A description of the variety of ways that the Web is being used to influence learning in K-12 classrooms includes introducing an example from a case study that typifies how most teachers currently use the Web within the context of their existing curriculum. Also reviewed are some of the major collaborative efforts between researchers and teachers to integrate cognitive tools and structured learning opportunities into Web-supported classrooms. (Contains 24 references.) (AEF)

Descriptors—Computer Literacy, *Computer Uses in Education, Elementary Secondary Education, *Faculty Development, Instructional Design, *Mentors, Models, Teaching Methods, *Training

Identifiers—*Technology Integration

This paper presents a model for professional development that is site-based and utilizes a Teacher-Mentor approach for technology training. To guide the development of such models for schools, the paper discusses the following principles: (1) the Teachers Computer Ability Profile (TCAP), a straightforward instrument teachers can use to self-assess their skills in seven areas of technology use; (2) the Individualized Professional Development Plan; (3) benefits of the Teacher-Mentor Model; (4) seven essential elements of a comprehensive teacher-mentor professional development model; (5) student involvement in the school's model; (6) development of a training curriculum; and (7) evaluation methods. Included at the end of the paper are: a diagram of the Professional Development Model, Teachers Computer Ability Profile, and online resources for technology planners. (AEF)

Descriptors—College Faculty, *Computer Anxiety, *Computer Assisted Instruction, *Computer Attitudes, *Computer Uses in Education, Educational Technology, Higher Education, Information Technology, *Teacher Attitudes, *Teacher Surveys

Identifiers—Technology Implementation, *Technology Integration

This survey of faculty attitudes toward technology calls for more critical dialogue on the uses, effects and hidden costs of information technology in the classroom and the national political economy. A survey was administered to 250 faculty members (135 were returned) at a northeastern university. The comments of respondents fell into two main areas of concern related to the use of information technologies in education. Most dramatically, instructors worried about the devastation of the teaching profession and, with it, the loss of their own jobs. Second, many were anxious about the dehumanization and alienation their students might face in a computer-dominated learning environment and workplace. Much of the expressed anxiety centered on the notion of distance learning. A few respondents said they had no objections to the potential uses of technology in education, but had not explored these personally because of limited resources and time. Others expressed eagerness to do whatever would be expected of them when the new technologies appeared on campus, while some said technology would be impossible to use in their particular disciplines. Many, including elite technology users, said they doubted students were being "educated" simply by using computers, and a few were cynical about the claims that mastery of computer skills in college would enable their students to find high-paying jobs after graduation. Contains 22 references. (AEF)

Instructional Design for the 21st Century: Towards a New Conceptual Framework.

Pub Date—1998-10-00

Note—11p.; Paper presented at the International Conference on Computers in Education

(Beijing, China, October 14-17, 1998).

Pub Type—Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Constructivism (Learning), Conventional Instruction, Educational Development, *Educational Principles, Educational Theories, Futures (of Society), *Instructional Design, Instructional Development, Teaching Methods, Teaching Models

As a new century approaches it is time to reassess the foundations on which instructional design currently rests, as well as the "mode of thinking" that it promotes. Traditional theories regarding instructional design have largely been implicitly based on out-moded eighteenth century conceptions of the physical universe (a mechanistic world view) involving certainty, determinism, and predictability. Using insights provided by 20th century science (particularly quantum theory) into the nature of knowledge, the field of instructional design should cultivate a post-mechanistic conceptual framework which would involve exploring the construction of human knowledge, explicating the use (and limitations) of Aristotelian logic, appreciating the "theory-ladenness" of observation, realizing the role of language in constructing meaning, accepting the role and impact of the observer on what is observed, and appreciating the usefulness of both the reductionist and holistic approaches. Contains 25 references. (Author/AEF)

Descriptors—*Computer Assisted Instruction, *Computer Mediated Communication, *Computer Software Development, Computer System Design, *Cooperative Learning, Design Preferences, Educational Technology, Higher Education, Innovation, Middle Schools, World Wide Web

In January 1999, an interdisciplinary seminar of doctoral students from cognitive, educational and computational sciences was organized to study theoretical texts that might provide insight into how to support collaborative learning with perspectives-based software. The seminar uses a Web-based tool called WEBGUIDE to mediate and structure collaborative learning, including reflection on use of the software. This software uses an innovation mechanism to define a flexible system of perspectives on a shared knowledge construction space. WEBGUIDE provides an electronic and persistent workspace for individuals and teams to develop and share distinctive points of view on a topic. The software and associated usage practices are being designed by testing it in a middle school classroom and in an advanced graduate seminar. The experience in these usage situations has raised a range of questions concerning theoretical and practical issues, which are driving the research. This paper is a reflection on what the designers are learning collaboratively about how software artifacts can mediate learning and shared cognition. Contains 36 references. (AEF)

Identifiers—*Gates (Bill), National Foundation for the Improvement of Education

This report summarizes findings and recommendations from the Road Ahead Program (1995-1997) of the National Foundation for the Improvement of Education (NFIE), a nonprofit foundation of the National Education Association and funded by Bill Gates, cofounder and CEO of Microsoft Corporation. Twenty-two sites in 15 states were selected by the NFIE. The essential elements of the Road Ahead included: (1) school-community partnerships, (2) a \$30,000 grant to each site, (3) three conferences, (4) a teacher mentor assigned to each site, (5) an online network, and (6) Microsoft software. Evaluation surveys focused on two fundamental questions: (1) To what extent were sites able to implement their programs and achieve their explicit objectives? (2) What effects did the Road Ahead model have on the four areas of concern—student learning, professional development, technology use, and systemic change? Findings are discussed in this report in terms of each of these four areas. Factors that helped and hindered the program, program support, and recommendation are also discussed. (AEF)

Identifiers—Technology Role

This paper presents research about the relationship between technology education and professional development of teachers and teachers-in-training, and discusses the implications for teachers' professional development. The research method included the use of a four-page survey instrument, follow-up interviews, and journal entries. This paper addresses a review of how educators' perspectives of their profession, work, and worldview changed as a result of learning to use technology for professional and personal purposes. This change is described in terms of perspective transformation learning theory and specific application to the participants' individual contexts. Includes questions for the discussion. Contains 25 references. (Author/AEF)

Collateral Benefits of an Interactive Literacy Program for Grade 1/2 Students and Their Teachers.

Pub Date—1999-04-00

Note—21p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-

23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price – MF01/PC01 Plus Postage.

Descriptors—*Computer Assisted Instruction, Computer Literacy, *Computer Software Evaluation, Grade 1, Grade 2, Literacy, Primary Education, Reading, Skill Development, Tables (Data), Writing (Composition)

This study examined the collateral effects of WiggleWorks, an interactive literacy program, in two settings: a cohort study comparing random samples of grade 1-2 students (n=452) before and after software implementation and a longitudinal sample tracing students from Kindergarten to grade 1 (n=126). WiggleWorks contributed to greater student use of computers, and enhanced computer skills, computer self-efficacy and (in grade 1 only) enjoyment of computers. Positive effects were observed regardless of whether the school received new hardware at the time of software delivery or used existing equipment of sufficient power acquired a year earlier. In addition, following WiggleWorks implementation, teachers became more confident about their ability to use computers and were more likely to assign students to self-directed exploration of computer functions. The study suggests that the high cost of adopting interactive literacy software may be warranted if the program has benefits beyond its contributions to reading and writing skills. Four tables present statistics. Contains 37 references. (Author/AEF)

Identifiers—*Virginia

New standards in the state of Virginia are being instituted to require that professional development programs for pre-service principals include experience with technology. This study was designed to identify relevant topics that should be part of that experience. Surveys and interviews were used to gather information from in-service principals and principal interns regarding policy issues, technology leadership issues, and personal computer use. Based on survey results, a technology class is proposed that addresses each topic through discussions and context-based projects designed to meet the individual needs and interests of class participants. The survey form, template letters to principals and sample course syllabus are appended. Contains 12 references. (Author/AEF)

Descriptors—*Computer Attitudes, Computer Literacy, *Computer Uses in Education, *Educational Technology, Elementary Secondary Education, Higher Education, Interviews, Stu-

dent Teachers, Tables (Data), *Teacher Attitudes, *Teacher Education

Identifiers—Technology Role

To gain the perspective of nine students currently being prepared to become teachers, this study used semi-structured interviews to examine their beliefs about computer-based educational technology. Areas for study included their views on the role of technology in the K-12 classroom, as well as their beliefs about their own skills in using technology and their perspectives on the most effective means of acquiring skills and implementing technology-infused activities into their classroom practice. Analysis found that participants' beliefs could be grouped into eight categories: background information; social dynamics; computers as used by teachers; computers as used by students; curriculum; learning about using computers; knowing about using computers; and availability of computers at school sites. Representative participants' responses in each category are reported, giving a detailed view of these preservice teachers' beliefs. Appendices include the coding structures and coding response tables. Contains 56 references. (Author/AEF)

Identifiers—*Compressed Video, Learning Environment

Distance education is moving toward more interactive environments. Studies of student satisfaction with distance education suggest that the level of interaction in the class is related to perceptions of satisfaction regardless of the instructional medium. This paper reports findings from a study of four graduate research and evaluation courses at a mid-western public university that were taught using interactive television technology, specifically, a compressed video system. Two of the courses had three delivery sites each and two had two sites each. Data were collected using multiple sources. Data included information on student background and experience with distance education; videotapes of classes; surveys of distance education satisfaction; five-minute feedback forms; student journals; surveys of student perceptions of interactivity; and student achievement data. A particular focus in this study was on "interactivity" in distance education. The results reported focus on data from four sources: (1) surveys of student perceptions of interaction, (2) videotape data from the classes, (3) student journals, and (4) one-minute feedback forms. Contains 20 references and the interaction survey. (JMK)

Descriptors—Academic Achievement, Computer Assisted Instruction, Computer Uses in Education, *Distance Education, Educational Technology, Higher Education, *Instructional Effectiveness, Instructional Materials, Interactive Video, Student Attitudes, *Student Reaction, Visual Aids

Identifiers—*Asynchronous Learning Networks

The purpose of this study was to determine whether asynchrony between audio and visual presentation in distance education classes had an impact on student perceptions of distance learning and student achievement. Six distance education courses, all in different disciplines, were taught from six different locations to a minimum of one satellite location. Over 115 students from these classes filled out a 42-item post-course questionnaire. In addition to demographic data, two constructs emerged from the questionnaire. One construct was labeled "metacognition." The second construct, "technology," is the focus of this paper. This construct was found to have predictive value in: (1) determining whether students would enroll in future distance education courses; (2) determining whether they would recommend such courses to other students; and (3) predicting their final grade. Questions dealing specifically with asynchronous audio/video presentation of distance education classes revealed that there was no measurable impact of the asynchrony on student perception of performance, nor their willingness to register for future distance education courses. Further quantitative statistical analyses were conducted to explore other areas which might prove helpful in formulating future distance education classes. The Factor Loadings pattern matrix is appended. Contains 11 references. (Author/AEF)

Do Computers Enhance or Detract from Student Learning?

Pub Date—1999-04-00

Note—20p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price – MF01/PC01 Plus Postage.

Descriptors—*College Students, *Computer Literacy, Higher Education, Information Technology, Outcomes of Education, Questionnaires, Secondary Education, Undergraduate Students

Identifiers—*College Student Experiences Questionnaire, Computer Use, Computer Users, Technology Role

The purpose of this study is to determine the relationships between students' self-reported use of computers and other information technologies and the outcomes of college thought to be essential for success during and after college. Data for this study are from the College Student Experiences Questionnaire (CSEQ) national research program. The sample is composed of 125,224 undergraduates from 205 four-year colleges and universities in the United States who completed the third edition of the CSEQ between 1990 and 1997. GNCMPTS is the gain item that asks students to indicate the extent to which they made progress during college in using computers and other information technologies. The sample was divided into two groups: High Gainers who reported substantial progress on GNCMPTS and Low Gainers. The results of this study unequivocally demonstrate that familiarity with computers contributes to, and does not detract from, the development of other skills and competencies considered to be important to success after college. Four tables present statistics. The CSEQ background variables and gains scales are appended. Contains 39 references. (AEF)

Through state and regional education networks and commercial providers, the vast resources of the Internet are increasingly available to administrators, school library media specialists, and classroom teachers. This ERIC Digest lists a sample of no cost Internet resources of special interest to K-12 educators (resources and addresses are subject to change). Highlights include: guides to Internet resources; lesson plans and teaching materials; keypals and penpals; acceptable use policies; technology plans for K-12 schools; Internet projects for the classroom; grant information; e-rate information; federal government information; state education departments; standards-based education; reference resources; library catalogs; and other resources. Descriptors—Case Studies, *Distance Education, Educational Research, Instructional Design, *Instructional Effectiveness, Material Development, Needs Assessment, Nontraditional Education, *Program Effectiveness, Program Implementation, Teaching Methods

This paper reviews an earlier study examining the variables affecting the success of distance learning programs. In 1995, Dr. Ellen Wagner developed a list identifying the following 16 variables which need to be considered if a distance learning program is to be successful: needs assessment; audience analysis; instructional design; course selection; course reconfiguration; lesson planning; interactive instructional strategies; instructional delivery systems; adapting media and materials for distance delivery; developing effective graphics; using facilitators at distance education sites; learner and instructor support services; program evaluation and learner assessment; organized readiness; inter-institutional partnerships; and regulatory environment. Nine case studies and three non-case study journal articles that describe distance learning activities and/or success factors were reviewed to test the validity of these variables. Findings suggest that these variables are generally considered during course design or implementation. The suitability of the factors, however, is dependent on the nature of the organization into which the program is being delivered, and the selection of the delivery mode. Three tables present study results. (AEF)

Information and Communication Technology (ICT) is now part of almost every aspect of the primary school curriculum. This book, designed for primary school teachers of all subjects, shows how teachers can enhance their instruction with ICT. Chapters are as follows: (1) Introduction; (2) Opportunities for ICT in Teaching Mathematics; (3) Roamers, Pixies and Screen Turtles; (4) The Computer as a Graphic Tool; (5) Spreadsheets and Investigations in Mathematics and Science; (6) Creating and Interrogating a Database in Mathematics; (7) Opportunities for ICT in Teaching English; (8) Overlay Keyboards and Non-Fiction Writing Composition; (9) Information Retrieval Using CD-ROM; (10) Multimedia Authoring; (11) The Tabular Database as a Tool for Inquiry; (12) Data Logging; (13) Approaches To Control Technology; and (14) The Internet in Primary Schools. Names and addresses of suppliers are appended. Includes a bibliography and an index. (AEF)

Descriptors—*Computer Assisted Instruction, Computer Uses in Education, *Distance Education, Educational Development, Educational Practices, Educational Technology, Foreign Countries, Futures (of Society), Higher Education, Nontraditional Education, Teaching Methods, Teaching Models

This book provides an analysis of teaching and learning and the network of issues and concerns that underpin distance education. It reviews several existing models that permeate current practice, and that will influence future practice, and relates these to pedagogics. The book provides not only an overview of historical developments but explains the thinking that is influencing current practice and that which is likely to influence future practice around the world. The first chapter "Taking Stock" outlines essential elements of the pedagogics of distance education. The second chapter "Distance and Proximity" describes five models of instruction (correspondence, conversation, teacher, tutor, and technological-extension). The third "Three Constitutive Concepts" and fourth "The Three Concepts in Practice" chapters discuss the three constitutive concepts of Dialogue, Structure, and Autonomy, and describe these concepts. The fifth chapter "Modifying Concepts" discusses the concepts of open, lifelong, post-industrial and post-modern learning. The sixth chapter "Digital Information and Communication" analyses working forms in the digital-learning environment, in teleconferencing, and in the virtual university. Chapter seven "Teaching and Learning Models Specific to Institutions" introduces distance teaching and learning models from institutions around the world. The eighth chapter "Analyses and Perspectives" provides an analysis of different models of teaching and learning in distance education. An appendix presents four examples showing distance instruction using various technologies. Includes subject and name indexes. (AEF)

Identifiers—Information Age

This book examines new learning and telecommunications technologies and their potential applications to enrich the learning process, to ensure educational equality for all students and to help cultivate the "Educated Person," one who is capable of maintaining a high quality of life, and of contributing to the betterment of the community and the world as a whole. The book is divided into four sections: (1) Education in the Information Age, (2) The Learning Environment, (3) The New Learning and Telecommunications Technologies, and (4) Effective Utilization of the New Learning and Telecommunications Technologies. The first section examines the need for educational reform, the goal of that reform, and the role of technology in realizing that goal. The second section addresses the sig-

nificance of the learning environment and the necessary conditions for providing teachers and students with access to models of excellence in human resources and in learning materials. The third section presents the new learning and telecommunications technologies, emphasizing their potential applications in education, and the fourth section focuses on necessary conditions conducive to the empowerment of teachers to teach and students to learn in the Information Age. Includes an index. (AEF)

Descriptors—*Access to Information, Agency Cooperation, Community Needs, Community Programs, *Community Services, Cooperative Planning, Evaluation, Fund Raising, *Information Networks, *Information Services, Library Networks, *Library Role, Marketing, *Public Libraries, Strategic Planning

This publication outlines the complete community networking process: planning, developing partnerships, funding, marketing, content, public access, and evaluation, and discusses the variety of roles that the local public library can play in this process. Chapter One, "The Importance of Community Networking," describes the importance of community networking: the National Information Infrastructure and telecommunications policy; community networking goals; and the history of community networking. Chapter Two, "Why Libraries Should Participate," discusses reasons why libraries should participate: community networking services; new possibilities; the synergy between libraries and community networks; next steps; and community networking organizations. Chapter Three, "Planning the Community Network," deals with planning the community network: setting a direction; forming a steering committee; citizens and consumers; format, content, and audience; ten rules of community network success; community assessment; and developing a business plan. Chapter Four, "Developing Community Partnerships," covers developing community partnerships: collaboration; strategies for successful partnerships; choosing your partners; library partnerships; and local government online. Chapter Five, "Managing a Community Network," discusses managing a community network: administration; volunteer management; and volunteer management information online. Chapter Six, "Funding Issues," deals with the following funding issues: costs; funding options; grant writing; grant information online; and fund-raising information online. Chapter Seven, "Marketing and Public Relations," discusses marketing process and public relations. Chapter Eight, "Developing Local Online Information," focuses on: delivering local content; building relationships with United Way Agencies; information and referral (I&R); I&R on the Internet; and cataloging community information. Chapter Nine, "Public Access, Training, and Technical Support," covers: public access profiles; delivering training, support, and technical assistance; and public access policies. Chapter Ten, "Evaluation and Sustainability," focuses on the importance of evaluation. Each chapter includes a list of recommended readings. An appendix contains information on 70 online resources. Includes an index. (Contains 54 references.) (DLS)

Document Not Available from EDRS.

Descriptors—*Class Activities, *Cooperative Learning, Educational Technology, Elementary Secondary Education, Group Activities, *Information Literacy, *Learning Resources Centers, Lesson Plans, Media Specialists, *Outcome Based Education, *School Libraries, Student Projects

This publication is the second edition of a work designed to give school library media specialists and teachers a better understanding of cooperative learning and the tools to develop a successful program, and to offer new ways to implement cooperative learning into the middle and high school curriculum. Changes since the first edition are the result of changes in the educational climate, such as: the SCANS report (Secretary's Commission on Achieving Necessary Skills); the rise of outcomes-based education; the push for national standards; the ubiquity of rubrics; work on new national standards for library media programs; and the continued rise in information. The first part introduces cooperative learning theory and practice, and contains the following chapters: (1) "The Nature of Cooperative Learning"; (2) "Inclusive Ways of Learning"; (3) "Outcomes-Based Education"; (4) "Information Literacy"; and (5) "Building a Learning Community." The second section provides a variety of lessons that culminate in benchmark projects. The sixth chapter contains a key to the lesson activities, and introduces the lesson components: activity description; content outcomes; information literacy outcomes; prerequisite skills; rationale for the process; activity/grade level, time frame, resources, grouping, group tasks, and tips; assessment; and activity variations. Most lessons have been modified since the first edition to incorporate educational technology. In addition, a multi-faceted project is included for each subject, in order to promote in-depth student work over time. The lessons are divided into 12 chapters by subject area, including: art; domestic sciences; English; foreign languages; health and physical education; mathematics; music; psychology and sociology; science; social studies; technology; and vocational education. Includes a glossary and an index. (Contains 172 references.) (DLS)

Descriptors—*Access to Information, Government Role, Information Technology, *Internet, Library Equipment, Library Policy, *Library Role, Library Services, *Library Standards, Library Surveys, National Surveys, *Public Libraries, Tables (Data), User Needs (Information)

Identifiers—*Access to Computers, *Access to Technology

This publication reports on research conducted to follow up on a 1997 survey of public libraries and the Internet, co-sponsored by the National Commis-

sion on Libraries and Information Science and the American Library Association. The 1998 survey is based on a sample of 2,500 of the nation's 15,718 public library outlets. The survey found that 73.3% of public library outlets now offer public access to the Internet. However, only 68.6% offer graphical public Internet access to the World Wide Web (WWW) and only 45.3% offer graphical public access to the WWW at speeds of 56 kbps or greater. The first section contains background information: the Telecommunications Act of 1996; public policy debate; information technology, Internet and the digital economy; and public libraries as a public point of Internet presence. The second section presents the results of the 1998 survey: availability of public Internet access; public Internet access for areas with varying levels of poverty; public Internet access for urban, suburban, and rural areas; graphical public Internet access; bandwidth as a component of public Internet access; defining effective public Internet access; key measures connectivity and public Internet access, 1996-1998; number of graphical workstations as a component of effective access; use of filtering software and availability of an acceptable use policy for public Internet access. The third section discusses findings, policy issues, and commission responses: supporting ongoing surveys on public libraries and the Internet; initiating a dialog on effective public Internet access; and identifying policy questions and promoting additional research. The last section is a bibliography of 8 statistical studies funded by the commission. Five appendices contain: summary results; the survey instrument; the survey methodology; the survey results; and the contractor's analysis of the survey results. Includes 56 tables of figures. (DLS)

Identifiers—*Special Needs Children

This publication is a guide to assist librarians in taking a proactive stance to include families of children with special needs in programs and services. The focus is on families with children up to age five, and covers the basic principles underlying inclusion, family-centered service, resource-based practice, and the provision of library services to families and children with special needs. This manual has a practical bias, and the outlined strategies and methods focus on communication skills, competencies, adaptations, collaborations, networks, training, programs, and collection development. The first section, "Understanding Inclusive Practices," covers inclusion and the benefits of inclusion for all families and the public library; outlines the laws and regulations that support inclusion; and addresses principles of family-centered service and resource-based practice. The second section, "Getting Your Library Ready," deals with assessing the readiness of your library and staff; communicating with parents of special needs children; collaboration for success; and guidelines for adapting your library. The third section, "Developing Collections and Services," discusses collection development; learning through play and toy-lending services; par-

ent and professional resource centers; and electronic resources. Four appendices include: a bibliography of 130 print and audiovisual materials; a list of developmental milestones for infants and young children; contact information for individuals with Disabilities Education Act Coordinators; and information on the New York State Developmental Disabilities Planning Council's Library-Based Parent Resource Center Initiative. Contains an index. (DLS)

This publication is a guide to teaching astronomy through the use of mythology and its literature in grades 3-6. The book is divided into the following seven sections: "Introduction"; Chapter 1: "Luna: the Moon"; Chapter 2: "Del Sol: the Sun"; Chapter 3: "The Planets"; Chapter 4: "Star Bright, Star Light"; Chapter 5: "Traveling through Space"; and Chapter 6: "Responding to Literature." A list of the multiple intelligences, three recommended readings, and a lesson plan suggestion are included. Chapters 1-5 are structured so that each can be used individually or in combination with the others, and each contains introductory literature and response activities followed by a sequential process that leads students through the acquisition of basic scientific understanding within each topic. Each chapter contains a bibliography, focusing on myths and folktales, and offers suggestions for combining these stories with math, science, art, music, and the multiple intelligences. Chapter 6 contains general recommendations for responding to literature with which most literary works can be accommodated. An appendix contains contact information for: NASA teacher resource centers; other NASA resources; additional aerospace resources; publications; and equipment resources. Contains an index. (DLS)

This 30th volume of American Reference Books Annual (ARBA) covers 1,578 books and CD-ROMs published in 1998 (with some from 1997 that were not included in the previous volume). The basic purpose of ARBA is to provide comprehensive coverage of English-language reference books published or distributed in the United States or Canada during a single year. Dictionaries, encyclopedias, indexes, directories, bibliographies, guides, concordances, atlases, gazetteers, are reviewed in each volume. General encyclopedias that are updated annually, yearbooks, almanacs, indexing and abstracting services, and other annuals or serials are reviewed at intervals of 3 to 5 years. New editions of reference books are reviewed with comparisons to older editions. Titles produced for the mass market in the areas of collectibles, travel guides, and genealogy receive selective coverage. The book is organized in four sections—general reference works, social sciences, humanities, and science and technology. Within the sections, chapters are arranged alphabetically by subject. Signed reviews by subject specialists describe the contents, scope, purpose, and intended audiences of the titles, and most make special note of positive and negative elements, quality of writing, and how a book compares to similar titles. Includes author/title and subject indexes. (AEF)

Descriptors—Annotated Bibliographies, Cultural Awareness, *Cultural Education, *Ethnic Groups, Foreign Countries, High Schools, Higher Education, Information Sources, Lists, *Minority Groups, *Multicultural Education, Resource Materials, *World Wide Web Identifiers—Canada, *Multicultural Materials, United States, USENET, *Web Sites

Designed as a research aid for educators and students in high school or college, this guide gathers and organizes information about Internet and World Wide Web sources that deal with multicultural issues that are likely to be of interest to an English-speaking audience in the United States and Canada. The first chapter constitutes a comprehensive collection of resources covering sites that provide information dealing with multiple ethnic groups and cultures. The rest of the book is divided into chapters according to the ethnic or cultural groups considered—Native American, African American, Hispanic American, Asian American (General), Chinese American, Japanese American, Asian Indian American, Jewish American, Americans of Middle Eastern and North African descent, French Canadian, Cajun and Creole, and Hawaiian American. Within each chapter, introduction and general information sections are followed by sources presented alphabetically by subject. For each site, the book provides a complete Internet address and a brief annotation that describes the site and its features. Includes a site/sponsor index. (AEF)

Identifiers—Association of Research Libraries, *Geographic Information Systems, Web Sites

The Association of Research Libraries (ARL), in partnership with Geographic Information System (GIS) vendors and foundations launched the GIS Literacy Project in 1992. This SPEC Kit and Flyer provide results from a survey conducted to examine how, in the years since the GIS Literacy Project began, ARL libraries have organized their delivery of GIS. Results are discussed in the SPEC Flyer in terms of the survey questions which focused on four categories: (1) general information about the library's role in delivery GIS services; (2) the number, level, and academic preparation or other training of staff involved; (3) the amount and kind of equipment, software, and data files that support GIS in the library; and (4) the kind of service offered and by whom it is used. The SPEC Kit contains: the survey questionnaire summarizing and tabulating results; a list of responding institutions; representative documents from ARL, the University of Georgia, Harvard University, North Carolina State University, and Southern Illinois University; and selected readings and World Wide Web sites. This SPEC Kit and Flyer focus on the gifts and exchange function in Association of Research (ARL) libraries. The survey was sent to 119 ARL institutions via e-mail; 62 usable replies were received. Results, discussed in the SPEC Flyer, highlight trends and effects of changes in library automation, staffing decreases, administrative reorganization, reexamination of gift policies, federal tax law changes, solutions regarding appraisals, and recent political upheavals and uncertainties around the world. The SPEC Kit contains: the survey questionnaire summarizing and tabulating results; a list of responding institutions; representative supporting documents, including a planning document, workflow charts, policies and procedures, donor information, deeds, and exchange labels/miscellaneous documents; and selected readings and World Wide Web sites. Identifiers—Big Six, *Pathfinders, Web Sites

Intended for use by teachers, librarians, parents, and elementary school students, this book provides 115 pathfinders to a variety of subjects to guide a student's research and broaden a child's interest base. Each pathfinder (i.e., collection of resources on a given topic) includes: a description of the subject; the Dewey Decimal numbers specific to that topic; search terms to use when researching the topic; a selection of nonfiction, reference, and fiction books; a list of World Wide Web sites appropriate for student or teacher use; a list of multimedia materials, including CD-ROMs and videos; and cross-references to related pathfinders. Following the pathfinders, is a section that provides an introduction to research methods and describes the Big6(TM) Skills problem-solving approach, the I-

Search research method, and creating an alphabet book to discover and record information on a particular theme. Appendices include: a research methods and library skills bibliography; guidelines for researching on the Internet and evaluating Web sites; nontraditional citation methods; a list of periodical indexes for children's literature; and an annotated bibliography of children's magazines and their Web sites. Contains an index. (AEF)

Identifiers—*Small Libraries, Subject Specialists
Designed to assist smaller libraries in selecting suitable reference materials for their collections, this annual review source identifies and describes 538 of the most useful and affordable reference sources available. The reviews cover reference titles published in 1998. Detailed annotations describe the nature, scope, and usability of each work. In addition, the entries furnish complete bibliographic and ordering information. All entries are coded to indicate whether a book is recommended for purchase by school media centers, public libraries, or smaller college libraries. Four main sections include: (1) General Reference Works; (2) Social Sciences (social sciences in general, area studies, economics and business, education, ethnic studies and anthropology, genealogy, geography, history, law, library and information science, military studies, political science, psychology and parapsychology, recreation and sports, sociology, statistics and urban studies, and women's studies); (3) Humanities (humanities in general, communication and mass media, decorative arts, fine arts, language and linguistics, literature, music, mythology/folklore and popular culture, performing arts, and philosophy and religion); and (4) Science and Technology (science and technology in general, agricultural sciences, biological sciences, engineering, health sciences, high technology, physical sciences, resource sciences, and transportation). Includes author/title and subject indexes. (AEF)

Descriptors—Books, *Childrens Literature, Information Sources, *Latin American Literature,

Learning Activities, Multilingual Materials, Poetry, *Program Development, *Reading Materials, Spanish

Identifiers—*Latinos

This book is both a reference tool for locating high-quality Latino children's literature—rhymes, fingerplays, poetry, stories, plays, and books—available in the United States, and a resource guide containing successful ideas for using this literature with children of all cultures. Particular emphasis is placed on books by Latino authors, whether in English or Spanish or both, and on books originally published in Spanish by Latin American authors. The book is organized into two main parts. Part 1, "Planning and Program How-To," features five chapters that introduce Latino culture and present program ideas using poetry, stories and plays. Part 2, "Planning and Programming Resources," includes sources of materials, book lists, a Spanish primer for children's librarians, and an annotated bibliography. The English translation of Spanish titles follows in parentheses. Where there is a dual-language edition or both Spanish and English editions are available, both titles appear in italics. Contains an index. (AEF)

Descriptors—Branch Libraries, Library Collections, Library Development, Library Expenditures, Library Funding, *Library Networks, Library Personnel, Library Services, *Library Statistics, Library Surveys, National Surveys, *Public Libraries, State Surveys, Tables (Data)

Identifiers—*Wyoming, Wyoming State Library

This report includes data furnished by public library directors to the Wyoming State Library and gives a statistical picture of the condition of public libraries throughout the state for fiscal year 1998 (July 1997 through June 1998). Information is taken from a national survey of the Federal-State Cooperative System for Public Library Data. Libraries are listed in order of county population to allow for more relevant comparisons between library systems. The tables present the following data on county library systems: (1) a five-year (1994-98) comparison; (2) services, including number of employees, library visits, reference transactions, circulation, children's program attendance, library loans, and library borrows; (3) collections, including bound materials, audio materials, video materials, subscriptions, total collection, collection age, and expenses; (4) expenditures, including salaries, benefits, collection expenses, operating expenditures, capital outlay, format expense, and access expense; (5) revenues, including Mill Levy, and county, city, state, and federal revenue; (6) other income, including gifts/donations, interest, fines, fees, and grants; (7) staffing; and (8) other comparisons, including registered patrons to population, services per capita, collection size per capita, and collection turnover. Each table also lists population estimate, number of registered patrons, and number of locations. Two additional tables present data on service and collection by city/town. (AEF)

Identifiers—Florida

This packet supplements a workshop on summer reading programs given in December, 1998 in several Florida counties. Workshop objectives and ground rules for successful meetings and workshops are outlined at the beginning of the document. The Florida Library Youth Program is then discussed, including basic philosophy, outreach to children in poverty, age and ability levels, and materials and incentives. The remainder of the packet consists of the following materials: a decision matrix form; sources for promotional materials; suggested types of programs and services; factors to consider when choosing an evaluation method; evaluation form for the 1999 Florida Library Youth Program; summer library program statistics form; sample questionnaire for summer library program participants; sample survey of parents/guardians; and a selected bibliography. Identifiers—Florida, Web Sites

This manual is designed to accompany the 1999 Florida Library Youth Program, focusing on the theme of the library as a destination. This introductory section of the manual contains: an overview of the program that discusses basic philosophy, outreach to children in poverty, age and ability levels, and materials and incentives; a schedule of workshops; an adaptation of a puppet show; public service announcements; description of a promotional video, as well as a sample release form; program evaluation form; and a discussion of outreach library programming for school age children. The remainder of the manual consists of annotated bibliographies, divided by seven themes—"Strange New Worlds," "Map It Out," "Wild Places," "Winner's Circle," "Center Stage," "Cutting Edge," "Art Is Everywhere," and "Traveling Companions." Each thematic bibliography includes: books and stories; poetry, including riddles and jokes; "fun stuff," i.e., music, crafts, and activities; community and professional resources; computer resources, including CD-ROMs and World Wide Web sites; and films and videos. A game sheet is also included at the end of each section. Game answer sheets and an index are provided at the end of the manual. (AEF)

Information Skills in the New Zealand Curriculum: A Blueprint for Education?

New Zealand Council for Educational Research, Wellington.

Pub Date—1998-00-00

Note—18p.; Paper presented at the Annual Conference of the New Zealand Association for Research in Education (NZARE) (Auckland, New Zealand, December 4-7, 1997).

Pub Type— Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Computer Literacy, Curriculum Development, Educational Objectives, Foreign Countries, *Information Literacy, *Information Skills, Skill Development, Trend Analysis

Identifiers—Computer Use, Computer Users, New Zealand

The development of the "information society" or "information age" creates a global context for instruction in information skills. Ensuring that students have skill in handling, understanding, and producing information is increasingly considered a vital educational goal. This paper reviews the literature on information literacy, focusing on the common elements and aspects of information skill sequences and components. The nature of information skills as presented in New Zealand curriculum documents is reviewed and evaluated against international trends. Possible implications for assessment and education are examined. Tables/figures include: (1) sample definitions: sequential stages; (2) sample non-stage definitions of information literacy; (3) information literacy phases and attributes; (4) information literacy components; (5) psychological domains of information literacy; relationship of New Zealand curriculum framework essential skills to information literacy; (6) achievement objectives for information processing; and (7) development framework for measurement and assessment: information skills-cognitive and affective. Searching the Web: Expert-Novice Differences in a Problem Solving Context.

Pub Date—1999-00-00

Note—23p.

Pub Type—Reports - Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Comparative Analysis, Computer Attitudes, Foreign Countries, Information Sources, Internet, *Online Searching, Problem Solving, *Search Strategies, World Wide Web Identifiers—Browsing, Computer Users, *Experts, *Novices

The purpose of this exploratory study was to compare three experts and three novices in a Web-based problem solving context. The task was to search and evaluate Web sources for writing a research paper on a topic (inquiry based instruction, or IBI) that was unfamiliar to the users. The following research questions guided the study: (1) What type of navigational strategies do experts and novices employ to search for information on the Web?; (2) What are the novices' and experts' attitudes and feelings during the search?; and (3) What type of metacognitive strategies do experts and novices use during the Web search? Lessons learned from studying novice and expert Web users have significant instructional implications for educators and designers. Study emphasized that searching information on the Web is a complex phenomenon that requires developing a Personal Information Structure. An appendix presents a list of categories and scores for all novices and experts; and a list of sites shared among some participants and missed by other participants. (AEF)

Libraries and Andrew Carnegie's Challenge.

Carnegie Corp. of New York, NY.

Pub Date—1999-00-00

Note—12p.

Pub Type—Opinion Papers (120)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Donors, *Financial Support, Grants, *Library Development, *Library Funding, Private Financial Support, Public Libraries

Identifiers—Carnegie (Andrew), *Carnegie Corporation, Library History, *New York Public Library

This essay by the president of the Carnegie Corporation of New York (reprinted from the 1998 annual report) opens by noting that the year 1999 marks the 100th anniversary of Andrew Carnegie's support for the planning and development of 65 branch libraries of the New York Public Library System, a gift that came to more than \$5.2 million. Discussion then moves to the role and significance of libraries and the importance of books and reading. A brief history, beginning with the first "libraries" in Mesopotamia, is then outlined. The significance of Carnegie's gifts for the development of American libraries is noted, and highlights are given of Carnegie Corporation's grants for public and academic library development and services and for training of librarians. The essay concludes with a profile of the library today and the potential benefits of new technologies, and notes that Carnegie Corporation funds, to be negotiated, will be used for the promotion of literacy, the preservation of texts, and the improvement of children's library services. Identifiers—Association of Research Libraries

This survey was conducted to delineate the growing relationship between marketing and public relations and library funding by identifying: (1) the extent to which North American research libraries have developed organized programs in the areas of marketing and public relations; (2) who holds positions in these areas; and (3) the impact these programs have on library funding. Results indicate that little clearly differentiates marketing from public relations. Out of 34 libraries responding to the survey, the majority, 37% reported having one department, area or individual responsible for combined marketing and public relations activities. For those without any marketing or public relations department, 17% reported plans to implement one in the future, while 19% indicated no plans for future implementation. Responding libraries favor the

mass distribution of brochures and flyers over other means of self-promotion and fundraising. The least-used method was government lobbying. Over 79% of the respondents experienced fund increases because of promotional activities. A copy of the survey with tabulation of responses is provided. Representative documents include: planning documents from the University of Alberta and Texas Tech University; capital campaign materials from the University of Alabama; gifts documents from the University of Alabama, Cornell and Georgetown universities; library associates newsletters from Georgetown University and the University of Iowa; announcement materials for Georgetown, University of Kentucky, and Texas Tech; and campus communication newsletters and reports from the University of Alabama, Georgetown, Indiana, and Texas Tech universities. A list of selected resources is also included. (AEF)

Descriptors—*Access to Education, *Community Colleges, Curriculum Development, *Educational Finance, Educational History, Enrollment, Governance, *Government School Relationship, Postsecondary Education, *Public Policy, Two Year Colleges

This document traces the influence of governmental policies on American community colleges, focusing on how different levels of government have affected the colleges at various stages of their development with respect to college organization and governance, finance, enrollment, and curriculum. The community college's main contribution has been to expand access to postsecondary studies for the millions of students who would otherwise not have an opportunity to participate. The question of why states did not simply expand their universities to accommodate the rising tide of student demands is posed; several interpretations are discussed that attribute the organization and growth of community colleges to broad social forces. The paper tracks the emergence of two-year colleges in the nineteenth and twentieth centuries, describes early state legislation, and highlights community college policies that contribute to their similarity to the K-12 system from which they grew, including: admission of all students who apply, funding on the basis of student status, the qualifications and working life of the faculty, and the generality of the curriculum. A review of developments in several states reveals patterns of conversion to state-funded operation, including Maryland, Oregon, North Carolina, New Jersey, Washington, Michigan, Pennsylvania, California, Illinois, Kansas, Virginia, Georgia, and Mississippi. Also covered are state plans regarding responsibilities, funding, and management issues shared by state and local authorities. Contains 14 references. (AS)

Interdisciplinary Studies in the Community Colleges.

Pub Date—1999-03-17

Note—19p.

Pub Type—Reports - Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Community Colleges, Course Selection (Students), *Curriculum Design, Instructional Development, Instructional Effectiveness, *Interdisciplinary Approach,

Learning Strategies, Teaching Methods, Two Year Colleges

This article explores the interdisciplinary course offerings at 164 institutions that participated in a 1998 curriculum analysis by the Center for the Study of Community Colleges. It examines interdisciplinary courses in the context of the total curriculum, and discusses examples of existing interdisciplinary programs, the benefits and transferability of interdisciplinary coursework, and distance education. An interdisciplinary course is defined here as a course with at least two instructors from different departments, divisions, or specializations, in which the synthesis of ideas and perspectives takes place. Characteristics of an interdisciplinary course include: (1) innovative techniques; (2) incorporation of new concepts and methods between disciplines; (3) content that involves broad-based social issues requiring multiple disciplines for effective study; (4) avoidance of artificial disciplinary lines for a more realistic educational approach; and (5) a combination of liberal arts and general education with vocational education. Findings show that a majority of the institutions offer interdisciplinary courses in the humanities and the sciences, and slightly less than half offer interdisciplinary courses in the social sciences. In addition, most of these courses are transferable to four-year institutions, a benefit that may encourage their continuation, given the positive experiences reported by both students and faculty. Contains eight data tables and 14 references. (AS)

The Relationship between American Community Colleges' Curricular and Extracurricular Programs and Students' Perceptions of Their Leadership Abilities.

Pub Date—1999-03-15

Note—19p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Community Colleges, Higher Education, *Leadership Qualities, Leadership Training, Self Esteem, *Self Evaluation (Individuals), *Student Attitudes, Student Characteristics, Student Empowerment, *Student Leadership, *Student Participation

Identifiers—Community Service, Volunteerism

This experimental study explores the relationship between students' perceptions of their leadership abilities and the characteristics of community colleges' academic and extracurricular programs. The research examines correlations between participation in school events and volunteer and community service, and the students' self-ratings on their capacities to lead others. The study also considers the characteristics of community college curricular programs that influence students' perceptions of their leadership abilities. The study draws upon data from the 1989 Beginning Postsecondary Students Survey and the 1994 follow-up survey. Findings indicate that participation in school events is positively associated with students' perceptions of their leadership abilities. The students who considered their leadership abilities to be above average were most likely to earn a bachelor's degree. All students in the study who transferred to a four-year institution perceived their leadership abilities as at least average. Positive change in increased perceptions of leadership ability occurred most notably in students majoring in social/behavioral sciences, business/management, and other technical and professional programs. Tables 1A-H measure response rates according to the following variables: (1) being a leader in the community; (2) highest degree attained; (3) 1989-90 degree program; (4) academic coursework; and (5) transfer to first institution by control and type. Contains 11 references. (AS)

Identifiers—*Los Angeles Pierce College CA

This report is designed to help college planners and decision-makers examine trends of the past and concerns of the present. Sections 1 through 5 contain information organized according to gender, ethnicity, age, language, previous degrees, and vocational/educational goals. Section 1 contains a profile of students enrolled for the fall 1996 semester. Sections 2 and 3 present five-year and long-term enrollment trends. Section 4 shows five-year weekly student contact hours (WSCH) and WSCH/full-time equivalent trends by discipline and for the college as a whole. Section 5 provides transfer data from 1978 to 1995 and demographic data about the communities served by Pierce College, and assessment trends for the distribution of fall 1997 placements in ENL (English as a Native Language), ESL (English as a Second Language), and mathematics. Grade distributions and comparisons also are given for fall semesters in 1981 and 1996. Section 6 presents job trends and projects the growth or decrease of job availability in L.A. County, with resulting implications for the curriculum. Section 7 examines population trends and projects future enrollment trends. The report points out that since its inception more than fifty years ago, the college has grown in relation to the surrounding San Fernando Valley, and its curriculum continues to be shaped largely in response to the educational goals of those who attend during periods of expansion, both in the city and the school. Identifiers—*Coconino Community College AZ

This Assessment Program Progress Report (APPR) records the institutional activities that have taken place at Coconino Community College (CCC) during the 1997-98 academic year. It presents models, timelines, accomplishments, and opportunities for improvement in the assessment practices at CCC. Implementation and outcomes information is included for the following areas: (1) college mission level indicators; (2) program level review; (3) general education; (4) classroom level assessment; (5) accomplishments of other CCC committees; (6) data systems; (7) pilot project proposals; (8) professional development; and (9) surveys. Accomplishments for the 1997-98 academic year include preparation of the second annual APPR, publication of the Assessment of General Education Curriculum in 1997, submission and acceptance of the APPR by the ERIC Clearinghouse for Community Colleges, continuation of retention studies, workshops on general education assessment, and faculty attendance at the NCA annual meeting in March. The report concludes with improvement areas and a glossary of assessment terms. Appendices A-E contain Coconino columns, intent to survey flow chart, general education survey, retention study data for Spring and Fall 1997, and CCC 1996-97 year-end reports. (AS)

Current and Future Demand for Distance Education.

Alaska Univ., Anchorage. Inst. of Social and Economic Research.

Pub Date—1998-02-00

Note—154p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—*Access to Education, College Faculty, Curriculum Development, *Distance Education, *Educational Technology, Higher Education, Program Effectiveness, Student Needs, Surveys, *Teacher Attitudes

Identifiers—*University of Alaska

This study assesses current and future demands for distance education at the University of Alaska (UA). It highlights findings from interviews with representatives of 33 rural organizations, and 36 instructors who teach 53 distance education courses. It also lists questions raised and recommendations made by provosts at the Anchorage, Fairbanks, and Juneau campuses. Included are an economic and demographic overview, fall 1997 distance delivery education overview, provosts' questions and recommendations. Findings indicate that, during the fall 1997 semester, nearly 4,115 students in 178 Alaskan locations were enrolled in 293 distance education courses offered through the UA. Distance education instructors suggested that courses will continue to draw more students because of the flexibility and accommodations they provide, and recommended that UA increase media advertising. Rural employers were less satisfied with distance education offerings than the local education authorities, wanted more professional development for educators and more training for health care professionals, and felt that skills in public administration, management, and accounting could be improved through local educational opportunities. The provosts recommended that UA should develop a management information system to help track and coordinate programs and courses across the three campuses. Appended are economic and demographic information and survey questionnaires. (AS)

Identifiers—South Plains College TX

This report provides an overview of the Learning Center at South Plains College (Texas) during the 1998-99 academic year. Since its inception in 1980, the Learning Center has offered developmental courses, collegiate instruction in reading and human development, peer-tutoring, computer-aided instruction, independent-study opportunities, workshops and seminars, and a variety of learning assessments for students and prospective students. This document describes facets of the center, including its students, curriculum, instruction, faculty, physical facilities, intra-institutional relationships, external relationships, and process. Also included are detailed descriptions of activities and accomplishments of students who received academic support services and/or developmental education provided through the center. Following the descriptive narrative is a progress report on goals for the 1998-99 and 1999-2000 academic years. Appended are faculty performance reports and listings of the professional activities of the faculty and director of the Learning Center. Also attached are

sample student evaluation forms concerning programs and services. Tables show the outcomes for students enrolled in developmental reading courses, TASP test performance, and other data detailing the academic experiences of students of South Plains College. (AS)

Identifiers—*Utah Valley State College

In an effort to determine whether advanced placement and concurrently enrolled high school students learn as well as college students in distance education courses, Utah Valley State College (UVSC) administered an open-ended survey in the spring of 1998 to all students learning off-campus via the computer or television, soliciting information on the interactive learning experience, demographics, and the level of satisfaction with the course and teacher. After the survey was administered, fourteen interactive teachers were surveyed on similar issues. Findings indicate that: (1) high school students had more complaints about interactive learning, yet were more complimentary of teachers than were the college students; (2) high school students value interactive classes more than college students, yet do not perform as well; (3) high school students reported feeling isolated and found the interactive courses to be difficult; (4) teacher feedback was similar to student feedback regarding the necessity of basic student skills for success in an interactive environment; (5) both teachers and students like the technology and access; (6) it is questionable whether high school students are prepared or ready for interactive college courses; and (7) further study should be conducted. Appended are the survey instruments. Contains 12 references. (EMH)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—College Faculty, *Community Colleges, *Curriculum Design, Educational Change, Educational Innovation, *Interdisciplinary Approach, Program Effectiveness, *Teacher Attitudes, Two Year Colleges

Identifiers—ERIC Digests

This digest defines interdisciplinary courses, presents the benefits and challenges of offering them in the community college, and describes six existing interdisciplinary courses at community colleges around the country. Interdisciplinary courses are characterized by the following: they tend to be highly innovative; they incorporate concepts and methods from more than one discipline; they explore broad-based social issues that require multiple perspectives; and they may combine liberal arts and general education with vocational education. Benefits accrue to students who take interdisciplinary courses, including preparation for a changing work environment; exposure to moral, humanistic, and political perspectives in vocational courses; and an increased sense of community on

campus. However, faculty may resent the loss of autonomy that team teaching necessitates, and may become impatient with the amount of time needed for class preparation. The digest outlines six programs currently offered by community colleges. Cuyahoga Community College in Ohio, for example, offers a freshman-level course in classical philosophy and American literature. One professor introduces a topic, while the second professor acts as commentator, questioner, and devil's advocate. At Macomb County Community College in Michigan, a business and technical writing course was developed jointly by faculty from the English, Technology, and Accounting disciplines. Contains 12 references. (CAK)

Rhodes, Jolene M.

A Study of Student Retention and Attitudes in a Community College Preparatory Mathematics Course.

Pub Date—1999-08-00

Note—141p.; Ed.D. Dissertation, University of Central Florida.

Pub Type—Dissertations/Theses - Doctoral Dissertations (041)

EDRS Price — MF01/PC06 Plus Postage.

Descriptors—*College Mathematics, Community Colleges, Instructional Improvement, *Mathematics Instruction, Program Effectiveness, School Holding Power, *Student Attitudes, *Teaching Methods, Two Year Colleges

This study explored the effects of the use of laboratory activities on students' attitudes and retention in a community college preparatory mathematics course. It also examined whether the use of numerical, analytical, and graphical methods of solution in preparatory classes would affect student retention in the succeeding algebra course. The study took place on two campuses of a metropolitan community college. Faculty on each campus taught a four-hour college preparatory mathematics course with a required one-hour laboratory component. At one campus, commercially produced puzzles, group activities, experiments, and data collection activities were used in the laboratory hour; at the other campus, a faculty-produced packet of activities that included skill worksheets and some group activities were used. At the end of the semester, students' attitudes about mathematics and their mathematical abilities were measured. Performance on a 20-question test measured to what extent the material was retained by the students. Findings included: the addition of the one-hour lab to the math class increased course retention rates; no differences were found in retention rates or student attitudes toward mathematics between the students that used the different types of laboratory materials; and the use of laboratory activities in the preparatory mathematics course improved retention rates in the subsequent algebra course. Five appendices are attached. (CAK)

Teaching Science in the Community College.

Pub Date—1999-06-08

Note—8p.

Pub Type—Opinion Papers (120)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Classroom Techniques, *Community Colleges, Learning, *Science Instruction, Student Attitudes, *Teacher Effectiveness, *Teacher Improvement, Teacher Student Relationship, *Teaching Methods, Two Year Colleges

This paper uses the psychology of learning to develop techniques for teaching science at community colleges. In order to maximize student learning, teachers should strive to develop and maintain learner interest through voice inflection and by using a wide variety of teaching methods, including discussions, experiments, demonstrations, lectures, and videotapes. Teachers should also help students to think critically and creatively, and ensure that students actually comprehend, rather than just memorize, content. Teachers can help shape student attitudes to reflect the values of scientists: objectivity, perseverance, and a desire for clo-

sure. This paper gives special attention to two methods of instruction: (1) the project method, in which a student selects, plans, and executes a project, with the teacher serving as a helper and evaluator; and (2) the problem-solving method, which is especially appropriate in a laboratory environment. In both cases, it is important for the teacher to develop measurable, precise objectives by which to evaluate the work of the student. An alternative method presented is "subject-centered science curriculum," which emphasizes the development of the students' intellect and critical thinking abilities, by focusing on abstract, rather than concrete, learning activities. All these methods can be appropriate in different situations, and the teacher can decide which is most effective for his or her students. (CAK)

Providing Access to Library Automation Systems for Students with Disabilities.

California Community Colleges, Sacramento.
High-Tech Center for the Disabled.

Pub Date—1999-00-00

Note—19p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Access to Education, *Accessibility (for Disabled), *Assistive Devices (for Disabled), *Community Colleges, Compliance (Legal), *Computer Uses in Education, Disabilities, Educational Planning, *Educational Technology, Program Implementation, *Special Needs Students, Student Needs, Two Year College Students, Two Year Colleges

Identifiers—Americans with Disabilities Act 1990, *California Community Colleges

This document provides information on the integration of assistive computer technologies and library automation systems at California Community Colleges in order to ensure access for students with disabilities. Topics covered include planning, upgrading, purchasing, implementing and using these technologies with library systems. As information management systems have become automated, access to technology has become synonymous with access to information. The need to comply with the Americans with Disabilities Act, by providing access to all individuals, made the integration of "adaptive computing technology" into existing automation systems an attractive solution. The three major types of automation systems are presented and the following automation systems are described: SIRSI, Innovative Interfaces, GEAC, DRA, CARL, Dynix and VTLS. The document also outlines the library access guidelines for persons with disabilities. Examples of types of assistive technologies for library access are categorized by disability, and include screen readers, speech synthesizers, screen enlargers, keyboard modification, and technologies for reading paper text. The document also identifies who at the community college should be responsible for designing and implementing the assistive computer technologies, the relevant decision-making factors to be considered, the characteristics of the users of these services, a rationale for why assistive integration is needed, and relative costs of implementation. (SKF)

Characteristics, Two Year College Students, Two Year Colleges

Identifiers—*Florida Community College System

Designed to provide timely, accurate and comparative information about the Florida Community College System, this fact book contains information for those who are interested in community college education in Florida. The community college system in Florida began in 1933 and has grown to such an extent that it currently provides postsecondary education within commuting distance for more than 99 percent of the state's population. Florida's master plan has become a model for community college development in the rest of the United States. The report begins with a brief foreword stating the purpose of the book, a table of contents, and a listing of the State Board of Community Colleges Members and Community College Presidents. Following is a historical overview of the Florida Community College System and guidelines to the Community College Funding Policy. Next, data tables are presented on the state's community college students, including fall headcount enrollment, annual headcount enrollment, full-time equivalent (FTE) enrollment, program enrollment, and program completions. There are also statistics regarding employee and financial information, and data from the College Center for Library Automation. A glossary of terms and a roster of the Division of Community Colleges are included as well. (JP)

Descriptors—*Administrators, *College Faculty, *Community Colleges, Comparative Analysis, Educational Finance, Faculty Workload, Full Time Faculty, Part Time Faculty, *Public Colleges, School Personnel, State Surveys, Tables (Data), *Teacher Employment Benefits, *Teacher Salaries, Two Year Colleges

Identifiers—*Illinois

This annual salary survey compiles data about compensation received by employees in Illinois' 49 public community colleges. Gathered by the Illinois Community College Board (ICCB), the report contains data for fiscal year 1999 on contractual base salaries for full-time faculty; salary rates for part-time faculty, full-time faculty overload and summer term; salary schedules for full-time faculty with a master's degree; and institutional policies related to faculty salaries. Furthermore, there is data pertaining to contractual base salaries for other (non-teaching) professional and administrative staff, salaries paid to selected administrators, a summary of fiscal year 1999 monthly classified and other (non-teaching) professional staff salaries; and fringe benefits for full-time employees. Finally, the report provides fiscal year 1999 mean percentage salary increases for all employees, average total salary actually paid, and statewide average annual contractual salaries in Illinois Public Community Colleges for fiscal years 1995 to 1999. The statewide data compilation is divided into seven peer groups, which are based on college enrollment (semester), geographic location, and financial data. Highlights include the weighted average total salaries actually paid in the fiscal year 1998: faculty members (9 and 12 months) earned \$56,516, administrators (12 months) earned \$61,289, and other (non-teaching) professionals (9 and 12 months) earned \$38,201. Descriptors—*Community Colleges, Curriculum Development, *Educational Assessment, Educational Finance, *Educational Improvement, *General Education, Institutional Mission, Learning Strategies, *Public Colleges, Teaching Methods, Two Year Colleges

Identifiers—*Tennessee

This study looks at the effects that the general education assessment undertaken for the Performance Funding Program has had on general education at the public two-year institutions of higher education in Tennessee. The purpose of the Performance Funding Project was to provide motivation, through financial incentives, to public institutions for increases in quality improvement. Since its inception, the assessment of general education has been one of the standards. Data were collected through three methods: a 21-item questionnaire, participant interviews, and document analysis. The sample consisted of selected faculty and administrators at 14 public two-year colleges whose positions required them to have specific knowledge about general education assessment. Findings from this research show that the institutions have used the results from the general education assessment to make changes in curriculum, instructional delivery strategies and methods, and student learning activities and experiences. At those institutions where the performance funding coordinator provides detailed analyses of general education assessment results in digestible terminology to the proper audiences at key intervals throughout the year, there is more complete usage of assessment results by faculty, staff, and administration. Contains 11 tables. Appended are the survey, interview protocol, interview contact summary sheet, and the document summary form. (CAK)

Identifiers—*College of the Canyons CA

This master plan for the College of the Canyons, a member of the Santa Clarita Community College District, covers the years 1996 through 2001. The master plan aims to describe and justify the goals of each educational program and division, and identify their needs in order to ultimately make a convincing case for the human and material resources required to meet the needs of the programs. Section 1 defines the purpose of the overall plan. Section 2 offers a profile of the campus and the district, including demographics, a history of the district, and projections for the future. Section 3 defines the mission, goals, and vision of the college. Section 4 is an environmental scan which addresses the impact the external environment has upon the institution. Section 5 is the five-year educational master plan of the Applied Arts and Technology division. Section 6 is the plan of the Fine Arts and Humanities division. Section 7 is the plan of the Science and Mathematics division. Section 8 is the plan of the Social and Behavioral Sciences division. Section 9 is the plan of the Student Services division's instructional programs. Finally, section 10 is the plan of the Instructional Resources division. (NB)

Scenario Planning at College of Marin.

College of Marin, Kentfield, CA.

Pub Date—1999-03-00

Note—33p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Administration, Community Colleges, Educational Change, Instructional Development, *Long Range Planning, *Organizational Objectives, Predictive Measurement, Two Year Colleges, Workshops

Identifiers—College of Marin CA

This article reviews the scenario planning process implemented at the College of Marin (California). Scenario planning is a creative process in which a group of people who share a common fate develop stories about different ways their future might unfold, and use these stories to make decisions about what path to take. The Global Business Network (GBN), a unique membership organization that helps companies, governments, and non-profit organizations explore and anticipate the future, was a partner with the College in this effort. Outlined in this article are two workshops on scenario planning administered by the College of Marin. Assumptions about the future that guided the creation of stories included: (1) the population of Marin county will become significantly older; (2) the demand for higher education services in California will increase; (3) the skill level of most jobs will continue to rise; (4) access to the Internet will become widespread; and (5) corporate interests will continue to influence California politics. Workshop I primarily discussed the Asian finance crisis, with scenarios focusing on the impact of international financial instability on California's educational system. During Scenario Planning Workshop II, held in November, participants addressed the difficult task of recommending strategic priorities and actions to best position the College for the future. (AS)

Crawford, Leonard

Extended Opportunity Programs and Services for Community College Retention.

Pub Date—1999-03-00

Note—32p.; Paper presented at the Annual California Community Colleges Chancellor's Office Statewide Conference (8th, Monterey, CA, March 1999).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Community Colleges, Educational Opportunities, Educational Research, *High Risk Students, Persistence, *School Holding Power, *Student Attrition, *Student Personnel Services, Two Year Colleges

This article assesses the effectiveness of student retention in the community college system, using as an example, the Extended Opportunities Programs and Services (EOP&S) program, which is available at all 106 California community colleges. EOP&S provides activities that have proven to enhance persistence and academic achievements for 80,000 low income, educationally disadvantaged students enrolled in the program. This document discusses the community college environment; retention research and persistence models; EOP&S progress toward student integration and involvement; definitions; and student performance. Results of current EOP&S research indicate significant levels of persistence with high-risk community college populations. Statewide data reveals the following performance trends: (1) EOP&S students had a four year average persistence rate of 82.64% from 1993 to 1997, in contrast to a 53.95% persistence rate for Non-EOP&S students who were enrolled full time the first ten days of instruction during the four Fall terms; and (2) The EOP&S students yielded an average GPA of 2.0 or greater for 78.6% of the students served in contrast to 81% for non-EOP&S students. These results support Tinto's theory that the more students are involved in the college environment, the more they positive their experiences. Table 1 and charts 1-4 indicate statewide persistence data for fall and spring enrollments. (Contains 91 references.) (AS)

Learning Community/Title III Project.
Cerritos Coll., Norwalk, CA.

Pub Date—1998-11-09

Note—15p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Affective Objectives, Anxiety, Community Colleges, *Curriculum Development, Educational Improvement, Learning Motivation, Learning Strategies, Models, *Nontraditional Students, Two Year Colleges
Identifiers—Cerritos College CA, Learning Communities

In 1995, Cerritos College implemented a "Learning Community" approach with the intent of strengthening student academic success, especially among non-traditional, first generation college students. Thirty Learning Community clusters, seventy classes/instructors, and over four hundred students have been part of the learning communities projects since its inception. Cerritos College's model uses four interrelated approaches: development of a curriculum based on current brain research, identification and implementation of essential learning skills, integration of technology into the learning process, and cultural sensitivity. Approximately 150 students who were enrolled in Spring 1997 Title III Learning Community Courses completed a survey, expressing their level of familiarity and comfort with Integrated Thematic Instruction principles, self-described skill levels, feelings on the importance of various instructional methods, and reasons for choosing the Learning Community. Seventy-seven of those students also participated in a survey at the end of the semester. Results include: (1) student satisfaction rates rose from 90% to 98.7%; (2) anxiety levels were higher at the end of the semester than at the beginning; (3) 97% of the students indicated that material presented in a practical context facilitated learning; (4) active student participation increased; and (5) almost 75% of the students preferred untimed tests. Student comments solicited through open questions are also presented, as are faculty reflections. (VF)

Descriptors—Community Colleges, *Computer Assisted Testing, *Developmental Studies Programs, Evaluation, *Mathematics Skills, *Reading Readiness, Remedial Instruction, *Student Placement, Two Year Colleges, *Writing Skills

Identifiers—Miami Dade Community College FL, *Placement Tests

This information capsule explores the effectiveness of score ranges on the Computerized Placement Test (CPT), used to assess the skills of entry-level students at Miami-Dade Community College and place first-time-in-college students in classes. Data are provided for students entering in Fall terms 1996 and 1997 showing the number of students placed into each college preparatory or entry-level course by COT score range, along with the percentage of students who passed the courses. The score ranges were adjusted beginning in July 1, 1997 to reflect new state standards for exemption from preparatory coursework. For most of the courses reported, the percentage of students passing increased, indicating that the adjusted score ranges may have been more effective in matching students' skill levels with courses, although other factors may have also contributed. Tables report results for four different classes: reading, English composition, college preparatory mathematics, and college level mathematics. Contains 9 tables. (NB)

Evaluation of SLS Intervention Courses. Information Capsule.

Miami-Dade Community Coll., FL. Office of Institutional Research.

Report No. —IC-No-98

Pub Date—1998-07-00

Note—11p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Preparation, Community Colleges, *Developmental Studies Programs, *Outcomes of Education, *Persistence, Program Effectiveness, Program Evaluation, Remedial Instruction, Transitional Programs, Two Year Colleges

Identifiers—Miami Dade Community College FL

In response to a District Student Services request, the Institutional Research Office of Miami-Dade Community College conducted a study of the new SLS intervention courses. The purpose of the research was to answer the following questions: 1) Did the SLS courses help in the retention of college preparatory students? 2) Did the SLS courses help students successfully complete college preparatory courses? and 3) Did the SLS courses help in the retention of Standards of Academic Progress (SOAP) students? The study found that college preparatory students who successfully completed SLS had a much higher Fall-to-Winter return rate (87.8%) than students who did not (67.6%). Results on the Standards of Academic Progress indicate a similar ratio: a 76.1% return rate among the students who completed SLS, compared to a 62.5% return rate among students who did not complete SLS. Further, based on nine examined courses, those students who successfully completed SLS had a high passing rate for college preparatory courses (75.6%) than did students who did not take SLS (62.5%). The sample for this study were 4,101 Fall term 1997 first-time-in-college students who tested below the placement score on one or more sub-tests of the CPT, and who had complete sets of scores. Contains 3 tables. (VF)

The Draw to Florida Community Colleges from Florida's "College-Age" Population by Program Areas.

Miami-Dade Community Coll., FL. Office of Institutional Research.

Report No. —IC-No-98-14C

Pub Date—1998-10-00

Note—13p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adult Vocational Education, College Attendance, *College Bound Students, College Choice, *Community Colleges, Decision Making, *Enrollment, *Enrollment Management, Two Year Colleges

Identifiers—*Florida Community College System

This information capsule presents an overview of the enrollments in the 28 Florida community colleges in comparison to the college-age population in the related counties. The purpose of the report is to determine: (1) the degree of market penetration or percent draw of the "college-age" population; (2) assess the effects of Vocational Technical Centers and universities on the community college draw; (3) study student program area preferences; and (4) examine the potential for increasing enrollments at the College. The college-age populations shown are aggregates of the 15-24 and 25-44 age group for each county. In 1995-96, 12.6% of the Florida college-age population, totaling 783,154 students, enrolled in community colleges. Colleges that drew the highest proportion of the college-age population were also likely to be area Vocational Technical Centers, which focus on adult vocational education, supplemental, and adult basic education program areas. The presence of a public state university within the county of the community college did not noticeably affect the draw of students to the college. In Table 1, colleges are ranked by the percent draw of college-age population to the community college. Table 2 presents the same data, sorted alpha-

betically by college, while Table 3 displays the top seven and bottom seven colleges. Contains 3 tables. (NB)

Descriptors—College Attendance, *College Bound Students, *College Choice, *College School Cooperation, Community Colleges, Decision Making, *Enrollment, *Enrollment Management, Higher Education, Universities
Identifiers—Dade County Public Schools FL, Florida

This study, which uses data from the Florida Department of Education Readiness for College reports, tracks Dade County Public High School (DCPS) graduates' entries into Florida colleges during the year following their graduation. During the 1996-1997 year, 43% (5,773 graduates) did not enter public secondary education in Florida. Of the 7,805 graduates who did enter college, 65.5% enrolled at Miami-Dade, 15.5% at Florida International University (FIU), 5% each at University of Florida (UF) and Florida State University (FSU), and 3.3% at Broward Community College (BCC). The number of local high school graduates enrolling at Miami-Dade dropped by 341 students from 1995-96 to 1996-97. However, the total proportion of students going on to public postsecondary education increased from 52.0% in 1995-96 to 57.5% in 1996-97. The study also reports on individual high schools' entries into individual colleges. The findings for Miami-Dade Community College indicate that all but nine of the 26 high schools show a decreased enrollment at this college. In contrast, the state universities show an increased enrollment, of which 75% is accounted for by FIU; of the high schools tracked, 8 high schools show an increase in entries into FIU. BCC, however, does not draw a large proportion of graduates and is not considered a serious contender. Contains 5 tables. (VF)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, *Community Colleges, Educational Research, *English (Second Language), Instructional Development, *Outcomes of Education, *Remedial Instruction, *Two Year College Students, Two Year Colleges, *Writing Instruction, Writing Skills

Identifiers—California Community Colleges

This study examines the success of community colleges in providing students with adequate college-preparatory instruction. Research focuses on the place of remedial writing instruction in two California Community Colleges, one large and urban, the other smaller and suburban. The study used transcript analysis to investigate how well students from the two key college preparatory writing courses—one an ESL course and one a non-credit beginning college reading and writing course—fared in their academic work. The guiding research questions were: (1) how well do students in developmental writing courses fare in subsequent academic writing courses? (progress tracking); and (2) how well do Associate Degree English and college level English students with different instructional

histories do in their academic writing classes? (historical tracking). The research found that for many students, remedial coursework is preliminary to extensive further college work, and the ESL cohort is most academically accomplished. The non-ESL students, the pre-collegiate basic skills students starting their college career with "English Fundamentals," did not fare as well. Only 58.6% passed the course, compared to 65.5% of the ESL students. Tables, charts and figures illustrate ethnicity demographics, cohort descriptive statistics, college English outcomes, progress tracking, failure and withdrawal rates by group, and grade point average. An Investigative Study on the Systematic Application of Effectiveness Indicators for Institutional Improvement in Northwest Community Colleges.

Pub Date—1998-04-15

Note—194p.; Ed.D. Dissertation, Oregon State University.

Pub Type—Dissertations/Theses - Doctoral Dissertations (041)

EDRS Price—MF01/PC08 Plus Postage.

Descriptors—Accreditation (Institutions), Change Strategies, *Community Colleges, Educational Research, *Institutional Evaluation, Outcomes of Education, *Performance Based Assessment, Two Year Colleges

Identifiers—Northwest Association of Schools and Colleges

This study examines the importance of using effectiveness indicators for assessing institutional outcomes, and their congruence with actual or potential use in making institutional change and improvement, in selected northwest community colleges. The study was undertaken in response to the Northwest Association of Schools and Colleges' transition to an outcomes-based accreditation model in 1991. Questionnaires were completed by 148 primary administrators working at northwest community colleges that completed the regional accreditation process since 1990. The survey instrument measured whether 13 effectiveness indicators were important to the institutional change process, and whether such indicators have been used at the institution. In general, the study shows that there is a positive relationship in community colleges between the development of institutional effectiveness indicators and institutional change and improvement. Overwhelming support was given by administrators about the value of using effectiveness indicators to initiate change, with support ranging from 85.5% to 97.0% they should use effectiveness indicators to initiate institutional change. Indicators prioritized as most important by at least 90% of participants include: external indicators related to employer satisfaction and job placement levels, student and customer satisfaction, and student progression. All administrators who have used effectiveness indicators believe that external indicators and community development led to the most positive change. (Contains approximately 90 references.) (AS)

The Academic Leadership Journal is a reviewed publication dedicated to disseminating both research-based and practical information, distrib-

uted three times a year. Its mission is to assist community and technical college department/division chairs, deans, and other organizational leaders to achieve academic excellence. The three issues in volume four are dated October 1996, and February and June 1997. Each issue is divided into Features; Tips and Tools; and Departments, including the Executive Director's Notebook, Stories, Metaphors & Anecdotes, and Membership. Number One focuses on the professional development of part-time faculty, and offers tips on cultivating student-centered faculty and developing departmental web sites. Number Two discusses innovation and educational reform, with a focus on leadership; enhancing faculty vitality; and the application of chaos theory to educational organizations; and offers tips on understanding and facilitating change. Number Three examines the risks and rewards of college intra- and entrepreneurship, looks at the skills necessary for a changing economy, discusses raising funds while reducing costs; and provides tips on developing skills for the new economy and how to increase costs and increase funds. Descriptors—Agricultural Technicians, *Community Colleges, Earth Science, Ecology, *Environmental Education, Higher Education, *Natural Resources, Partnerships in Education, Program Development, Secondary Education, Sustainable Development

The Northwest Center for Sustainable Resources (NCSR) is a partnership of educators and numerous agencies dealing with natural resource management. NCSR emphasizes the ecosystem as a central theme in natural resource technical education. This booklet explains NCSR's relationship to secondary and higher education, describes NCSR programs and curriculum, and introduces NCSR partners, employers, and researchers. Curriculum discussions focus on core courses in environmental science and mathematics, standard and advanced mathematics in technological education, and technical mathematics for a state-of-the-art workforce. NCSR partners include employers, community colleges (Northwest Indian College, WA; Hawaii Community College, and Blackfeet Community College, MT), Native American organizations, professional associations, and universities. Five model community college programs supported by NCSR are: (1) Shasta College - agricultural technology; (2) Grays Harbor College - natural resources/fisheries technology; (3) Central Oregon Community College - forest resources/eastside and GIS technology; (4) Chemeketa Community College, Oregon - forest resources/westside; (5) Feather River College, California - wildlife technology; (6) Itasca Community College; and (7) Haywood Community College. Appended are a list of NCSR project partners, ecosystem management resources and examples, and charts related to program developments at Grays Harbor College, Central Oregon Community College, Chemeketa Community College, and Feather River College. Descriptors—*Community Colleges, Conservation (Environment), Employer Attitudes, *Employers, Environmental Education, *Job Skills, Job Training, *Natural Resources, School Community Relationship, Two Year Colleges

This report describes the ways in which model programs created by the Northwest Center for Sustainable Resources (NCSR) are based upon employers' needs and recommendations. An introductory essay describes Geographic Information Systems (GIS), a form of remote sensing technology with satellite imagery, that is a promising tool for analyzing natural resource management and policy alternatives. The report outlines a workshop on defining environmental technology, with a chart that highlights the broad job functions for the following occupational titles and technical positions: (1) aquatic ecology; (2) botany; (3) terrestrial ecology; (4) fire management; (5) forestry; (6) forest engineering; (7) geographic information systems; (8) geology; (9) hydrology; (10) range technician; (11) rare/endangered species specialist; (12) recreation technician; (13) soil conservancy; (14) wetlands technician; and (15) wildlife technician. Next, the report provides transcripts of NCSR focus group interviews conducted at Chemeketa Community College with representatives of four related industries. The report also provides "DACUM Charts" ("Developing A Curriculum") that outline job duties and required knowledge for six jobs in the natural resources area. Finally, the report includes charts regarding the partnerships between NCSR and the following community colleges: Feather River College; Central Oregon Community College; Chemeketa Community College; Grays Harbor College; Western Center; and Shasta College. Descriptors—College Role, *Community Colleges, *Economic Development, Education Work Relationship, Educational Change, *Futures (of Society), *Job Training, *School Business Relationship, School Community Relationship, Technology, Two Year Colleges, Vocational Education

This essay discusses the expanded role for two-year postsecondary institutions. It suggests that global competition and recent developments in new technologies are creating new conditions in the workplace and in the postsecondary educational system. These conditions are creating an increased demand for highly skilled workers, new management styles, and entrepreneurial skills. These workplace trends suggest the need for community colleges to emphasize an institutional and public commitment to economic development as a community enterprise. The essay outlines some possible strategies for fostering economic development through partnerships between industry and postsecondary institutions. It also analyzes the effects upon the United States of lower wages being paid by industrialized countries to hire workers in developing countries. In response to global competition,

U.S. industry began to consider automated systems and computer programs. The two-year colleges demonstrate an important potential to expand their participation in community development within the context of emerging vocationalism, but questions remain as to whether they can make the changes necessary to support the needs of the established local industry, help individuals ease the transition to business ownership, and become proactive players in the development of the community. Any Differences? Comparative Analysis of White and Non-White Transfer Students at a University.

Pub Date—1999-04-23

Note—46p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, Blacks, *College Transfer Students, *Community Colleges, Comparative Analysis, *Educational Environment, Ethnic Groups, Higher Education, Minority Groups, *Student Attitudes, *Student Characteristics, Whites

This study sought to examine the community college and university experiences of students who differed by racial/ethnic background. C. R. Pace's concept of Quality of Effort was employed to frame questions regarding level of involvement, quality of effort, general perceptions and the academic and social adjustment process. The research design utilized the Transfer Student Questionnaire (TSQ) and captured a sample of 696 students. Descriptive and factor analyses as well as tests of significance were employed in the data analysis. Results suggest that non-white students are likely to have different experiences at both the two- and four-year institutions than white students in terms of quality of effort, perceptions of the environment, and educational background. White students reported a significantly higher quality of effort with regard to faculty and course learning. Whites also performed better than non-white students as measured by GPA. However, a significantly higher number of non-whites than whites were first-generation college students. Implications for future practice are discussed. Survey results are appended. Contains 37 references. (SKF)

Descriptors—Community Colleges, Education Work Relationship, *Employment Potential, Employment Programs, Enrollment, *Job Training, Labor Force Development, Outcomes of Education, Program Evaluation, Student Attitudes, Tables (Data), Two Year Colleges

This study investigated adult students who completed an instructional program that included training in employability and job readiness. It identified and analyzed program completers' perceptions of the instruction they received and the employability skill levels and benefits gained as a result of their program participation. Data were collected from 85 community college students using a questionnaire with both closed- and open-ended questions. Information collected included demographics, reasons for seeking training, current employment status, and impressions of the training services offered by the program. Respondents were categorized by employment school enrollment status at the time the surveys were completed. The respondents were

92% female and ranged in age from 20-54; 73% reported having a work history, 71% were receiving public assistance, and 59% were enrolled in a school or training program. The most popular reasons for enrolling in the program were to continue education (68%), to learn new skills (61%), and to seek employment (55%). A great majority of the completers indicated that the instruction was useful; many found that their skills in seven major areas identified by the literature had improved. Overall, the findings point to a positive perception of employability skills on the part of the participants who completed the program. Contains 42 references. (CAK)

This directory presents a picture of the programs, services, and support that community colleges offer for individuals with disabilities, and heightens awareness of the range of education and training opportunities available at those institutions. It should serve as a resource for administrators, counselors, students, parents, and policymakers. Data were collected from summer 1995 through mid-1996 from disability services personnel at 672 public and private technical, community, and junior colleges. As part of the survey, each school described outreach activities in eight different areas, provided information on any noteworthy features of their programs, and reported on nine categories of disabilities: visual impairment or blindness; deafness/hard of hearing; orthopedic/mobility disabilities; speech/language disorders; learning disabilities; mental retardation; emotional/behavioral disorders; head injuries; and chronic illnesses/other. The directory is organized into four parts: (1) Institutions by State, including the number of students registered for disability support services, a list of services available, and special features; (2) Numbers of Students Reporting Disabilities by Category (in chart form); (3) Special Features Index, which categorizes services, programs, or accommodations that are perceived to be particularly noteworthy by the institutions; and (4) Institutional Index. Contains 73 selected references. (VF)

Palow, William P.

Is Arithmetic Really Necessary for Algebra? A Case for an Integrated Curriculum.

Miami-Dade Community Coll., FL.

Pub Date—1999-00-00

Note—18p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Algebra, *Arithmetic, College Mathematics, Community Colleges, *Mathematical Aptitude, *Mathematics Achievement, *Mathematics Education, *Prerequisites, Prior Learning, Two Year Colleges

Identifiers—Miami Dade Community College FL
By measuring the performance of 62 students enrolled in a community college introductory algebra course, this study challenges the generally

accepted assumption among mathematics instructors that mastery of arithmetic is necessary for the learning of algebra. Study subjects were 35% male, 74% Hispanic, 16% Black, 8% white, and 2% other. A pretest, consisting of 10 items designed to indicate minimum competency in computational arithmetic, was administered at the beginning of the semester, and the final exam was used as a posttest. Using analysis of variance, analysis of covariance, and a Pearson *r* calculation, no significant differences were found between three groups that received different types of instruction: (1) computer-managed instruction combined with individualized instruction in a math lab; (2) computer-managed instruction used in the classroom; and (3) a traditional class, used as a control group. The study concludes that the ability to perform well in computational arithmetic has little, if anything, to do with the ability to perform well in beginning algebra. As a result of this finding, it is suggested that community colleges combine the topics of arithmetic and beginning algebra into one integrated course that uses a "spiral approach." Contains 3 tables and 11 references. (CAK)

Identifiers—Day Care Licensing, Day Care Quality, Parent Caregiver Relationship

Being a family day care provider is work that requires professional responsibilities and attention to the physical, emotional, and educational well-being of children; listening and responding to parents; and running a business. This videotape, in English- and Spanish-language versions, explores the elements involved in starting up a family day care operation. Following an overview of what is involved in starting and operating a quality family day care, sections of the video explore the following: (1) "Starting Out," including matters to consider when making the decision to become a provider and organizational aspects of the child care business, such as a business plan; (2) "Research, Rules and Regulations," including benefits of licensing in some states and additional resources for planning; (3) "Planning, Health and Safety," covering planning the child care space and safety precautions; (4) "Atmosphere," including behavior guidelines and positive discipline; (5) "Transitions," at drop-off and pick-up time as well as between day care activities; (6) "Daily Schedule," including routines as well as special celebrations and field trips; (7) "Nutrition," covering benefits of the Federal Food Program; (8) "Policies," detailing items to cover in a parent booklet; (9) "Parents," outlining various ways to communicate with parents; (10) "Business," with suggestions for keeping accurate records and for marketing; (11) "Systems," such as central management for finances and marketing as well as professional support; (12) "Accreditation," detailing an evaluation by the National Association for Family Day Care; (13) "Training and Education," suggesting types of training materials and degree programs; and (14) "Rewards," exploring the personal satisfaction of providing family day care. The viewer's guide (in English), accompanying the video, outlines the script of the video. (HTH)

A 2-year project was undertaken to develop, test, and distribute a video-based program to train low-income parents in engaging their 3- to 5-year-old children in highly motivating play techniques in order to enhance children's cognitive, social and motor skills for school readiness. An evaluation was conducted of the Year One phase of the training materials and procedures, and the effectiveness of the parent-training in leading to higher school readiness scores. The participants were the parents of 103 preschool children from inner city schools. The findings of the child assessments after 2 weeks of parent training indicate that children of parents who participated in the program showed significantly higher scores than the control children in the Total School Readiness Test, particularly in the areas of vocabulary, nature knowledge, general information, and awareness of good manners. This suggests that types of play-training methods and materials developed for the project can impact the ability of low-income parents to enhance their children's cognitive and social skills. (Twelve appendices include a list of participating schools, data on the child care centers, and copies of testing instruments and data collection materials.) (JPB)

How Can Parents Assist in the Learning Process? What Classroom Teachers May Suggest.

Pub Date—1998-10-30

Note—10p.

Language—English, Spanish

Pub Type—Guides - Non-Classroom (055) - Multilingual/Bilingual Materials (171)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, Children, Elementary Education, Family Environment, *Learning Activities, Parent Child Relationship, *Parent Participation, *Parent Student Relationship, *Parent Teacher Cooperation

Through interaction with their children and experiences they provide for them, parents can influence and guide children's growth, development, and learning process. This paper, in English- and Spanish-language versions, lists several ways parents can support their children's learning. The paper first notes that parents can establish a support system for children to achieve their maximum potential through the development of confidence, motivation, effort, responsibility, initiative, perseverance, caring, teamwork, common sense, and problem solving. The paper then lists activities for facilitating parental involvement and promoting a positive home environment, including communicating regularly with teachers and school staff, even if there are no questions; making sure the child has a safe way to and from school; and teaching children to ask questions and not be afraid to learn new things. The paper next presents a checklist of questions parents should consider asking themselves, such as "Do I treat my children as worthwhile members of the family?" or "Do I take interest in my child's education and attend parent/teacher conferences?"

Finally, the paper lists specific learning activities parents can do with their children in the areas of reading and language arts, mathematics, and miscellaneous, including arts and crafts projects. Includes a list of 9 resources. (HTH)

Noting that specialized educational programs for teen parents should address the teen parents' needs for knowledge about self-development, pregnancy, parenting, and economic independence as well as problem solving and interpersonal skills, this series of guides for school-age parents and the parent educators working with such teens provides a resource written with these needs in mind. The five teen guides in the series are: (1) "Your Pregnancy and Newborn Journey"; (2) "Your Baby's First Year"; (3) "The Challenge of Toddlers"; (4) "Discipline from Birth to Three"; and (5) "Teen Dads: Rights, Responsibilities and Joys." Each of the guides has an accompanying workbook. The series teacher's guide includes workbook responses, quizzes, and answer key for the first four teen guides; the "Teen Dads" teacher's guide is self-contained. The series curriculum guide provides guidelines for developing a teaching plan for teen parents, and includes activities and projects, writing assignments, objectives, and other resources corresponding to each chapter of each of the guides. Identifiers—Adolescent Behavior

This report details the 27th annual study to examine the attitudes of student leaders in U.S. high schools. Participating in the survey were 3,370 adolescents, primarily 16- and 17-year-olds, who had been featured in the 1996 edition of "Who's Who Among American High School Students." The report presents demographic information on the survey participants and provides tables of the survey findings, including breakdowns by sex, race, type of school attended, and type of community. The findings are organized in the following sections: education; school uniforms; prayer in school; high school experiences; school violence; weapons; cheating in school; sexual behavior and attitudes; sexual harassment, assault, and date rape; cigarettes, alcohol, and drugs; peer pressure; tattoos/body piercing; future plans; personal finances; confidence in institutions; important influences; home life; happiness/depression; suicide; popularity; lifestyles; the nation's and their generation's greatest crisis; aspirations; media/technology; prejudice; ethnic diversity and immigration; and abortion. A summary section highlights overall findings, which indicated unexpected levels of stress, depression, and thoughts of suicide. Sexual issues were worrisome to many of these students, and three-quarters admitted to cheating in school to get ahead. Most students studied 7 hours or less per week, and spent at least 8 hours or more per week on social activities, athletics, extracurricular activities, and watching television. (KB)

Identifiers—Adolescent Behavior, Volunteerism

This report details the 28th annual study to examine the attitudes of student leaders in U.S. high schools. Participating in the survey were 3,210 adolescents, primarily 16- and 17-year-olds, who had been featured in the 1997 edition of "Who's Who Among American High School Students." The report presents demographic information on the survey participants and provides tables of the survey results, including breakdowns by sex, race, type of school attended, and type of community. Findings are organized in the following sections: education; school violence; weapons; cheating in school; sexual behavior and attitudes; sexual harassment, assault, and date rape; cigarettes, alcohol, and drugs; future plans; the court system; honesty in American leaders; important influences; home life; happiness/depression; dieting, eating disorders, and self-image; cults; suicide; Internet usage; the nation's and their generation's greatest crisis; aspirations; prejudice; ethnic diversity, immigration, and Affirmative Action; abortion; volunteerism; quality of home life; and family meal time. A summary section highlights overall findings, which indicated that teens were more likely to base their choice of tobacco and alcohol products on a friend's recommendation rather than on advertisements, most acknowledge cheating on exams, a disturbing number had considered suicide, and many cited the decline of moral and social values as the greatest crisis confronting them and the nation. Descriptors—Children, Early Childhood Education, *Family Programs, Family Relationship, Parent Participation, *Program Evaluation

Identifiers—*Evaluation Reports, *Family Support, Louisiana (New Orleans), Minnesota, Ohio

The Family Resource Coalition of America (FRCA) and the National Resource Center for Family Centered Practice convened a meeting of evaluators, policymakers, and program practitioners to discuss the issue of evaluation in the field of family support. The goal was to bring together those who were implementing programs, evaluating programs, and those asking for information on the impact of programs. This issue of the FRCA Report focuses on the outcomes of that meeting. Following an introduction to current issues in family support evaluation, the journal is comprised of three main sections: (1) using evaluation to work in family support programs; (2) progressive models and theories; and (3) state-level innovations. Article titles include: (1) "A New Focus on Results: Current Issues in Family Support Evaluation"; (2) "Coming

Soon: How Are We Doing? A New FRCA Tool for Comprehensive Program Self-Assessment"; (3) "Parent Involvement in Evaluation" (McDonald); (4) "Being a Parent Leader in Program Evaluation" (Payton); (5) "Lessons Learned: Academic Research Meets Grassroots Expertise"; (6) "Lessons Learned: Evaluation in a Family Support Center"; (7) "Residents Call for Evaluation that Serves the Community: St. Thomas/Irish Channel Consortium [New Orleans]"; (8) "The Seven C's of Conducting Evaluation: From the Outside In" (Noboa-Rios); (9) "Theories of Change: A Powerful Approach to Evaluating Family Support Programs" (Connell and Kubisch); (10) "Evaluation That Works for You: A Practical Useful Model from the Field" [Tufts University] (Kapusik and Jacobs); (11) "Highlights from the Harvard Family Research Project" (Schilder); (12) "Best Evaluation of the Year: How [Minnesota's] Early Childhood Family Education Measured Low-Income Family Outcomes" (Cooke); and (13) "State-Funded Programs in Ohio Work Together to Evaluate Success" (Hecht). Also included are a glossary of evaluation terms, directory of evaluators, and a resource file. (LBT)

Using Technology To Enhance Early Childhood Teacher Preparation.

Pub Date—1997-06-00

Note—11p. Paper presented at the National Association of Early Childhood Teacher Educators Conference (Seattle, WA, June 1997).

Pub Type— Guides - Non-Classroom (055) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Computer Assisted Instruction, *Early Childhood Education, *Educational Technology, Faculty Development, Higher Education, Internet, Teacher Education

Identifiers—Child Centered Education, *Technology Role

Technology can be a tremendous asset in preparing professionals to work with young children and a number of technological applications can serve to enhance early childhood teacher preparation. Among these applications are: slide show presentations; use of the internet; introduction of students to software to assist in the development of child-centered curriculums; and practicum opportunities to provide students with experience in working with young children on computers. Teacher educators need to continue to strive to find increasingly effective ways to help their students become more comfortable and proficient in working with technology in early childhood classrooms, from preschool through the primary grades. (Includes a table of website addresses of use to early childhood professionals.) (LBT)

A First Year Teacher's Awakening to Pre-School Special Needs: Are You Ready?

Pub Date—1998-00-00

Note—13p.

Pub Type— Guides - Non-Classroom (055) — Opinion Papers (120)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Disabilities, Disability Identification, Preschool Education, *Referral, *Special Education, State Aid

Identifiers—New York, *Special Needs Children, *Support Services

In an effort to assist early childhood professionals to better understand special education practices and procedures in New York State that might affect classroom environment, this paper presents an account of one teacher's search for help with a spe-

cial needs preschooler. Following a year in which only one-on-one instruction with the boy yielded any success, the teacher learned that the initial process of recommending an evaluation for disability is often very rocky. A child's age determines the support agency and each agency has slightly different evaluation procedures. Once the evaluation is completed, it may take a minimum of 6 months to receive services. Early childhood teachers can ease the process by self education, trusting their instincts, getting to know their students, keeping anecdotal records, and developing a teacher/parent dialogue. There is a definite increase in the number of pre-school children requiring special assistance, and early childhood professionals should maintain a basic understanding of the special education system in order to help children and their families through the process. Challenging conventional characterization of teenage girlhood as a wasteland of depression, low self-esteem, and passive victimhood, this book presents accounts of young girls showing how their voices are shaped and constrained by socioeconomic class. Based on a year-long study involving conversations with white adolescent girls from the working poor and the middle classes, the book demonstrates how girls adopt some expectations about gender but strenuously resist others, how they use traditionally feminine means to maintain their independence, and how they recognize and resist pressures to ignore their own needs and wishes. Working class girls are shown to be more willing to be openly angry than their middle-class peers, and yet more likely to denigrate themselves and attribute their failures to personal weakness. The book highlights how the two classes differ in the intensity of their anger, the issues that arouse the strongest feelings, and the manner in which they express these feelings. The book's preface discusses how women and girls who protest the realities of their experiences are likely to be accused of contributing to a "cult of victimization" or "culture of complaint." Accordingly, these misnomers of political resistance reveal the depth of cultural denial, the covering over of girls' and women's psychological realities, particularly when these realities are painted with strong feeling and vivid illustrations, as they are in the case of sexual harassment, physical violence, acquaintance rape, and incest. Chapters in the book are: (1) "Stones in the Road," dealing with the constraints of class, culture and race in female expressions of anger; (2) "Privileged Difference," explaining how social status has a profound effect on the evolution of this study; (3) "Mansfield: Living outside the Lines," a description of girls from a working class setting; (4) "Acadia: The Conventions of Imagination," a description of girls from a middle-class setting; (5) "Voice and Ventriloquation in Girls' Development," explaining a process whereby one voice speaks through another voice or voice type; (6) "Resisting Femininity," discussing girls' struggles with the idealization of what a woman is supposed to be in a given culture; (7) "The Madgirl in the Classroom," describing the differences between the constraints felt by the middle-class girls, and the working-class girls' openness to expressing their feelings; and (8) "Educating the Resistance," dealing with the battle over the interpretation of truth and reality as being feminine and defined in class, gender, and race. Contains 166 references. (AMC)

Early childhood professional organizations in Canada and the United States have evolved since leaders of the Kindergarten Department of the National Educational Association (NEA) met in Toronto in 1891. This meeting led to the creation of the International Kindergarten Union (IKU), now known as the Association for Childhood Education International (ACEI). From the ACEI developed the National Association for Nursery Education, a precursor to the National Association for the Education of Young Children (NAEYC). In 1892, the organizational goals of the IKU were presented to: (1) gather and disseminate knowledge of the kindergarten movement throughout the world; (2) bring into active cooperation all kindergarten interests; (3) promote the establishment of kindergartens, and (4) elevate the standard of professional training for the kindergarten. Leading the organization were three married professional couples: Eudora and William N. Hailmann, Maria Kraus-Boelte and John Kraus, and Adaline and John Hughes. Their involvement created a female-based department in the practically all male NEA, and they promoted the Froebelian theory of early childhood education. (Includes 19 references.) (LBT)

The Child Care and Family Support Partnership Informal Care Project: Report on the First Cohort.

Bank Street Coll. of Education, New York, NY. Center for Family Support.

Pub Date—1998-12-00

Note—9p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Agency Cooperation, *Child Caregivers, Community Organizations, Early Childhood Education, *Family Day Care, *Social Support Groups

Identifiers—Caregiver Training, *Family Day Care Systems, *Family Support, New York, Support Systems

In July of 1997, Bank Street College of Education's Center for Family Support initiated a collaborative project to provide support to family, friends, and neighbors who care for other people's children. Five agencies participated in the project: the Center, Child Care, Inc., Women's Housing and Economic Development Corporation (WHEDCO), Aquinas Housing Corporation (Aquinas), and the Citizen's Advice Bureau (CAB). The three objectives of the project were to: (1) enhance the quality of care that children receive from kin and kin caregivers; (2) provide these caregivers with information about economic opportunities in the child care field; and

(3) enhance community organizations' capacity to meet child care needs in their neighborhoods. In order to achieve project goals, a series of focus groups were conducted to gather information about caregivers. The findings were analyzed and developed into a curriculum to prepare staff of the community organizations to work with caregivers. The project served a total of 135 caregivers in three 6-month cycles. Registration and participation records from 37 caregivers and conversations with program staff provided data regarding caregiver characteristics in the following areas: (1) members of household; (2) marital status; (3) ethnicity, gender, and language spoken at home; (4) education; (5) paid jobs and income source; (6) training; (7) experience; (8) children in care; (9) duration of care; (10) relationship between duration of care and caregiver status; (11) attendance and discussion topics of support groups; and (12) outcomes of the program. In post-project interviews with six participants, the caregivers indicated that they had learned new information that affected the way they worked with children. (LBT)

Identifiers—Cross Sex Friendship, Cross Sex Interaction, Same Sex Friendship, *Same Sex Interaction, *Sex Segregation, Sexual Attitudes

This book seeks to explain how gender affects human development from infancy through adolescence and into adulthood. The book's introduction states the two theses of the book: first, gender differences appear primarily in group, or social, contexts; and second, gender differentiation can be understood only in a developmental context—the sexes diverge at certain stages of development, and converge at others. The book identifies a complex combination of biological, cognitive, and social factors that contribute to gender segregation and group differentiation. Childhood experiences in same-sex groups are shown to profoundly influence how members of the two sexes relate to one another in adulthood—as lovers, coworkers, and parents. The book is divided into three sections. The chapters in the first part, "Divergence in Childhood," are: (1) "Gender Segregation in Childhood"; (2) "The Two Cultures of Childhood"; and (3) "Cross-Sex Encounters." The chapters in the second part, "The Explanatory Web," are: (4) "What Needs to Be Explained"; (5) "The Biological Component"; (6) "The Socialization Component"; and (7) "The Cognitive Component." The chapters in the third part, "Convergence in Adulthood," are: (8) "Heterosexual Attraction and Relationships"; (9) "The Two Sexes in the Workplace"; and (10) "Men and Women as Parents." The book concludes with an overview. Contains 499 references. (AMC)

Identifiers—*Visitation Rights, Welfare Reform

"Speak Out for Children" is the quarterly newsletter of the Children's Rights Council, Inc. (CRC), a children's rights and family preservation advocacy group. The feature articles for these four issues track the progress of the access/visitation grants included in the welfare reform legislation; the grants are to help establish and administer programs to support and facilitate non-custodial parents' access to and visitation of their children. Also discussed in the four newsletters are legal issues and court cases involving custody and child support payments, and summaries of research on legal and social welfare issues of non-custodial fathers, approaches to divorce, and the effect of legislation on divorce rates and child custody payments. Regular sections in the newsletter cover news of CRC lobbying efforts, congressional involvement in the organization, and CRC chapter news. (JPB)

Identifiers—Czech Republic

Noting that increasing numbers of elementary schools in the Czech Republic are interested in participating in a program of health promotion for their students, this document outlines the contents of the handbook developed for an integrated program of health promotion in schools. The handbook is described as containing four parts. Part 1 presents the underlying philosophy and integrating principles of health promotion: respect for individual needs in the context of societal needs, and communication and collaboration; and an account of the risks threatening young children's health status. Part 2 contains the health promotion curriculum, with each of three chapters dealing with pillars of health education and promotion upon which the curriculum is built: (1) providing for well being in the school environment; (2) healthy learning through activities enabling direct experience, communication, and cooperation of students; and (3) open partnership between the school and the community. Part 3 provides instructions for schools to create their own curriculum or to revise materials in line with the spirit of this project. Part 4 contains basic documents on the strategies of the European network of health promoting schools and includes the history and implementation of the project. This document also describes the development of the manual and its function in Czech schools, and invites comments on its use and contents. (KB)

Descriptors—Job Placement, *Job Training, *Mothers, *Parent Child Relationship, *Welfare Recipients, Welfare Services

Identifiers—*Job Opportunities and Basic Skills Program

The Job Opportunities and Basic Skills Training Program (JOBS) is intended to enhance welfare recipients' employability through education, training, and job placement activities, and provision of Medicaid benefits and child care subsidies. The JOBS Observational Study compared outcomes findings to those from the New Chance Observational Study to examine whether the contrasting programs pose differing implications for mother-child interaction. The JOBS Observational study examined 370 families, using data collected in the JOBS Child Outcomes Study supplemented with detailed measures of the mother-child relationship derived from direct observation and interviews. Findings of the JOBS Observation showed mothers participating in the program exhibiting negative parenting behaviors and reactions to parenting as a result of the stress of participation. Findings were similar in the New Chance Observation, with some group differences. (Includes seven tables charting a comparison of selected features of JOBS and New Chance programs; baseline characteristics of the JOBS Observational Study sample; and statistical data.) (JPB)

During the 1990s, an increasing number of states have become interested in social indicators as basic tools of governance. Many states have been working aggressively to develop programs and initiatives that make systematic use of social indicators, and to develop the underlying data system to measure and track such indicators. This report reviews developments in six states: California, Florida, Massachusetts, Minnesota, Oregon, and Vermont. The report focuses on the underlying data systems and on the efforts to make the data accessible to a variety of users. Throughout, the focus is on social indicators of child and family well-being. Each state review includes: (1) a description of major programs which use social indicator data; (2) descriptions of the survey and administrative data sources used to measure and track social indicators; (3) an assessment of the strengths and weaknesses of the overall data system; (4) a list of existing sites and major publications reporting social indicator data; (5) a description of the training programs to educate users and staff in both the collection and proper use of social indicator data; and (6) a brief description of current challenges and future plans regarding the further development and use of social indicator data in the state. This study examined transitions into and out of poverty and welfare across 4-year time periods and their implications for math and reading skills and behavior among 10- and 11-year-olds. Analyses of data from the National Longitudinal Survey of Youth-Child Supplement indicate that even with controls for factors that select families into poverty, children who do not experience poverty or welfare over this time period are advantaged relative to children who experience either. Children who are continuously poor but never receive welfare have more favorable outcomes than poor children who receive welfare. Among children experiencing changing economic circumstances, if the family manages to leave poverty, child outcomes are more positive;

children whose families fall into poverty experience more negative outcomes than children living consistently above the poverty line. Fluctuations in family economic circumstances are also associated with poorer child outcomes. (Contains 32 references and 6 tables.) (JPB)

An evaluation was conducted of the parent involvement program developed and provided by the Parent Institute for Quality Education (PIQE). The PIQE program provides information and support to inner city, minority parents through an eight-session program provided at the elementary and middle school levels. The evaluation focused on child outcomes, based on two separate but complementary analyses using data from two large, urban California school districts. From the first district, evaluators collected teacher reports of student classroom behaviors and parent-school contact, and parent self-reports of changes in knowledge, expectations, and behaviors. From the second district, official school records of attendance, grades and disciplinary actions were examined. Findings show that the effects of PIQE were largely limited to parents. Virtually all PIQE graduates reported substantial changes in their knowledge, attitudes, and behavior; however, teachers reported far less contact with parents than parents reported with teachers. Teacher reports of student behaviors showed no effects of parental PIQE attendance. There were no changes in student grades or behaviors. An analysis that included only Hispanic children revealed small, insignificant but consistent improvements in children's outcomes. (Contains 18 references.) (JPB)

Abramson, Shareen Huggins, Joyce M.

The Hundred Languages of Children Exhibition: A Unique Early Childhood Education Professional Development Program. Final Evaluation Report (September 15 to December 15, 1998).

California State Univ., Fresno. Early Education Center.

Pub Date—1999-02-25

Note—119p.; Contains many pages of color photographs that may not reproduce well.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—*Continuing Education, Early Childhood Education, *Faculty Development, *Preschool Teachers, Program Evaluation, Teaching Methods

Identifiers—Project Approach (Katz and Chard), *Reggio Emilia Approach

The "Exhibition of the Hundred Languages of Children" (HLC) was organized in the early 1980s by the early childhood schools in Reggio Emilia, Italy to promote the study of their educational methods and to reveal the potential of young children

for learning and creative expression. This report details an evaluation of the exhibition and continuing education program held during the exhibition in 1998 at California State University in Fresno, California, "Making Connections to Reggio Emilia and Beyond: An Educational Institute." The institute consisted of four weekend courses taught by leading authorities in early childhood education. Attendees were also able to observe in the Huggins Center, a model training, demonstration, and research center in early childhood education using an exemplary curriculum influenced by the study of the Reggio Approach. The evaluation findings indicated that the HLC exhibition and the program generated an intense and a positive public response throughout the state. Feedback on the exhibit, institute, and tours was exceptionally positive and enthusiastic. The report notes that the program was successful because it provided early childhood education (ECE) training aligned to the mission and goals for ECE in the county offices of education, school districts, and other early childhood education agencies and organizations. The resulting collaboration provided needed financial resources, assisted in publicity efforts, encouraged greater participation of those interested in ECE, and led to greater public awareness of the importance and benefits of ECE. Included in the report are numerous photographs from the exhibit and institute, attendee information, and media information related to the event. (KB)

This book presents performance-based projects to provide elementary school students both the structure and the freedom to become actively engaged in their own learning. The approach is based on the concept of authentic learning, which advocates a relevant, real world experience to personally engage students in learning. The book is divided into four themes, each of which includes a project at three different levels: beginning, intermediate, and advanced. Each project begins with an introduction, outline of the assignment, a list of materials required, and a list of concepts students will study. A customized assessment form is included for each project. The theme of part 1 is living things; this section presents projects on seeds, zoo designing, and imaginary animals. The theme of part 2 is numbers and measurement; this part presents projects on distance, student census, and budgeting. The theme of part 3 is people and places; this part presents projects on home, American heroes, and famous people and places. The theme of part 4 is research; this part presents projects on educational collages, encyclopedias, and interactive educational software programs. The book concludes with a student resources section which addresses choosing a topic, finding resources, tak-

ing notes, planning the writing, editing, and finding resources. (SD)

Identifiers—*Self Direction

This book presents performance-based projects as a systematic way to provide middle school and high school students both the structure and the freedom to become actively engaged in their own learning. The approach is based on the concept of authentic learning, which advocates a relevant, real world experience to personally engage students in learning. The goal is to provide opportunities for student exploration of topics that interest them by completing in-depth projects. The book includes materials lists, student responsibilities, and authentic, performance-based assessment tools. The book is divided into three sections. Section 1, "Using Challenging Projects for Creative Minds," gives educators an overview of the approach and details the goals and organization, the students' and teachers' responsibilities, and project assessment. This section also discusses using the projects for small-group work, and describes in detail how to write original projects using the teaching philosophy behind the projects in the book. Section 2, "Student Projects," offers students an overview of the approach and features all twenty project assignments and guidelines. Section 3, "Project Forms and Resources," contains reproducible materials to guide students in choosing and planning a project, reporting their progress and problems, recording their resources and work time, and assessing the project. Identifiers—Aid to Families with Dependent Children, Arrests, Child Mortality, *Indicators, *North Carolina, Out of Home Care

This Kids Count report examines statewide trends in the well-being of North Carolina's children. The statistical portrait is based on 16 indica-

tors of well-being: (1) infant mortality rate; (2) infants born with low birth weight; (3) births to single teens; (4) children without insurance; (5) ninth graders who graduate; (6) high school dropout rate; (7) SAT scores; (8) child abuse and neglect; (9) children in out-of-home placements; (10) juvenile arrest rate; (11) training school commitments; (12) child deaths; (13) children living in poverty; (14) median family income; (15) children receiving Aid to Families with Dependent Children; and (16) child support collections. The bulk of the report is comprised of statewide summaries of findings. Findings indicate that the infant mortality rate dropped in 1992 to 9.9, the lowest in state history. Births to single teens decreased slightly in 1992 and had been level over the preceding 5 years. The proportion of infants born at low birth weight had not declined in the last 15 years, and remained at eight percent. The school dropout rate worsened by 10 percent after several years of progress. The high school graduation rate dropped seven percent since 1986. Child abuse report have nearly doubled since 1989. The number of child support cases increased and the number of children living in poverty increased. The report also tabulates county data on 14 of the indicators. The report concludes with information on data definitions and sources and 5-year trend information on the indicators. (KB)

Identifiers—Aid to Families with Dependent Children, Arrests, *Indicators, *North Carolina, Out of Home Care

This Kids Count report examines statewide trends in the well-being of North Carolina's children. The statistical portrait is based on 16 indicators of well-being: (1) infant mortality rate; (2) infants born with low birth weight; (3) births to single teens; (4) children without insurance; (5) high school dropout rate; (6) SAT scores; (7) high school retention rate; (8) child abuse and neglect; (9) children in out-of-home placements; (10) training school commitments; (11) juvenile arrests; (12) training school commitments; (13) child deaths; (14) child support collections; (15) children living in poverty; and (16) children receiving Aid to Families with Dependent Children. The bulk of the report is comprised of summaries of the indicators in the health, education, safety, and security areas; a statement of the state vision for the areas, and a list of the counties scoring the best and worst on each indicator. The findings indicate that based on 1992 data, the well-being of North Carolina's children deteriorated between 1985 and 1992 in 5 areas. More than 18 percent of children live in household with no adult male present. The rate of unmarried teen births rose 61 percent. The juvenile violent arrest rate is increasing much faster than the nation as a whole. Infant mortality declined by 15 percent, but the state still ranks 43rd. Although the high school dropout rate fell by 9 percent between 1985

and 1992, North Carolina still ranked 46th on this indicator. The report concludes with a county-by-county listing for each indicator and information on data definitions and sources. (KB)

This Kids Count report examines county and statewide trends in the well-being of North Carolina's children from the 1970s through the 1990s. The statistical portrait is based on 40 indicators of well-being in five categories: (1) demographics; (2) physical well-being, including infant mortality rate and percent low birth weight; (3) intellectual well-being, including dropout rate and children in subsidized child care; (4) social well-being, including divorce rate and teen birth rate; and (5) economic well-being, including median family income and child poverty rate. Multiple comparisons are provided to allow examination of state and county data from several perspectives. The state-level mean, median, highest, and lowest numbers are also provided for each indicator for the latest year available. Following a section on using this data guide, the bulk of the report is comprised of data tables for each county, delineating indicator information for the 1970s, 1980s, 1990, and the latest available. Additional county data are provided for seven indicators for which trend information is not available. State- and national-level trend information is provided in tabular and graphic format. State-level findings indicate that infant mortality has decreased by 68 percent over the last 25 years. Teen suicide has increased 150 percent over the last 25 years. There have been substantial increases in the child abuse and neglect rate and foster care placement. The percent of children in poverty is currently 20 percent. The report concludes with data definitions and sources as well as a county index. (KB)

Supporting Pre-Kindergarten Children's Readiness for School Mathematics.

Spons Agency—Department of Education, Washington, DC.

Pub Date—1998-06-00

Contract—R307F60024

Note—16p.; Poster presented at the NIECDE Project Director's meeting (Washington, DC, June 8-10, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Cognitive Development, Curriculum Development, *Mathematics Curriculum, Mathematics Instruction, *Mathematics Skills,

Parent Attitudes, *Parent Role, Parent School Relationship, *Preschool Children, Preschool Education, *School Readiness, Teacher Attitudes, *Teacher Role

This study examined home and classroom support for early mathematical development. Teachers and parents of preschool children completed questionnaires evaluating young children's readiness for school mathematics. Teachers were selected from licensed preschool programs and Head Start programs. Findings indicated that a minority of teachers and parents did not believe that young children possessed types of mathematical knowledge which research has shown to be in their developmental range; that parents attributed more mathematical knowledge to pre-kindergarten children than their teachers did; and that a minority of teachers believed that children possessed math knowledge outside their developmental range. The surveys also revealed the extent of math activities provided to children in the home and at school, teacher's knowledge of curriculum, and the need for a comprehensive preschool math curriculum. Based on the findings, a pre-kindergarten math curriculum was developed, organized into topical units, each with a set of informal math activities accompanied by concrete materials, and including home and school components. Instructional approaches and professional development activities were included in the curriculum. (JPB)

Crosby, Danielle A.

What's Being Served for Dinner? Maternal Mood, Child Orientation, and Mother-Child Interaction during Family Dinnertime Conversation.

Pub Date—1999-04-00

Note—11p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Albuquerque, NM, April 15-18, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Beliefs, *Caregiver Speech, Child Rearing, Children, Comparative Analysis, Conflict, Goal Orientation, Models, *Moods, *Mothers, *Parent Attitudes, *Parent Child Relationship, Preschool Children, Preschool Education

The emotion-goal-regulation model of parenting maintains that the degree to which parents' behavior, cognitions, and emotions are organized by outcomes important to children (child orientation) is an important influence on parent-child interaction. This study examined the impact of negative parental moods on parents' ability and motivation to attend to and address their children's concerns and whether parent-child interaction proceeds more smoothly when parents are child-oriented than when they are not. Participating were 29 intact families from four preschools in Austin, Texas with target children ranging in age from 3 to 6 years. Parents independently completed the Positive and Negative Affect Schedule, a mood measure. Audiotapes were made of 15 dinner-time conversations at which both parents and the target child were present; the two dinner times for which mothers reported their most extreme positive and negative moods were selected for transcription and analysis. The transcripts were coded for mothers' child-orientation during conversation turns, verbal conflict, and affective expression. The results indicated that mothers spoke an average of 118 turns per dinner, with no differences between negative and positive mood days. Thirty-seven percent of mothers' turns were coded as actively promoting a particular agenda. Mothers were less oriented toward their children's concerns when experiencing a negative mood than when experiencing a positive mood. The percentage of mothers' turns that were self-oriented was very low, accounted for only 2 percent of mothers' total turns. Children expressed less negativity toward mothers and less conflict following mothers' child-oriented turns than following mothers' turns in general. (KB)

The Relation between Coordinated Interpersonal Timing and Maternal Sensitivity in Four-Month-Old Infants.

Pub Date—1999-04-00

Note—22p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Albuquerque, NM, April 15-18, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Caregiver Speech, Infant Behavior, *Infants, *Mothers, *Parent Child Relationship, Responses

Identifiers—Dyadic Interaction Analysis, Dyads, *Maternal Sensitivity, Vocalization

This study explored the relation between mother-infant coordinated interpersonal timing, an automated microanalytic measure of dyadic vocal coordination, and maternal sensitivity. Thirty-four mothers and their developmentally normal 4-month-old infants were audio recorded during a 20-minute laboratory vocal interaction session, which was later analyzed for coordinated interpersonal timing. Maternal sensitivity ratings were based on a videotaped 45-minute unstructured interaction period also obtained during the laboratory visit. The findings indicated a significant curvilinear relation between the degree to which mother coordinated her noninterruptive co-occurring speech to that of her infant ($r=.381$) and revealed that mothers highest in sensitivity were characterized by moderate levels of coordination. The finding supported the notion that examining mother-infant interaction at the specific behavioral level, while incorporating tests of nonlinear trends, may provide important information about the nature of sensitive parenting. Common Concerns of School Age Children.

Pub Date—1999-04-00

Note—15p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Albuquerque, April 15-18, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Age Differences, Anxiety, *Children, Elementary Education, *Elementary School Students, *Fear, Interviews, Locus of Control, Questionnaires, Sadness, *Stress Variables

Identifiers—Worry

This study assessed common concerns of school-age children. Participating were 138 children in grades 1, 3, and 5. Concerns were spontaneously generated by children during Phase 1 of the study, and common stressors most frequently mentioned were ranked on a 10-item rank-order task during Phase 2. In Phase 3, children completed questionnaires measuring their manifest anxiety and locus of control. In Phase 4, children's understanding of the concept of worry was assessed in semi-structured interviews with a small subsample. Findings indicated that fifth graders were significantly more worried about school than younger children. They were also more concerned about peer acceptance and the future than third graders. Third graders were more concerned about getting in trouble than fifth graders. Similar grade differences were found in children's rankings of common concerns. Fifth graders were again significantly more worried about school problems than younger children. Fifth graders were significantly more worried about family members getting hurt than third graders. First graders were significantly more worried about smoking and drugs than third graders. Fifth graders were significantly less anxious and had a significantly more internal locus of control than third graders, who in turn were significantly less anxious and had a significantly more internal locus of control than first graders. First graders exhibited less ability to verbally express their understanding of the concept of worry than older children. First graders were more likely to associate worry with sad-

ness, while older children were more likely to associate worry with fear. (Contains 14 references.) (Author/KB)

Comparison of Mother-Infant Interactions between Japanese Dyads and American Dyads.

Pub Date—1999-04-00

Note—14p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Albuquerque, NM, April 15-18, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Comparative Analysis, Cross Cultural Studies, Cross Sectional Studies, Cultural Differences, Foreign Countries, Infant Behavior, *Infants, *Interaction, Longitudinal Studies, *Mothers, *Parent Child Relationship, Parents as Teachers, Test Validity

Identifiers—Dyads, Japan, Maternal Sensitivity, United States

Mother-infant interaction creates a context for socioemotional, behavioral, and cognitive development. This study used the Nursing Child Assessment Feeding Scale (NCAFS) and the Nursing Child Assessment Teaching Scale (NCATS) to examine mother-infant interaction in Japanese dyads. Subjects were residing in Hokkaido, Japan, and assessments were obtained when infants were 13, 18, and 24 months of age. Comparative cross-sectional data were obtained from the Nursing Child Assessment Satellite Training database drawn from populations throughout the United States. Comparative analysis indicated major differences in the two samples, including age, marital status, education, parity, and ethnicity, with Japanese samples being more homogeneous. The variables that were predictive of NCAFS/NCATS scores were different for the two samples. Birth weight was predictive of Japanese scores, but was unavailable for the American sample. Mother's education and age, child's gender, and birth weight were important predictors for the Japanese sample. Changes in scores over time were demonstrated in the Japanese sample, there were fewer comparable age differences in the American data. It may be concluded that NCAFS/NCATS scores reasonably measure the quality of Japanese mother-child interactions, with further study warranted to assess the impact of different methods of observation, using larger sample sizes and controlling for demographic and geographical factors. Document Not Available from EDRS.

Descriptors—Adolescents, *Adults, Age Differences, *Attachment Behavior, Caregiver Child Relationship, Child Development, *Children, Cultural Influences, Developmental Psychology, Emotional Development, Emotional Disturbances, Emotional Problems, *Individual Differences, Longitudinal Studies, Measurement Techniques, *Parent Child Relationship, *Parents, Personality, Psychological Patterns, Psychopathology, Psychotherapy, Public Policy, Research Needs, Significant Others, Theories

Identifiers—Ainsworth (Mary D), Attachment Disorders, Bowlby (John), Security Classifications, *Security of Attachment

The theoretical work on attachment behavior by John Bowlby and Mary Ainsworth spawned one of the broadest, most creative lines of research in

twentieth century psychology. This volume compiles articles discussing attachment theory and research, measurement issues, and contributions of recent theoretical and empirical developments to the study of attachment relationships and personality development. Articles in section 1, "Overview of Attachment Theory," provide an updated primer on the theory, including discussions of the constructs of attachment and internal working models, normal development, effects of attachment disruptions in, and individual differences. Articles in section 2, "Biological Perspectives," stem from Bowlby's reliance on ethology and primate research in theory development and include discussions of how attachment theory fits with other evolutionary biology and psychology theories, attachment-related processes in rats and in primates, and the use of psychophysiological assessment techniques. Articles in section 3, "Attachment in Infancy and Childhood," review empirical research on patterns of attachment in infancy and childhood, while those in section 4, "Attachment in Adolescence and Adulthood," review studies of attachment patterns in adolescence, examine bonds between adult lovers and marital partners, discuss same-sex romantic relationships, and examine the Adult Attachment Interview. Articles in section 5, "Clinical Applications of Attachment Theory and Research," discuss contributions of attachment theory/research to clinical work, focusing on psychopathology and contributions to specific forms of therapy. Articles in section 6, "Emerging Topics and Perspectives," provide a sampling of the wide array of areas into which attachment theory and research are being extended, including caregiver-child relationships, cultural influences, bereavement, the exploratory behavior system, religion, and public policy. Each chapter contains references. (KB)

Descriptors—Child Health, *Community Involvement, *Community Programs, Community Support, Disadvantaged Youth, Foreign Countries, Health Programs, Health Services, *Poverty Programs, Preschool Education, Prevention, Program Descriptions, *Program Effectiveness

Identifiers—Ireland, Netherlands, *Program Characteristics, Tennessee

This paper discusses the characteristics of three community-based early childhood care and development support programs: the Community Mothers Program of Dublin, Ireland; the Maternal and Infant Health Outreach Workers Program of Tennessee; and the Mothers Inform Mothers Program of the Netherlands. The paper considers the general characteristics of successful programs, the method of peer group home visiting, the role of stakeholders of the program, program evaluation findings, the role of programs in the prevention of child abuse, and strengths and weaknesses of such programs. The paper concludes that these programs have a powerful potential for empowering parents. (Contains 20 references.) (JPB)

Identifiers—*Day Care Quality, Day Care Selection, Welfare Reform

A meeting of child care researchers, federal and state child care administrators, and participants in the studies of child outcomes in the context of state welfare waiver evaluations was convened on February 7, 1997. The purpose of the meeting was to ask for input as to the most important aspects of child care to cover in the state welfare waiver evaluations and advice on specific measures of child care for inclusion in these evaluations. The second purpose was to discuss key issues concerning child care in the new policy context that should be examined in future research. This document summarizes key findings from the research, as discussed at the meeting, that can help provide a context for the study of child care issues within the state welfare waiver evaluations, design and measurement issues raised at the meeting that should be taken into account in the welfare waiver evaluation studies, preliminary suggestions for what aspects of child care could be addressed in the evaluation studies, and what specific child care measures could be used in these studies. Document Not Available from EDRS.

Descriptors—Adolescent Development, Adolescents, Age Differences, Child Abuse, Child Development, Children, Cognitive Development, Depression (Psychology), Emotional Development, Guilt, *Individual Development, *Self Concept, *Self Esteem, Self Evaluation (Individuals), Self Expression, Self Motivation, Sex Differences, *Theories

Identifiers—Cooley (Charles H), Identity (Psychological), *Identity Formation, James (William), Pride, Shame, Symbolic Interactionism

Drawing upon extensive theoretical knowledge and decades of empirical research, this book traces changes in the structure and content of self-representations from early childhood through late adolescence. Chapter 1 includes a discussion of the self as subject (I-self) and object (Me-self) and describes the historical roots of contemporary issues involving self-development. Attention is first devoted to cognitive-developmental processes that represent I-self changes, which impact developmental differences in the nature of the Me-self in childhood (Chapter 2) and adolescence (Chapter 3). Chapter 4 examines developmental differences, focusing on self-affects such as pride, shame, and guilt as cognitive and social constructions. Chapter 5 examines the content, valence, and organization of self-evaluative judgments. Chapter 6 explores how the discrepancy/congruence between ideal and real self-concepts determines one's overall sense of worth. Chapter 7 deals with child-rearing practices leading to individual differences in the valence of self-attributes against a backdrop of models specifying how others' opinions are internalized. Chapter 8 presents a broader model of causes and consequences of self-worth, especially the constellation of negative consequences associated with low self-worth evident in depression. Chapter 9 focuses on factors leading to self-representations judged to be

false, highlighting the inability to voice one's opinions. Chapter 10 deals with how abusive experiences with caregivers compromises the functionality of numerous I-self and Me-self functions. Chapter 11 discusses healthy adaptation as an integration of autonomy and connectedness. Chapter 12 deals with practical applications, including conceptual and methodological issues, in considering interventions to promote self-evaluations that involve both cognitive and social processes. Contains over 700 references. (KB)

Identifiers—*Project Head Start, Welfare Reform

This report summarizes the conference proceedings of the fourth Head Start National Research Conference. The focus of the conference was on creating a shared agenda for researchers, practitioners, and policy makers related to serving children and families in an era of rapid change. Keynote topics and speakers are: "Countering the Health Effects of Poverty on Children and Families" (Norman Anderson); "Researchers, Practitioners, and Policy Makers: Hanging Together or Hanging Separately" (Jack P. Shonkoff); and "An Embarrassment of Riches: Partnering for High Quality Research and Programs During Head Start Expansion" (Eleanor E. Maccoby). Other special session topics included the effects of immigration and migration of children and their communities and early childhood assessment. Thirty-seven symposia are summarized in the areas of: (1) Head Start research and practice; (2) Administration of Children, Youth, and Families research; (3) cultural diversity; (4) family support and parenting; (5) health, mental health, and resiliency; (6) language development and school readiness; (7) research methods, measures, and assessment; (8) researcher-practitioner partnerships and collaborations; and (9) miscellaneous. Poster sessions are also summarized on the following topics: (1) children and technology; (2) classroom environment; (3) cultural and linguistic diversity; (4) curriculum development; (5) early education; (6) exceptional children; (7) fathers; (8) health; (9) infants and toddlers; (10) measurement techniques; (11) mental health; (12) research methods; (13) normative child development; (14) parenting; (15) parent education; (16) parent involvement; (17) school readiness; (18) staff development; (19) teacher-child interaction; (20) transition; and (21) welfare reform. Four appendices include a list of the cooperating organizations and peer reviewers, a subject index, and a directory of participants. (KB)

Descriptors—Academic Achievement, Acculturation, Adolescent Attitudes, *Adolescents, *Child Rearing, Cultural Differences, *Ethnicity, *Immigrants, Parent Attitudes, Parent Child Relationship, *Parents, Questionnaires, Secondary Education, Self Esteem, Social Adjustment

Identifiers—*East Indians, Ethnic Differences, *European Americans, Identity (Psychological), Parenting Styles

The challenges of identity formation are particularly difficult for minority youth because of the clash of traditional culture and the host culture. This study examined the effects of parenting style, acculturation, and parent and adolescent ethnic identity on the self-esteem and school performance of East Indian and European American adolescents. Participating in the study were 70 East Indian and 70 European American adolescents, ages 13 to 19 years, and their parents. Adolescents and parents were interviewed separately in their homes. The instruments used were the Multigroup Ethnic Identity Measure, Child Rearing Beliefs Measure, and Self-Description Questionnaire. Students' grades were used as a measure of academic performance. The findings indicated that adolescents who were themselves more ethnically identified and those whose parents had higher ethnic identity had higher self-esteem than students who were less ethnically identified themselves, and those who had parents with lower ethnic identity. East Indian parents rated the parenting philosophies of authoritative, training, and esteem significantly higher than their European American counterparts, with no difference in ratings of shaming. There were no ethnic group differences on self-esteem. East Indian American adolescents had an average grade point average of 3.37, significantly higher than the European American adolescent average of 3.14. East Indian American parents and adolescents had a significantly higher ethnic identification than European American parents and adolescents. (Contains 10 references.) (KB)

Descriptors—Adults, Beliefs, Comparative Analysis, *Family Structure, Higher Education, Nuclear Family, *One Parent Family, *Sex Differences, *Sex Role, Student Attitudes, *Two Year College Students, *Undergraduate Students

This study compared the perceptions of personal and ideal gender roles, and the fit between an individual's personal and ideal gender roles. Participating were 108 female and 61 male students (ages ranged from 17 to 56) enrolled in undergraduate psychology classes at a Midwestern university and at a community college. For comparison purposes, participants from single-parent and intact families were paired on gender, age, race, and socioeconomic status, resulting in 32 female and 13 male pairs. There were 30 Caucasian, 12 African-American, and 3 Asian-American pairs. Participants completed two forms of the Bem Sex-Role Inventory, describing their own and ideal gender roles. Findings indicated that males in mother-headed single-parent families were more likely to report a masculine personal gender role than males in intact families. Females in two-parent families were more

likely to describe themselves as androgynous than females in mother-headed single-parent families. Individuals reared in mother-headed single-parent families did not hold more androgynous ideal gender role beliefs than individuals from intact families. Males were more likely to describe themselves in terms of traditionally masculine characteristics than to describe the ideal person this way. Females in mother-headed single-parent families were more likely to describe the ideal person as androgynous than to describe themselves this way. Six of the 8 subjects raised in father-headed single-parent families described the ideal person as androgynous. Most of the females in this group described themselves using traditional feminine characteristics. (KB)

State Funding of Head Start.

Idaho State Legislature, Boise. Office of Performance Evaluation.

Pub Date—1999-02-00

Note—7p.; "Background Paper/Evaluation Proposal, with errata incorporated."

Pub Type—Reports - Descriptive (141) — Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—At Risk Persons, Educational Finance, Evaluation Research, *Financial Support, Low Income Groups, *Outcomes of Education, *Preschool Education, Program Effectiveness, Program Evaluation

Identifiers—Idaho, *Preschool Effects, *Project Head Start

This background paper details Head Start, a federally funded program serving preschool age children from low-income families, and focuses on the program's effectiveness and the adequacy of historic federal funding levels. The paper provides an overview of the Head Start Program, describes federal requirements for local programs, and describes Head Start services in Idaho. The paper also details federal Head Start appropriations, enrollment, and costs per child from fiscal year 1995 to 1999, both nationally and for Idaho. In addition, the paper lists the states providing no state funding for Head Start, those providing direct state funding for Head Start, and those with state-funded pre-kindergarten programs other than Head Start. The paper notes although it is difficult to determine the overall impact and effectiveness of Head Start nationwide because of the variation in local programs, recent research concerning local programs has generally found them to be effective in preparing children for school. However, the General Accounting Office has concluded that the existing body of studies was not sufficient to develop a national estimate of the impact of Head Start and recommended that the Department of Health and Human Services conduct a nationwide assessment of the impact of Head Start programs. The Department of Health and Human Services maintains that existing research has already provided clear evidence of the positive impacts of Head Start services. The paper concludes with a list of proposed evaluation questions for Idaho Head Start programs. (KB)

Participation, *Parent Role, Parent School Relationship, *Preschool Education
Identifiers—India, Singapore

This paper compares and analyzes preschool mathematics education in Singapore and India in terms of strategies, learning activities, teacher expectations, and parental involvement. The paper describes the mathematics curriculum of one school in Erode, India, including teaching methods, and in Singapore. The results of a parent survey in each country are presented, highlighting different parental attitudes toward mathematics education, math achievement for boys and girls, parental involvement in math education, and classroom instruction. Descriptors—*After School Programs, Case Studies, *Disadvantaged Youth, Elementary Education, Inner City, Mentors, Program Descriptions, *Tutorial Programs, Tutoring
Identifiers—Illinois (Chicago), Program Characteristics

This report details a case study of the Tutor-Mentor Connection (T/MC), an organization designed to build infrastructures to expand and improve after-school tutoring and mentoring opportunities for inner-city children in Chicago. The case study was conducted over a 3-month period in 1997 and was intended as a limited exploration of one model for developing an infrastructure among a particular type of primary support organization. The report begins with background on T/MC, including its origins, mission, leadership and staffing, funding and planning efforts. Included are descriptions of T/MC's four primary program components—research, public awareness, resource-building, and education/consulting—as well as the benefits and challenges of each component, according to various interviewees. The report concludes with a discussion of the overall benefits fostered and challenges faced by T/MC, several considerations for T/MC's future work, and suggestions for further study on primary infrastructures. The report's four appendices include a list of people interviewed and materials reviewed for the case study, a supplementary report on a spring 1998 survey of tutoring and mentoring programs, a copy of the interview protocol, and maps of the tutor/mentor program sites and the need for them. grams, *Poverty, School Readiness, *Social Indicators, State Surveys, Statistical Surveys, Tables (Data), Trend Analysis, Violence, Welfare Recipients, *Well Being, Youth Problems
Identifiers—Arrests, Child Mortality, *Indicators, *Minnesota, Out of Home Care, School Lunch Program, Vaccination

This Kids Count report examines statewide trends in the well-being of Minnesota's children. The statistical portrait is based on 12 indicators of well-being: (1) child poverty rate; (2) children in families receiving food stamps; (3) children eligible for free or reduced-price school lunch; (4) births to teenage mothers; (5) low birth weight rates; (6) children not immunized by age 2; (7) school readiness problems; (8) drop out rates; (9) children arrested for serious crime; (10) child abuse and neglect rates; (11) children in out-of-home placements; (12) children dying violently. Following an introduction detailing the major findings, the report provides regional and statewide statistical summaries for each indicator, discusses the importance of the indicator, describes potential improvement strategies, provides information on resources related to the indicator, and describes Minnesota trends. Minnesota data are compared to national findings for each indicator. The bulk of the report provides statistical information on the indicators for each county. Findings indicated that 1 in 8 Minnesota children continue to live in poverty, with child poverty rates related to ethnicity, family structure, residence location, and parent education. Although the teen birth rate has been declining, the school dropout and school completion rates continue to worsen, and sizable numbers of children are not ready to learn when they enter school. The report concludes with definitions of the indicators and their sources. (KB)

Identifiers—Training Materials

Designed to be used in conjunction with "On the Road to Reading: A Guide for Community Partners," this handbook focuses on the knowledge and skills necessary for tutors to help children from birth through third grade master reading fundamentals. The 5 chapters of the handbook present 11 training sessions for tutors, comprising 36 hours of training. Chapter 1, "First Steps for Reading Helpers," provides an orientation to basic principles and techniques of tutoring. Chapter 2, "How Children Learn To Read," presents an overview of how children become readers and writers. Chapter 3, "Tutoring Strategies for Preschool and Kindergarten," addresses strategies for talking with children, reading aloud, and writing with children. Chapter 4, "Tutoring Strategies for the Primary Grades," explores reading together, helping children with reading strategies, focusing on meaning, and improving writing skills. Chapter 5, "Partnering with Families," discusses how to support children's reading at home and promote family literacy. Each chapter is organized in two parts—an overview

summarizing the topic and highlighting the principal themes, and the training sessions and activities related to the theme. Each training session follows a standard format: (1) learning objectives; (2) basic concepts; (3) tutor reading; (4) trainer preparation; (5) materials needed; (6) activities; (7) debriefing; (8) tutor follow up; and (9) evaluation. The handbook's two appendices list of training resources and includes overhead transparencies and handouts. Contains a 47-item annotated bibliography. (KB)

Based on information from the School Transition Study, sponsored by the MacArthur Network on Successful Pathways through Middle Childhood, this Early Childhood Digest focuses on enhancing communication between parents and the school. The digest discusses the importance of parents' level of comfort at school and in talking to teachers, and provides examples for ways parents have become more comfortable and confident. Also described are ways parents can communicate with the school without visiting the school. The digest discusses difficulties in communication when parents speak languages different from that of the teachers, have different backgrounds, or have lived in the United States for only a short time, and provides suggestions for improving communication in these situations. The digest notes the importance of parents from backgrounds different from that of the teacher sharing their views with school in order to help the teacher understand their child. The digest concludes by noting that teachers need to know about the child's life outside of school in order to do their job better and that parents need to find a way to communicate with their child's teacher what is right for them. Identifiers—*Ecological Psychology, Greece
Nursery teachers in Greece were surveyed to determine their definition of behavior problems and their relevance to management techniques employed. A questionnaire was developed and distributed to 225 nursery teachers; 154 teachers returned the questionnaire for 280 children perceived to be exhibiting behavior problems. The findings showed that nursery teachers define behavior problems in terms of both children's holistic development and the aims and goals of the educational setting. With regard to management tech-

niques, nursery teachers tend to use a wide range of techniques of different theoretical orientation across all behavior problems, but they also deliver punishment. The disturbing effect of behavior problems and the ease of use of management techniques were revealed as the two primary factors that primarily guide teachers' decisions for the use of management techniques. The contribution of the effectiveness of management approaches in such decisions was not clearly supported in this study. The findings indicated that although nursery teachers define behavior problems in light of both children's holistic development and the aims and goals of education, when it comes to management techniques, classroom processes and pragmatics seem to be more influential factors for their use. The implication of these findings with regard to teachers' initial and in-service training are discussed. (Contains 101 references.) (Author/AMC)

This document outlines a presentation on the use of music activities to develop reading and composition skills in young children. The outline describes how music contributes to language arts development and presents several classroom activities. Activities to develop reading through music involve creating new verses to songs, cumulative story building, matching rhyming words, illustrating a song, using sound substitutions, and tongue twisters. Activities for composition focus on the importance of tone to illustrate the author's attitudes toward the subject and the audience. Contains 18 references. (KB)

Examination of Preschool Teachers' Biased Perception on Gender Differences.

Pub Date—1999-04-00

Note—36p.; Paper presented at the Annual Conference of the American Educational Research Association (Montreal, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Culturally Relevant Education, Hermeneutics, Preschool Education, *Preschool Teachers, Qualitative Research, *Sex Differences, *Teacher Attitudes, Young Children

Identifiers—Developmentally Appropriate Programs

Using the theoretical framework of hermeneutics and guided by the conceptual framework of Developmentally and Culturally Appropriate Practice, two studies examined how preschool teachers perceive young children's gender differences in relation to the pedagogical considerations. Participants in Study 1 were 121 early childhood educators attending workshops on gender differences in the classroom. The teachers produced 113 different words to describe preschool boys and 98 to describe preschool girls. A wider range of behaviors were described for boys than for girls and there was a higher level of agreement on the three most common descriptors for boys (active, loud, aggressive) than for girls (quiet, talkative, sensitive). Teachers perceived boys to have more of the qualities of constructivist learners than girls, and more initiative and capacity for independent learning. Study 2 examined the meaning attached to these descriptors by others. Thirty-one early childhood practitioners completed surveys regarding the positive/negative

nature of each descriptor and perceptions of children described with the most common descriptors for boys or for girls. The findings suggest that the female teachers tend to be less appreciative of boys' ways of playing, and constructing and using knowledge than those of girls. While many constructivist learner qualities are identified more often for boys than girls, overall the teachers' perception of the boys' group was as less "teachable" and "easy to work with" than the girls' group. Descriptors—*Agencies, *Agency Cooperation, Change Strategies, Child Welfare, Children, Community Programs, *Community Services, *Family Programs, *Financial Support, Government Role, Integrated Services, Profiles, Program Descriptions, Social Services

Critical to the success of current efforts to reform and restructure education and other community supports and services to improve the lives of children and their families is the way in which they are financed. This report of The Finance Project presents an overview of eight initiatives that have overcome some of the barriers created by turf issues and rigid categorical funding streams by bringing funds together across programmatic lines to support the development of more comprehensive community-based services. Information is based upon telephone interviews with key contacts, review of documents provided by the contacts and a general literature review, and follow-up interviews with state or county staff. Following an introduction, the report describes four approaches to reform: (1) state support of local collaboratives; (2) state pooling of out-of-home care funds; (3) state initiatives as locally driven; and (4) pooled funds for multi-agency children. The report follows with profiles of initiatives in Missouri, West Virginia, Virginia, Maryland, Iowa, California, Ohio, and Oregon which illustrate the above approaches to reform. The report maintains that the central strength of the initiatives is that they have provided opportunities for interagency collaboration, which help build interagency understanding and willingness to work together. Another strength of the initiatives is their appeal to ideologues on both ends of the political spectrum. The report concludes with a list of issues to be considered further. Three appendices include descriptions of other initiatives, contact information for the profiled initiatives, and a resource list. Contains 16 references. (KB)

Identifiers—California, *Community Based Organizations, *Community Based Programming

Prominent among the new models of social service delivery are organizations providing comprehensive, community-based supports and services (CCBSS) to children and their families. A needs analysis explored CCBSS sites' interest in and readiness to use a software tool designed to help them make more effective internal resource allocation decisions and demonstrate the cost-effectiveness of comprehensive approaches to providing services to children and families. Based on data obtained from eight CCBSS sites in California, the analysis assessed three critical factors: (1) incentives for using such a system; (2) data inputs; and (3) information processing and staff capacity. The findings indicated that CCBSS sites perceived the need for and were interested in strengthening their cost accounting and decision support analysis capabilities. They anticipated growing demand for providing comprehensive, detailed outcome and service information as managed care and results-based budgeting become more prevalent. Computer information systems were found to be focused primarily on required accounting and billing functions. Information technology staff capacity was lean, not readily accessible to multi-agency sites, and likely not adequate for additional information processing tasks. Data from revenues, costs, services, and outcomes are necessary to perform the full range of analyses envisioned for the software. The analysis concluded that successful implementation of a cost account/decision support software system in the CCBSS environment will require building on existing incentives and capacity in the field and making new investments in information technology, data development, and staff capacity. Descriptors—*Child Welfare, *Children, Contracts, Family Programs, Health Maintenance Organizations, *Privatization, Program Effectiveness, Program Evaluation, Public Policy, *Social Services

Critical to the success of initiatives to reform and restructure educational and community services to improve the lives of children is the way in which they are financed. This report explores the movement toward privatization through contracting in managing, financing, and delivering child and family social services and provides a conceptual basis to inform efforts to improve practical models. The report synthesizes the state of knowledge in the area, defines and frames privatization and various contracting models, identifies relevant issues, examines the advantages and disadvantages of these approaches, and highlights examples that enhance understanding of contracting practices. Following an introduction defining privatization, the report provides a historical overview of the privatization of social services. Three major contracting models—purchase of service contracting, managed care, and network contracting—are discussed, and advantages and disadvantages explored. The report notes that although scholars continue to debate privatization, administrators take it as a given and are interested in how to contract well. The report concludes that four developments in the social services field are converging, with potentially major consequences for child and family social services: (1) change in the locus of service delivery, leading to the use of purchase of service contracting; (2) a change in social service delivery models, increasingly stressing community-based rather than residential services; (3) a change in child welfare service delivery, emphasizing maintenance of children at home; and (4) a change in financing, stressing flexible and pooled rather than categorical funds. The Role of Siblings in the Development of Imitation.

Pub Date—1999-04-00

Note—9p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Albuquerque, NM, April 15-18, 1999). Research supported by a grant from the Foundation of Research, Science, and Technology of New Zealand.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Age Differences, Behavior Development, Diaries, Foreign Countries, *Imitation, Infant Behavior, *Infants, *Observational Learning, Sibling Relationship, *Siblings

This study examined the development of imitation under naturalistic conditions. Participating were 320 parents, who provided diary records of imitation by their 12-, 15-, and 18-month-old infants over a 7-day period. Approximately half of the infants were first-borns and half had older siblings. The findings indicated that infants of all ages acquired one to two new behaviors per day by imitation. There were age-related changes in the quality rather than the quantity of behaviors acquired through imitation. Older infants imitated more multi-step sequences and substituted more objects during reenactment than did younger infants. There were also sibling-related changes in the quality of behaviors acquired through imitation. Infants with siblings imitated more behaviors spontaneously and their imitation was characterized by a higher level of pretense than infants without siblings. The findings were highly consistent with those obtained under more controlled laboratory conditions. The similarity of the two sets of findings increases the validity of current laboratory research on imitation and indicates that imitation is a powerful mechanism by which infants acquire new behaviors in the course of their everyday lives. Descriptors—*Children, Comparative Analysis, Day Care, Early Childhood Education, *Employed Parents, Family Characteristics, *Family Income, Family Structure, Health Insurance, Parent Education, *Poverty, Racial Differences

Identifiers—Ethnic Differences, Survey of Income and Program Participation, Welfare Reform, *Working Poor

Although it is likely that there will be a substantial number of children who remain poor in spite of considerable work effort by their parents as families leave welfare roles, there has been relatively little research on children in working poor families. The primary purpose of this project is to develop a definition of working poor families and to provide a baseline of descriptive information about them. The primary data sources for the study were the 1987, 1988, and 1990-1993 panels of the Survey of Income and Program Participation and the Current Population Survey for 1996 and 1997. The findings indicated that children were much less likely to be poor if they were living in a working family. Over time, there was a rough balance between the number of children entering and the number leaving poverty, and children whose parents met the work standard had higher odds of leaving poverty and lower odds of entering poverty. There were racial/ethnic and family structure differences in the percentage of poor children whose families met the work standard. There were substantial differences between working poor families and poor families not meeting the work standard with respect to family structure, education, home ownership, health insurance coverage, car ownership, and child care costs. There were also important differences between working poor families and more prosperous working families in terms of home and car ownership, paid child care participation, and health insurance. Identifiers—Behavior Management, Neurobiology, *Ritalin

Noting the increased diagnosis of Attention Deficit Hyperactivity Disorder (ADHD), this book offers help for families in communicating with professionals about the symptoms and treatment of children with ADHD. Following an introduction defining ADHD as a neurobiological disorder, this book calls for an increased understanding of the children diagnosed with ADHD. The chapters are: (1) "How It Feels to Have ADHD"; (2) "What Makes ADHD So Difficult to Identify"; (3) "How Expectations Affect Understanding"; (4) "Diagnosis: Collecting Information"; (5) "Diagnosis: Recording Information"; (6) "Where to Go for Help"; (7) "Intervention: Medical"; (8) "Intervention: Psychosocial"; (9) "Basic Steps in Behavior Modification"; (10) "Measuring Behavior"; (11) "Sample Behavior Modification Plans"; (12) "Strategies for Home and School"; (13) "My Experience: How an Adult Decides To Treat ADHD"; (14) "Common Myths and Misunderstandings"; (15) "Conclusion: When in Doubt, Err on the Side of Compassion." The book concludes with a list of 23 resources. Contains 64 references. (AMC)

Descriptors—Change Strategies, *Child Welfare, *Cultural Awareness, Cultural Differences, *Cultural Pluralism, Human Services, Organizational Change, Organizational Climate, Self Evaluation (Groups), *Social Services, Social Workers, *Strategic Planning

Identifiers—*Cultural Competence

One of the most critical challenges faced by the field of child welfare is the need to understand and respond effectively to changes in the multicultural nature of American society. This guide for human service agencies, developed by the Child Welfare League of America, is designed to assist agencies in their move toward cultural competence. Chapter 1 discusses the relevance of cultural competence to human service agencies and maintains that child welfare agencies should assess the costs and benefits of integrating cultural competence into their programs and reach consensus as to why an integrated comprehensive approach is the best way to ensure that cultural competence becomes part of the organizational culture. Chapter 2 describes past approaches to addressing cultural differences and outlines the struggles of African Americans, Native Americans, and Hispanic/Latinos in the child welfare system. Chapter 3 identifies barriers to and benefits of a culturally competent organization. Chapter 4 discusses the advantages of organizations incorporating cultural competence as an integral part of their strategic plan. Chapter 5 deals with the self-evaluation by agencies regarding their goals in integrating cultural competence into their organizational culture and operations. Chapter 6 discusses the development of an action plan. Chapter 7

describes the steps in the processes of organizational change and behavioral change. Chapter 8 addresses ways that agencies can enhance their relationship with the community, while chapter 9 suggests ways that agencies can practice cultural competence among staff. The guide concludes with a listing of available resources. Each chapter contains references. (KB)

Descriptors—*Early Intervention, Family Programs, Infants, *Preschool Education, Program Effectiveness, Program Evaluation, Toddlers

Identifiers—Arizona (Phoenix), *Early Head Start, Project Head Start

The Phoenix, Arizona Early Head Start program is a family-centered program providing early, continuous, intensive, and comprehensive child development and family support services for low-income pregnant women and families with children ages birth to three. Analyses were conducted of program and participant data and program processes from Year 3, the second full year of implementation. The program components evaluated were: (1) child development, promoted through weekly home visits, site-based socialization activities, and weekly play groups; (2) family development services, provided by family support specialists to develop effective, supportive relationships, especially with fathers; (3) staff development, incorporating a multi-disciplinary approach reinforced by a relationship-based supervision model; and (4) community building and collaboration, including connections with Phoenix's program for young fathers and other family-focused initiatives. Evaluation findings suggest that the program is on the right track. Among the program's successes are the launch of all planned child development activities, increased services by and access to the child development/disabilities specialists, and progress made through the male involvement component. The program continues to face challenges, including increasing staff skills in child development and parent-child relationships, helping young parents adjust to dealing with toddlers, reducing disruptive effects of staff turnover, and making the program and participants visible and vital to other family-centered community endeavors and to policy makers. Recommendations for future operations were derived from the evaluation findings. (Contains 49 references.) (KB)

Federal Programs, Foreign Countries, Program Descriptions, Public Policy

This report reviews the child labor situation in 16 countries where child labor has been identified as a problem, and the level and types of action being undertaken to reduce child exploitation. The information is based on material gathered during field visits to Bangladesh, Brazil, Egypt, Guatemala, India, Kenya, Mexico, Nepal, Nicaragua, Pakistan, Peru, the Philippines, South Africa, Tanzania, Thailand, and Turkey; testimony submitted to the Department of Labor; and other reports. The report notes that at least 250 million of 5- to 14-year-olds are working in developing countries, tens of millions under exploitative and harmful conditions. The report also identifies child labor laws for each country, notes that legislation often excludes sectors in which most children work, maintains that inadequate enforcement of child labor laws remains widespread, and asserts that child labor laws should be made comprehensive in scope and coverage and that enforcement should be improved. Further, the report describes governmental education initiatives aimed at increasing primary school enrollment, retention, and completion rates by overcoming impediments to educational attainment. Finally, the report presents examples of targeted efforts implemented or advanced by governments to address the exploitation of working children. The report concludes that the information can serve as a framework for further study and evaluation of the progress toward eliminating child labor in the countries studied. Six appendices include information on methodology, sources, and relevant child labor provisions. (KB)

Identifiers—Alberta, School Based Services

The Student Health Initiative is a joint initiative of the Canadian provincial government partners of Education, Health, Family, and Social Services; the Alberta Mental Health Board; the Child and Family Services Secretariat; and Community Development. The initiative is designed to strengthen the capacity to deliver health and related support services to children with special health needs registered in school programs. This document summarizes funding information and outlines student health initiative principles and joint service planning as well as annual reporting requirements. Part 1 describes the Student Health Initiative, including the purpose of the program, the principles for the program's operation, and the partnership. Part 2 outlines procedures for accessing funding and details eligible (and ineligible) service categories, types of eligible services, eligible service providers, eligible (and ineligible) costs. Part 3 details the required components of the joint service plan, development and submission procedures, support documents, and review and approval procedures. Part 4 describes the joint annual report, including the required components, development and submission procedures, and the review process. Six appendices include required components of the joint service plan, relevant forms, and acknowledgments. (KB)

Identifiers—Affordability, Availability (Programs and Services), *Child Care Costs, Virginia

This White Paper on child care is the second of four to be published by the Action Alliance for Virginia's Children, and focuses on the affordability and availability of quality child care in Virginia. The paper states that despite federal attempts to simplify funding, funding remains complicated due to differences in the federal and state fiscal years and multiple programs administered through multiple departments. The paper asserts that public funding must supplement parent fees and that diversified funding is needed. The fragmented, uncoordinated child care system compounds funding problems, with concomitant problems in values and increasingly complex funding streams and policies. There is a shortage of care, particularly quality care, care at nontraditional hours, care for infants and school-age children, and care for children who are ill or who have special needs. Topics addressed by the paper include: (1) the affordability of child care; (2) the funding problems created by a fragmented, uncoordinated child care system; (3) the availability of child care, including care at times required by parents' schedules, infant and school age care, sick child care, accessibility to public transportation, and time delays; and (4) funding sources for child care, including parent fees, the Child Care and Development Fund, and smaller government programs. The paper concludes with recommendations for child care advocates to lobby for more dollars to be well spent, to insist that spending be based on the best information available, and to work persistently for a coordinated, systematic approach to child care in Virginia. EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Accountability, *Audits (Verification), Compliance (Legal), Early Childhood Education, Financial Support, Quality Control

Identifiers—North Carolina, *Smart Start

This report of the Office of the State Auditor in North Carolina details audit findings regarding allegations of misuse of Smart Start funds by Save Our Brothers, Inc. and the Liberty Chapel United Church of Christ. Save Our Brothers, Inc., a non-profit agency, received two contracts totaling \$46,327 from the Chatham County Partnership for

Children (CCPC) to implement a Surrogate Father's Program. Liberty Chapel United Church of Christ in Moncure, North Carolina received Smart Start grants from CCPC totaling \$60,630 and a grant from the North Carolina Department of Health and Human Services for \$5,000 to develop an educational and child care center. The report concludes that all the funding to Save Our Brothers, Inc. was questionable given their limited accomplishments and the nature and number of findings produced as a result of the audit. The report maintains that no clear objectives have been accomplished with the funds, there have been conflicts of interest in hiring practices, there has been a lack of documentation for services, and there has been a major breach of internal controls and an abdication of responsible oversight by the board of directors and president. In regard to the Liberty Chapel United Church of Christ, the report questions all the funds allocated to Liberty since the child care center has not opened. The report also notes the encouraging tone and intent of the response by the chair of the CCPC and expresses the hope that closer monitoring of project performance will prevent similar situations from occurring. Descriptors—*Day Care, *Day Care Centers, Early Childhood Education, *Family Day Care, Hazardous Materials, National Surveys, *Safety, Young Children

Identifiers—*Child Safety

Each year, thousands of children in child care settings are injured seriously enough to need emergency medical treatment. This national study identified potential safety hazards in 220 licensed child care settings in October and November 1998. Eight product areas were examined: cribs, soft bedding, playground surfacing, playground surface maintenance, child safety gates, window blind cords, drawstrings on children's clothing, and recalled children's products. Participating child care centers were located in the eastern, central, or western United States and were selected randomly, when possible, from regional or national lists of licensed child care providers. A prepared checklist was used to observe conditions related to the eight product areas. The findings indicated that two-thirds of the child care settings exhibited at least one of the targeted safety hazards. The most commonly seen hazards were the use of clothing with drawstrings at the neck (38 percent of settings), lack of safe playground surfacing (24 percent) or adequate maintenance (27 percent), and the use of window blind cords with loops (26 percent). Fewer settings had cribs that did not meet current safety standards (8 percent), cribs with soft bedding (19 percent), lack of child safety gates (13 percent), and the use of recalled products (5 percent). A review of state licensing requirements revealed that most of the hazards examined in this study are not adequately addressed. (KB)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Behavior Problems, *Classroom Techniques, Foreign Countries, Preschool Chil-

dren, Preschool Education, *Preschool Teachers, Questionnaires, Teacher Response, Teacher Student Relationship

Identifiers—Greece

This study investigated the management approaches employed by nursery teachers in Greece to deal with children's behavior problems. In particular, the extent, frequency of use, and effectiveness of behavioral, cognitive, and punitive approaches were investigated with regard to conduct, emotional, and developmentally related problems. Participating were 154 female teachers selected from nursery schools located in three distinct regions of Greece. The teachers completed the questionnaires in regard to a total of 280 children from a total pupil sample of 3,091. The findings showed that teachers appeared to mainly attend to and deal with conduct problems which cause greater disturbance in the classroom. However, emotional and developmentally related problems were also addressed, revealing teachers' concern about their pupils' well-being and development. Teachers seemed to use mainly positive ways in dealing with the children's behavior problems, but they did deliver punishment as well. Finally, the study indicated that teachers appeared to be rather effect oriented, employing a variety of techniques of different theoretical orientation which have been perceived to be effective. (Nine tables detail findings, and the questionnaire is appended. Contains 69 references. (Author/KB))

Nonsocial Play in the Kindergarten Classroom: Gender Differences in Relations with Adjustment.

Pub Date—1999-04-00

Note—10p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Albuquerque, NM, April 15-18, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Child Behavior, Kindergarten, *Kindergarten Children, *Play, Primary Education, *Sex Differences, Social Adjustment

This study examined gender differences in the correlates of different types of nonsocial play behaviors. Seventy-seven kindergarten children (38 males, 39 females) were observed during free play. Behaviors were categorized according to three subtypes of nonsocial play: reticent, solitary-passive, and solitary-active. Additional measures included an interview, assessment of academic achievement, parental ratings of child temperament, teachers' ratings of children's behavior problems, social competence, and academic skills. Findings from regression analyses indicated that a lack of social play for males, but not for females, was associated with indices of maladjustment. In particular, solitary-passive play was associated with positive outcomes for females, but not for males. In contrast, reticent play was a predictor of maladjustment for both genders. Findings indicate potentially different meanings in the various forms of nonsocial play behaviors for young boys and girls. Contains 17 references. (Author/HTH)

Crawford, Valerie M.

Semiotic Processes in Women's Coordination of Work and Family.

Pub Date—1999-04-00

Note—10p.; Paper presented at the Biennial Conference of the Society for Research in Child Development (Albuquerque, NM, April 14-18, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Child Rearing, Day Care, Early Childhood Education, *Employed Parents, *Family Work Relationship, *Mother Atti-

tudes, *Mothers, Parent Child Relationship, *Role Conflict, Role Perception, *Semiotics Identifiers—Role Strain

This study examined how women who work in the professions and who have been mothers for 1 to 4 years construct and coordinate their roles as professionals and as mothers, in terms of both the symbolic meanings of these roles and the practical organization of their daily activity related to these roles. Fifteen women participated in extensive individual interviews designed to probe the personal significance of each role, professional and mother, and to explore their thoughts and feelings about day care, child-rearing, and women's roles in society. The perspectives taken in coordinating work and family were identified from the transcribed interviews. Additionally, the form of coordination (oppositional or nonoppositional) was identified. Findings revealed four perspectives: (1) ego-anchored, in which self figures prominently, with pleasures and stresses of working and mothering contributing to one's development; (2) child-anchored, in which the child's needs are prominent; (3) role-anchored/work, emphasizing professional identity, work, and professional achievements and satisfactions; and (4) role-anchored family, emphasizing the maternal role, identification with it, and enjoyment derived from it. Oppositional forms of coordination were evident in statements regarding conflict or situations in which one domain constrains activity in another. Nonoppositional coordination was apparent in considerations of tradeoffs and specific positive effects across domains. Lengthy citations from interviews illustrate the perspectives. The perspectives act as mediators of action, thinking, and feelings, in the domains of working, mothering, and coordinating the two and thus complements outcomes-oriented studies. (Contains 11 references.) (KB)

Parental Style: And How It May Influence a Child's Role in Bullying.

Pub Date—1999-04-15

Note—6p.; Paper presented at the Biennial Conference of the Society for Research in Child Development (Albuquerque, NM, April 15-18, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Bullying, Child Rearing, Childhood Attitudes, Elementary Education, Elementary School Students, Foreign Countries, Parent Attitudes, *Parent Child Relationship, Parent Role, Parents, *Peer Relationship Identifiers—Disciplinary Styles, England (London), Nurture, *Parenting Styles, Restrictiveness (Child Rearing), Victimization

This study explored the link between parenting style and different types of bullying behaviors. Data were collected from 196 students from 4 schools in London. The mean age of the subjects was 9 years, and the children were of various ethnic origins. Children were asked to nominate whether their peers took part in any of 20 difference types of behaviors related to 6 participant roles: (1) bully; (2) reinforcer; (3) assistant; (4) defender; (5) outsider; and (6) victim. Children were assigned a category based on their highest peer nomination. Children also completed a questionnaire to assess their perception of their parents' parenting style with regard to warmth, accurate monitoring, overprotection, punitiveness, and neglect. A subsample of 39 parents completed a questionnaire measuring parental warmth and restrictiveness. The findings revealed that 27 of the subjects were nominated as bullies, 15 were reinforcer bullies, 12 were assistant bullies, 86 were defenders of the victim, and 35 were victims. Reinforcer bullies scored significantly low on perceived parental warmth. Assistant bullies scored significantly high on perceived parental neglect. Victims scored significantly high on perceived punitiveness. Children nominated as reinforcer bullies also scored significantly high on perceived punitive parenting. Parents viewed themselves as significantly more warm than their children did. Parents of children nominated in the

outsider role saw themselves as significantly more nurturant than parents of children in other roles. Parents of victims saw themselves as more restrictive than did parents of children in other roles. (Contains 13 references.) (KB)

Culture and Educational Experiences Influence American and Taiwan Pre-Service Teachers' Efficacy Beliefs.

Pub Date—1998-05-00

Note—23p.; Paper presented at the Annual Meeting of the American Psychological Society (Washington, DC, May 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Beliefs, Cross Cultural Studies, *Cultural Differences, Cultural Influences, Elementary Secondary Education, Foreign Countries, Higher Education, Preservice Teacher Education, *Preservice Teachers, Secondary Education, *Teacher Effectiveness Identifiers—Chinese People, Taiwan

This study examined preservice teachers' beliefs in light of potential cultural differences in perceived efficacy in Taiwan and America. Subjects were 240 preservice teachers at the beginning or the ending points of their teacher education programs in Taiwan and 231 comparable American preservice teachers. Subjects completed a revised version of the Gibson and Dembo (1984) teacher efficacy scale. Multivariate tests indicated that the preservice teachers in these two countries may have conceptually different expectations of teaching (e.g., parental support, social awareness, individual effort). However, efficacy beliefs of preservice teachers in these two countries showed a similar pattern regarding their capability to adjust to individual children. Findings suggest that, in both countries, preservice teachers' efficacy beliefs may be influenced by the context of their studies, by their increasing competence and experience as teachers, and by cultural perspectives. Contains 19 references. (Author/HTH)

Descriptors—Beliefs, College Students, Comparative Analysis, Foreign Countries, Higher Education, Learning, *Preservice Teacher Education, *Preservice Teachers, Primary Education, *Student Attitudes, *Teacher Role, *Teacher Student Relationship Identifiers—Taiwan

This study compared the perceptions of Taiwanese preservice teachers at two different points in their educational experience. Participating were 298 preservice teachers who were completing either their first year or third year of a teacher training program. Subjects completed a questionnaire including open-ended questions examining their perceptions of their role as teachers, of ways that children learn, and of their relationships with children. Through the process of translating, sorting, coding written responses and analyses, the description of central beliefs was generated. Content analysis was used as the dominant mode of data analysis. Chi-square analysis was conducted to support claims of representativeness in conjunction with category analysis to provide a better understanding of preservice teachers' beliefs. The findings indicated that the two groups of preservice teachers shared some beliefs and that their beliefs became more integrated with experience. The value of patience and love had a pervasive influence in their perceptions as teachers, their images of classroom practice, and their relationship with students. Opportunities for student

self-discovery were emphasized in views regarding learning. There were also qualitative differences related to some beliefs about teaching and learning. The main differences related to willingness to take responsibility for children's learning, conception of how teaching should be conducted, images of learning experience, integration of cognitive ability with social and culture learning, children's learning from experience, and the necessity of building relationships for teaching. (Contains 51 references.) (KB)

Descriptors—*Beliefs, Early Childhood Education, Foreign Countries, Higher Education, *Preservice Teachers, Teacher Attitudes, Teacher Education Programs, *Teacher Role, Teacher Student Relationship, *Teaching (Occupation)

Identifiers—Chinese People, Taiwan

This study examined the patterns of Taiwanese early childhood preservice teachers' professional beliefs about teaching and learning. The instrument included six open-ended questions that examined preservice teachers' perceptions of their roles as teachers, of ways that children learn, and of their relationships with children. Participants were 298 preservice teachers who were completing either their first or third year of a teacher training program. The study aimed primarily at description or conceptualization of central beliefs and interrelationships among them. Content analysis and the grounded theory method were the predominant mode of data analysis. The data suggest that preservice teachers' beliefs can be conceptualized and organized systematically. Their beliefs can be divided into three categories: goals for which the teacher is responsible, a deep commitment to teaching, and enhancing self-cultivation in which students are responsible for their own learning. Interrelationships among teacher role, images of classroom practice, ways children learn, the reasons for schooling, children's needs from teachers, and the relationship between teachers and students were constructed by the researchers. The study shows that teacher education in Taiwan plays a major role in preserving, broadening, and strengthening Chinese educational beliefs. Contains 62 references. (Author/HTH)

Preschool Education, School Choice, Telephone Surveys

Identifiers—Day Care Selection, Family Activities, New Zealand, Preschool Selection

This telephone survey examined the early childhood education (ECE) experiences, home experiences, and home resources of near-5-year-olds in New Zealand, as identified by their parents. Participating were 767 New Zealand families in Wellington and Porirua, a sample selected to be comparable to those selected in other longitudinal studies. The main findings of this study follow. Around 60 percent of mothers were in paid employment. Family income was related to the number of parents employed and occupations, and children in sole-parent families were more likely than others to be in low-income households. Most parents reported four kinds of family activities, with family income and mother's educational level associated with different activity patterns. Parents' description of their contribution to children's development included spending time with them, providing resources that cost money, reading to them, and providing a stable family environment. About half the children could read or recognize some words; about one-third could add or subtract. The use of two or more ECE services was related to maternal education and family income. Crèches and private informal care were the two main types of ECE service first used. Later ECE service use was related to family income. The main reasons for choice of children's first ECE service were suitability to parents' needs, previous family/friend's attendance, location, and reputation. Parents' ratings of children's competency were related to parents' education, family income, and family structure. The main factors in parental choice of primary schools were proximity, reputation, and previous family attendance. The questionnaire is appended. (KB)

Progress towards Licensing and Chartering Pacific Islands Early Childhood Centres in New Zealand.

New Zealand Council for Educational Research, Wellington.

Report No.—ISBN-1-877140-46-5

Pub Date—1998-00-00

Note—66p.

Available from—NZCER Distribution Services, P.O. Box 3237, Wellington, New Zealand.

Pub Type—Reports - Research (143)

EDRS Price — MF01/PC03 Plus Postage.

Descriptors—*Certification, Day Care, *Day Care Centers, *Early Childhood Education, Foreign Countries, Preschool Education, Program Improvement, Young Children

Identifiers—Chartering Process, *Day Care Licensing, New Zealand

There has been concern in New Zealand about whether the level and pace of licensing and chartering Pacific Islands early childhood centers (PIECs) are sufficient to meet current needs. This study identified obstacles to the attainment of licensed and chartered status as assessed by key informants from agencies working with Pacific Islands Language Groups and PIECs, representatives of the national Pacific Islands early childhood associations, and representatives of licensed centers or centers working towards licensing. Findings indicated that agencies viewed funding as the primary barrier; viewed national organizations and centers as becoming better informed about early childhood education; and identified centers' almost total reliance on government funding and ability to sustain licensed status as challenges. Pacific Island national associations identified difficulties related to funding, parent involvement, and rapidly changing policies and regulations; noted the importance of Pacific Island agency personnel; and identified the challenge in providing further immersion in Pacific Island languages. Key informants from PIECs identified barriers and challenges, including funding, relationships with families, and lack of qualified staff. Differences between licensed and unlicensed programs included the ability to extend services to all-day provision, ability to train and pay staff, improved community status of the programs,

and increased access to quality services. (Four appendices include information on definitions of terminology used by the Ministry of Education, interview questions, and feedback on the draft report. Contains 19 references.) (KB)

School-age children between the ages of 5 and 14 spend up to 80% of their time out of school. These hours represent an opportunity to help children grow and acquire important social, emotional, cognitive, and physical skills and to help them develop lifelong interests. This time can also be used to provide support for the academic challenges faced by children each day in school. Out-of-school time programs provide opportunities for young adolescents to learn skills that are not usually acquired in school, such as athletic and artistic performance skills. Programs may also extend and enrich academic skills by enabling participation in a debate club or computer club. This Digest examines two broad categories of enrichment programs—extracurricular and academic enrichment—and describes specific programs, such as the Art Moves Us program in Santa Fe, New Mexico, and LA's BEST in Los Angeles, California. The Digest also discusses program funding opportunities and gives examples of specific programs such as the MOST Initiative in Boston, Chicago, and Seattle. (LPP)

This proceedings, containing 69 paper and poster presentations, focuses on innovation and hope with a glance to the future. The conference was planned to include theoretical discussions, current research findings, and promising practices based on sound evidence. Current issues in special education include the use of technology, integrating theory

and practice for all ages, and effective professional development. The proceedings is organized to correspond to conference strands: at-risk students, collaborative education models, early childhood special education, gifted education, leadership and policy issues, multicultural education, parents and families, professional development, technology, transition, and understanding issues of low incidence disabilities. Identifiers—Arizona, Missouri

Youth with disabilities are particularly susceptible to dangerous outcomes associated with contemporary issues such as teenage pregnancy, substance abuse, and domestic violence. Several studies document the high degree of social, medical, and legal risk to which youth with disabilities are exposed. The extent to which public schools provide risk reduction for students through prevention and protection programs varies across communities. In addition, special education students may be excluded from the programs that are offered. A survey of 509 teachers (primarily special education teachers) in Missouri and Arizona examined the extent to which they addressed 45 contemporary issues with their students. Respondents included rural and urban teachers of students with mental retardation, learning disabilities, and behavioral and emotional disorders, as well as typical students. For all teachers, the most frequently discussed issues were attitudes toward disabilities, drug and alcohol abuse, tobacco use, racism, teen pregnancy, and domestic violence; the least discussed areas were homosexuality, rape, abortion, child sexual abuse, and sexual promiscuity. In all but two categories, more rural special educators addressed the high risk issues than did urban special educators. Most frequently mentioned obstacles to discussing contemporary issues included conservative community attitudes and lack of time for rural educators, and lack of time and materials for urban educators. Data tables detail survey responses. Contains 10 references. (SV)

The PASSAGEWAY Project (Program To Assist Secondary Students in Achieving Gainful Employment for West Alabama Youth) sought to increase the academic, social, and job skills of high-risk and dropout special education students. A cooperative program of the University of West Alabama, public

schools, businesses, and social service agencies, the project used the resources of the university's College of Education and Division of Technology to develop an alternative program that accomplished several objectives. The program identified and recruited youth with disabilities who were at high risk of dropping out or who had recently dropped out in six west Alabama counties; provided functional literacy training to identified youth; developed and implemented employment training for youth aged 16 and above; provided individual youth and their families with counseling focused on specific outcomes; increased student participation through alternative scheduling and distance learning; and developed business partnerships culminating in employment opportunities for students with disabilities. This paper also discusses the criteria for student identification, program staff and their professional qualifications, the role of school personnel and industry liaisons, availability of various resources to the program, program activities, and 3-year outcomes. Identifiers—*Behavioral Assessment, Control Theory, *Functional Assessment, Glasser (William), Individuals with Disabilities Education Act

This paper connects the philosophical basis of Glasser's Choice Theory/Reality Therapy to the Functional Assessments of Behavior (FAB) required by the Individuals with Disabilities Education Act (IDEA). The 1997 reauthorization of IDEA states that before a school can place a student with emotional or behavioral difficulties into an alternative program for discipline reasons, it must conduct a FAB and implement a behavior intervention plan in an attempt to alleviate the behavioral issue. A FAB is also an integral part of a manifestation determination for severe problems related to weapons and drugs in the school setting. However, IDEA offers little guidance about how to conduct a FAB. Various working definitions suggest that a FAB should determine the function that the problem behavior serves for the student, describe the undesirable behavior and the circumstances of its occurrence and nonoccurrence, and define reinforcers that maintain the behavior. Glasser's choice theory, also known as control theory, posits that humans have five basic needs and that all behavior is undertaken to meet or satisfy these needs. Five elements of a FAB (need for philosophical orientation, description of child's behavior, precipitating factors, hypothesis for explanation, and identifying variables for change) are correlated with five elements of choice theory (choice theory itself, total behavior system, external environment, identifying the unmet need, and developing a plan). There have been few initiatives addressing the improvement of science education for students with disabilities. Funded by the National Science Foundation, Biotechnology Works is a summer institute in immunology and genetics for students with disabilities, high school science teachers, and high school counselors. During the 1998 summer session, activities included developing curriculum adaptations for students with disabilities, mentoring high school science students, developing curriculum materials, and developing career development materials to encourage the participation of students with disabilities in science careers. Student activities included hands-on laboratories. Extended interviews were conducted with the 14 students who attended the 1998 summer institute. The students were 15-18 years old and had physical, emotional, or learning disabilities. Major interview themes related to the students' experiences were limited availability of science courses and science labs, the importance of teacher support, lack of adapted laboratory equipment, the importance of high teacher expectations and standards, and a desire to accomplish the work on their own. The students reported continued difficulties in their own science education programs, with the most striking finding being the few laboratory experiences available in either regular education or specialized settings. A variety of common adaptations and assistive technology used in the summer institute are listed. (SV)

Identifiers—*Maine

This paper describes Maine's high standards for all students and a model for personalizing instruction and assessment to fit student needs, thus providing fair opportunities for all children to achieve the standards. Maine's academic standards, the Learning Results, are structured in three levels: broad performance goals for all students (guiding principles); content standards in eight subject areas; and performance indicators at the PK-2, 3-4, 5-8, and secondary levels. To provide a structure for personalizing instruction and assessment, a systems framework outlines the interrelationships within a local school system among theories, methods, or tools; guiding ideas; infrastructure; attitudes and beliefs; skills and capabilities; and awareness and sensibilities. The framework is also applied to the student as an individual system. An example demonstrates how to draw on this framework to develop personalized instruction for a student with complex needs, using three planning tools: a student profile, a Personalized Opportunities to Learn template, and a performance indicator planning grid. Addressing student needs through this comprehensive planning process has implications for all levels of the educational system. A vision of the student-centered system of 2002 outlines these implications at the student level, the educator and classroom level, the school district and community level, and the state level. (SV)

Descriptors—*Consultation Programs, Educational Diagnosis, Elementary Secondary Education, *Prereferral Intervention, Prevention, Program Termination, Qualitative Research, Referral, Rural Schools, Special Education, *Teacher Collaboration

A followup study of 10 prereferral teams within a rural, northwestern state investigated common causes for prereferral teams to be discontinued within schools and examined effective methods being used to maintain the prereferral teams. Prereferral teams assist general educators with academic and behavioral concerns they encounter with their students, thereby reducing referrals to special education services. Each of the prereferral teams studied consisted of 7-9 members, mostly general education teachers. Eight of the 10 teams remained in operation, providing school support as needed. One team was no longer functioning, while another had shifted its focus to monitoring "at-risk" sophomores. Information collected from special education directors and prereferral team members revealed strengths and weaknesses evident in team operations. A rotation system in which team members served for a period of time and then were released from their duties was an effective mechanism for preventing burn-out. Other factors contributing to team success were realization by school personnel of the benefits of prereferral services, multidisciplinary team membership and transdisciplinary operations, and use of a tracking system to provide continuity of effort in the next school year. Results strongly support the provision of formal team training and ongoing support for newly developing prereferral teams. Contains 15 references. (CDS)

Identifiers—Training Needs

The state education agency in a northern rural state funded a study that investigated paraeducator training and roles in special education. Surveys were completed by 153 principals, 297 general education teachers, 554 special educators, and 572 paraeducators. Study results include data on the role of paraeducators, their educational background, and their training. Findings include the following: (1) paraeducators served primarily students with mild disabilities; (2) while 28 percent of paraeducators provided services in self-contained classrooms, most services were offered in general education environments; (3) some problems of role confusion were noted; (4) paraeducators served a mean of 12.8 students, but about 10 percent served only 1 student; (5) about one fifth of paraeducators were in their first year of employment; (6) paraeducators tended to be well educated, with a third having 4-year degrees or better; and (7) paraprofessionals tended to be satisfied with state-mandated training. EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Consultation Programs, *Educational Diagnosis, Educational Quality, Elementary Secondary Education, *Prereferral Intervention, Referral, Rural Schools, School Districts, *Special Education, *Student Evaluation, Student Records

A study in a small rural school district used district preassessment records of students referred for a comprehensive, special education evaluation to determine if preassessment practices had improved. The district was located in a midwestern state that mandated preassessment practices in the mid-1980s in an effort to control special education referrals and maintain more students in the general classroom. A subject pool of 48 educators was provided with actual preassessment forms completed by school-based preassessment teams for the 1996-97 school year. General information on referrals was collected as well as reasons for referral and suggested interventions. Preassessment teams serve two clear functions: to support students experiencing learning or behavioral difficulties and to monitor the referral of students for special education evaluations. The teams in this study appeared to address both these functions, but with limited success. Preassessment records showed regular team meetings, documentation of suggested classroom interventions, and a regulated system of referrals for special education assessment. However, there were qualitative concerns about team membership and involvement of key stakeholders, duration of attention given to students at the preassessment level, team proficiency in pinpointing student problems, and the efficacy of team-suggested interventions. Contains 15 references and lists of preassessment team interventions suggested for the areas of speech and language, math, reading, written language, motor, and general achievement. (CDS)

Identifiers—*Oklahoma

The Assistive Technology Program for Oklahoma Public Schools was developed to assist Oklahoma public schools in meeting the challenges of assistive technology service delivery as mandated by the Individuals with Disabilities Education Act (IDEA). The program is a collaborative effort between the Oklahoma State Department of Education's Special Education Services Division and the Assistive Technology Center of the University of Oklahoma Health Sciences Center. The program serves as a resource in assisting all schools in the state, offering such services as information dissemination, systematic staff training, technical assistance, access to resources, and development of a

statewide network of assistive technology resource teams. Project IMPACT AT Preschool (Improving Mobility, Positioning, and Communication through Assistive Technology) gives Oklahoma preschool teachers and therapists training in the use of assistive technology and an opportunity to assess the functioning of their preschool students with various assistive technology devices. The project offers a lending library of assistive devices and training resources, as well as training for preschool teams in the assessment and programming of preschool students with developmental delays. A project evaluation at six preschool sites outlined project benefits to students and teachers and barriers to classroom use of assistive technology. A program evaluation form for Project IMPACT AT Preschool is included. Contains 10 references. (CDS)

Descriptors—*Child Development, *Curriculum Development, Developmental Delays, Early Childhood Education, *Intervention, *Play, Play Therapy, Preschool Curriculum, *Special Education

Identifiers—Behavioral Assessment, *Developmentally Appropriate Programs

This paper explores the research literature surrounding beliefs about children's play and the rationale for using play-based programming as part of early childhood special education practices. Discussions of recommended practices for educating or serving the needs of children typically refer to developmentally appropriate practice (DAP). DAP is defined, along with a discussion of its components. Two examples of play-based programming models are Linder's Transdisciplinary Play-Based Assessment/Intervention (TPBA/I) and McCord's Storybook Journey Curriculum (SJC). The TPBA/I model has six categories or levels of play. Identifying the primary category of a child's spontaneous play is important to determining the child's strengths and provides vital clues to use in planning interventions. Parent participation is systematically built in to the assessment and intervention process. SJC provides a structure for using children's literature to design play activities relative to the child's intervention and developmental needs. Twelve developmental implications of SJC are briefly explained. A particular advantage to play-based curricula is its use of existing materials within rural communities and homes. Adults who engage with a child in play demonstrate interactions with the child that can provide professionals with understandings about family expectations, beliefs, skills, and needs. Contains 24 references. (CDS)

*School Community Relationship, Secondary Education, *Special Education

Identifiers—Authentic Assessment, Native Americans

Project Leadership Excellence Achievement and Performance (LEAP) was designed to respond to the needs of gifted students enrolled in secondary schools in rural areas. This paper describes Project LEAP's implementation in four rural Oklahoma high schools with high American Indian enrollments and high percentages of low-income families and limited English proficient students. It demonstrates how the two major overarching outcomes of the project, authentic discovery and rural linkages, provide the framework and foundation for the project's success. Project goals are discussed along with specific indicators of success in the areas of collaboration, identification, curriculum development, and community/parent involvement. The project served over 120 high school students who were not currently identified or served by gifted programs; about 60 percent were Native American. Project LEAP provided students with individualized instruction and specially developed study units that responded to students' assessed strengths and interests and emphasized the language and culture of Native American participants. Project students demonstrated an overall increase in performance on the ACT/SAT scores. Project sites showed statistically significant increases in the number of students applying for college, and no student who applied was denied acceptance to college. Factors influencing the success of the project include authenticity in identification of participants (use of portfolio assessment), linkages between schools and community, superior qualifications of project personnel, and project administration by an interdistrict cooperative. Contains 11 references. (CDS)

Descriptors—Beliefs, *Curriculum Development, Educational Environment, Elementary Secondary Education, *Gifted, *Individualized Instruction, Q Methodology, Special Education, Special Education Teachers, *Teacher Attitudes, Teaching Methods

Identifiers—*Differentiated Curriculum (Gifted)

Differentiating instruction for diverse learners means planning and implementing curriculum based on each student's level of readiness. Appropriate curriculum development for gifted and talented students involves differentiation of content, teaching and learning strategies, and student products in a student-centered environment. A study used Q methodology to determine teacher perceptions of curriculum modification for students who are gifted and talented. Q methodology is used to describe subjective opinions about behaviors and compare the relative strengths of those behaviors according to the beliefs of any individual. Concourse theory was used to generate 48 statements about curriculum modifications for gifted students. Five general education teachers, two administrators, and ten teachers of gifted students completed Q-sorts of the statements under two conditions: their perceptions of their own actual instructional practices with gifted and talented students, and their beliefs about ideal practices for teaching gifted students. Results included three theoretical arrays of teacher beliefs: differentiating according to student academic needs; differentiating according to teacher practices; and differentiating according to process ideas and student practices. Contains 24 references. (CDS)

Descriptors—*Educational Strategies, Elementary Secondary Education, *Gifted, *Identification, Rural Areas, *Rural Education, Rural Schools, *Special Education, Teaching Methods

Identifiers—Differentiated Curriculum (Gifted)

Gifted and talented children have cognitive and affective characteristics that set them apart from their more typical classmates. These characteristics may be particularly problematic in rural areas where stability, traditional values, small schools, and self-sufficiency can be at once a barrier and a support. This paper discusses the characteristics, needs, and identification of gifted learners, as well as the barriers and benefits offered to them by rural communities. Rural students as a group have different educational and life experiences than their urban and suburban peers. As a result, gifted rural students may be underidentified by standardized tests with an urban bias. Identification and appropriate instruction of gifted rural females are also influenced by social bias and stereotypical expectations. Barriers to gifted education in rural areas may include limited school finances, lack of qualified educators, problematic grouping arrangements due to the small number of gifted students, and problems arranging time and place of instruction. Strengths of rural communities may include small class size, which can make individualized instruction easier. Programming strategies for rural schools must include differentiation of the regular curriculum for all gifted learners. Rural schools are challenged to keep in mind the unique characteristics of their communities. Sharing resources and making use of technology can help schools provide the variety of instructional options needed by gifted learners. Strategies such as curriculum compacting and tiered assignments are two ways to differentiate that are easy to manage with small numbers of students. Use of the Internet and a variety of on-line activities can broaden experience that may otherwise be limited in rural areas. Contains 18 references. (CDS)

Vanderslice, Ronna

Rural Hispanic Children and Giftedness: Why the Difficulty in Identification?

Pub Date—1999-03-00

Note—8p.; In: Rural Special Education for the New Millennium. Conference Proceedings of the American Council on Rural Special Education (ACRES) (19th, Albuquerque, New Mexico, March 25-27, 1999); see RC 021 888.

Descriptors—Cultural Differences, Elementary Secondary Education, Ethnic Bias, *Gifted, Gifted Disadvantaged, *Hispanic Americans, *Identification, Intelligence Quotient, *Rural Education, Rural Schools, Special Education, *Test Bias

This paper discusses problems related to identification of gifted Hispanic children in rural areas. While the federal definition of giftedness is subscribed to by most states, local districts tend to seek and find White, middle-class academic achievers. One problem associated with identification of gifted minorities is that the research and literature on minorities has focused more on deficits than on strengths. Obstacles to identification include language differences, inappropriate use of I.Q. information, differences in home and cultural backgrounds, effects of poverty, limited out-of-school educational experiences, and racial or eth-

RC 021 901

nic bias. In assessing student abilities, it is essential to understand that each instrument or procedure measures only one of many facets. Measures that go beyond academic achievement must be used to find students whose abilities are not indicated by tests and school performance. Three major types of educational adaptations for the gifted Hispanic student are suggested: counseling to help students caught between conflicting cultures, the building of self-knowledge, and the development of meaningful curriculum adaptations. Six suggestions are listed to help parents, counselors, and teachers work successfully with culturally diverse gifted learners. Contains 26 references. (CDS)

Identifiers—Chadron State College NE, Nebraska (West)

This paper describes the Entry Year Assistance Program (EYAP), a mentoring program for novice teachers, offered by the School of Education at Chadron State College (Nebraska). The program supports beginning teachers who are geographically isolated in Nebraska's panhandle. A discussion of the theoretical basis for teacher mentoring includes guidelines that can be used to ensure support for neophyte teachers. EYAP is an example of a partnership between a college of education and local school districts. Local school district officials participated in developing EYAP in 1985. Program features include visitation by faculty to beginning teachers at their respective school sites, seminars held on campus, and luncheons for new teachers. The fact that the new teachers decide on the seminar topics to be discussed is an especially positive aspect of the program. Concerns of the beginning teachers become areas for program improvement. In this collaborative approach to beginning teacher mentoring, all participants come to share and solve problems. Recently, preservice teachers have begun attending the seminars as observers who take notes and report back to their methods classes on what they learned about the first year of teaching. Legislation has mandated teacher mentoring in Nebraska, and EYAP has been chosen by the Nebraska State Education Association as the model to replicate for state mentoring. Contains 22 references. School Personnel, Special Education, Teacher Education, *Transitional Programs

Identifiers—*Individuals with Disabilities Education Act Amend 1997

This paper discusses provisions of the Individuals with Disabilities Education Act of 1997 (IDEA) and suggests strategies for maximizing existing resources in rural settings to meet the requirements of the law. The purposes of this paper are to: (1) discuss personnel preparation data relevant to ensuring that all individuals possess the necessary competencies to meet the needs of students with disabilities in general and special education settings; (2) present the key provisions of IDEA that relate to ensuring quality personnel preparation and educational services in rural settings; and (3) identify ways in which personnel preparation activities and utilization of existing resources in rural settings can be maximized to ensure full implementation of IDEA. Key areas of the legislation include evaluation and reevaluation of students, the Individualized Education Program (IEP), and IEP transition services. Instructional implications for teacher educators are discussed for each of these areas, focusing on the skills and knowledge that teachers will need relevant to the following IDEA requirements: parent participation in student evaluations, collection and interpretation of information for evaluations and IEPs, design of appropriate curriculum modification, regular communication with parents, design of functional behavioral assessments and intervention plans, consideration of the child's linguistic needs or need for assistive technology, and design of transition services. Identifiers—*Systemic Educational Reform

This paper describes systemic thinking in support of the recently established Navajo Nation Rural Systemic Initiative (RSI). The RSI aims to create a standards-based student-centered teaching and learning environment in mathematics, science, and technology in the 173 elementary and secondary schools on or near the Navajo Nation, including public, private, and Bureau of Indian Affairs (BIA) schools. The convergence of limited resources within the service area is intended to address the complexities of standards-based reform in a very rural area lying within Utah, Arizona, New Mexico, and territory served by the BIA. The RSI has six priorities (program "drivers"): (1) student attainment and achievement (data collection through indirect measures, process measures, and criterion-referenced and norm-referenced tests); (2) strategies to close the gap between Navajo and non-Navajo students (integration of Navajo and Western knowledge, use of Navajo role models, career exploration); (3) culturally relevant curriculum and assessment and use of Dine (Navajo) philosophy in teacher preparation programs; (4) educational policy and procedures consistent with Navajo self-determination; (5) resource convergence (partnerships, networking, recognition of promising practices); and (6) cultivation of broad-based support across educational, business, and government/services sectors of the Navajo Nation. A table compares traditional and systemic thinking about large-scale change and improvement efforts. (SV)

Identifiers—*Individuals with Disabilities Education Act, Related Services

Rural schools do not receive special compliance exemptions under the Individuals with Disabilities Education Act (IDEA). This paper examines the responsibilities of schools to students with disabilities, as outlined in IDEA regulations and court decisions, as well as implications for rural schools with limited funding and resources. Issues discussed include the proportion of federal funds intended for local schools, oversight of state agency compliance with federal regulations concerning funding distribution, the IDEA definition of a child with a disability, age requirements for identification and provision of special education and related services, court decisions about when a school's responsibility to a student ends, statutory categories of disability, the unconditional nature of the IDEA requirement of a free appropriate education for all students with disabilities, development of state-level child identification systems, development of state standards for special education, the state's responsibility to ensure appropriate use of federal and state special education funding, funding changes in the 1997 amendments to IDEA, presumption that children with and without disabilities will be educated together wherever possible, availability of a continuum of alternative placement options, qualitative standards, provision of special services unavailable in the school district, provision of extensive accommodations, and exclusion of medical services. Identifiers—*New Mexico

The state of New Mexico has a generalist special education licensure that allows anyone with a special education degree to teach any child in special education regardless of disability. Although this works well to supply the demand for special education teachers in rural areas, it may not meet the unique needs of children who are deaf or hard of hearing. This paper examines the characteristics of deaf and hard of hearing children and their teachers in rural New Mexico schools. A survey was sent to the special education directors of 50 public schools identified as enrolling deaf and hard of hearing children. Results indicate that only about 31% of the teachers serving deaf and hard of hearing children had degrees in special education, and only 6 percent

had specific degrees in deaf education. About 40 percent of students served, but only 7 percent of their teachers, were Hispanic. Most children communicated via speech mode. Most students were mainstreamed, and of these, two-thirds (all deaf) used interpreters in the inclusive setting, suggesting that sign language was being used where needed. About half of children used some form of amplification. The findings suggest that deaf and hard of hearing children in New Mexico may not be receiving adequate services with regard to their deafness or to their cultural background. (SV)

Descriptors—Elementary Education, *Elementary School Students, Higher Education, *Mild Disabilities, *Photography, Recreational Activities, Rural Education, Self Esteem

Recreation is a significant part of a full and rich life but is frequently overlooked in relation to handicapped children. A project called Cross-Cultural Images aimed to improve the quality of life for handicapped children by teaching them vocational photography skills. The project involved mildly handicapped children aged 7-11 in Appalachia, on the Navajo Reservation, and along the Mexican border; special education teachers working in those areas; and faculty members and preservice educators at East Tennessee State University and Northern Arizona University. The project had four major components: teaching the children about photography (emphasizing subject selection, framing the shot, and use of light); allowing them the opportunity to take photographs (practice time followed by giving the students a simple one-time-use camera); mounting and displaying the exhibition (based on children's selections); and sharing the exhibition with children at other project sites. The students were very good at manipulating their cameras and ultimately produced images of high quality and interest. Several photographs were judged to be quite artistic and technically good by professional photographers who viewed the work. Although the students clearly acquired the knowledge and skill to do good work in photography, the most powerful project results were related to student pride and self-esteem. Suggestions are offered for project continuation and replication. (SV)

tion, *Technical Assistance, Tribally Controlled Education
 Identifiers—*Minority Institutions of Higher Education

The Alliance Project strives to increase the participation of minority institutions of higher education (MIHEs) in personnel preparation grants, contracts, and cooperative agreements supported by the Individuals with Disabilities Education Act. The project's primary purpose is to create a more diverse pool of special educators and related service providers. To be eligible under the MIHE umbrella, an institution must be a historically Black college or university or have 25 percent or more enrollment from underrepresented ethnic groups (excluding foreign students). Since its start in 1991, the project has assisted with 862 proposals submitted by MIHEs to the Office of Special Education Programs, and 226 of these were funded. In fiscal years 1997 and 1998, the success rates for proposals from historically Black colleges and tribal colleges were 30-40 percent. During its existence, the project has served faculty from 46 rural MIHEs, primarily tribal colleges and historically Black colleges. Typical activities include grant writing workshops, other seminars and meetings, and one-on-one mentoring to refine proposals. Seven current and recently funded project directors described the impact of federal funding on MIHE programs and on the teacher pool available to local rural school districts. Tips are offered to rural MIHEs for recruiting students into special education preparation programs and for retaining nontraditional students. Current services available to rural MIHEs through the Alliance Project are listed. (SV)

Disability Research Encompassing Native Americans in Math and Science (DREAMS) is a comprehensive program that offers math and science experiences to Native American students with disabilities and encourages systems change in schools on or near Indian reservations in related domains. These domains include development of science instructional models based on hands-on learning and conceptual development, approaches to meet national science and mathematics standards, infusion of Native American culture into instruction and methods, accommodations for students with disabilities in science and math instruction, and career exploration in technical fields. DREAMS is a partnership between the University of North Dakota and 10-12 public and tribal schools in North Dakota. Project activities include curriculum and materials development; two annual week-long summer institutes for students, parents, and teachers; teacher education in science and mathematics; and systems change and liaison at participating schools. Program evaluation is based on attitude and achievement data from students and on feedback from parents and teachers about the effectiveness of the summer institutes and systems change. Assessment results for 1998 are summarized. (SV)

Identifiers—Oklahoma

This paper presents three case studies describing the experiences of rural families receiving early intervention (EI) services for a developmentally disabled infant/toddler. Part C of the Individuals with Disabilities Education Act (IDEA) (1997 amendments) provides funds for home-based, family-centered, transdisciplinary EI services. The case studies indicate that for rural families, the reality of home-based EI often fails to meet the goals of IDEA. The families presented here are from rural or small town settings, come from diverse backgrounds, may be struggling at low income levels, and may be reluctant to seek government support. Data interpretation focuses on early communication between infants and caregivers, the context of families as impacted by cultural and socioeconomic diversity, and client perceptions of a transdisciplinary family-focused program philosophy. The cases illustrate how family characteristics require different responses from EI providers. In addition to direct services to identified children, EI workers may need to provide social and emotional support to parents, basic assistance to families in working with medical professionals, information about and assistance with the processes for obtaining public assistance, and advice to some families with strong religious beliefs about the importance of special education services and how they can be consistent with religious beliefs. Identifiers—*Access to Computers, *Alaska

Alaska has been forced by geography and weather to look at numerous innovative solutions to improving communication between families and schools. The Internet is showing more impact than any other technique that has been tried. This has been especially helpful to parents of children with disabilities, due to a severe shortage of special education professionals. Although not every family has a computer, public Internet access is available at 90 percent of the public school libraries and at Native corporation or tribal council offices. There are programs to give or lend computers to families without them, and many families have e-mail accounts at their workplace. A bigger problem than connecting families to the Internet is convincing technologically timid parents to try it. Among the strategies being employed are interactive Web libraries, chat

RC 021 911

groups, bulletin boards, discussion lists, person-to-person e-mail, and homework e-mail lists. Delta Greely Cyber Charter School provides education directly to families' homes for grades 7-12 using Internet conferencing, live chat technology, and e-mail. The school is extremely popular, and has experienced a recent surge in enrollment of students with special education needs. The Alaska statewide correspondence school increasingly is using computer and Internet based services. The cyber and correspondence schools loan computers to families without access to one. Laptop computers are loaned to island families that have to travel to neighboring islands with telephone lines. The Alaska Department of Education plans to conduct studies to determine the effectiveness of Internet based education. (TD)

Identifiers—*Comprehensive System of Personnel Development, Individuals with Disabilities Education Act, *Oklahoma, Related Services

Oklahoma's Comprehensive System of Personnel Development (CSPD) initiative was developed to meet requirements of the Individuals with Disabilities Education Act. CSPD compensates for the state's geographic diversity through regionalization, which allows a grassroots approach to determining preservice and inservice training activities for special education teachers that are unique to the needs of each region but support a unified vision and strategic plan. The Southern region's activities exemplify the rural focus. The region comprises the southern half of Oklahoma, is the largest region in the state, and has only one metropolitan area. Quarterly meetings rotate around the region and highlight a facility or program of interest, with a flexible schedule to allow for travel time. The region's three main priorities include increasing the supply of teachers and ancillary staff to serve students with low-incidence disabilities, formalizing methods of cross-group/agency information exchanges, and including higher education in its initiatives and efforts. Three task forces have addressed these priorities by conducting training workshops for teacher assistants for visually and hearing impaired students; developing a professional development newsletter; and coordinating annual workshops on collaboration, co-teaching, special education law, and discipline. East Central University, the state department of education, the Oklahoma School for the Blind, and other agencies have collaborated on these efforts. The potential for replication of this initiative in other rural states is discussed. (TD)

 Identifiers—*Hyperlearning

A hyperbook is a form of distance education that promotes computer-mediated learning and collaborative/constructive learning in the development of multigenerational learning communities. A hyperbook is composed of hypertext that resides on the Internet. Hypertext is text with embedded links that allow the reader to move around in the text or to other locations on the Internet. Hypertext is multi-level and nonlinear; it supports intuitive association and parallels the way a person learns by exploration and association in a dynamic, interactive, and non-sequential process. Hyperbooks can be accessed 7 days a week, 24 hours a day, thus allowing higher education to expand from serving students at a traditional campus to serving nontraditional students anywhere. This paper discusses a hyperbook designed to help teachers at the college level develop courses that are provided on or supported by the Internet. Among its goals are: using the computer to provide a many-to-many form of instruction rather than one-to-many instruction; creating a virtual infrastructure where participants in multiple cohorts can learn; and creating a multigenerational superdocument that will grow over time. The paper discusses the modular approach to instructional design, multigenerational posting by successive participants, the general philosophy of the hyperbook, peer collaboration, scaffolding student development, student evaluation by self and peers, navigating the hyperbook, and tips on hyperbook development. Numerous web sites are cited for examples and resources. (TD)

 Identifiers—Facilitators, *Scaffolding, *Zone of Proximal Development

When in the "zone of proximal development" for a particular skill or piece of information, a learner is ready to learn but lacks certain prerequisites. Scaffolding is an interactive process in which a teacher or facilitator assists such a learner to build a "structure" to contain and frame the new information. Scaffolding can be provided by teachers, peers, or computers, and may include the use of tutoring, performance systems, and reciprocal teaching. Online scaffolding practices include scaffolding embedded in the information, such as visual cuing, separate web pages of directions on what to notice or what process to employ, tutorials that are interactive or downloadable, help pages, additional explanatory links, or communication forms to contact the instructor or peers. In computer-mediated learning, scaffolding is more important than in traditional education because learning is typically collaborative, and all participants will provide scaffolding to other participants at different times during the learning process. Therefore, participants must be

exposed to the idea of scaffolding and know when it is appropriate in the dialogic process. Pointers on appropriate use of scaffolding are given. The teacher may have to provide prerequisite skills to some students. A computer environment makes the provision of these easier because there is much pre-packaged material on the Internet, including visuals, illustrations, and simulations. Students can create materials to help less sophisticated students, and post these on the class web page, thus creating a learning archive. The four stages of facilitated learning, from a constructivist view, are described, as is coaching in collaborative computer-mediated learning. The measure of a well functioning group is the decreasing need for external scaffolding from the teacher, as the members scaffold each other. Contains web sites for online resources. (TD)

Identifiers—*Web Sites

Intergenerational learning communities develop when learners from one class create materials that learners from later classes can use. If information for a class is collected and maintained in an electronic archive, each successive class, or generation, can use that material and build upon it. The compilation of documents results in a superdocument, the components of which can be integrated, cited, and linked to other internal documents via hyperlinks, allowing multiple orderings and perspectives based on the needs of users. Disciplinary web sites, such as for gifted education, use this practice to improve learning and motivation, develop resources, and encourage mentor partnerships. Three levels are recommended for a disciplinary web site, with separate pages for beginners, intermediates, and advanced. A typical web site would include big theories, big questions, frequently asked questions, how to do research, links to related web sites, resources, future conferences, and search-and-help systems. Learners that work with fully functional discipline sites should develop the following processes: linking materials, integrating existing information, critiquing ideas, and reflecting on own progress. The site also provides an authentic audience for student products. (TD)

service Teachers, Student Evaluation, *World Wide Web

Identifiers—*Teacher Portfolios

Portfolios provide a means to represent excellence and variety in the work of one preparing to be a teacher. This paper reviews the implementation of portfolios with preservice teachers and describes appropriate electronic artifacts for inclusion in an electronic portfolio. Teaching portfolios are typically composed of artifacts, reproductions, productions, and attestations. Electronic portfolios can contain video, dialogues, simulations, links to references, and the interchanges of ideas in a chat room; they can be organized to be accessible in a searchable form; and they are useful in parallel problem solving. Portfolios can be used for student evaluation of personal learning, for program evaluation by showing the development of learners through their products to a team of evaluators, and for making archives for future generations of learners to build on. An electronic group portfolio developed by preservice teachers promotes reflection and discussion about what should be included, thus teaching cooperative activity and increasing social skills in a new medium. Group portfolios promote synergy and peer review, are a teaching device for both peer and teacher instruction, and support student choice. They are particularly appropriate for case studies, problem-based learning, and team teaching. Portfolio design is discussed, and techniques for capturing material electronically are presented. Links to web sites containing examples and references are interspersed throughout this document. (TD)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Collegiality, Inservice Teacher Education, *Institutes (Training Programs), Low Incidence Disabilities, Mainstreaming, *Professional Development, Program Evaluation, Rural Schools, *Special Education, *Special Education Teachers, *Summer Programs, *Teacher Attitudes, Teacher Surveys

Identifiers—Nevada, Teacher Networks

A 2-year followup evaluation was conducted with 1 male and 19 female rural Nevada regular and special education teachers and related service workers who had participated in two summer institutes on teaching practices for students with severe, multiple disabilities and students with emotional disturbances. Telephone interviews sought to determine the effectiveness of summer institutes as a method of providing information regarding low incidence disabilities. Six themes emerged in the area of professional impact: (1) information was implemented in classrooms; (2) long-lasting teacher support networks were established; (3) information was passed on to other school personnel and parents who did not participate in the institutes; (4) changes occurred in participants' philosophy and attitudes; (5) information was obtained on laws and policies related to special education; and (6) participants were frustrated in attempting to make building-level changes upon returning to their schools. The concentrated nature of the institutes appealed to participants, and half the participants reported that grant funding enabled their attendance. The most common factor that would influence participation in future institutes was the topic. Other factors included logistical factors and earning recertification credits. It is noteworthy that participants were able to describe specific strategies and materials being implemented

on the job 2 years after the institutes. A particularly valuable outcome of the summer institutes was the formation of lasting networks of professionals that could call on each other for information, resources, or support. The interview protocol and participant comments are included. (TD)

Identifiers—*Nevada

A middle school and a high school in rural Nevada participated in a project with the University of Nevada to develop a model for training staff in the successful inclusion of students with disabilities. Project participants included all 23 teachers and 3 assistants from both schools, 4 university students in teacher education programs, the district director of special education services and personnel, and a university professor. The university students rotated between two functions: serving as substitute teachers to allow monthly collaborative meetings between the special education and regular education teachers, and participating in the collaborative meetings, thereby gaining educational as well as practical experience. The professor facilitated the collaborative meetings and three inservice training workshops. Questionnaires and interviews indicated that the benefits for regular education teachers included bringing isolated staff closer by sharing common problems and having time to deal with individual students' concerns. Special education teachers felt that regular education teachers gained a greater awareness of special education issues and that the joint problem solving that occurred in collaborative meetings resulted in students being better served. The administrator thought the project provided an easily replicated model. The teachers and administrator both felt the outside influence provided by the professor was advantageous in terms of providing information and assisting with brainstorming. The university students felt that the information provided to them through project participation differed from that obtained in university classes and better prepared them for their future professions. Identifiers—*Gonzaga University WA

Gonzaga University in Spokane, Washington, developed a preservice teacher education program that holistically assesses the skills of teacher candidates to better identify prospective teachers from

underrepresented racial, ethnic, and disability-related groups. Careful attention is paid to the admissions process, and program applicants are assessed with regard to key program themes: reflective thinking, the idea that teaching is interpersonal and professional, the value of developing conflict resolution skills, and the value of multiple perspectives and ways of doing. Students who have self-disclosed their disabilities work with the disabilities services center, and faculty are notified of any students needing accommodations to be successful. Prior to student teaching, candidates must possess a minimum grade point average, acceptable standardized test scores, and three recommendations, and must attend a meeting explaining student teaching and the application process. Teacher education faculty review the skills and abilities of each student teacher candidate. Each student teacher is assigned a university supervisor who observes the student teacher and acts as a liaison between the school and university. A remediation plan is developed for student teachers who have difficulty, and the experience is terminated if competencies in the plan cannot be met. A second chance is given at another site the following semester. The experiences of four student teachers with disabilities are described to show how adaptations, accommodations, or simply a creative look at alternative approaches can create an environment for success. Identifiers—*Council for Exceptional Children

Student teaching handbooks from seven state-supported institutions of higher education that offered special education as a major in preservice teacher education programs were studied to determine the extent to which Council for Exceptional Children (CEC) standards for student teaching experiences were incorporated into teacher preparation programs. The institutions were located in Utah, South Dakota, South Carolina, Nebraska, and Pennsylvania and enrolled less than 10,000 full-time undergraduate students. A 5-point Likert scale was used in the evaluation with 5 indicating complete congruence between a CEC standard and a handbook requirement, and 0 indicating no congruence between the two. There was little congruence between the handbooks and the CEC standards, with only one standard in the handbooks, length of the student teaching experience, awarded a mean score higher than 3. The handbooks were awarded mean scores between 2 and 3 on four CEC standards that generally dealt with the structure of the student teaching experience. On five standards concerning the objectives of a student teaching experience, the handbooks were awarded scores between 1 and 2. Mean scores between 0 and 1 were awarded to the handbooks on five standards that addressed the qualifications of the professionals involved, the quality of the sites, and the placement of student teachers in the sites. Only two of the handbooks were written specifically for student teaching in special education. Appendices include CEC standards for clinical experiences and a demographic questionnaire completed by the special education programs. Contains 11 references. (TD)

Identifiers—Individuals with Disabilities Educ Act Amend 1997

Sixteen rural K-12 regular education teachers from West Virginia, Maryland, and Pennsylvania completed a certification program focusing on inclusive practices for successful integration of special education into regular education classrooms. Data on competency acquisition and use were collected prior to participation and 6 months following completion. Eleven participants rated their comfort level in the use of seven instructional and behavioral techniques: curriculum-based assessment, cooperative learning, student self-management, peer tutoring, direct instruction, strategy instruction, and goal setting for students with learning disabilities (LD). Significant gains were reported for all but strategy instruction. Eleven participants were asked the degree to which they could establish positive strategies for students with varying learning styles, analyze materials according to appropriateness for students with LD, develop lesson plans to assist students with LD, respond appropriately to learning needs of students from different cultures and backgrounds, develop intervention plans for deviant behaviors, identify specific teaching materials to meet the needs of students with LD, and develop a schedule that allows them to work effectively with the variety of students in class. There were significant gains in all areas except the last. A program evaluation questionnaire completed by six participants found that the most frequently cited instructional impacts were in cooperative learning and peer tutoring, evaluation methods were greatly impacted, participants appreciated the cohort structure, and academic and social benefits were realized for students with and without LD. Descriptors—Computer Assisted Instruction, *Creative Development, Creative Thinking, *Creativity, Gifted, Learning Processes, *Problem Solving, *Thinking Skills, World Wide Web

Identifiers—*Web Sites

This paper discusses techniques and resources to use to stimulate creativity through a web site for several "generations" of gifted and talented learners. To organize a web site to stimulate creativity, two categories of development issues must be considered: intrinsic person variables, and process variables such as thinking skills, specific learning processes, and those person characteristics that are responsive to development. Bloom's taxonomy of knowledge contains six levels of skill; the higher-

level thinking skills of analysis, synthesis, and evaluation are often integrated into models of creative problem solving. Thinking skills that promote creative solutions to problems are critical thinking, deductive thinking, divergent thinking, inductive thinking, lateral thinking, metacognitive skills, visual thinking, and vertical thinking. Techniques that help establish an environment for creativity are set breaking, warm-ups, blockbusting processes, constructive discontent, creative dramatics, relaxation training, autogenics, psychodrama, socio-drama, and future studies. General systems that develop general creative processes or that value creativity are bionics, synectics, future problem solving, creative problem solving, creativity by design, entrepreneurship, and intrapreneuring. Components of two problem-solving models, methods for creating original associations, creativity enhancing techniques, brainstorming, visualization, and imagery are discussed. Web site addresses that provide examples and references are given throughout the article. A table presents characteristics of creative persons. (TD)

Identifiers—Individuals with Disabilities Education Act Amend 1997, *Systemic Change

The National Association of State Directors of Special Education has established the Professional Development Leadership Academy to assist states in meeting state improvement plan requirements of the 1997 amendments to the Individuals with Disabilities Education Act. Professional development is crucial to this endeavor and will be accomplished through interagency, interinstitutional, and interdisciplinary training programs designed to insure systems change in support of educational reform. In its first year, the academy will train two state teams. The second year a cohort of five states will complete two training sessions. Training will expand to two cohorts of five states each per year, with sustained technical assistance for the second year. Through the training process, rural and small school educators, policy makers, administrators, teacher educators, special educators, and parents will have the opportunity to collaborate and form networks. Tables present the academy objectives and outline each curriculum section: strategic thinking, leadership, organizational change, creating collaborative partnerships, and systems of accountability. Identifiers—*Arizona (Santa Cruz County), Mexico United States Border, Northern Arizona University

Northern Arizona University (NAU) and Nogales Unified School District established a school-university partnership in 1998 to prepare special education teachers to work in the rural Mexican border area of southern Santa Cruz County, Arizona. All 25 students in the program's first cohort were working adults from the local area, bilingual and already employed as teacher assistants or serving as volunteer teacher interns. The shortage of qualified elementary and special education teachers in the area was one factor leading to federal grant funding. The nontraditional program integrates individual courses into a 15-hour block of coursework per semester. Courses are taught in late afternoons by NAU faculty at a Nogales school and are enriched by resource specialists and guest speakers. A required supervised internship in an inclusive elementary classroom or a special education setting provides a valuable experiential component. Training sessions hosted by NAU faculty for mentors in the internship component foster a close working relationship among the parties. Although the program provides many opportunities for research, the demands of such a comprehensive program preclude efforts beyond the on-going evaluation. Because of the dedication of NAU faculty and the continuing need for bilingual, special education teachers in the region, there is a positive outlook for institutionalization of the program. Steps in the program's implementation plan are listed. (TD)

Identifiers—*University of Kentucky

A series of U.S. Department of Education grants has enabled the University of Kentucky to deliver a graduate program on low incidence disabilities to students in rural areas via distance education. In 1989, the initial Training Rural Educators in Kentucky (TREK) project involved physically moving coursework to rural London, Kentucky. In subsequent years, satellite and compressed video technology were added, the number of project sites was increased, a team teaching model was introduced, and expert guest lecturers were added. Practica have been supervised at the distance sites throughout the program's history. Lessons learned during the 10 years of the program are discussed. These include: (1) get everything in writing before starting; (2) the bottom line for a university is money; (3) higher enrollment is a mixed blessing; (4) do not expect change overnight; (5) some technologies are more appropriate than others, and sometimes technology is not appropriate at all; (6) distance learning students may have different expectations than

their on-campus counterparts; (7) the quality of coursework does not have to change when distance learning technology is used; (8) scheduling distance learning courses can be a nightmare; (9) everything that can go wrong will go wrong; and (10) do not take anything for granted. Continual evaluation of regional, institutional, and student needs is of prime importance, and due to constantly developing technology, one must embrace an attitude of change and good humor. A table presents variables in the evolution of TREK distance learning projects, categorized by geographic, institutional, and student needs. (TD)

The National Association of State Directors of Special Education, through its Research Institute of Assistive and Training Technologies (RIATT@NASDSE), has developed a planned approach to professional development in the area of assistive technology using distance education. This award-winning distance education program offers convenient, inexpensive training to professionals using multimedia materials at home. The program comprises 15 four-week long courses in which participants use multimedia materials and e-mail to complete their assignments and participate in class discussions. Participants may earn continuing education units and can work toward competency certificates in specific areas of assistive technology. Several universities accept RIATT@NASDSE courses for graduate and undergraduate credit. The program has been implemented successfully in several states, which report the following positive outcomes: renewed statewide enthusiasm, access to training by all rural professionals, enhanced communication among districts, increased participation at conferences, a common knowledge base, and satisfaction of related parental concerns. Brief profiles explain how the RIATT@NASDSE program has been used to enhance professional development in Kansas, Indiana, Maine, Ohio, Idaho, Alabama, New Mexico, and New York. (SV)

Identifiers—*Mexico United States Border, Texas (South)

As the population of minority pupils continues to increase, the need for special education personnel to identify and educate culturally and linguistically diverse exceptional students will also rise. Continu-

ing shortages of qualified personnel in special education have been declared a national emergency, with "diagnostic staff" ranked as the fourth highest area of need. Shortages are particularly severe along the Texas-Mexico border, where a 1997 needs assessment predicted a need for 41 diagnosticians, preferably bilingual, within the ensuing 5 years. This paper describes initial steps in the development of Project DEED (Distance Education for Educational Diagnosticians), a federally funded distance learning program to provide courses in special educational diagnostics to rural border communities far from higher education institutions. The closing of one of the four university-based special education programs in the south Texas border corridor exacerbated an already serious situation. At about the same time, T-1 fiber optic telephone lines were extended to all rural schools in the area. This, coupled with other technological advances, made it feasible to offer multimedia-based presentations accompanied by videoconferencing. Steps in program development included choosing software, establishing 8-10 distal sites, acquiring sufficient space to accommodate hardware and work space, building technological infrastructure, developing staff within a team approach model, keeping costs down, and selecting each distal-based cohort. Contains 26 references. (SV)

Video presentations of teaching episodes in home, school, and community settings and audio recordings of parents' and professionals' views can be important adjuncts to personnel preparation in special education. This paper describes instructional applications of digital media and outlines steps in producing audio and video segments. Digital audio and video are readily incorporated into instruction via live presentation in person or on television, via computer instruction through interactive multimedia modules, or via Web courses with materials provided for distributed or distance learning. Hardware and software needs are described for use of digital media in live presentations, computer instruction, and Web courses. The first step in producing audio and video media for instruction is selecting equipment that best fits the instructor's development capabilities, instructional goals, and equipment budget. Camera equipment, camera accessories, computer equipment, and production software are described with approximate costs. The next steps in producing audio and video media for instruction involve carefully planning, recording, editing, and compressing media segments to ensure that they contain high quality images and sounds and accurately represent the content. Tips and suggestions are offered for each of these steps. The final production step is using software to incorporate the media files into a particular application: live presentation, computer instruction, or Web course. Contains 38 references. (SV)

Identifiers—University of Utah, *Video Production

The University of Utah offers four graduate courses to prepare teachers to work more effectively with American Indian students. This paper describes the development of a documentary-style, video-mediated distance learning course that, with solicited input from American Indian advisors, synthesized content from the four on-campus courses. The course was conceptualized as a graduate level course to be offered in both preservice and inservice contexts. The "professor plus" model was selected, utilizing stand-alone video modules with printed support materials and an on-site facilitator. Project developers were adamant that the course use a documentary format in which American Indians and other professionals would share their experiences in their own words. Steps in course design included: (1) outlining overall goals, factors influencing course development, and potential problems to provide a common understanding for the project team; (2) identifying knowledge, skills, and attitudes needed by learners to fulfill course goals; (3) arranging course content to meet the scaffolding needs of instruction; and (4) setting realistic expectations about media production costs and time. Elements in video production included the shooting schedule and related problems, conducting interviews in a respectful and culturally appropriate manner, and selecting background footage to support interview content. Postproduction elements included editing and final "finishing" to produce 15 one-hour video modules and development of facilitator and student guides. Contains 18 references. (SV)

Identifiers—West Virginia

An exploratory multiple-case study examined West Virginia students', parents', and educators' perceptions of participation by secondary students and recent school leavers with mild intellectual disabilities in the Individual Transition/Education Planning (ITEP) process. Data collection consisted of individual interviews with 24 students and graduates (aged 14-24); focus groups with 60 students, graduates, parents, educators, and counselors in 5 West Virginia counties; and review of 15 ITEP documents. Major findings included the following: (1) except in the most remote county, students could identify agencies and resources to help them with career development; (2) students were informally prepared for ITEP meetings by educators, but no

systematic training for self-determination was taking place; (3) there was general agreement about inadequate time and schoolwide support for transition planning; (4) some students had difficulties communicating about future plans, in general or with their parents; (5) collaboration among educators was good but county-wide transition coordinators were needed; and (6) parents had lower expectations of student outcomes than did educators, and conceptualizations of the meaning of self-determination varied widely. Implications are discussed for further research, special education policy in West Virginia, parent-teacher communication, and improvements in transition practices. Contains 42 references. (SV)

Descriptors—*Disabilities, High Schools, Professional Development, Program Development, Program Effectiveness, *Rural Education, Rural Schools, *Self Efficacy, *Special Education, Special Education Teachers, *Teacher Competencies, *Transitional Programs

In the past decade, disappointing national outcomes have been reported regarding the transition of youth with disabilities to community and work environments. The transition outlook is even more dismal for rural youth with disabilities, in light of geographic barriers to special education service delivery, lack of jobs in rural areas, and rural shortages of qualified special education personnel. In addition, rural schools must not overlook the importance of educators' personal efficacy to the success of transition programs. Educators with a strong sense of efficacy can apply the professional skills and competencies needed for goal attainment. Generic skills needed to deliver instruction in transition programs are summarized, followed by the skills needed for special education service delivery in rural areas. Addressing the professional development needs of special educators is an important part of promoting effective rural transition practices. The first step in developing a rural transition program is formation of goals and related benchmarks for their achievement. With regard to personal efficacy, productivity measures for each goal lead to concrete knowledge of performance expectations and the application of professional capacity. Drawing on information about the regional population, professional staff, students, and local resources, rural transition teams may design a range of transition options. Besides meeting varied student needs, a range of options also increases the probability of good matches between service delivery needs and professional qualifications. Contains 19 references. (SV)

sponsibility, Teacher Role, *Transitional Programs
Identifiers—Texas

A survey examined the perceived roles and competencies of school personnel and parents involved in the transition planning process for special education students, and compared these perceptions in rural and nonrural areas. The study took place in two parts: first, a field study validated the questions in the survey instrument; second, the survey instrument was administered to 112 parents and education professionals in rural and nonrural Texas school districts. Examination of the perceptions of parents and professionals regarding their responsibilities during the transition process found that role confusion existed, thus hindering effective transition planning. No differences were found between rural and nonrural districts for perceptions of transition responsibilities or for extent of transition training provided to personnel. Although parents were highly aware of their responsibilities, education professionals had a different view of what those parental responsibilities were. Only administrators reported that they were adequately trained to fulfill their role in the transition process. Implications for delivery of transition services are discussed. Contains 18 references. Descriptors—Disadvantaged Youth, Education Work Relationship, *Late Adolescents, *Learning Disabilities, *Low Income, *Quality of Life, Secondary Education, *Underemployment, *Work Experience, Young Adults, Youth Problems

Interviews were conducted with three learning disabled young people over a period of 8 years, beginning when they were in junior high school. The interviews reveal common themes related to the effects of a lack of vocational training and the inability to maintain adequate employment. Jerry experienced a pattern of temporary work followed by periods collecting unemployment benefits. Christy obtained only sporadic employment with pay so low that she could not live on her own. Jesse's skills were so low that he became discouraged by his low level of pay and refused to work for less than \$10 per hour. He continued to live at home with his mother. The literature indicates that in 1990, the median hourly wage for adolescents with learning disabilities was \$5.72, representing an annual income of less than \$12,000. Only about 60 percent of working, learning disabled youth received medical insurance benefits or paid vacation. Although the employment rate for graduates with learning disabilities is respectable, a high percentage are employed part-time in low-status occupations. High percentages live with family. Descriptors—Elementary Secondary Education, *Inclusive Schools, Mainstreaming, *Multiple Disabilities, *Rural Education, Rural Schools,

Severe Disabilities, *Special Education, Student Needs

This paper focuses on the difficulties faced by rural school districts in their efforts to serve children with severe multiple disabilities. Both historic and contemporary views on mainstreaming and inclusion of students with multiple disabilities are presented. Concerns of educators about the inclusion of such students center around the amount of time required to ensure appropriate inclusion. Suggestions offered include the use of student-centered learning approaches such as cooperative learning, holistic approaches to reading and language instruction, and curricular modification. Mainstreaming advocates believe that special education teachers require in-depth training and extensive support. Suggestions for rural schools include: (1) computer applications utilizing Internet, e-mail, and distance learning; (2) team teaching interactions at both the elementary and secondary levels; (3) peer tutoring and service education (experiences in volunteerism) of mainstreamed public school students who can assist their special education counterparts; (4) collaboration between nondisabled and disabled students in after-school activities; (5) involvement of faculty in nonschool activities; (6) working relationship with community medical and health care professionals; and (7) professional educators serving as an integral part of family support systems. Contains 14 references. (CDS)

Descriptors—*Educational Practices, Elementary Secondary Education, Geographic Isolation, Labor Turnover, Professional Isolation, *Rural Areas, *Rural Education, *Special Education, *Teaching Conditions, *Visual Impairments, Visually Impaired Mobility

This paper provides background information on the nature of rural communities and examines factors that influence educational services for students with visual impairments in these communities. Characteristics that are most often mentioned in defining rural areas are lack of public transportation, distance from a metropolitan area, size of nearest city, density of population, and environmental features such as lack of sidewalks. Rural communities demonstrate vast differences in topography and population density, ranging from isolated Alaskan bush villages to clusters of small towns in New England. Factors that influence educational services to visually impaired rural students include: (1) difficulties in recruitment and retention of teachers; (2) isolation of teachers and related stress; (3) lack of environments appropriate to teaching mobility concepts; (4) school district efforts to meet student needs; and (5) isolation of the student with visual impairment. Rural areas may lack preservice and inservice opportunities for teachers; salaries may be low; and teachers may not be prepared for a rural environment. Technological advances such as e-mail and cellular telephone service may aid in reducing teacher isolation. Various practices are described by which rural school districts try to meet the needs of their few visually impaired students. Contains 25 references. (CDS)

Identifiers—*Cochlear Implants, *Vanderbilt University TN

The number of deaf children with surgically implanted cochlear devices has been increasing since the device was approved in 1989. In rural communities, there may be no one who is knowledgeable about the care of cochlear implants, what to expect of the child's communication abilities, and how to maximize the child's progress. A federally funded training program at Vanderbilt University was designed: (1) to increase the number of trained professionals in three communication-related disciplines who are prepared to serve on cochlear implant teams and are knowledgeable about the best practices in educational management of deaf children with cochlear implants, and (2) to provide related inservice training to daycare, preschool, and school district personnel in rural areas of middle Tennessee and southern Kentucky. The program is a three-semester sequence that begins with a multidisciplinary seminar including selected students from audiology, speech-language pathology, and deaf education. During the second semester, students are placed in various settings with children who have cochlear implants. In the third semester, students work in multidisciplinary teams to provide support and inservice training, primarily to school districts. The curriculum emphasizes problem-based learning and reflects four major competency strands: multidisciplinary team functioning, knowledge of cochlear implant technology, knowledge and skills for effective communication rehabilitation, and knowledge and skills of adult learning methods. Benefits of the training program are outlined for children, university students, professionals, and community members. Contains 11 references. (CDS)

Descriptors—*Academic Achievement, *Academic Aspiration, *Classroom Environment, Foreign Countries, Geographic Isolation, High School Students, High Schools, *Rural Schools, Rural Urban Differences, *Self Esteem, *Socioeconomic Status, Student Attitudes, Student Surveys

Identifiers—*Australia (Western Australia)

A study comparing the effects of student self-concept, classroom environment, and socioeconomic status on student aspirations and achievement surveyed 3,397 students in 28 rural and urban high schools in Western Australia over a period of 3 years. Government and nongovernment schools in metropolitan areas and in four categories of rural and remote areas were included. This paper presents findings from data collected during the first year. The classroom learning environment had a strong, positive effect on student self-concept, which in turn had an indirect effect on student ambition and aspirations. Socioeconomic status (SES) had a strong, positive effect on student ambition and aspirations, but did not directly affect self-concept. The effect of SES on ambition was very strong; the effect on achievement was weak, but positive. Overall, SES had an overwhelming impact on these student outcomes. Self-concept had a direct effect on student ambition, aspiration, and achievement. This effect was mitigated by SES, but was still strong. For urban students, there appeared to be little or no relationship between self-esteem and ambition. For rural students, there was a small effect of self-esteem on ambition and a larger effect of ambition on self-esteem. Contains 41 references and 15 tables and figures. (TD)

Identifiers—Edith Cowan University (Australia)

A graduate children's studies course at Edith Cowan University in Western Australia implemented a rural and remote practicum to expose students to the special needs of children and families in rural communities. Many graduates will eventually work in the country, and prospective rural employers look for graduates with experience in rural settings. In rural areas, children's services such as schools often serve as community cultural centers, and graduates need to be prepared for this role. Each year the practicum has been offered in a different setting. One year the students had the opportunity to work with people from the Aboriginal culture and to see how their children's play, though different from that of white Australian children, fit well with the ecological, child-initiated approach taught within the course. The students meet licensing requirements and make the connection between theory and practice. Real situations give students experience in decision making, integrating children with other children or adults with a minimum of stress in a short period of time, improvising in the face of limited resources, and developing respect for others and their equipment. The practicum has enabled university staff to enhance their credibility with students and identify new research areas, and the university to enhance its image in rural communities. The rural communities have gained through increased access to services and increased understanding of the role of children's services and universities. Contains 11 references. (TD)

Identifiers—Australia (Riverina)

To collect data about the first-year university experiences of rural students, 15 students were drawn from a pool of 125 Riverina (Australia) students who had participated in an earlier study on factors that influence academic persistence. The sample consisted of approximately equal numbers of males and females, about equal proportions of students residing on and off campus, and a representative mix of Australian universities. Each student was interviewed for 30 minutes and was asked 16 questions concerning perceived successes and failures encountered during the first year of university study. Among the challenges faced by first-year rural students were developing new friendships, forging an independent identity, a lack of direction from others, an intimidating large campus environment, financial pressures, and homesickness. Successful strategies for meeting these challenges included quickly initiating close friendships, residing on campus, maintaining motivation, using orientation week to full advantage, retaining contact with high school friends attending the same university, being willing to leave home setting, participat-

ing in rural student awareness programs, and deferring studies temporarily. Advice for potential university students includes being outgoing, residing on campus, being strongly committed to one's goals, being prepared to leave family and friends or staying close to home, and realizing that other students are experiencing similar difficulties. Implications for administrators and academics are discussed. Questions and responses are presented in 13 tables. (TD)

Identifiers—Australia (Riverina)

A two-phase study assessed the extent to which a set of variables predicted rural secondary students' likelihood of continuing to college and sought to determine predictors of rural students' academic success at the completion of first-year university study. Participants were drawn from seven state coeducational secondary schools in the Riverina (Australia) region. Phase 1 gathered school achievement data from 281 rural secondary students for year 10 and year 12 and developed measures of family background, school commitment, and goal commitment from student surveys. Results indicate that although academic achievement was the most important predictor of continuation to university study, other family background and attitudinal factors were also related to this outcome. In addition, a student's future academic success was largely predictable at the end of year 10. Phase 2 monitored the first-year progress of 54 of the 125 students from phase 1 that attended college. Results indicate that although academic achievement and course satisfaction predicted a student's likelihood of passing all first-year subjects, the latter was the more important predictor. Course satisfaction stemmed from the related attitudinal measures of student identity and sense of purpose. Contains 20 references. (TD)

Australian schooling is undergoing a revolution in structure, management, and organization brought about by the advent of information and communication technologies in educational settings. This

paper emphasizes the value of relationships between universities and schools in enhancing the quality of educational services provided to learning communities, specifically rural communities. Examples of innovative partnerships in technology use related to the enhancement of education and teacher training in rural areas include: (1) an Australian program that integrated interactive CD-ROM technology with examples of good teaching practice to increase confidence in technology use for preservice and inservice teachers; (2) a joint project between three rural high schools and the University of Southern Queensland that helped teachers adapt to computer and Internet technology; (3) an interactive television system that enabled preservice teacher education students to observe and interact with teachers in small rural schools; (4) a Canadian university that placed interns in local schools to help them integrate technology into their curricula; (5) a Montana university that developed practicum partnerships with schools in New Zealand and Europe; (6) a distance education university in Scotland that allowed rural students to complete their education without leaving their communities; and (7) partnerships that enabled preservice teachers at the University of Southern Queensland to experience teaching in rural and remote locations. A recent Queensland (Australia) report outlines the need for educational partnerships, and key features of and barriers to successful partnerships. Contains 14 references. (TD)

Identifiers—*Australia, *Womens Organizations

The Country Women's Association (CWA) is a nationwide Australian group that started in the 1920s in response to isolated women's need to socialize. The group's activities have expanded greatly over time. It distributes essential food and clothing to needy rural families, and its extensive involvement in incidental education for women includes cultural pursuits such as drama, choirs, floral art, and handicrafts. CWA uses its network to disseminate craft training, teaching a woman from each district at a central school each year, who then teaches members in her own area. Outreach teams go to the Pacific Islands or Aboriginal lands, at the invitation of the women themselves, to expand women's abilities and horizons. The usual requests are for sewing, basic hygiene, and cooking skills. Members are trained in conducting formal meetings, parliamentary procedure, accounting and record keeping, leadership skills, reporting, and publicity and public speaking. CWA is active in state and national politics. The nonsectarian, non-partisan nature of the group has helped it gain credibility, and its lobbying efforts have been quite successful, especially in areas of youth, health, infrastructure, and rural education. Each year the group studies a different country as an international project, encouraging members to expand their horizons. Community education is carried out through annual projects called state objectives. A subject, such as cystic fibrosis, is chosen from nominations around the state and becomes the fundraising focus for the year. CWA also administers a scholarship for young people who need financial assistance in continuing their education or for mature women who are retraining. (TD)

Identifiers—Australia (New South Wales), *Charles Sturt University (Australia), *Telematics

Charles Sturt University (Riverina, Australia) has initiated the Certificate in Distance Teaching course for rural teachers working in a distance education setting to extend their understandings about rural and distance education topics. Two semester-long subjects constitute the course: pedagogy of distance teaching and organization of distance teaching. The first subject's topics include types of distance education technologies and how they facilitate educational interaction, teaching and learning with distance technologies, preparing materials for distance teaching, specific examples of distance technology application, and emerging technologies that may be used in distance education. Materials include print, CD, video, and computer disk. The second subject consists of two print-based modules. Module 1 covers the systems thinking model of organization and an overview of policies in distance education in each state and territory. Module 2 covers management, technological, human resource, student welfare, and evaluative issues about teaching in a distance education setting. Evaluative information from course graduates found that the top two reasons participants chose the course were to improve distance teaching skills and to gain accreditation. The pedagogy subject was rated "very high" by 83 percent of participants, and the CD-ROM with examples of teachers' telematics lessons was rated the most useful resource. The organization subject was rated "very high" or "high" by all respondents. Suggested improvements are included. Contains 36 references. (TD)

Identifiers—Australia (Perth)

A survey of 16 rural students attending college in Perth, Australia, found that all of them felt disadvantaged because of issues specific to their rural status. These issues were emotional, social, and financial or a combination thereof. The emotional and social concerns were loneliness, making new friends, and learning to adjust to an urban lifestyle, all of which stemmed from the fact that rural students had to leave their home support systems to attend college. However, financial problems were of greatest concern. These difficulties help to explain why rural students have a lower retention rate in higher education, resulting in their minority status in university enrollments and therefore life-improving opportunities.

Suggested strategies for improving this situation are the provision of additional financial assistance to all rural students by the government, and the provision of university support groups for rural students, such as counsellors, academic staff, student administration, and medical suites. These strategies could make a critical difference for many rural students undertaking or considering college attendance. (TD)

Identifiers—Australia (Western Australia)

Because of geographic isolation, many Australian families find it necessary to send their children to boarding schools for an appropriate secondary education. To determine the impact that leaving home has on young adolescents, and how they cope with the change, 38 year-8 boarding-school students from remote areas of Western Australia were surveyed. The director of the hostel where they lived and a school psychologist were interviewed concerning policies that aid student transition. Results indicate that the ease of making the transition from home to the boarding situation was heavily reliant upon expectations, which were derived from family ideology and the child's background. Personal attributes such as self-confidence and self-esteem, the ability to make friends, interest in sports, and previous experience with change contributed to ease of adjustment. How a child coped often had a lot to do with how well their parents were prepared for this eventuality. Factors that facilitated the transition were a high quality of care provided by the hostel, close staff and student relationships, opportunities to meet others and communicate effectively, an environment where facilities and opportunities stimulated and benefited the individual, the presence of siblings at the hostel, and programs and policies that considered each child's unique way of dealing with the move away from home and offered support. Identifiers—Australia, *Teacher Community Relationship, University of Ballarat (Australia)

The highest levels of dissatisfaction registered by practicing rural teachers in Australia about their training were toward distinctly rural components: multi-grade teaching, rural living, and school-community relationships. School-community relationships are important, especially so in rural areas

because most rural schools are the center of their community. The teacher preparation course at the University of Ballarat (Victoria, Australia) includes a semester-long unit titled "Rural Australia," which examines the sociology of rural communities and schools and promotes student understanding of how a teacher's behavior can win or lose community acceptance and esteem. The course is offered to second-year primary trainees and has been offered to practicing teachers on weekends or school vacations. Students are made aware that rural Australians are class conscious and their society is highly stratified. Status differentiation on the basis of gender exists, and is studied. Other topics studied are strategies for teacher acceptance or rejection, teaching Aboriginal children, distance education, telematics, and problems associated with rural unemployment. An important aspect of the unit is the case study that students must conduct and present to the class. Each student selects a rural community and investigates aspects of stratification and the requirements for a young teacher to fit in socially. Excerpts from one case study are included, along with comments from students about how the unit would assist them in the future. Contains 35 references. (TD)

Identifiers—Australia (Queensland)

Ag-Ed is an agricultural education project aimed at upper primary students, held in conjunction with the Toowoomba Show (similar to a county fair) in Queensland, Australia. The program achieves its purpose of helping children understand the impact and relevance that agriculture has on their everyday lives through two components, an Ag-Ed day and a teacher resource package. The Ag-Ed day component involves classes in interactive agricultural presentations on the first 2 days of the Toowoomba Show. Teachers from schools up to 250 kilometers away book their classes into 4 agricultural presentations from a list of 20. The 20-minute presentations are organized and conducted by industry representatives, who understand that they are providing an educational experience, not marketing their products. The teacher resource package contains 13 sections of information and activities that supplement the industry presentations. The material is designed for use by teachers in the classroom for lead-up and follow-up sessions. The material is reviewed and critiqued by industry representatives, and exposes students to the full scope of the business of agriculture. Teachers are provided with evaluation sheets so they can critique the package. The package is sent free of charge to 200 schools within a radius of 1.5 hours drive from Toowoomba, but it travels a good bit further as a result of word-of-mouth referrals. Winner of the 1997 Australian Rural Education Award, the program has been tremendously successful at providing an interesting, experiential, interactive curriculum. (TD)

Many communities are trying to build sustainable societies, melding the wisdom of nature with culture, by undertaking various projects and initiatives. Although many projects may contribute to community sustainability, it is difficult to know which are most urgent or will be most effective. The purpose of this document is to introduce the concept of indicators of community sustainability as well as show how indicators can be used to measure progress toward community sustainability action plan goals, educate residents, and mobilize community members to join in community sustainability efforts. Since publication of the first edition of this booklet in 1995, the use of indicators to gauge progress toward sustainability has become widespread. This second edition revisits one of the United States' original indicator monitoring projects in Seattle, Washington, discusses the procedures used for developing a set of indicators for specific communities, outlines various types of indicators used, and shows how they are related to goal-setting processes. One section explains how to communicate indicator findings to the community. Appendices feature community sustainability principles, sample indicators, suggested indicator documentation, a glossary, and a resource list of publications and websites. (PVD)

This book is the third in a series of family math books whose aim is to involve parents and their children in middle school mathematics. All the activities contained in this guide are based on the National Council of Teachers of Mathematics

(NCTM) Standards, and most activities involve several integrated math concepts rather than isolated skills. This book focuses on algebraic reasoning and number sense. There are 31 activities on algebraic reasoning and 29 activities for number sense. A chapter on parent advocacy that provides a framework for families to make informed decisions about their children's math future is included. A list of resources for additional information is also featured. Contains 28 references. (ASK)

Identifiers—Earth Day, *Environmental Awareness, United Nations

This guide seeks to provide public and school librarians with a variety of practical resources and activities for contributing to the public's understanding of major global trends and relationships that affect local communities. The guide contains four sections geared towards children, young adults, adults, and school settings. The children's section is based on the United Nations' Convention on the Rights of the Child. Resources and activities are organized into broad areas of survival (food, health care, a home), personal development (education and recreation), protection (family and parental guidance), and participation (freedoms and civil rights). Young adult activities focus on the world music of social change. This section includes electronic and print resources for world music of social change, world music sources, and suggested recordings. Adult activities are structured around commemorative days throughout the year that have been designated primarily by the United Nations. This section presents tips for locating and maximizing community resources, program ideas, and selected Web sites. The section for school librarians contains program ideas to enhance awareness of global issues and ways for teachers to introduce sustainable development into the curriculum. This section includes lists of Internet sites, magazines, and resources for ideas for taking personal action. (PVD)

Identifiers—Environmental Awareness, Farmland, *New Jersey

This unit helps middle school students explore the local face of a global challenge: vanishing farmland and the need for sustainable agriculture. With an eye on the National Geography Standards and five areas of the New Jersey core curriculum standards, this unit also develops the skills needed to contribute toward creative solutions for such problems.

This unit was developed as a nine-week study skills project for seventh grade students and includes the core subject classes of mathematics, science, social studies, reading, and writing. The 12 lessons can also be taught individually. Objectives of the 12 lessons include learning about population distribution and density, creation of various kinds of maps and graphs, inferring relationships between farm locations and soil types, researching agricultural best management practices for preserving farmland, and negotiating a consensus position on farmland preservation with persons representing a variety of viewpoints. Many of the lessons contain reading selections. Study skills pre- and post-tests, a glossary, and references are also included. (PVD)

States, school districts, and individual schools have created standards that indicate what content teachers should teach and students should learn. This document suggests that in order to have substantive effect in mathematics and science classrooms, other components must be addressed and linked to the content standards which include establishing criteria for selecting programs or materials, building a common vision for instruction, prioritizing funds, setting up appropriate teacher professional development exercises, constructing student assessments aligned with the standards, and articulating policies about resources. This briefing paper describes program and system standards and shares implications for their use. Contains 11 references. (ASK)

Instruction, Thematic Approach, Water Resources

Identifiers—Ohio, *Watersheds

Sciening with Watersheds, Environmental Education, and Partnerships (SWEET) is a professional development program designed to help elementary teachers improve the way they teach science using partnerships among teachers and resource professionals. SWEET follows a thematic approach using watersheds as the core concept of an integrated elementary curriculum. The program involves a four-day intensive summer institute for teams of one to four teachers representing one school building. During the institute, teachers team with resource professionals or volunteers from agencies and businesses who possess science content expertise and a desire to work collaboratively with teachers to strengthen science instruction. Together teachers and resource professionals engage in activities in content areas such as partnering, instructional methods from exposition to inquiry, watersheds and theme issues, thematic planning, child development, process skills, materials management, questioning strategies, and assessment. Each partnership is maintained throughout the school year. The instructor's implementation guide provides logistical information about operating the SWEET program, detailed teaching notes, and an in-depth discussion on establishing and supporting effective partnership teams. A matrix outlining basic aspects related to how SWEET was originally implemented in Ohio in the Cuyahoga River watershed and the lower Scioto River watershed and guidelines to consider when modifying or adapting it to other settings are also included. The notebook is used to provide professional development for those teachers and resource professionals who attend the summer workshop and is designed to be used with the implementation guide for program instructors. The notebook is divided into tabbed sections that correspond to the nine content areas listed in the table of contents of the Instructor's Guide. Each session presents an essential skill to make hands-on, minds-on science work for classroom teachers and resource partners. (PVD)

This paper addresses the issue of effectively integrating technology such as the World Wide Web and computer software technology into diverse classrooms. Significant ideas and support for constructivist, project-based teaching and learning approaches are also provided. This paper argues for schools, universities, and departments of education across the nation to lead the way in preparing tomorrow's classroom teachers for incorporating technology into their teaching. The paper is organized around the national goals of the Technology Literacy Challenge, which include equipping all classrooms with modern computers, connecting all classrooms to the Internet, developing interactive software and networked learning content to help all students meet high standards, and preparing all teachers to integrate new technologies into the curriculum. Contains 20 references. (DDR)

Many of the most critical global environmental issues are rooted in local, day-to-day problems. Local decisions about such issues benefit all citizens globally. This book attempts to identify and document the current range of initiatives toward developing sustainable communities. Dozens of tools, initiatives, and resources are presented, accompanied by hundreds of references to aid readers in their own research. Part 1 explores the meaning of sustainable development and its implications for communities. A framework for sustainable community development is also presented. Part 2 is comprised of a set of sustainable community building blocks. Each chapter provides an overview explaining the topic and its relevance to sustainable communities followed by a set of planning tools, practical initiatives, and associated resources that have helped citizens and their governments move toward sustainable communities. Part 3 focuses on mobilizing citizens and their governments toward sustainable communities. It concentrates on government of sustainable communities and tools for managing community sustainability, and concludes with lessons for designing effective sustainable community development policies. Topics include urban agriculture and aquatic systems, water and sewage, conservation issues, air quality, transportation planning, land use, housing, and community economic development. This book focuses on the developed countries of North America, i.e., the United States and Canada. (PVD)

Identifiers—*Florida

This booklet is intended to help teachers in Florida manage the growing interest in environmental education. Fourteen experiments are grouped into the environmental areas of the water cycle, groundwater, water pollution, waste and water treatment, air pollution, and field experiments. Experiments include demonstrations of the water cycle, the interrelationship between ground and surface water, water pollution principles, and water treatment processes; laboratory experiments such as construction and use of air pollution detectors; and field experiments to measure the clarity of different bodies of water, study the plankton that make up the base of the food chain for marine organisms, and assess plant cover in land plots. Each experiment is organized to show educational level (junior and/or senior high) objective, tools needed, procedure, and results and discussion. One experiment for high school that assesses air pollution substitutes a section on quantitative evaluation for results. A resource list is also included. (PVD)

Identifiers—*Florida

This booklet provides information to children on responsible environmental behavior, both at home and at school, using the concept of environmental citizenship as an organizing principle. Environmental citizens understand that they must behave in ways that do not harm the environment and make it better. Environmental citizens also understand that they are a part of the environment and hence must act as though their lives depend on good environmental citizenship. Topics include conservation indoors through saving electricity and water, conservation outdoors through planting native trees and composting, conservation at school through lunch container choices and raising environmental awareness among adults, recycling at home and school, and closing the environmental recycling loop by buying recycled products. Games, quizzes and puzzles are also included. This booklet refers to native trees, the heat conditions, and the water quality in the Floridian environment but the content can also be extended for use elsewhere. (PVD)

Innovative Hands-on Activities for Middle School Science.

Pub Date—1999-03-00

Note—7p.; Paper presented at the Annual Meeting of the National Science Teachers Association (Boston, MA, March 25-28, 1999).

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Art, *Hands on Science, *Integrated Curriculum, *Interdisciplinary Approach, Language Arts, *Middle Schools, *Science Activities, *Science Education

This paper contains some hands-on activities that relate science to art and language arts. The focus is placed on middle schools and activities engage students in the discovery that chemicals are used to draw and color. Students also read and write poetry and literature that employ science-related topics. A number of spin-off activities are suggested for both art and language arts that involve food dye, candy, and other easily available materials. (DDR)

Space Orientation for Professional Educators: Program Evaluation and Effectiveness.

Pub Date—1998-11-00

Note—40p.; Paper presented at the Southern Area Annual Meeting of the National Science Teachers Association (Birmingham, AL, November

19-21, 1998).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Educational Strategies, Elementary Secondary Education, *Knowledge Base for Teaching, *Professional Development, Program Evaluation, Science Curriculum, *Science Instruction, *Space Sciences

Identifiers—Alabama

This evaluation of mini-conferences conducted for Alabama teachers who completed training in the 1996 Summer Space Orientation for Professional Educators (SOPE) examines the effectiveness of follow-up sessions for teachers (N=69) and provides baseline data on teachers' knowledge of and attitudes toward teaching science. Conclusions about the 1996 summer SOPE program, reached through collaboration between the evaluation team and project personnel, provided the impetus for initiation of the follow-up mini-conferences for Alabama teachers in the Huntsville, Birmingham, and Montgomery areas of the state. Ways of Knowing Beyond Facts and Laws of Science: An Ethnographic Investigation of Student Engagement in Scientific Practices.

Pub Date—1999-03-00

Note—49p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (72nd, Boston, MA, March 28-31, 1999).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Cultural Influences, *Elementary School Science, Grade 3, Inquiry, Marine Education, Primary Education, *Science Instruction, *Scientific Principles, Teaching Methods

This study brings an anthropological perspective informed by sociolinguistic discourse analysis to examine how teachers, students, and scientists constructed ways of investigating and knowing science. The teaching and learning processes for a group of third grade students and how, in the following academic year, these same students drew upon their prior experience to investigate animal behavior in a marine sciences observation tank is described. An ethnographic logic-of-inquiry was used to examine the ways in which cultural practices of science were interactionally constructed by the class members. Research findings include identification of specific instructional strategies used to model scientific inquiry; ways in which the student drew upon, appropriated, and reconstructed scientific practices; and opportunities afforded students when investigating inquiries into unknown science. The implications of this study for the teaching of science in elementary classrooms are discussed. (Contains 60 references and 6 figures.) (Author/NB)

A Naturalistic Study of Epistemology: Oceanography Constructed through Oral and Written Discourse.

Spons Agency—National Science Foundation, Arlington, VA.

Pub Date—1999-03-00

Contract—DUE-9254192, DUE-9455758

Note—57p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (72nd, Boston, MA, March 28-31, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC03 Plus Postage.

Descriptors—Constructivism (Learning), Discourse Analysis, *Epistemology, *Ethnography, Higher Education, *Interaction Process Analysis, *Oceanography, Science Education, Scientific Enterprise, Scientific Principles, Social Science Research, Sociolinguistics, Speech Communication

The purpose of this paper is to examine how the epistemology of a discipline is interactionally

accomplished, acknowledged, and appropriated in a university oceanography course. Drawing from sociological and anthropological studies of scientific communities, this study uses an ethnographic perspective to explore how teachers and students came to define particular epistemological perspectives through the everyday practices associated with teaching and learning oceanography. Writing in a scientific genre was foregrounded in the teaching of this university introductory course and demonstrated how, through discourse processes in classrooms about writing in science, knowledge construction reflects aspects of disciplinary knowledge derived from scientific communities. Analysis of the data examined how social mediators between science and education position the epistemology of the discipline of oceanography. Cultural themes woven throughout the course activities emphasized epistemological issues such as uses of evidence, role of expertise, relevance of point of view, and limits to the authority of disciplinary inquiry. Class discussions about writing in science became contexts for students to question cultural norms of science and school science activities. (Contains 61 references and 3 figures.) (Author/NB)

Porter, Rhonda C.

Gender Differences in Mathematics Performance.

Pub Date—1999-01-27

Note—16p.; Paper presented at the Annual Meeting of the Holmes Partnership (Boston, MA, January 27-31, 1999).

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, *Ethnicity, *Mathematics Achievement, Mathematics Education, *Sex Differences, Social Influences, *Socioeconomic Status, *Teacher Student Relationship

Since the 1960s, gender differences in mathematics performance have been a major topic in educational and mathematical research. This study entails a gender comparative analysis of students' mathematics performance as determined by the Iowa Test of Basic Skills and by the Tests of Achievement and Proficiency. In a public school system in rural Southwest Georgia, 1,172 students enrolled in Grades 1 through 10 took these tests. An analysis of variance found a significant difference in the total mathematics achievement scores between genders [$F(1, 1171)=13.222, p<.001$] in favor of the female students. Additional analyses of variance revealed statistically significant differences in mathematics performance favoring females over males in the first grade [$F(1, 115)=8.785, p<.005$] and in the 4th grade [$F(1, 99)=11.821, p<.002$]. In all grades, except the second grade, the females' scores were higher than the males'. Explanations for this outcome are attributed to social issues including ethnic background, socio-economic status, and teacher-student relationships. Ethnic background and socio-economic status account for gender differences in achievement favoring females, and expectations and visible role models presented by the teachers could also affect performance in the students favoring females. When accounting for the social situations of this population, the findings are commensurate with previous studies done on this type of population. Contains 14 references. (Author)

Pub Type—Books (010) — Guides - Classroom - Learner (051) — Guides - Classroom - Teacher (052)

Document Not Available from EDRS.

Descriptors—Environmental Education, *Equations (Mathematics), *Graphs, High Schools,

Lesson Plans, Mathematics Activities, Mathematics Curriculum, Mathematics Instruction, *Statistics, *Water Quality

Identifiers—*Rivers

The Rivers Project at Southern Illinois University began in February, 1990 as a pilot program involving eight high schools along the Mississippi and lower Illinois River. The Rivers Project network has grown through the training of teachers from across the United States and Canada. With scientific literacy as the ultimate goal, students collect and analyze water samples from various test sites. The study of streams and water quality presents unique opportunities to apply to real-world situations many of the techniques students encounter in mathematics courses. This guide provides students with a chance to develop the math skills necessary for assessing scientific data. Students learn statistical methods and applications, scientific measurement, and quantitative analysis techniques using actual river data. Lessons on equation and formulas, graphing, and statistics are also featured. Readiness tests to help teachers determine which skills need to be covered or reviewed are included. (ASK)

Identifiers—Iowa City School District IA, *Systemic Educational Reform

This study reports on the effects of a major reform initiative which was implemented in the Iowa City Community Schools District. The Science: Parents, Activities, and Literature (Science PALs) Project was launched in 1994 to reform the district's elementary science program. It was designed to increase teacher effectiveness by providing a comprehensive professional development program for improving science content knowledge and science content-pedagogical knowledge, to enrich the cross-curricular connections of the science units, and to promote meaningful parental involvement in science learning. Another goal of Science PALs was to move teachers towards an interactive-constructive model of teaching and learning that reflected a "middle-of-the-road" interpretation of constructivism. Data indicated that teachers involved in Science PALs used many constructivist and cross-curricular strategies that were detected by the science supervisor and perceived by the students. Parents also positively responded to their new roles as partners in learning. The program did not seem to consistently develop positive attitudes in students about science learning or improve student achievement in science. (Contains 17 references and 12 tables.) (WRM)

Descriptors—Comparative Education, *Cultural Influences, *Educational Environment, Elementary Secondary Education, *Family Influence, *Family School Relationship, Foreign Countries, Mathematics Instruction, *Science Instruction

Identifiers—Australia, Third International Mathematics and Science Study

This paper has the potential for identifying and codifying the home learning environment and parental factors in a unique multicultural setting within Australian schools, and for the establishment of research-based initiatives for more effective collaboration between schools and parents. The Third International Mathematics and Science Study (TIMSS) revealed that home environment factors were thought to be strongly related to mathematics and science achievement in every TIMSS country. This result, in conjunction with Australian students coming from home environments and communities with widely different cultural practices, provides the basis for this recent study. The study combined qualitative (interview and case study techniques) and quantitative (questionnaire and Likert-type instruments) methods. Results indicate that when students found that the manner in which things were learned at home clashed with their school-based learning experiences, they found their school a somewhat confusing experience. Secondly, students who revealed that they had a high respect for authority saw their preferred classroom environment as being one which is characterized by higher affiliation, teacher support, and order/organization compared to those who had a lower respect for authority. The outcomes of this research relate specifically to each of the key stakeholder groups—students, teachers and parents. Sensitive quantitative and qualitative data collected on how students and their parents perceive the learning environments at home and at school can be an essential base for the development of any innovative framework of new strategies and structures to be implemented by teachers and parents. Descriptors—Educational Facilities, Foreign Countries, History, *Knowledge Base for Teaching, Mathematics Instruction, *Museums, Nonformal Education, Science Instruction, Science Teaching Centers, *Teacher Attitudes, *Teacher Education

Identifiers—Taiwan

This study investigated the changes that occurred in the knowledge and attitudes of a group of science and mathematics teachers ($n=38$) who took a museum education course. The course contained lectures and discussions on the rationales and strategies of museum education. The students also learned about the history of museum development in Taiwan and visited the science museum. Qualitative methods were used for collecting and analyzing the data. Findings indicate that although the National Museum of Natural Science played an important role in allowing the teachers to construct meaningful museum experiences, the participants still held many misunderstandings about the museum. After taking the course, the teachers were more oriented to in-depth rational thinking about issues related to museum education. Participants also critically compared formal and informal science learning environments and indicated that they planned to use aspects of the museum education

course in their own teaching. (Contains 10 references.) (Author/WRM)

What Can Inservice Taiwanese Science Teachers Learn and Teach about the Nature of Science?

Pub Date—1999-03-29

Note—19p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (72nd, Boston, MA, March 28-31, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Foreign Countries, Higher Education, *Inservice Teacher Education, Knowledge Base for Teaching, Science Instruction, *Scientific Concepts, *Scientific Principles, Teacher Attitudes, Teacher Improvement, Teaching Methods

Identifiers—Taiwan

The purpose of this study was to investigate aspects of the Nature of Science (NOS) concepts and teaching practices acquired by inservice teachers who participated in a teacher education program at the National Changhua University of Education in Taiwan. Two instructors used both case-history and demonstration approaches to help science teachers understand NOS concepts and model teaching practices. A questionnaire, Understanding of the Nature of Science Scale (Chinese version), was administered before and after the course. In addition, weekly group discussion reports, teachers' reflective journals, and the instructors' logs were collected during the course processing. Findings revealed that the inservice teachers were impressed by the subjective nature of generating scientific knowledge, and the human nature of the scientists. Thus, the teachers' conceptions of the NOS relative to the subjective and tentative nature of scientific knowledge were changed dramatically as a result of the course. Relative to pedagogy, the teachers indicated a preference for providing concrete activities in the context of group work in order to guide students' understanding of the social negotiation processes and inquiry aspects of the NOS. Factors which influenced the teachers' conceptions of the NOS included their image of scientists and their understandings of the nature of scientific inquiry. The science teachers' views of teaching the NOS were reinforced by their new conceptions of the NOS, by other methods courses, and by the teaching methods used by the instructors in the NOS course. Contains 26 references. (WRM)

Descriptors—Action Research, *Biology, Case Studies, *Classroom Communication, *Educational Technology, Foreign Countries, *Science Education, Scientific Literacy, Secondary Education, *Teaching Methods, World Wide Web

Identifiers—Conceptual Change, Learning Cycle Teaching Method, Taiwan, Teacher Talk

This study explores the impact of a researcher-developed World Wide Web database on a variety of tasks and talk in a science classroom. The study was part of an experienced teacher's action research project designed to increase student engagement in biology class. Lessons were videotaped approximately once a week throughout the entire school year, written materials were collected, and the teacher was interviewed at regular intervals. The teacher employed a wide variety of task designs applying strategies such as concept mapping, group

investigation, games and tournaments, and models such as the learning cycle and Driver's 5-stage conceptual teaching model. The teacher-student interactions that evolved from whole-class discussions were found to differ in the ownership of scientific talk. (Contains 10 references.) (Author/WRM)

Improving the Grade Point Average of Our At-Risk Students: A Collaborative Group Action Research Approach.

Pub Date—1999-04-00

Note—20p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Action Research, At Risk Persons, Elementary Education, *Grade Point Average, *High Risk Students, *Student Teaching, *Teaching Methods

This paper focuses on the use of a group action research approach to help student teachers develop strategies to improve the grade point average of at-risk students. Teaching interventions such as group work and individual tutoring were compared to teaching strategies already used in the field. Results indicated an improvement in the grade point averages of at least half the students. Four main observations were made through the study. First, students in the study group exhibited a variety of learning styles and responded differently to group work and tutoring. Some students learned better in group situations while others liked to work independently or in individual tutoring sessions. Secondly, new teachers working in a cooperative setting with discussion of teaching practices improved the sense of readiness as prospective teachers and promoted professional growth. Thirdly, teachers should always have at their disposal a large inventory of classroom techniques from which they can choose an appropriate mix to engage all students. Finally, collaborative efforts between teachers, administrators, students, parents, researchers, and other concerned members of the community were important and necessary to fully address the issues and concerns of all students, especially those at-risk. Identifiers—*Video Teleconferencing, Virginia Polytechnic Inst and State Univ

Universities and colleges have attempted to enhance education through the use of video teleconferencing. This paper reports on a videoconferencing effort between two campuses of the Virginia Polytechnic Institute and State University using synchronous two-way audio and video equipment to allow two groups to interact. The teleconference was facilitated by television cameras and microphones at both locations that permitted video and audio to be transmitted in both directions. The two campuses in the study are located in rural and urban areas and serve as sites for teacher education graduate programs in mathematics and science. The collaborative action research study described in this paper is an investigation of students' use of videoconferencing as a reflective tool for sharing ideas and programmatic experiences in two contrasting locations and cultures. Contains 17 references. (WRM)

Descriptors—*Classroom Techniques, Computer Assisted Instruction, *Computer Interfaces, Computer Uses in Education, *Graphing Calculators, Laboratories, Middle Schools, *Science Education, Teacher Attitudes, Teaching Methods, *Technology

This study evaluates the use of graphing calculators in the science classroom within the context of a collaborative action research approach. A class of diversified middle-class students (n=650) defined by teachers and administrators as "above average" were studied. Initially, information was gathered on current classroom management techniques as well as feelings regarding graphing calculators and classroom management. The equipment used included Texas Instruments TI-83 graphing calculators with hand-held computer-based laboratory interfaces (CBL), a computer lab with 15 Macintosh Power PCs, and the teacher's own computer. Results indicate that effective classroom management depends on early planning, revision, and final implementation of the course for action with considerable thought given to possible contingencies and their resolutions when using graphing calculators and computer based-labs in the science classroom. Graphing calculators also enabled students to complete higher level work with understanding, enjoy the use of technology in the science classroom, and increased students' independence and self-confidence in completing the lab. (Contains 15 references.) (CCM)

Identifiers—Taiwan

The purpose of this ongoing project is to establish a model for school-based teacher development for secondary science and mathematics teachers in Taiwan. The model uses an action research approach with emphasis on constructivist perspectives of teaching and learning and the idea that teachers are to be taken as researchers and reflective practitioners. Implementation strategies for initiating such a collaborative teacher development project that were tested in one of the participating secondary schools are reported. The professional development of the participating teachers was studied by collecting data from sources such as surveys, questionnaires, and interviews. Results from preliminary analysis of the data collected indicate that while some teachers seemed to benefit greatly from this collaborative research, there were a few who were opposed to the project. Influencing factors for the practicability and effectiveness of the school-based professional development project are discussed. (WRM)

Descriptors—Elementary Education, Higher Education, Integrated Activities, *Interdisciplinary Approach, *Mathematics Education, Middle Schools, *Science Education, Student Teachers, *Teacher Education

This study presents a detailed description and an interpretation of efforts made to prepare prospective upper elementary/middle level teachers to make connections between science and mathematics. The focus of this study is placed on the undergraduate teacher candidates' senior year in which they take science methods in the fall and participate in student teaching in the spring. Participants in this year-long study included the science methods professor and his co-researcher, 30 teacher candidates in the fall science methods course, and a sample of 6 select teacher candidates participating in student teaching in the spring. The six teacher candidates were distinguished from the other teacher candidates in this study by their participation in an undergraduate teacher preparation program funded by the National Science Foundation (NSF) called the Maryland Collaborative for Teacher Preparation (MCTP). A key implication from the science methods phase of the study was that while all participants benefited from the teaching innovation to blend mathematics and science in the methods course, the teacher candidates participating in the specialist program were particularly receptive to and accomplished in making connections between mathematics and science. Candidates seemed to benefit preferentially due to their prior experience

in content specialist classes in which the professors emphasized the connections between the two disciplines. This study also showed that when making connections, some of the teacher candidates were inclined to construct visions of the role of mathematics and science that specialists in the disciplines might find problematic. A key implication from the student teaching phase of this study was that while most of the benefits of the innovation continued, the process of enculturation of the student teachers in extant cultures differentially supported aspects of the innovation. Of particular note is the tension that emerged between student freedom to engage in inquiry and a perceived need to limit student off-task behavior and confusion through the use of more explicit instruction. An Analysis of Jamaican Primary School Teachers' Science Teaching Assessment Strategies.

Pub Date—1999-03-00

Note—15p.; Paper presented at the Annual Meeting of the National Association of Research in Science Teaching (Boston, MA, March 28-31, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Classroom Environment, Elementary Education, *Evaluation Methods, Foreign Countries, *Science Instruction, *Teacher Characteristics, Teaching Methods

Identifiers—Jamaica

The types of assessment methods that 400 Jamaican primary teachers indicated that they used in teaching science were analyzed using three instruments. Most of the teachers indicated that they often used oral quiz and other traditional assessment methods (TAM) while alternative assessment methods (AAM) were rarely used. An oral quiz was often used by most of the 30 teachers whose 150 lessons were actually observed. More females claimed that they used oral quiz more than males. Rural teachers indicated that they used more TAM than their urban peers while older and more experienced teachers used more AAM than their younger and less experienced peers respectively. Trained teachers indicated that they used more of both TAM and AAM than untrained teachers. Significant differences existed in the number of those who used written tests in favor of teachers aged over 30 years and the less experienced ones; practical work, oral quiz, and projects in favor of those over 30; and portfolio in favor of those aged over 30 and urban teachers. Sisters in Science: An Intergenerational Science Program for Elementary School Girls.

Spons Agency—National Science Foundation, Arlington, VA.

Pub Date—1999-03-00

Contract—9553426

Note—33p.; Paper presented at the Annual Meeting of the National Association of Research in Science Teaching (Boston, MA, March 28-31, 1999).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Constructivism (Learning), *Females, Grade 4, *Intergenerational Programs, Intermediate Grades, *Mathematics Education, *Science Education, Science Programs, *Sex Differences, Teaching Methods, Technology

This paper describes an intergenerational science program called Sisters in Science which fosters girls' interest and achievement in science. The program is designed to encourage and prepare girls and women for careers in math, science, and technology. A group of fourth grade girls from 19 classrooms across 6 elementary schools met once a week after school. The girls participate in gender-sensi-

tive, constructivist, integrated mathematics and science instruction; 2 hours of instruction from preservice teachers from Temple University; and a 2-week summer camp experience. Findings suggest that the girls in the program increased their interest and achievement in science and mathematics. Data supports a positive pattern of change in the girls' science/math and language skills as evidenced by their class participation and the writing in their science journals. In addition, three policy and practical implications are cited from the study. First, programs must involve parents in the effort to foster the success of young females in science and mathematics. Second, involving intergenerational role models in school science and mathematics enhances female achievement in science and mathematics. And finally, program interventions evolve in stages of development, growth, and change. (Contains 52 references.) (CCM)

Identifiers—*Science Achievement

This paper describes the development, administration, and results of an instrument to assess changes in students' science abilities as they progress from ninth grade through twelfth grade. Standard science tests commonly in use in schools to measure high school science students' achievement are content specific. Although these tests are useful they do not tell teachers or other educators what skills or general science knowledge students have acquired, nor can they ascertain students' progress as they move through high school. As part of the evaluation of the WINNERS II Project described in this paper, the research team wished to know more about what students were taking away from their science classes as they made their way through four years of high school. The research team decided to focus on designing a test that measured (1) understanding of the nature of science; (2) use of skills to solve problems; and (3) development of skills to use science equipment. Descriptors—*Coeducation, *Educational Environment, Foreign Countries, Knowledge Base for Teaching, *Science Education, Science Teachers, Secondary Education, Sex Differences, *Single Sex Schools, *Teacher Qualifications, Teaching Methods

Identifiers—Nigeria

This study examined the differences and similarities experienced by secondary school science teachers when teaching science within and outside their area of specialization in single sex and co-educational schools. Interviews were conducted and audio taped for six experienced science teachers on their qualification, classes/subjects taught and teaching experience. To ensure that each teacher's

perspective was heard, each interview was reviewed, and agreement about the meaning was built to the satisfaction of the teachers. On analyzing the differences and similarities in the teachers' experiences, it was found that those teaching out of their areas of specialization found it difficult structuring their lessons, getting back on track when drawn away from their original lesson plan and were sometimes unable to construct explanation in response to students (especially male) questions. The importance of training more science teachers in specific fields, assigning teachers to teach within their areas of specialization and creating a learning environment that promotes equity is discussed. The purpose of this study was to describe the validation of a new instrument called the Teacher Communication Behavior Questionnaire (TCBCQ). This instrument is meant for use in assessing students' perceptions of their interactions with their teacher by focusing on their teachers' communicating behaviors. The study described in this paper occurred in secondary science classrooms in Taiwan. Quantitative and qualitative approaches were used in the development and validation processes of the TCBCQ. The questionnaire was then used to investigate Taiwanese secondary science teachers' behaviors and their associations with students' perceptions and attitudes toward science and science academic achievement. Results indicate that all five scales of the TCBCQ were found to display satisfactory internal consistency reliability, discriminant validity, and factor validity. There were strong associations between the scales of the instrument and students' attitudes about science, and two of the scales were associated with cognitive achievement. This instrument has added an additional aspect to research on teacher-student interactions by focusing on the use of verbal and non-verbal feedback to enhance students' attitudes toward science and their academic achievement outcomes. Contains 22 references. (Author/WRM)

Identifiers—Conceptual Change Theory of Knowledge, United Kingdom

For the past eight years postgraduate science teachers in training (approximately 50 each year)

have been given Assessment of Performance Unit (APU) questions under strict test conditions as part of an initial learning experience in an education course. The APU questions were originally devised to explore the range of understanding of 15-year-old pupils in the United Kingdom of some key concepts in biology, chemistry, and physics. The key concepts probed included air pressure, oxidation, conservation of mass, photosynthesis, and reactivity series. Comparison of responses shows that beginning science teachers with a degree in biology, chemistry, or physics give more correct responses than 15-year-olds, as expected, but there remains a level of incorrect responses among the science graduates. The response patterns of the postgraduates remain similar from year to year. This study provides support for the view that alternative conceptions of scientific phenomena remain even in those who have experienced a high level of education in science. Implications for the training of pre-service teachers are considered. Contains 23 references. (Author/WRM)

Identifiers—Calculator Based Laboratories

Technology has revolutionized the way mathematics and science are taught and few innovations in mathematics education have had as much impact as the graphing calculator. Fourteen classroom teachers were brought together during the summer of 1997 and during a week-long workshop, the teachers collaborated to develop a resource guide for integrating graphing calculators into the mathematics curriculum for grades 7-12. This book provides those lessons that cover a wide variety of mathematical concepts and topics and are intended to facilitate the use of the graphing calculator in the classroom. Designed to be consistent with national standards and state frameworks for mathematics, the lessons emphasize hands-on, problem solving approaches and connections to science and the real world. Some lessons also incorporate other forms of technology such as calculator-based laboratories. (ASK)

This booklet is intended for teachers in grades K-12, guidance counselors, school administrators, preservice teachers and their college instructors, and interested parents. The information included in this publication has been gathered from the research and programs developed and refined by hundreds of dedicated teachers and researchers in the field of educational equity. What they found is that, depending on one's gender, race, or ethnicity, there is a difference in the mathematics and science education one receives. This differential is not affected by the number of students per teacher or even the number of computers in the classroom; rather, it is a direct result of the classroom environment and the content of science, mathematics, engineering, and technology (SMET) courses that reinforce our cultural stereotypes about suitable careers and occupations for girls. This booklet is a starting point for future growth in knowledge and practice of equitable pedagogy. (Contains names and contact information for resources in gender-fair practices.) (Author/ASK)

The ability to use algebra in describing and analyzing real-world situations is becoming a basic skill for all students. The main focus of this book is on patterns, functions, and relationships. Information and ideas on how algebraic thinking can be developed in the years leading to a formal algebra course are included. K-8 teachers are offered a series of appropriate activities that will excite students about mathematics in general and algebra in particular. Activities, grouped by grades K-2, 3-5, and 6-8, are organized around the instructional process and include a list of necessary materials and background information for students and instructors. Metaphor: A Tool for Monitoring Prospective Elementary Teachers' Developing Metacognitive Awareness of Learning and Teaching Science.

Pub Date—1999-03-30

Note—30p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (Boston, MA, March 28-31,

1999).
 Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Elementary Education, *Elementary School Science, Higher Education, *Metacognition, *Metaphors, *Science Teachers, Teaching Methods, Teaching Styles

The purpose of this research was to explore the usefulness of metaphor generation and analysis as a tool for reflection by prospective elementary teachers of science. An interpretive case study was conducted to investigate the changing beliefs of four prospective teachers about science learning and teaching. The main assertion that emerged from the analysis was "reflection through metaphor helped prospective teachers identify and actualize some of their beliefs about learning and teaching science, but the extent depended on their personal histories as science learners and their cooperating teachers." In light of this, it seems that if prospective teachers need to make their implicit beliefs explicit before they can consider learning theories and teaching strategies as presented within their teacher education programs, then they need to be encouraged to do so within reflection. To help prospective teachers make their implicit beliefs about teaching and learning explicit so those beliefs can grow and develop into consistent actions throughout their personal and professional careers, metaphor may be a useful tool for the kind of reflection that connects learning and teaching. Underlying this whole process of learning to teach science is the learning-to-teach environment as influenced by the cooperating teacher. Prospective teachers apparently need safe and supportive learning-to-teach environments where they can become confident to learn to teach science under the mentorship of cooperating teachers who understand contemporary perspectives on children's science learning as well as how prospective teachers learn to teach. This document represents the next step by the National Council of Teachers of Mathematics (NCTM) in its efforts to ensure quality, indicate goals, and promote positive change in mathematics education for grades pre-K-12. Following an introduction in Chapter 1, Chapter 2 elaborates on six guiding principles for school mathematics instructional programs. An overview of the 10 standards is

provided in Chapter 3, followed by grade band elaboration chapters for grades pre-K-2 (Chapter 4), grades 3-5 (Chapter 5), grades 6-8 (Chapter 6), and grades 9-12 (Chapter 7). Chapter 8 is planned for inclusion in the final version of Principles and Standards that will focus on implementation and policy implications. This draft offers an outline of Chapter 8 and invites readers to submit comments and reactions. This draft of Principles and Standards includes a number of substantive and structural features that are different from the original Standards documents, the most significant structural feature being that this product is presented in both print and electronic format. The production of this document in electronic format will allow a richer array of examples to illuminate and extend the ideas provided in the text and make possible the inclusion of links to resource and background materials. Identifiers—*National Assessment of Educational Progress

Since 1973, the National Assessment of Educational Progress (NAEP) has gathered information about levels of student proficiency in mathematics. These assessments are reported by NAEP periodically and present information on the strengths and weaknesses in students' mathematical understanding and their ability to apply that understanding in problem solving situations. This document presents the mathematics framework for the 1996 and 2000 NAEP assessments. The suggested revisions in the framework for the new NAEP assessment in mathematics are intended to reflect recent curricular emphases and objectives; to include what various scholars, practitioners, and interested citizens believe should be in the assessment; and to maintain ties to prior assessments to permit the reporting of trends in student achievement. Recommendations for the 1996 and future NAEP mathematics assessment are presented in eight categories: (1) content strands; (2) mathematical abilities; (3) percentage of items; (4) item families; (5) constructed-response items; (6) special studies; (7) manipulative; and (8) item bias review. Descriptors—Chinese Americans, *Cognitive Ability, *Cross Cultural Studies, Early Childhood Education, Foreign Countries, Grade 1, Kindergarten, Mathematics Achievement, *Par-

ent Attitudes, Parent Child Relationship, Parent Participation, Preschool Tests
Identifiers—China (Beijing), Chinese People, New York City Board of Education

Informal and formal mathematical abilities were studied in the preschool, kindergarten, and first grade children in Beijing, China and Chinese-American children in New York City. Test of Early Mathematical Abilities-2nd Edition (TEMA-2) was administered to the three groups of children (children from Beijing, Chinese-American from lower-class, and Chinese-American from middle-class families). A parent questionnaire was also used to examine parents' attitudes toward their children's learning in the early school years and the nature of parent-child interaction at home. Results indicate that with regard to informal mathematical knowledge, preschool children in Beijing outperformed their Chinese-American peers from lower-class families. Chinese-American preschoolers from middle-class families did equally as well as those from Beijing in the overall informal mathematics. At the kindergarten level, children from Beijing outperformed Chinese-American children from both lower- and middle-class families in overall informal mathematics but not in formal mathematics. At the first grade level, a significant difference was found in formal mathematics with children from Beijing performing significantly better than Chinese-American children from both lower- and middle-class families. Responses from the parent questionnaire suggest similarities in terms of values, expectations, and the nature of parent-child interactions among the three groups. Factors that do and do not seem to explain performance differences among the groups are also discussed. Contains 13 references. (Author/NB)

Descriptors—Databases, Disabilities, *Educational Research, Elementary Secondary Education, *Ethnicity, *Mathematics Education, *Research Needs, *Sex Differences

This study provides a broad look at mathematics education research published since 1982. The Educational Resources Information Center (ERIC) database was utilized to count and categorize over 3,000 articles from 48 educational research journals, with particular attention to equity issues. Results reveal the number of articles relating to ethnicity, gender, class, and disabilities, as well as intersections among these groups. The study also examines the attention given to various grade levels, mathematical topics, and general educational topics, both in the overall pool of articles as well as in conjunction with each equity group. Results are compared across journal types as well as between the pool of mathematics education research and the entire ERIC database. It is concluded that gender research was more prevalent and integrated into mainstream U.S. mathematics education research than research on ethnicity, class, or disability. Still, the majority of mathematics education research focused on student cognition and outcomes with relatively little attention to contextual or cultural issues. Contains 37 references. (Author/NB)

Identifiers—Japan, Portugal, *Third International Mathematics and Science Study, United States

This study used data from the Third International Mathematics and Science Study (TIMSS) to determine trends in calculator use among Population 2 (13-year-olds) students in Japan, the United States, and Portugal. While relatively high levels of calculator use were observed for the U.S. and Portugal, virtually no calculator use was found in the Japanese sample. Hierarchical Linear Model analysis determined a significant negative relationship between students' frequency of calculator use and student performance in Japan. No significant relationship was detected for the U.S. and Portuguese samples. U.S. student achievement was positively associated with each of the five reported ways in which calculators are used; however, a significant negative relationship was found between student performance and Japanese students' use of calculators on tests. Plausible explanations are explored. Contains 18 references. (Author/NB)

Effectively Teaching Critical Thinking Skills to High School Students.

Pub Date—1997-00-00

Note—18p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Class Activities, *Critical Thinking, *Debate, *High School Students, High Schools, Instructional Effectiveness, *Problem Solving, Student Development, *Thinking Skills

Today's highly technical information society is marked by constant change. To be competent, functional, and prepared to deal with the future, students need to be able to analyze, question, and evaluate information critically. Therefore, the educational community has renewed interest in teaching critical thinking. Unfortunately, educational practices

often concentrate on rote knowledge of facts while neglecting problem solving skills. This paper addresses the effectiveness of classroom debate as a tool to teach problem solving skills. The strategies given enable high school teachers to prepare their students for classroom debate. Contains 18 references. (Author/BT)

Russia is undergoing the most difficult ethical, moral, political, and economic period of its existence. The greatest hope of the Russians is the development of the schools; in particular, the moral and ethical healing and rebirth. This is a collection of experiences of Russian pedagogues, including teachers and researchers in the area of innovation and reform. The essays examine the processes and events that characterize the new education environment in Russia. Seven essays follow an introduction: (1) "Remedial Education in the Ismailovo Education Complex" (N. G. Avdeichuk); (2) "The School as the Foundation in a System of Lifelong Learning" (S. V. Gorbun and O. K. Tikhonova); (3) "Creating Reading Textbooks for the Primary Grades" (R. N. Bunev and E. V. Buneva); (4) "Modeling Effective Instructional Processes" (A. A. Rykin); (5) "Innovative Processes in Rural Schools" (G. F. Suvorova); (6) "The Rebirth of National Traditions" (N. V. Prokhina); and (7) "From Computer Literacy to Logical Thought" (A. A. Muranov). Since the late 1970s, the central government in China has focused on education reform as one of the key components to achieve the goal of the four modernizations: (1) agriculture; (2) industry; (3) science and technology; and (4) defense. Reform outlines and government mandates have significantly affected education in China at all levels. A brief chronology of education is highlighted and an explanation is given about how teacher education has evolved since the time of Confucius. The monograph includes vignettes taken from original essays.

These essays are the extemporaneous writings of Chinese students at the Shanghai International Studies University. (BT)

Identifiers—*Arizona (Phoenix), State Capitals

Information about Arizona's history, government, and state capital is organized into two sections. The first section presents a timeline of Arizona history from the prehistoric era to 1992. Brief descriptions of the state's entrance into the Union and the city of Phoenix as the selection for the State Capitol are discussed. Details are given about the actual site of the State Capitol and the building itself. The second section analyzes the government of Arizona by giving an explanation of the executive branch, a list of Arizona state governors, and descriptions of the functions of its legislative and judicial branches of government. Both sections include illustrations or maps and reproducible student quizzes with answer sheets. Student activity worksheets and a bibliography are provided. Although designed to accompany student field trips to the Arizona State Capitol Museum, the resource guide and activities are appropriate for independent classroom use. (MM)

Canada's present role in the new world order and its trade and economic dimensions are clarified in this book. Furthermore, the book explains the intricacies of Canada's history and multicultural heritage. The chapters focus on the modes of social studies instruction, resources for learning and teaching, the use of films and videos, and new technologies for the classroom. A student activities section provides a springboard for teachers interested in sharing their knowledge of Canada with students. Following a foreword (Michael S. Bittner) and an introduction (Jeanne Kissner; Marion Salinger), chapters in the book are: (1) "An Introduction to the History of Canada" (Victor Howard); (2) "Geography of Canada" (Michael J. Broadway); (3) "Canadian Government and Politics" (George Sherman); (4) "Canada and the World" (Donald K. Alper; Matthew Sparke); (5) "The Canadian Economy" (Anthony Cicerone; Mark J. Kasoff); (6) "Canadian Culture in the Late 1990s" (William Metcalfe); (7) "Quebec, Past and Present" (Richard Beach); (8) "Canada within the Social Studies" (William W. Joyce); (9) "Instructional Activities" (Janet Alleman); (10) "Resources for Learning and Teaching about Canada" (Gail F. Curry Yvon); and (11) "Technology in the Classroom" (Matthew Smith; John Preston). (BT)

"The Goldfinch" is a periodical that introduces young children to various facets of Iowa history. Each issue has a different theme topic and a number of articles covering diverse aspects of the topic being addressed. This issue focuses on letters and letter writing. Featured articles discuss letters that illuminate historical events. The volume includes letters belonging to a woman who moved from Pennsylvania to Iowa around the time of the Civil War, Anne Frank and her Iowa pen pal, letters exchanged by an Iowa draftee and his wife during World War II, letters written by a group of pen pals at Iowa State University between 1918 and 1922, and letters of Laura Ingalls Wilder and her daughter. Student activities include writing to pen pals, making a quill pen, answering questions about Clara Hinton's diary, and a writing game. (BT)

Identifiers—German Culture, *Germany, Historical Background

Understanding German elementary and secondary schools requires knowledge of political, geographic, economic, and social aspects of Germany. German schools have developed in accordance with the prevailing influences of their times. People and events, throughout the past 400 years, are discussed. The legal status of education in Germany is similar to that of the United States. The central government has no responsibility for elementary and secondary education. By tradition and law, German public schools are state schools. They are created, financed, organized, and supervised by the "Kultusministerium" (ministries of education) of the 16 states. The monograph includes three case studies that portray life in German schools. The case studies are based on personal observations, discussions with teachers, and documents available in the schools. The volume contains the following six chapters and subchapters: (1) "The Cultural Setting" (political development; geographic factors; economic conditions; social traditions); (2) "Bases of German Education" (churches, guilds, and cities; new humanism and "Bildung"; reform pedagogy in the 20th century); (3) "Modern School Organization" (primary education; elementary education; secondary education; school reform in the Former East Germany; establishing the "Gesamtschule"; vocational school, or "Berufsschule"; conclusion); (4) "Teaching and Learning in German Schools" (curriculum; instruction and evaluation; at the elementary level; at the secondary level; teacher training; school finance; school reform); (5) "Three Case Studies" (Ludgeri Grundschule; Max Planck Gymnasium; Hasperg Gesamtschule); and (6) "The Future: Problems and Promise" (current issues; promise). Contains 14 references. (BT)

Identifiers—*Character Education, Moral Education

An effective, action-oriented way of addressing students' values and character growth is emphasized in this collection of articles. The book teaches the principles that form the integrated approach to character education. Three vital aspects of teaching and learning are discussed. An introduction by the editor is entitled: "The Six Principles of Integrated Character Education." Articles in the book are organized around the six principles. Chapter titles are: (1) "Integrating Character in the Life of the School" (Timothy Rusnak); (2) "Making Characters Work"

(William J. Switala); (3) "Character, Curriculum, and Action Education" (Thomas Farrelly); (4) "Learning beyond the Classroom" (James Antis); (5) "Building a Positive Classroom Environment" (Mark John Tierno); (6) "More Than a Good Lesson Plan" (Kenneth Barbour); (7) "Leadership, Character Growth, and Authenticity" (James E. Henderson); (8) "Making Leadership Count" (Robert D. Myers); (9) "Constructing Learning and Character" (Frank M. Ribich); (10) "Fostering Character Growth" (Judy Heasley); (11) "Community, Character, and Schooling" (V. Robert Agostino); and (12) "Partnering with the Community" (Donna K. Milanovich). The epilogue is entitled "Getting Started" (Paul F. Black). A list of resource organizations and programs concludes the book. (BT)

Descriptors—*Biblical Literature, *Cultural Context, Global Education, *Inquiry, Learning Processes, Reader Response, Reader Text Relationship, *Religion, *Religion Studies, *Religious Education

Identifiers—Judeo-Christian Values, Text Factors

The combination of biblical scholarship and pedagogical inquiry of the Biblical "wisdom" texts (Proverbs, Job, Ecclesiastes, Ecclesiasticus, Wisdom of Solomon, and the Synoptic Gospels) are the focus of this book. Inferences about teaching and learning that can be drawn from these texts are discussed. Acknowledging that the practices of the wise teachers of the biblical tradition cannot be reconstructed, the wisdom texts embody not only what the teachers wanted readers/students to learn but also how it was to be learned. Questions are raised about the literary forms and content the "wisdom" texts presuppose, imply, and entail for the learning and teaching processes. Some teaching and learning approaches are more suitable than others for these texts and are more likely to foster engagement with particular themes. For contemporary teachers to have an understanding of this style of teaching and learning an effort to determine why the "wisdom" teachers said and taught as they did is made. Contains an index of biblical references. (BT)

This activity-centered approach to teaching geography to elementary students is based on children's literature. Methodologies for teaching the themes of geography using children's books and stories are given. The book is organized into five chapters: (1) "Geographic Literacy in Curriculum" gives instructions for using the book and provides teaching resources and references; (2) "Location" offers teaching ideas for the study of absolute and relative location; (3) "Place" looks at the physical and human characteristics of place. (4) "Human-Environmental Relations" gives ideas for studying the earth as an environmental system and considers ethics and values relevant to its preservation; (5) "Movement" examines form and stimulus and global interdependence; and (6) "Regions" explores uniform, functional, and cultural perspectives of different regions. Each chapter includes titles and descriptions of children's books that can be used to teach and reinforce the concepts presented. Reproducible activity sheets are provided. An annotated bibliography of more than 160 children's books with suggestion for integrated language arts and geography activities is given along with a list of teachers' resources and indexes. (MM)

Descriptors—Brainstorming, *Curriculum Development, Curriculum Research, Foreign Countries, Higher Education, Models, *Music, *Music Education, Needs Assessment, *Teacher Effectiveness, Teacher Surveys

Identifiers—Ontario, *Queens University of Kingston (Canada)

A research project examined the music education curriculum of Queen's University (Kingston, Ontario, Canada) through a research model that provided adequate, broadly based evidence from diverse but relevant sources. The purpose was to evaluate the existing curriculum and then design and implement a revised curriculum that would be more effective and appropriate in both content and process. A committee devised a research plan to discover the factors used to determine a quality music education program and a quality music educator. This concept of teacher training integrates at least three theories of curriculum: (1) competencies (musical and teaching); (2) human traits; and (3) social skills. Researchers chose mixed-methods strategy to frame the research. A Needs Assessment Survey was sent to a randomly selected group of elementary and secondary school music teachers, principals, and faculty of music education in

Ontario (Canada) universities. Responses from electronic brainstorming sessions and post-session interviews held at Queen's University Executive Decision Centre were added to qualitative data from the survey. There were 247 surveys returned. Personal skills rated most important were interpersonal communication, leadership, and respect for others. Teaching skills rated most important were effective classroom management skills, the modifying of teaching strategies, and using a variety of teaching methods. Musical skills rated most important were sharing appreciation for other arts, aural skills, and teaching music by thinking creatively. Results of this preliminary report form a basis for exploring the remainder of the data. Contains 10 tables of data and 52 references. (BT)

Learning Engineering in Practice: Constructing "Knowledge" via Culturally-Powered Relations.

Pub Date—1998-04-00

Note—37p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Diego, CA, April 13-17, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Educational Research, *Engineering Education, Field Studies, Higher Education, Learning Theories, Participant Observation, *Student Behavior, *Teamwork, Theory Practice Relationship

Identifiers—Academic Discourse Communities, *Design (Engineering), Identity Formation, Learning Environments, *Situating Learning Engineering is the application of scientific and engineering principles to site-specific, real-world problems. However, engineering education tends to focus on abstract, decontextualized, generalizable knowledge and learning tasks. Research was done to find out the results of adding out-of-class, real-world courses to the conventional engineering education program. The real-world courses provided opportunities for students to gather information from clients, and apply scientific, mathematical, and engineering principles to specific situations. The research followed three different design courses over four semesters. Participant observation field notes were collected and students and faculty were interviewed. The findings propose that an adequate theory of learning must include both micro- and macroscopic features of learning, relations of power, knowledge of real-world and academic practices, and ways to think about learning settings. Learning settings should be viewed as large systems with historical, social, and cultural entrenched ways of promoting one version of reality at the expense of others. Contains 4 tables, a figure, and 24 references. (BT)

Organizational Cultures of Excellent Schools in Hong Kong.

Pub Date—1998-04-00

Note—32p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Diego, CA, April 13-17, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Foreign Countries, *Organizational Effectiveness, *School Culture, Secondary Education, *Secondary Schools, Teacher Surveys
Identifiers—*Exemplary Schools, Hong Kong, *Organizational Culture, Organizational Research

Currently school organizations are under pressure to achieve excellence. There is no exception to this pressure in the schools of Hong Kong. Research into organizational cultures of excellent schools in Hong Kong is seeking evidence for others striving for excellence. Excellent schools are defined as few schools that have many aspects that outweigh their counterparts to a great extent. This study adopted an "etic" view on organizational cultures, in contrast to an "emic" view. An "etic" perspective of culture

allows the quantitative assessments of organizational cultures across schools. Furthermore, it renders possible comparisons between the characteristics of excellent schools, and that of their counterparts. A questionnaire method was employed in this study. An instrument, "School Values Inventory" (SVI), was created for the study. Based on data collected from 554 teachers from a randomly selected sample of 44 secondary schools in Hong Kong, a "Linear Structural Relationships" (LISREL), a four-factor model of organizational values in schools, was developed. The model delineates that bureaucratic linkage, cultural linkage, tight coupling, and loose coupling are the major forces that bind teachers together in school organizations. An "Organizational Culture Index" (OCI) also was created as indicative of the strength of organizational cultures of schools. While the four binding forces demonstrate cultural contents in schools, the OCIs show their strength. Three excellent schools were identified out of the 44 schools in the sample. Organizational cultures of the 44 schools were described in terms of OCI and the four major binding forces. Characteristics of the three identified excellent schools were analyzed according to their cultural strengths and contents. All three schools had strong organizational cultures. Two distinctive types were identified in the excellent schools: (1) professional culture; and (2) bureaucratic-professional culture. One school relied heavily on cultural linkage and loose coupling as management strategies to bind people together. The other two schools were strong in bureaucratic linkage and cultural linkage. Contains 3 tables, 6 figures, and 36 references. (BT)

Seeing the Light: Literacy Education and Citizenship in Botswana.

Pub Date—1998-04-00

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Diego, CA, April 13-17, 1998).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Adult Literacy, Adult Reading Programs, Case Studies, *Citizenship, *Developing Nations, Ethnography, Foreign Countries, *Illiteracy, *Literacy Education, *National Programs, Program Evaluation, Student Needs

Identifiers—*Botswana

Botswana's national literacy program and its role in both democracy building and national development efforts is discussed in this paper. Literacy groups can be found in villages and towns throughout the country. The proportion of literate adults has increased from 34% in 1966 to 68.9% in 1993. Yet the absence of 81% of the eligible population brings into question its ability to attract participants. Participation is a poor contender to the other demands placed upon Botswana's adults due to their everyday struggle to feed themselves and their families. Based upon an 18-month ethnographic study of literacy in Botswana, the paper describes the supports provided by the national program and the everyday practices of learners and non-learners. Discrepancies between structure and local meaning have resulted in the interruption of existing social positions and divisions of labor. Reasons for the discrepancies are examined. Analysis of the program across gender, ethnic, and geographic lines identifies places where adult learners have been able to find safety, inspiration, and guidance. However, it is noted that the literacy program does not provide skills beyond decoding text, and does not help adults become upwardly mobile. Speaking to relationships among adult education, empowerment, and social transformation, the paper focuses on why the program has not been more effective in educating Botswana's citizens. Contains 18 references. (BT)

A 200-year journey has taken the United States from individualism to democratic community toward a global society. The struggles of this heritage are not evident unless political culture, literature of struggles, and diverse cultural contributions are presented as a whole. The focus of this project is the question: can public education secure and teach common values, such as respect for individual self-worth, cooperation and conflict resolution, justice and compassion and at the same time respect diversity? To appreciate the struggles of U.S. heritage, basic literature of democracy was integrated with democratic teaching methods. A collaborative network of 13 Professional Development Schools (PDS), partnered with professors from Indiana State University, created an institute to enrich the teaching of literature, history, and government for K-12 teachers. Three methods were used: (1) the study of the evolution of democracy by reading and discussing key texts and documents in the humanities; (2) the demonstration and experiencing of democratic teaching methods in the context of the institutes; and (3) the exploration of important texts in K-12 literature that deal with key values of democratic living. This report outlines the curriculum and teachers' responses to important events of the institute and gives a sense of the "lived through" democracy that evolved. (BT)

Ideas from the Other Side of the Desk: Student Evaluations.

Pub Date—1997-00-00

Note—8p.

Pub Type—Guides - Non-Classroom (055) — Reports - Evaluative (142) — Tests/Questionnaires (160)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Course Evaluation, Informal Assessment, Instructional Improvement, Questionnaires, Secondary Education, *Social Studies, *Student Evaluation of Teacher Performance, Student Surveys, *Teacher Effectiveness

Identifiers—Course Evaluation Questionnaire

Student-completed course evaluations are used almost exclusively in collegiate education. This paper proposes the use of student evaluations in secondary education, specifically in social studies, for the purpose of improving teacher and course effectiveness. The paper presents an informal method of student course evaluation by describing a process to create evaluation tools, collect responses, and utilize the data. A sample student evaluation form is attached. (Author/BT)

The Creative Arts: Are Elementary Education Majors Prepared for Curriculum Integration of the Arts?

Pub Date—1997-11-00

Note—9p.; Paper presented at the Annual Meeting of the Mid South Educational Research Association (Memphis, TN, November 12-14, 1997).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Creative Art, *Curriculum Development, Elementary Education, Higher Education, *Integrated Curriculum, Preservice Teacher Education, Questionnaires, *Student Attitudes, Student Surveys

Identifiers—Interpretive Research

When the curriculum revision process began at a southern university for an upcoming program review, elementary education faculty decided to look at current coursework to determine whether the "Arts in the Integrated Curriculum" course adequately prepared preservice elementary education majors to teach the creative arts (music, movement, drama, visual arts). Since the new program would certify K-6 teachers, instead of the previous 1-6 certification, a concern existed regarding preparation for both primary and upper elementary grades. A study examined whether those students interested in teaching the primary grades felt prepared to teach the integrated arts in kindergarten. While the research method was qualitative, the research design followed an interpretive approach and allowed for interviews and content analysis. Subjects were obtained from a sample of 15 junior and senior level teacher education students who had completed the aforementioned course. A telephone questionnaire was developed that focused on preferred teaching levels, feelings of being appropriately prepared for preferred teaching levels, and recommendations for improvements. Findings indicated that students who preferred to teach primary grades felt adequately prepared to integrate the creative arts. Findings also suggested that students were already applying techniques learned in the course to other assigned course projects and job-related situations such as a summer library program. It was concluded that the existing course met the needs of the sample group. The recommendations were evaluated and implemented in the existing course. Contains a sample questionnaire and five references. (BT)

Beardsley, Donna A.

An Interdisciplinary Project and the American West.

Pub Date—1998-00-00

Note—15p.

Pub Type—Reports - Descriptive (141)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*American Studies, Class Activities, Higher Education, *Interdisciplinary Approach, Nonfiction, Secondary Education, Social Studies, *Student Projects, United States History

Identifiers—*United States (West)

This project began with a list of the kinds of topics that would be of most interest in a study of the old west. Some of the topics that were mentioned for the project included Lewis and Clark, Native American tribes and nations, early pioneers, the fur trade, Texas independence, the Pony Express, homesteaders, gunfighters, the Indian wars, and Wild West shows. The project then required each student to select a category and a specific aspect of that category for special study. Whole class participation in the project included the planning and construction of a picture map, other art activities, and discussions. History and English teachers collaborated on several project activities. For example, English teachers used the project's bibliography for outside reading credit, while history teachers used oral reports from the students' areas of specialization to communicate subject matter. Other project activities included skits and role playing. As a culminating activity, the project used district music teachers and the university music professors and librarians to help with a list of period songs. The project's unit required 30 fifty-minute class periods for its completion. The preparation and presenta-

tion of oral reports took seven days. An activities outline is provided, as is an extensive list of selected topics. Contains 48 references. (BT)

Descriptors—Case Studies, *Cultural Context, *Curriculum Development, *Educational History, *Elementary School Curriculum, Humanism, *Social Studies

Identifiers—*Cultural Change, *Educational Issues, Progressive Era, Texas, Theoretical Orientation

Elementary social studies was "custom made" to fit progressive era issues and theories, and to "develop" children into good citizens. Social studies has not developed fast enough to keep pace with culture changes since World War II. Assumptions changed in the United States during World War II and elementary social studies curriculum failed to adapt to the new demands and theories. This explains why social studies is a vanishing species of curriculum. Social studies is unable to compete with language arts for space in the "basic" curriculum. This paper reviews the context and explains the developmental theory that supported the social studies in the progressive era. An explanation of John Dewey's concerns and the serious flaws in elementary social studies is given. A case study of why and how a group of parents successfully supported social studies in Texas in 1980 proves these parent views align perfectly with humanist philosophy, clear political demands, and with modern cognitive psychology that replaced genetic stage theory. The paper suggests that social studies can realign with key forces in today's social and theoretical context to regain an important role in elementary curriculum. Contains 38 references. (BT)

Writing and Retelling Multiple Ethnographic Tales of a Soup Kitchen for the Homeless.

Pub Date—1998-04-00

Note—30p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Diego, CA, April 13-17, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Cultural Context, *Descriptive Writing, Ethnography, Higher Education, *Homeless People, Qualitative Research, *Story Telling

Identifiers—Narrative Text, *Retelling, *Soup Kitchens, Writing Contexts

An ethnographic study narrated three tales about a soup kitchen for the homeless and the near-homeless. To provide a cultural, ethnographic analysis, and share fieldwork experiences the study began with realist and confessional tales. These two tales emerged from the initial writing and presenting of the soup kitchen ethnography to qualitative research classes. As the study was shared with social justice researchers after leaving the field, a critical perspective emerged, leading to the reflective interrogation of the realist and confessional tales. The study's text describes how multiple ethnographic tales emerge and are further shaped by the retelling of the tales. Contains 2 figures and 35 references. (Author/BT)

Linked Instruction: The Contextual Acquisition of Learning Strategies in a University History Course.

Pub Date—1998-04-00

Note—23p.; Paper presented at the Annual Meet-

ing of the American Educational Research Association (San Diego, CA, April 13-17, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, College Freshmen, *College Instruction, Comparative Analysis, *High Risk Students, Higher Education, *History Instruction, Learning Strategies, Remedial Reading

Identifiers—*Link Courses, Student Engagement

The academic performance and learning strategy use of students in a freshman history course at a large southeastern U.S. regional university is the focus of this study. One group of students was comprised of first-term, at-risk students who were jointly enrolled in a learning support reading course and the freshman history course. The second group of students was comprised of the remaining students in the history course, some of whom had previously completed other college courses. No statistically significant differences on test scores or final grades in the history course were revealed. However, strategy engagement trends were implicated between the two groups of students. Findings are congruent with research that has shown the viability of linking non-credit reading courses for at-risk students with social science credit courses in college. Contains 7 tables of data, 27 references, and a student pre-questionnaire. (BT)

The Significance of Theoretical Training for Critical Thinking.

Pub Date—1997-00-00

Note—14p.; Paper presented at the Annual Meeting of the American Psychological Association (105th, Chicago, IL, August 15-19, 1997).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Critical Thinking, Higher Education, Information Dissemination, *Psychology, Scientific Methodology, *Teacher Role, Teaching Methods

Identifiers—*Faculty Attitudes, Theoretical Orientation

The ability to think critically is one of the few teaching goals that seems to cut across the various factions of contemporary university culture. Critical thinking provides students with the ability to learn and evaluate the content of each discipline. Evaluation skills offer two benefits: (1) students understand the discipline at a greater depth; and (2) students are more creative. Psychology endorses the importance of critical thinking. Noting that psychology is one of the many disciplines to endorse the importance of critical thinking, this paper considers how well academic psychologists actually facilitate critical thinking in their undergraduate and graduate students. The paper offers a true experience that suggests psychologists have a long way to go before reaching "critical thinking nirvana." It recounts what happened in a "Teaching Psychology" graduate course when various visiting faculty members discoursed on how to teach discipline. The critical thinking issue was completely overlooked by the 17 faculty lecturers. According to the paper, information distribution was emphasized by the majority of the presenters. The only lecturer to mention critical thinking in his presentation felt that the key to critical thinking is the skill to question and evaluate the information itself. In addition, one group of presenters taught scientific method as critical thinking. The paper contends that critical thinking should involve skills in evaluating all the information, including the process being advocated to do the evaluating. The paper suggests that the discipline of psychology, which views science as proceeding without the need of intellectual history, has not laid down the theoretical groundwork necessary to facilitate critical thinking. For this and other reasons, the paper proposes a new subdiscipline of theoretical psychology. (BT)

Descriptors—*Citizenship Education, *Civics, Class Activities, Curriculum Guides, *Democracy, Elementary Education, Foreign Countries, Grade 3, Grade 4, Grade 7, Grade 8, Learning Activities, Middle Schools, Social Studies

Identifiers—Civic Values, *Romania

This guide begins by stating that the curricular items recommended for civic education classes meet the provisions of Romania's Education Law, articles 3 and 4, and particularly, the educational ideal and the ultimate goals of education. Noting that the process of socialization should start early in life, the guide states that the place of civic education in grades 3 and 4 is justified by the need to introduce students to civic behavior in a democratic society. The guide then lists specific objectives, and outlines reference objectives that illustrate key concepts related to democracy. The guide enumerates recommended teaching practices. For grade 7 it is stated that the place of civic culture as a "lower secondary school discipline" is justified by the need to take further the civic education of children and strengthen it by exercising a civic behavior in a democratic society. The guide is divided into five sections: (1) "Presentation Note"; (2) "A Teaching Model for Social and Humanist Disciplines"; (3) "Basic Objectives"; (4) "Reference Objectives and Learning Activities"; and (5) "The Contents of Learning." The grade 8 guide states that an in-depth study and nuanced discussion of the democratic value and principles is emphasized as well as the exercise of specific democratic political practices that were partially introduced to students in grade 7. The guide explains that the knowledge acquired by students in grade 7 can be integrated and reassessed, and specific skills and capabilities further developed in a new context. (BT)

Identifiers—*Childrens Drawings, Civic Values, *Romania

This album addresses how civic education should be taught in Romanian schools. Civic education, like any other form of education, must be gradual and adapted to the specifics of the respective age. The album can be used by any person involved in developing future citizens. The document includes drawings and texts made by students who were apart of the project "Human Rights Education in Romanian Schools." The project consisted of trying out alternative experimental materials in the seventh and eighth grade civic culture classes. The starting point of the project's concept is that of holding "the philosophy of human rights" to be the explicit basis of values and ideas for civic education approaches as well as for establishing a democratic civic culture. The album contains 16 sections: (1) "The Right to Childhood"; (2) "The Right to a Family"; (3) "The Right to Equality"; (4) "The Right to Liberty"; (5) "The Right to Life"; (6) "The Right to Peace and Security"; (7) "On Identity and Differ-

ences"; (8) "On Solidarity"; (9) "On Tolerance and Respect"; (10) "The Abolishment of Brutal and Degrading Treatment"; (11) "On Environmental Preservation"; (12) "The Right to Association"; (13) "The Right to Property and Labor"; (14) "The Right to Education and Care"; (15) "On Fundamental Human Needs"; and (16) "On Democracy and Human Rights." Morality in Education.

Pub Date—1997-00-00

Note—19p.

Pub Type—Historical Materials (060) — Information Analyses (070) — Opinion Papers (120)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Educational History, Elementary Secondary Education, *Ethical Instruction, Higher Education, *Moral Development, Moral Issues, *Moral Values, *Student Development, Teacher Role, Values Education

Identifiers—*Moral Orientation

The current status of the United States as an "immoral" society has a direct correlation to the lack of serious attention given to moral education in the classroom. Morality, and what constitutes morality education, is a topic of concern for parents as well as educators. Morality, as a term, incorporates the social, economic, and political biases of the society that defines it. Morality instruction tries to enlist training that will create a more "humane" human. Morality, as a serious subject of education, began in the early stages of civilization. In ancient cultures, morality education was an important part of the curriculum. In classical times, the educational systems of the Greeks and Romans showed an integration of morality, or morality-based instruction, in their programs of study. As Christianity became a way of life attractive to the "intellectuals and prosperous upper classes," the first known "catechetical" school of Christianity was founded in Alexandria. The curriculum expanded from "exclusively religious and doctrinal courses" to general subjects, one being "ethics." Moral education was a part of religious instruction in medieval higher education. The character education movement between 1880 and 1930 attempted to make schools more efficient transmitters of "appropriate moral values." In the 1960s, values clarification invited students to define their own moral values, "free of adult imposition," through a process of Socratic dialogue and creative resolution of ethical dilemmas. Now the hope is that society will bring the issue of morality back to the educators and the educators will give serious attention to moral instruction. Contains 17 references. (BT)

Identifiers—Civic Values

Research in law-related education (LRE) and related fields is reviewed in this report. For the past two decades, researchers consistently have reported that law-related curricula and instruction make a positive impact on youth when compared to traditional approaches to teaching and learning law, civics, and government. The overall conclusion is that LRE programs have a positive effect on student knowledge about law and legal processes, and individual rights and responsibilities. In addition, there is evidence that LRE programs have a positive influ-

ence on student attitudes and behavior. The most positive changes in student behavior often are associated with LRE programs where the following elements are present: instruction is of high quality and promotes higher order thinking; students are actively involved in the instructional process; teachers thoughtfully mediate the curriculum through wise selection of materials and outside resource persons; administrators actively support the program; and instructors have a network of professional peer support. This review incorporates an analysis of the major databases that yielded 9 technical reports, 6 scholarly papers, and 25 dissertations directly linked to law-related education. In addition, 13 journal articles and 6 book chapters were included in the review. (BT)

Descriptors—*Adolescent Attitudes, *Adolescents, *Childrens Art, Data Analysis, Elementary Education, *Experience, *Freehand Drawing, Junior High Schools, Middle Schools, Qualitative Research, *Student Reaction, *Visual Perception, World Views

Identifiers—Childrens Drawings, Interpretive Research, Symbolic Representation

This qualitative study investigated the medium of drawings as a methodological technique for visual data analysis. The study explored graphical symbols as an additional source for descriptive, interpretive inquiry. The design focused on gaining insight into the perceptions of adolescents' experiences as expressed by the visual narratives in their drawings. Written narratives and participant interviews provided additional information. Classroom teachers participated in teacher/researcher collaboration. Participants, 58 adolescents from two middle schools with contrasting socioeconomic and ethnic neighborhood characteristics, illustrated responses to four topics: self perception, personal achievement, inspiring teachers, and ideal future

environments. Following content analytic procedures, the drawings were coded systematically and themes were inferred. Findings revealed that drawings are useful as a singular source of interpretive inquiry when symbols are descriptive and explanatory. When more than one drawing by an individual is examined, relationships between symbols can be interpreted to give a more complete picture of the individual's perceptions. When interpreting beyond what is visible and descriptive, other methodological techniques, such as narratives and interviews, are necessary to clarify ambiguous and vague symbols. Drawings are traditionally used in elementary schools to enhance conceptual understanding. This study showed that strategies for middle school instruction can be augmented with drawings as a technique to display understanding of learner knowledge. Further, as a tool for research in education, drawings can be used to gain insight into teacher instructional practices, learning environments, and the quality of teacher/student rapport. Contains 8 figures and extensive illustrations. (Author/BT)

Identifiers—African Americans, *Harlem Renaissance, National History Standards, New York (New York)

This teaching unit represents a specific "dramatic moment" in history that can allow students to delve into the deeper meanings of selected landmark events and explore their wider context in the great historical narrative. Studying a crucial turning point in history helps students realize that history is an ongoing, open-ended process, and that the decisions they make today create the conditions of tomorrow's history. This unit is about the Harlem Renaissance. The Harlem Renaissance is part of the post-World War I cultural upheaval that found all of U.S. society trying to come to terms with the shift from a rural way of life to an urban and industrialized one. The unit can be taught after studying World War I or as a transition to the era of the Great Depression and the New Deal. The unit is based on primary sources taken from documents, artifacts, journals, diaries, newspapers, and literature from the period under study. Within the unit are teacher background materials that provide an overview of the entire unit and the historical information and context necessary to link the "dramatic moment" to the larger historical narrative. Lesson plans include a variety of ideas and approaches. An extensive bibliography contains 7 items about painting and sculpture, 13 poem citations, 12 articles and maps, and 7 recording dates. (BT)

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price — MF01/PC10 Plus Postage.

Descriptors—Colonialism, Foreign Countries, *Global Approach, *Hunger, Learning Activities, Middle Schools, *Poverty, Secondary Education, Social Action, Social Studies, Units of Study, World Problems

Identifiers—*Community Service, Food Production

This manual engages young people in the task of helping save their less fortunate peers from hunger and starvation. The activities give students the knowledge to take action on the causes of hunger and their capacity to change the world. Global hunger, caused by the economic and social forces that result in a billion people going to bed hungry on a planet that produces more than enough food is a mystery to most adults. Explanations of global hunger are usually too simple and often wrong. The manual is based on the belief that children can be helped to understand the real causes of hunger and learn to change them. Each lesson leads the student through exercises that teach such things as the pain of hunger, the importance of food, the inequity of its distribution, the curious lack of relationship between hunger and population density, and the links between poverty, hunger, joblessness, and homelessness in the U.S. and elsewhere. Throughout the lessons, students are asked to read and write, calculate and analyze, role play, and figure out solutions to the problems of global hunger. The manual contains 25 lessons and is divided into three units: (1) "What Is Hunger?"; (2) "Why Are People Hungry?"; and (3) "What Can We Do to Help End Hunger?" (BT)

The Great Irish Famine.

Irish Famine Curriculum Committee and Educa-

tion Fund, Inc., Morristown, NJ.

Pub Date—1997-00-00

Note—150p.

Available from—Irish Famine Curriculum Committee and Education Fund, Inc., 757 Paddock Path, Moorestown, NJ 08057 (\$20, including postage/handling).

Pub Type—Guides - Classroom - Teacher (052) — Historical Materials (060)

EDRS Price — MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Area Studies, *Colonialism, *European History, *Food, Foreign Countries, *Political Issues, Secondary Education, *Social Problems, Units of Study

Identifiers—English History, *Famine, Great Britain, Ireland, *Irish History, Nineteenth Century History

Between 1845 and 1850, more than a million Irish starved to death while massive quantities of food were being exported from their country. A half million were evicted from their homes during the potato blight. A million and a half emigrated to the United States, Britain, and Australia, often on board rotting, overcrowded "coffin ships." This is the story of how that immense tragedy came to pass. The necessary historical and political context for a study of the Irish Famine is provided in the teacher's synopsis. Following the synopsis is a student summary that provides a historical overview and concludes with seven questions. Six lessons follow the student summary: (1) Laws; (2) Racism; (3) Eviction; (4) Mortality; (5) Emigration; and (6) Genocide. A synopsis gives an overview of the relevant Irish and English history and contains 47 footnotes and a 15-item bibliography. Each unit of study begins with a list of performance objectives, teaching/learning strategies and activities, and instructional materials/resources. (BT)

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price — MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Elementary Education, Geographic Concepts, *Geography Instruction, Gifted, *Independent Study, Integrated Activities, Map Skills, *Social Studies

This learning packet presents geography units designed for self-directed study use by students in grades K-8. Instructions are given regarding how to use the materials. The five themes of geography provide a framework for analyzing questions about a place, how that place came to be the way it is, and how the place affects the people living there. Activities are designed to aid students in the development of skills needed to read, interpret, and create maps. Students practice techniques of geographic analysis using their own environment. Answer keys and bibliography are provided. (MM)

Descriptors—*Aesthetics, *Art Education, Curriculum Guides, Elementary Secondary Education, Units of Study

Strategy guidelines for including aesthetics as part of K-12 art instruction are provided in this text. In addition to providing a rationale for inclusion of philosophical inquiry in the K-12 art program, the guide provides information about theories of art, suggestions for planning, sample programs and lessons outcomes or objectives, and examples of lesson plans and instructional resources. An appendix includes lists of philosophical questions about artworks, art-makers, responders, and contexts; teacher and student worksheets; suggested classroom activities; and additional resources. Chapters include: (1) "Philosophy, Aesthetics, and Children"; (2) "Aesthetic Theories and Philosophical Questions"; (3) "Wonder, Inquiry, and the Philosophical Dialogue"; (4) "Generating Questions for Philosophical Inquiry"; (5) "Activities for Philosophical Inquiry"; (6) "Activities for Introducing and Practicing Skills"; and (7) "Philosophical Inquiry and the Art Curriculum." An appendix contains philosophical questions, worksheets, activities, additional resources, and an index. (MM)

Document Not Available from EDRS.

Descriptors—*Art Education, Educational Assessment, Elementary Secondary Education, Evaluation Criteria, *Evaluation Methods, Units of Study

Major topics in the field of assessment measurements are described in this text. Focus is on appropriateness for use in the art classroom. The volume prepares teachers to address assessment effectively as it relates to their own art classroom practices. Familiar art assessment strategies and procedures are presented along with new insights about other different and highly successful art education assessment systems. The strategies delve deeper than the assessment of content-based knowledge. Important thinking processes that are central to making and appraising art are highlighted. Chapters include: (1) "Introduction to Art Assessment"; (2) "Performance Assessment Strategies"; (3) "Traditional Strategies: Tests, Questionnaires, and Visual Identification"; (4) "Scoring and Judging Strategies"; (5) "Formative Assessments"; (6) "Summative Assessment"; (7) "Art Assessment Guideline"; and (8) "Validity and Reliability." An appendix includes charts of skills and scoring rubrics, performance strategies, achievement checklists, and checklists for the teacher. A bibliography and an index conclude the text. (MM)

Descriptors—*Art Criticism, *Art Education, Elementary Secondary Education, Units of Study

This volume offers strategies for getting K-12 students to examine and discuss the works of art they and others make. Using the traditional college-level critique as a preliminary model, approaches

for engaging younger learners in critical discussions are presented. A sampler of critiques offers a range of practical ideas and activities for classroom use. The text also gives realistic critical performance goals for students of different ages and circumstances. Guidelines for interpretive critical discussions and evaluative discussions are included. Finally, an example of a critique with adults and practical suggestions for leading critiques are presented. Chapters include: (1) "Studio Critiques: As They Are and as They Could Be"; (2) "A Sampler of Critical Discussions"; (3) "Interpreting Student Art"; (4) "Judging Student Art"; and (5) "General Recommendations for Interactive Group Critiques." An appendix includes reproducible student worksheets. (MM)

This social studies resource is designed for French-speaking high school students who have need for definitions of widely used terms relating to social studies. Divided into four sections, the first section presents a term, the gender of the French term, a related term, the definition, a sentence using the word, and the English equivalent. The second section is a list of English acronyms and the French language equivalent terms. The third section features a list of English expressions with accompanying equivalent French expressions. The fourth section is an index of English language terms with the equivalent French words. The volume would also be useful to English-speaking students who are familiar with the French language. The "Goldfinch" is a magazine that introduces young children to different aspects of Iowa history. Each issue contains articles to provide in-depth knowledge of a topic about Iowa. The focus of this issue is "Iowa Festivals." Hard work, fun, and the opportunity to raise money for community projects are all a part of organizing a festival. The journal invites the reader/student to become a history detective and examine a variety of Iowa festivals by asking how they got started and what they mean. The magazine provides activities and projects for students. Each festival featured has Iowa roots and serves a purpose for the community in which it takes place. Articles included are: (1) "Iowa Festivals on Parade"; (2) "Food Festivals-Let's Eat!"; (3) "Spring Into the Past"; (4) "Mesquakie Powwow Keeps Traditions Alive"; (5) "Festivals Put Iowa History on the Map"; (6) "Clowns, Soldiers, Explorers, & Bank Robbers: Iowa Celebrates People"; (7) "Hoboes Find a Home in Britt"; (8) "Art and Music Festivals Commemorate—and Inspire—Creative Iowans"; (9) "Nordic Fest"; and (10) "Iowa Festivals in Motion." Springboards into Holocaust Study: Five Activities for Secondary Social Studies Students.

Pub Date—1998-00-00

Note—21p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Anti-Semitism, Class Activities, Curriculum Development, *European History, Foreign Countries, Learning Activities, Nazism, Secondary Education, Social Studies, Thematic Approach, World War II

Identifiers—Europe, *Holocaust, *Tolerance

Even with appropriate curriculum materials, teachers need to employ reflective springboards that cause learners to link Holocaust information and personal stories to the students' in-school and out-of-school realities and to issues in community life. The guide provides five activities that are intended to be used in any sequence and for any class. The guide's lessons are independent activities that introduce a serious study of the Holocaust. Each lesson is designed to elicit the students' personal knowledge. The guide offers detailed information as to how to introduce and implement each activity in the secondary classroom. Contains 15 references. (BT)

Teaching Secondary School Geography with a Focus upon National Images.

Pub Date—1998-00-00

Note—21p.; Light type throughout.

Pub Type—Reports - Descriptive (141)

EDRS Price — MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Class Activities, Critical Thinking, Curriculum Development, Foreign Countries, *Geography, *Geography Instruction, Global Approach, *Instructional Effectiveness, Learn-

ing Activities, Secondary Education, Social Studies, Textbook Content, *World Views
Identifiers—Great Britain, *Nation States, *National Image, South Korea

The world is made up of over 185 nation-states. This paper offers advice for geography teachers and students on how to focus their study of some nations in terms of their national images. The goals for studying national images are (1) to understand how national images are constructed and influence thought and behavior; (2) to test the linkage between perspective and reality in the images that students have of other nations and their own; (3) to critically examine the national images served to them uncritically by their geography textbooks; and (4) to understand how many nations today are consciously trying to redefine their national images to be able to sell themselves and their products and services in the global marketplace. The paper provides examples of national images, using South Korea (through images in textbooks, the media, national products, and national images); and Great Britain (under Prime Minister Tony Blair) and its campaign to change its national image. Activities for geographic study that center on national image are strategies that students find interesting and challenging. Contains 10 references. (BT)

Teacher Exchanges: Teaching "Billy Budd" as Secondary School Social Studies.

Pub Date—1998-00-00

Note—23p.

Pub Type—Guides - Classroom - Teacher (052) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cooperative Learning, *Curriculum Development, Drama, Law Related Education, *Novels, Secondary Education, *Social Studies, *Staff Development, *Student Needs, Units of Study

Identifiers—*Billy Budd, Meaning Construction, Melville (Herman)

The question of why only English teachers and their students study Herman Melville's novel, "Billy Budd," is raised in this paper. The book offers insights and fundamental social questions for students in secondary school social studies. Suggestions are offered as to how social studies teachers (with their perspectives, concerns, and curriculum goals) could design and conduct teaching and learning using "Billy Budd" for secondary school students in history, law, sociology, and other social studies curriculum contexts. It describes a collaborative staff development experience that used the drama form of "Billy Budd" for discussion and for Internet and library research. The paper states that the teachers gradually focused upon the most meaningful linkage to their students' life space. The discussions are focused on four separate social studies approaches to the study of "Billy Budd": (1) taking a stand; (2) taking liberties; (3) taking offense; and (4) taking action. Each lesson is based upon a "mega-question" linking Melville's story, the social studies curriculum, and students' life concerns. Each lesson is taught "authentically" with students constructing their own meaning using disciplined inquiry and prior knowledge. The four approaches are described in detail. Contains a figure and 16 references. (BT)

Identifiers—National Social Studies Standards

During the past five years there has been new research into the teaching of history to children. Many educators are advocating once again the teaching of history through concepts. This elementary school unit uses the concept approach to teaching history. The lesson examines the concept of war and wars' impact on the lives of a variety of people. The lesson's approach contrasts with and provides a balance to the fears and triumphs of leaders of nations who seek to preserve or extend their own economic and political power. The lesson provides identification with the impact of war rather than an attempt to create a set of heroes. It identifies eight knowledge objectives (such as defining war, explaining war's destruction, and making conclusions about the impact of war), four skills objectives, (including gathering and analyzing data), and four attitudinal objectives. A list of materials needed for the unit and trade books to be read is given. The lesson then presents a day-by-day description of classroom procedures and activities. It concludes with a list of formative and formal assessments. (BT)

CIVITAS: An International Civic Education Exchange Program. Evaluation Report.

Center for Civic Education, Calabasas, CA.

Pub Date—1998-11-04

Note—85p.

Available from—Center for Civic Education, 5146 Douglas Fir Road, Calabasas, CA 91302.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Citizenship Education, *Civics, *Exchange Programs, Foreign Countries, Higher Education, *International Cooperation, *International Educational Exchange, Mail Surveys, Program Evaluation, Questionnaires

Identifiers—*CIVITAS

This evaluation report documents the CIVITAS program's progress toward its five stated goals: (1) acquaint educators from Eastern and Central Europe with exemplary curricular and teacher training programs in civic education developed in the United States; (2) assist educators from Eastern and Central Europe in adapting and implementing effective civic education programs in their own countries; (3) create instructional materials for students in the United States that will help them better understand emerging constitutional democracies; (4) facilitate the exchange of ideas and experiences in civic education among political, educational, and private sector leaders from Eastern and Central Europe, the United States, and other established democracies; and (5) encourage research to determine the effects of civic education on the development of knowledge, skills, and traits of public and private character essential for the preservation and improvement of constitutional democracy. The report states that U.S. partners and people from Eastern and Central Europe were asked to respond to questionnaires eliciting both numerical and narrative data regarding their progress toward meeting these goals. Questionnaires were mailed in July and October of 1998 to 12 European partners and 16 U.S. partners. Six European partners and nine U.S. partners responded. According to the report, responses from both U.S. and European partners clearly indicated that at these partnership sites at least four of the five goals are being achieved. The only goal not yet being achieved, by all but one site, is conducting research to determine the impact of civic education and the development of knowledge skills and traits essential for the improvement of constitutional democracy. Contains 4 tables of data,

a sample survey, and informational appendixes. (BT)

Identifiers—*Peace Education

This study surveyed 31 professional educators who have taken a peace education course to see what factors influence their use of skills and knowledge acquired in this class. The main hypothesis of this study is that theoretical knowledge is not enough to motivate teachers to become peace educators. Respondents indicated that knowledge of subject matter was important but not as important as feelings of urgency about violence. Religious faith, past peace education success, and school climate helped peace education efforts. Responses to a questionnaire used in this study indicate the wide variety of approaches to peace education: (1) 58% were dealing with diversity; (2) 54% were teaching about peace; (3) 50% were helping their students cope with violence; (4) 35% were advocating violence prevention; and (5) 23% were working with a peer mediation program. Contains 7 tables and 31 references. (Author/LB)

Identifiers—India, *Peace Education

The development of peace education in India is discussed in this booklet. Although India has made many contributions to the theory and practice of peace work (the non-violent movement led by Mahatma Gandhi), peace education in the form of university courses or special curricula for schools is seldom encountered. However, signs of interest in peace education are evident in the peace research centres, in departments of Gandhian Thought, and in similar institutes that have been organized over recent decades. Brief descriptions of these institutes are given. Books and journals from India and relevant to peace education also are presented. Contains 19 references. (Author/LB)

Identifiers—*Massachusetts

This curriculum framework represents the first statewide guideline for learning, teaching, and assessment in history and social science for the Commonwealth of Massachusetts's public schools. The framework is based on sound research and effective practice and reflects a vision of how classrooms can and should look to assist all students to achieve high standards of excellence. Following a visual overview and an introduction, the framework comprises 10 sections and three appendices: (1) "Core Concept," states the fundamental purposes of a curriculum in history and social science: to enable students to acquire knowledge, skills, and judgment so as to continue to learn for themselves, participate intelligently in civic life, and avail themselves of historical and cultural resources. Further sections are: (2) "Guiding Principles"; (3) "Reasoning, Reflection, Research, and Context in History and Social Science"; (4) "Core Knowledge in United States and World History, Geography, Economics, and Civics and Government"; (5) "Commonly Taught Subtopics Related to Core Knowledge in United States and World History, Geography, Economics, and Civics and Government"; (6) "Pre K-12 Scope and Sequence of History and Social Science Instruction"; (7) "History and Social Science in Pre K and Elementary Grades"; (8) "Study Strands and Learning Standards: History, Geography, Economics, and Civics and Government Overview"; (9) "Learning Standards and Examples, Pre K-12"; and (10) "Using the History and Social Science Curriculum Framework in Schools." Appendixes list American political documents recommended for study; recommended reading; and Massachusetts museums, historic sites, and state parks. (BT)

Identifiers—*Massachusetts

This curriculum framework presents a philosophy of arts education, synthesizes current research, and sets learning standards for students from pre-kindergarten through 12th grade in the Commonwealth of Massachusetts. The curriculum framework's core concept is that experience in the creative process is essential for all learners, and that, in the arts, this process involves solving problems with skill and imagination, discovering new questions, ideas, and objects, or interpretations of existing works. According to the framework, learning in, about, and through the arts develops each learner's capacity to make meaning from experience, respond to creativity, and contribute to society. The curriculum framework is divided into the following sections: "Overview of the Arts Framework"; "Guiding Principles"; "Habits of Mind"; and "Arts Content." The Guiding Principles section is subdivided into: (1) "Arts Education for All Students"; (2) "Multiple Intelligences through the Arts"; (3) "Arts Education and Human Development"; (4) "Comprehensive and Sequential Arts

Programs"; (5) "Multicultural and Interdisciplinary Connections"; (6) "Assessment in the Arts"; and (7) "Partnerships for Arts Education." The Arts Content section is subdivided into: (1) "Creating and Performing Strand"; (2) "Thinking and Responding Strand"; and (3) "Connecting and Contributing Strand." Contains three appendices, 27 references, and selected resources. (BT)

Descriptors—*Academic Standards, *Aesthetic Education, *Art Education, Dance, Elementary Secondary Education, Fine Arts, Public Schools, State Curriculum Guides, *State Standards, Student Development, Theater Arts, Visual Arts

Identifiers—*Alabama

This curriculum guide provides the framework for K-12 arts education program in Alabama's public schools. Content standards in the guide are minimum and required, and fundamental and specific but not exhaustive. School systems may include additional content standards and add implementation guidelines, resources, and/or activities. In response to the idea that the arts have intrinsic value and are worth experiencing for their own sake, the guide suggests that each art discipline appeals to different senses and expresses itself through the different media, and that each adds a special richness to the learning environment. Studies have shown that arts education in schools provides greater motivation to learn in all subjects, increases attendance rates for students and teachers, raises test scores including standardized achievement tests, engages students more fully in the learning process, gives teachers a sense of renewal and challenge, and develops higher-order thinking and problem-solving skills. Sections in the guide include dance, music, theater, and visual arts. Each section contains an introduction, a conceptual framework, content standards, resources, a bibliography, and a glossary of terms. Eight appendices contain information about audience behavior, performance behavior, arts-related careers and professional organizations, humanities course guidelines, laws and regulations relating to arts education, Alabama high school graduation requirements, and guidelines for local time requirements and homework. Identifiers—*Alabama

This curriculum guide defines social studies as the integrated study of the social sciences and humanities to promote civic competence. A framework for the K-12 social studies program in Alabama's public schools is provided. The curriculum emphasis on civic responsibility will encourage students to become informed, responsible, participating citizens, and enable them to function well in both their private and public lives. Content stan-

dards in the guide are minimum and required, and fundamental and specific but not exhaustive. School systems may include additional content standards and add implementation guidelines, resources, and/or activities. The curriculum guide uses history and geography as the central disciplines, with the addition of specific core information and ideas from economics, law, and U.S. government interwoven into all courses to provide for the program goals of historic, geographic, political, and economic literacy. These program goals support the commitment to provide a curriculum that prepares all of Alabama's students to lead productive and independent lives. The guide presents an introduction to the course of study, the conceptual framework, position statements, directions for interpreting the minimum required content, and the minimum required content and overview for various subjects in kindergarten through second grade, for third and fourth grade, for fifth and sixth grade, for seventh grade, for eighth and ninth grade, the ninth grade-twelfth grade social studies program, and for other tenth, eleventh, and twelfth grade materials. Appendices contain Alabama high school graduation requirements, and guidelines and suggestions for local time requirements and homework. A bibliography concludes the guide. (BT)

Making Connections: Interdisciplinary Lessons To Prepare Tomorrow's Citizens.

Pub Date—1998-11-00

Note—51p.; Paper presented at the Annual Meeting of the National Council for Social Studies (78th, Anaheim, CA, November 20-22, 1998).

Pub Type—Guides - Classroom - Teacher (052) — Opinion Papers (120)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Adolescents, *Citizenship, *Citizenship Education, *Civics, Instructional Effectiveness, *Interdisciplinary Approach, Junior High Schools, Learning Strategies, *Public Schools, Student Development, *Student Needs

Identifiers—Curriculum Emphases

This paper considers how well today's young adolescents are prepared for their future roles as citizens, noting that the public schools have a unique opportunity to positively affect their students' civic knowledge, values, and behaviors. The paper contends that recent research suggests that the next generation of citizens may lack the knowledge, attitudes, values, and social awareness that were once viewed as crucial. It discusses what civic literacy means and outlines the basic requirements for citizenship. The paper advocates using an interdisciplinary civics curriculum to teach students how to grasp the essential elements of a problem or issue, consider the consequences of various alternatives, and make decisions that are based on a concern for society as well as individual self interest. The paper contends that the educational system and curricula must do a better job of helping students to think critically, resolve conflicts, cooperate, communicate, and gather and synthesize information. Eight recommended curriculum goals are outlined and then discussed in detail. The paper also suggests nine effective instructional strategies to help ensure the success of the civics course. According to the paper, students who complete such a multidisciplinary course should achieve a substantial number of learning goals. For example, they should know the historical foundations and the structure of U.S. political, legal, economic, and social systems; they should understand basic societal goals and values; and they should have improved attitudes toward democracy and their future roles as citizens. Contains 14 references, and 2 lesson plans with student handouts. (BT)

Descriptors—Communication Problems, *Cross Cultural Training, *Cultural Awareness, *Cultural Context, *Cultural Differences, *Culture Contact, *Foreign Countries, Sociocultural Patterns

Identifiers—Communication Styles, *Peace Corps

This workbook serves as a map to guide Peace Corps trainees through their cross-cultural experience and as a record of thoughts and feelings as they live and work in their host country. The workbook examines the behaviors and values of people in the host country in relation to those of the people in the trainees' native country; it does not intend to suggest that American culture is superior or inferior to the host country's culture. The workbook covers the following fundamentals of culture: the concept of

self, personal versus societal obligations, the concept of time, the locus of control, and comparing American and host country views. Following an introduction, the workbook contains the following chapters: (1) "Understanding Culture"; (2) "American Culture and American Diversity"; (3) "Styles of Communication"; (4) "Culture in the Workplace"; (5) "Social Relationships"; and (6) "Adjusting to a New Culture." Appendixes contain information on using cultural informants, joining in, keeping a journal, learning from the media and the arts, critical incidents, and studying an institution. Answers to chapter questions are also provided. (BT)

Effect of Computer Assisted Instruction on Students' Achievement in Global Studies.

Pub Date—1998-10-00

Note—14p.; Paper presented at the Annual Meeting of the Northeastern Educational Research Association, (Ellenville, NY, October 28-30, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, Comparative Analysis, *Computer Assisted Instruction, *Global Education, Grade 10, High Schools, Pretests Posttests, Research Design, Social Studies, Urban Schools

Identifiers—New York City Board of Education, T Test

A pretest posttest experimental group design was used to study the effects that computer assisted instruction (CAI) has on urban school, tenth grade students' achievement in global studies. Students were selected and assigned to one of two groups using random selection and assignment techniques. A pretest confirmed the equivalence of the two groups. After a six-week treatment of the experimental group, a posttest administered to both groups assessed the effect of the treatment. Items from the June 1993, 1994, and 1995 global studies unit of the New York State Regents Examination were used to develop an assessment instrument. The assessment found that students using CAI achieved significantly higher scores on a posttest than students taught by traditional methods. An attitude survey showed an increase in motivation and interest for students who were taught with CAI. Results may be generalized to classrooms in urban settings where students consist primarily of minority populations. Contains 3 tables of data and 13 references. (BT)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Class Activities, *Critical Thinking, Higher Education, Instructional Effectiveness, Learning Activities, Seminars, *Student Development, *Thinking Skills

Identifiers—*Analytical Reasoning

The pedagogical imperative to prepare students to become critical thinkers, critical readers, and critical writers for the coming millennium necessitates a comprehensive college discourse on critical thinking. The paper cites seminars and workshops that incorporate theoretical and practical dimensions of teaching critical-analytical thinking processes. Using descriptions from the text, "Logic and Contemporary Rhetoric" (Howard Kahane), the paper outlines nine 75-minute seminars and workshops that offer examples and exercises drawn from a broad range of sources, including advertisements, political speeches, newspapers, audio-visuals, and sample examinations. Course objectives include developing a critical understanding of the follow-

ing: (1) "Bloom's taxonomy"; (2) "the difference between fact and opinion"; (3) "the fundamental elements of analysis"; (4) "Aristotelian proofs: ethos, logos, and pathos"; (5) "divergent thinking (multiple perspectives)"; (6) "types of arguments and fallacies"; (7) "how culture affects thought processes"; (8) "how to decipher examinations"; and (9) "how to integrate technology driven data into the research process." Successful completion of the seminars/workshops means that each student completes satisfactorily 80% of the materials covered in each of the nine sessions. Pedagogical strategies are attached. Contains a 12-item selected bibliography. (BT)

Descriptors—Classroom Techniques, *History Instruction, Instructional Effectiveness, Learning Activities, *Primary Sources, Secondary Education, *United States History, *World History

Identifiers—*Analytical Reasoning, *National Archives and Records Administration, National Civics and Government Standards, National History Standards

This collection of primary source materials from the National Archives and Records Administration (Washington, DC) humanizes history so that it is real and personal to students. Intended for secondary school history teachers, the collection provides primary source documents, reports, maps, photographs, letters, diaries, posters, and recordings created by those who participated in or witnessed the events of the past. This teaching method exposes students to important historical concepts. Through analysis of primary sources, students confront two essential facts of historical work: (1) the record of historical events reflects the personal, social, political, or economic views of the participants who created the sources; and (2) students bring to the study of the sources their own biases, created by their own personal situations and their social living environments. A benefit of using the primary sources collection is the development of broad cognitive and analytical skills. This second volume of the collection compiles 43 articles. The articles were published in "Social Education" from 1989 to 1998 and similar articles were published in the Organization of American Historians' "Magazine of History," "The Roger Williams Report," "Heritage Education Quarterly," and "Social Studies and the Young

Learner." Appended are charts listing types of documents, disciplines and subject areas, themes, and materials which connect with the National Standards for U.S. History, National Standards for World History, and National Standards for Civics and Government. (BT)

Descriptors—*Art Education, *Cognitive Style, Curriculum Development, *Educational Policy, Elementary Secondary Education, *Fine Arts, Public Education, Student Improvement

Identifiers—Cognitive Research, *National Arts Education Standards

Although the term "arts education" conjures up competing images and definitions for different people, for the purposes of this policy brief, arts education is defined as incorporating four distinct subject areas: (1) music, (2) dance, (3) theater arts, and (4) visual arts, as taught by certified arts educators. The policy brief provides information about the integration of the arts into K-12 curriculum as a mechanism to improve the performance of all students, particularly in the basic areas of reading, writing, and mathematics. This brief reports on selected research information in brain development and cognition (learning styles) as they relate to arts education and selected findings on the effectiveness of arts education as a curriculum reform effort. Sample arts education standards from the National Standards for Arts Education (1994) are described. The brief also discusses policy issues concerning arts education and its present place in public education. Contains 37 references. (BT)

An overview of Burma's history and culture is discussed in this learning guide. The book begins with a geographical study of Asia's major land masses, archipelagoes, and the bodies of water that have made possible the movement of trade, religion, and culture from ancient to modern times. The early history of Burma's culture is discussed through temples, kings and kingdoms, religions, dynasties, and wars to the more current transformation of Burma from a colony to a nation. Concepts and teachings of Buddhism and Buddhism in daily life, along with the sangha and the Shwedagon Pagoda, are given. A section is devoted to the discussion of Burma after gaining independence and includes information about foreign relations, civilian to military rule, economic development and the military, the socialist republic, and the continuing struggle between the military successors of Ne Win and the pro-democracy movement. Each chapter provides multiple choice questions, fill in the blanks, creative writing problems, class discussion, and suggestions for further research. Chapters include: (1) "Land and People"; (2) "From Past to Present"; (3) "Religion"; (4) "Life and Culture"; and (5) "Burma after Independence." The book contains answer keys to chapter exercises and a 26-item bibliography. (BT)

An overview of Singapore's history and culture is discussed in this learning guide. A study of the history of Singapore, including Temasek to Singapore, the Raffles Years, and the Straits Settlements, is given. Information about the transition of Singapore as a British Colony to the modern independent state of today, and the effects of World War II also is presented. Each chapter provides an overview, learning objectives, a timeline of important events, multiple choice questions, fill in the blanks, true or false statements, geography exercises, creative writing problems, questions for class discussion, and suggestions for further research. Chapters include: (1) "Early History of Singapore"; (2) "The Colonial Era"; and (3) "Independence." The book contains answer keys to chapter exercises and a 21-item bibliography. (BT)

Descriptors—Case Studies, Higher Education, Multicultural Education, *Preservice Teacher Education, *Preservice Teachers, *Reflective Teaching, *Service Learning

Identifiers—Interpretive Research, *Meaning Construction, *Student Expectations, Teaching Research

Preservice teachers' constructions of meaning within a multicultural education course are explored in this study. The study considers whether prior expectations have an impact on service learning, what meanings preservice teachers make from service learning, and whether reflection has an influence on meaning making. This interpretive case study used 24 preservice teachers in a multicultural education course. Community-based service learning was a 20-hour course component in which inquiry teams of three to six preservice teachers worked together at each community organization. Services responded to site-based needs and included tutoring, teaching small groups, and assisting recreational programs. An African-American family, familiar with the neighborhood served, acted as mentors, participated in two reflective sessions, and answered questions that arose from service learning. Data generated included introductory letters and a series of reflective essays written by

preservice teachers. Three reflective sessions were videotaped, and class assignments and field-based projects were collected. Data were read and reread to determine themes and trends. Given the diversity of the class, the construction of meaning in a multicultural education course is a complex, varied, and somewhat idiosyncratic process, as profiles of several students illustrate. Preservice teachers learned that the process of confirmation or disconfirmation is not simple. Preservice teachers seemed to grow more comfortable with it over time. Contains 19 references. (BT)

Identifiers—*China, Technological Demands, *United States

Instruction is affected in the People's Republic of China and in the United States in a world of changing technology. This paper examines methods used in the two countries, identifies common problems faced by both countries, and suggests alternative approaches for meeting technological challenges. The paper explains that both countries face problems such as a lack of qualified teachers, an increasing number of high-risk students in middle schools, students' lack of interest in studying subjects such as mathematics, and the growing number of unprepared students. The paper reviews studies that have been conducted and discusses findings relative to investigation of class size, lesson planning and teaching methods, class activities, problem solving, and entrance requirements. Contains 23 references. (Author/BT)

Identifiers—Conceptual Models, Teaching Research

Teacher preparation for multicultural education centers around learning about cultural diversity, examining relations of power and inequality, and responding affirmatively to sociocultural differences in schools and classrooms. This paper suggests that community-based service learning is an important part of this process. The document explains that service learning complements the community-based approach, presents opportunities for interaction with diverse socio-cultural groups, and emphasizes reflection, which prods analysis of community-based concerns. Finding that the popularity of community service learning belies research, the paper contends that there is a strong need for research-based practice, especially at the college level. The paper considers three related questions fundamental to community-based service learning for multicultural education: (1) why is community-based learning important to multicultural teacher education?; (2) how can it be combined with service learning in the preparation of teachers?; and (3) how do preservice teachers interpret community-based service learning in the context of their preparation to teach? Responses of 117 prospective teachers to community-based service learning develops a conceptual framework that

describes these responses, and discusses implications for multicultural teacher education. Contains 35 references. (Author/BT)

Identifiers—*Community Ties

A critical exploration of the meaning and function of community is the focus of this curriculum unit. It is proposed that students develop projects that are designed to contribute to a community in which they are involved, positing that the leadership and networking skills these students develop over the course of the semester provide them with confidence and direction for the adult world they are about to enter. The unit presents a course overview, student objectives, methodology and assessment materials, a section on student projects and whole class activities, final student presentations, a section on course content, notes for the teacher on how to teach the course, and a contemporary problems project list. Identifiers—*Quilting, *Womens History

This curriculum unit is part of a larger unit on women's history that allows students to explore the many ways that history has been recorded, including quilting. The unit teaches students how women used quilts as their pens to record issues of their time. Students then connect this to their own lives by expressing contemporary issues through a quilt square. The unit continues with students volunteering to sew quilt squares together to provide a community quilt that is then donated to a community center for display. Students also are encouraged to provide a special housewarming gift for a woman moving from a shelter to her own home. The unit contains an overview and rationale, a content section, a list of objectives, lesson plans, and a section on the evaluation of the quilting project. (BT)

A few years ago, the concept of non-formal education was virtually unknown in the Lao People's Democratic Republic. Today, however, many understand the importance and relevance of non-formal education activities. This evolution is due to the implementation in several Laotian provinces of "Women's Literacy and Basic Skills Training," a project launched in 1994 by UNESCO with Norwegian funding. In the Lao People's Democratic Republic, schooling opportunities for girls have been limited for a long time. This is especially true for girls from ethnic minorities and those who live in some of the numerous isolated and mountainous regions. By implementing non-formal educational activities, this project, widely-known as 504/LAQ/11, has proved that it is possible to transmit basic knowledge, both general and technical, to young women who otherwise would have no access to education. The core mission of the social studies curriculum is education for democratic citizenship. The middle school years are an important time frame in which to fulfill that core mission. Policymakers, educators, community members, and parents need to recognize that civic education at the middle level years is important. One effective method for accomplishing middle school instruction in civic education is issue-centered education. Two perennial questions accompany this instructional method: (1) is the teaching of content culled from history and the social sciences appropriately tailored for young minds, adequate citizenship education in and of itself? and (2) should students first master a core body of information and concepts before being asked to consider the issues that face adult citizens? Issue-centered civic education examines social questions within a discipline-based or interdisciplinary curriculum. An exemplary issue-centered civic education program is "We the People Project Citizen." Developed and sponsored by the Center for Civic Education, it was launched in California in 1992 and expanded to national usage in 1995. The program is created specifically for middle school students and involves them in the civic life of their community. "Project Citizen" has been evaluated by a comprehensive, eight-month study conducted at the University of Texas. The research report indicated several positive outcomes of the program. In addition, "We the People Project Citizen" is a flexible program that can fit into many classroom settings. (JH)

Identifiers—Nebraska

This evaluation progress report for the budget period October 1 1996-September 30, 1997 describes the Connections Project within the Seward, Nebraska, public schools. The project provided four major activities to help Nebraska middle and high school teachers, mentors, and community members enhance student learning through integrated curricula supported by technology. The activities included professional development for teachers to support their use of integrated curriculum and technology, curriculum development activities, community connections programs, and statewide and national dissemination of 400 project curriculum models and resources through a website and CD-ROM. The project was intended to increase the capacity of educators to teach effectively through integrated curriculum reflecting Nebraska frameworks, the creation of a cadre of 600 teachers able to help colleagues in effective use of curriculum integration and technology, improved achievement by high risk students, and creation of a national and statewide learning community of middle and secondary school teachers. Attached to the report (and comprising the bulk of the report) are copies of project planning, funding, implementation, and evaluation materials. (SM)

Identifiers—India, *Professionalism, Professionalization of Teaching, *Teacher Knowledge
Education provides the opportunity to face social change, and a teacher's role in this process is significant. Until recently, teacher expertise was defined only in terms of knowledge of the subject taught, and teaching itself was not considered a professional activity. This paper describes the entailment of a teacher's profession, examining the difference between professionalism and amateurism. After discussing the importance of integrity in teaching and the relationship of integrity to professionalism, the paper explains the need to have a strong knowledge base in order to move forward and improve. If teachers do not equip themselves with the necessary knowledge and attitudes about change, they will be left behind as change occurs. Teachers are the key to quality education and must be familiar with current educational technology (e.g., tele-access and virtual publishing). Knowledge can be categorized into two series of distinctions: (1) public knowledge, which is necessarily explicit, and personal knowledge, which can be explicit or tacit; and (2) and propositional knowledge, which is "knowing that"; procedural knowledge, which is "knowing how"; and images and impressions, which are held in memory but not represented in propositional form. There are four kinds of processes which contribute to professional performance: processes for acquiring and interpreting information, skilled behavior, deliberate processes, and meta processes. (SM)

Identifiers—Lesley College MA

This paper describes college-school partnerships between Lesley College, Massachusetts and surrounding local schools. The partnerships fall into three categories: 1) training of preservice teachers in intensive, 1-year, field-based clinical masters programs, where coursework and field experience are integrated in an onsite clinical model; 2) professional development of teachers and facilitation of school change; and 3) Professional Development Schools (PDSs) engaged in simultaneous renewal

of the school and the college. In order to sustain and support these partnerships, new structures and roles have been created. The overriding structure for sharing across partnerships is the PDS/Partnership group, comprised of representatives from the various collaborative models, which meets monthly. Most of the models have like-group meetings as well as larger collaborative meetings, so opportunities exist for conversations with similar and different types of partnerships, thus creating a network of networks. New roles to support the partnerships have placed faculty and administrators in different positions. Collaborating teachers and schools are encouraged to cooperate and share ideas in order to make the partnerships work. The Lesley College partnership proposes that PDSs are not the only model worthy of implementation, and that in fact, a variety of collaborative partnerships will better meet the needs of all constituencies and lead to educational renewal. The attachments contain descriptions of specific partnership programs. (Contains 16 references.) (SM)

Identifiers—*Centers of Pedagogy

This book, designed for provosts, college deans, school leaders, and university faculty, provides guidance on achieving transformation in teacher education through a structural innovation called a "Center of Pedagogy." The book provides a rationale and illustrations of ways to build bridges among the arts and sciences, education, and partner schools to create a faculty devoted to strengthening teacher preparation and schooling. The book examines a growing movement of schools and universities collaborating to break down traditional barriers and promote systemic educational renewal, offering a practical framework for advancing university-school collaboration on educational improvement. Papers draw from university deans' diverse experiences and emphasize the Centers of Pedagogy model. Featuring case examples from many successful partnership programs, this book studies policies, organizational structures, and other key conditions needed to establish such vital centers. Part 1, "The Case for Centers of Pedagogy," includes "The Roots of an Idea," "Operating Effective School-University Partnerships," and "Centers of Pedagogy: The Concept." Part 2, "Centers of Pedagogy in Practice," includes discussions of programs at Montclair State University, New Jersey; Brigham Young University, Utah; and The University of Texas at El Paso. Part 3, "Developing Successful Centers of Pedagogy," features "Crosscutting Themes: Goals, Principles, and Obstacles," and "Current Conditions, Essential Qualities, and Lessons for the Future." John Goodlad offers an afterword. An appendix contains a survey of institutions of higher education. (SM)

This book presents a theoretical basis for Professional Development Schools (PDSs) as well as practical guidance for establishing, funding, and evaluating them. It offers a comprehensive view of the role that PDSs play in today's educational renewal efforts and insights about the potential that a quality PDS can bring to learning at many levels. It explores some of the key concepts that school- and university-based educators need to consider as they work together in PDS settings. The eight chapters are (1) "Introduction: Definition, Description, and Benefits of a Professional Development School (PDS)"; (2) "Cultivating the Fabric: Conditions in Creating a PDS"; (3) "Cutting the Cloth: Forging a Common Educational Mission"; (4) "The First Layer of Clothes: Processes in Creating a PDS"; (5) "Style, Not Fad: Essential Qualities of an Effective PDS"; (6) "Keeping the Britches Up: PDS Costs and Financing"; (7) "Ensuring that There Really are Clothes: Evaluating a PDS"; and (8) "Lead On: The Leadership Imperative." The book includes an essay by John Goodlad addressing the challenges of school-university partnerships. (SM)

Document Not Available from EDRS.

Descriptors—Elementary Secondary Education, High Risk Students, *Literacy Education, Parent Empowerment, *Parent Participation, *Parent School Relationship, *Parent Teacher Cooperation, Parents, Parents as Teachers, *Personal Narratives, Reading Skills, Teachers

This book discusses parent-school cooperation, suggesting that parent stories are an effective tool for accessing knowledge to benefit parent-teacher relationships. The book defines stories as narratives gained from open-ended conversations and/or interviews, where parents answer questions that illuminate traditional and nontraditional early literacy activities in the home. The book offers a step-by-step approach to creating parent story programs, sample questions, case studies, and guidelines on collecting and interpreting data. Chapter 1, "Mapping the Terrain," discusses why parents and teachers are not partners, summarizes relevant literature, and introduces parent stories. Chapter 2, "At-Risk Students and Parental Involvement," includes teachers' descriptions of at-risk students and considers difficulties in establishing conversations with such parents. Chapter 3, "Collecting Parent Stories," discusses types of questions that teachers have asked previously and suggests that they were one-dimensional, introducing the context and development of the interview questionnaire and sharing the questionnaire. Chapter 4, "Making Sense of Parent Stories," examines the process of extrapolating salient information from conversations based on parent interviews and provides an

action plan to further guide conversations with parents and develop instructional plans for students. Chapter 5, "Implications of Parent Stories," discusses how teachers can seek help outside the school by creating a resource file, using a parent narrative to discuss what agencies and organizations teachers can access when students' difficulties are beyond their control. Identifiers—Minnesota, Teacher Knowledge

This book argues that the current process for teacher licensing does not always guarantee competence in the classroom, and it offers advice on how to prepare and evaluate aspiring teachers for the challenges of their profession. It places Minnesota's experience in the context of current reform efforts and suggests that developing and requiring a meaningful license to teach will be crucial for ensuring that teachers have the necessary knowledge for 21st-century schools. The eight chapters are as follows: (1) "Licensing Teachers: The Need for Change"; (2) "What Teachers Need to Know and Be Able to Do"; (3) "The Need for New Assessments in Teaching"; (4) "New Assessment Strategies in Teaching"; (5) "An Architecture for a Licensing System"; (6) "Developing Prototype Assessments for Licensing"; (7) "The Internship"; and (8) "Implementation Concerns." The six appendixes contain Minnesota's Vision for Teacher Education; Model Standards for Beginning Teacher Licensing and Development—Interstate New Teacher Assessment and Support Consortium; Minnesota Licensure Standards for Teachers of English and Language Arts Sample Questions for an Examination of Teaching Knowledge; Secondary English-Language Arts Performance Assessment; and Code of Ethics for Minnesota Teachers. This study examined whether the effects of collaboration between schools and higher education would persist 1 year after discontinuation of an action research project. Participants were teachers and other district personnel who had completed an action research seminar the previous year. They completed a survey that compared their present attitudes toward research and research issues with those that they held prior to the seminar. The survey also had them reflect on their experiences and the skills they developed during their action research

projects, examined how their participation had affected their classroom practices, and investigated how they integrated the new skills, especially the use of technology, that they had learned into their practice. Data analysis indicated that 1 year later, participants perceived themselves as being capable of both consuming and creating research that was meaningful and valuable. Teachers had heightened awareness of the need to gather data systematically before drawing conclusions. The project affected how they talked about their classroom practice and the activities in which they engaged to improve their own teaching and their students' learning. They appeared to have developed attitudes that enabled them to apply theory to practice in ways that had value for them and their students. Teachers were more comfortable accessing information databases on the World Wide Web. (Contains 14 references.) (SM)

This Fastback provides a guide for developing a partnership between the student teacher and the cooperating teacher in order to make student teaching a rewarding experience for all involved. It explains that the relationship between the student teacher and the cooperating teacher needs to be one of collaboration and mutual respect in order to ensure that the experience benefits the student teacher, the cooperating teacher, and the students in the classroom. Many factors influence this relationship, including planning, feedback, honesty, and guidance. The chapters focus on the following topics: "Preparing for Student Teaching," "Building a Good Relationship," "Developing the First Lesson Plan," "Giving and Receiving Feedback," and "Concluding the Student Teaching Experience." Each section presents information on the role of the cooperating teacher and the role of the student teacher in various situations. (Contains 11 references.) (SM)

The Benefits of Teaching Small Classes Perceived by Chinese Urban School Teachers.

Pub Date—1998-02-00

Note—16p.; Paper presented at the Annual Meeting of the Eastern Education Research Association (22nd, Hilton Head, SC, February 24-27, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, *Class Size, *Classroom Environment, Classroom Techniques, Elementary Secondary Education, Foreign Countries, Questionnaires, *Small Classes, Teacher Attitudes, Teacher Student Relationship, Teachers, Urban Schools

Identifiers—China

A survey with open-ended questions investigated the attitudes of 54 urban Chinese teachers about issues related to the functions and benefits of having small classes (for both teachers and students). Findings indicated that most of the urban Chinese teachers preferred teaching small classes. While

they perceived small class size as a beneficial factor in certain respects, they did not believe that students in smaller classes would necessarily have better achievement. They believed that small classes facilitated more individualized help from teachers, more student-teacher interactions, better classroom management, and reduced teacher workload. They also believed in teachers encouraging and creating competition among students, which they regarded as important for students in large classes in order to attain higher achievement. The teachers regarded external influences and the school environment as important factors in learning. They regarded peer help as important to student success. Some cultural differences between U.S. and Chinese teachers were found. An appendix contains the questionnaire (translated into English). (SM)

Frameworks for Summative and Formative Evaluation of Diverse PDS Sites.

Pub Date—1999-04-00

Note—25p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Canada, April 19-23, 1999).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*College School Cooperation, Elementary Secondary Education, Evaluation Methods, Formative Evaluation, Higher Education, Preservice Teacher Education, *Professional Development Schools, *Program Evaluation, Rural Schools, Summative Evaluation

Identifiers—Alabama, Auburn University AL

This article presents the insights gained by individuals involved in designing and implementing an evaluation system for a coalition of Professional Development Schools (PDSs) in rural Alabama. The article begins with a brief overview of the history of PDSs, with a particular emphasis on issues related to establishing quality indicators and judging effectiveness. It discusses concerns about evaluating PDS efforts. Next, it presents a detailed description of the context and discusses how the system has been used to reform, inform, and transform both institutions and professional relationships. In discussing how to create a comprehensive system for evaluating PDS efforts, it looks at the background and context of Auburn University's PDS efforts, discusses the creation of quality indicators, and examines the design of the evaluation system. The article explains how to use evaluation for future growth and concludes with a set of assumptions to consider when designing a PDS evaluation system. (Contains 27 references.) (SM)

Descriptors—*Computer Uses in Education, *Educational Technology, Elementary Secondary Education, Higher Education, Information Technology, *Schools of Education, *World Wide Web

Identifiers—*Cyberspace

This paper discusses the use of the World Wide Web (WWW) by schools, colleges, and departments of education (SCDEs), focusing on such topics as the applications of online courses, program evaluation for distance learning, and future integration of educational technology in teacher education curriculum. The paper also discusses the development of a website that will catalog the innovative uses of the WWW by members of the American Association of Colleges for Teacher Education. Information is placed in the context of social issues generated by

the use of information technologies. The paper explains that most schools of education currently use the WWW in a variety of ways. The paper provides a 1999 review of cybercasting SCDEs, a listing of exemplary features on SCDE webpages for 1999, and a listing of additional online review sites. It makes four conclusions about the various SCDE websites and suggests that in designing a website for an SCDE, clarity of navigation is essential. (SM)

Instructional Scaffolding Intervention and Concept Mapping Outcomes among Diverse Learners in a Pre-Service Educational Psychology Course: A Model for Developing Expertise in Writing Expressions of Conceptual Understanding.

Pub Date—1999-04-00

Note—40p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, College Students, *Concept Mapping, Elementary Secondary Education, Essays, Feedback, Higher Education, Introductory Courses, Knowledge Level, Learning Strategies, Preservice Teacher Education, Psychology, Student Teachers, Teaching Methods

Identifiers—*Scaffolding

This study evaluated the effects of instructional scaffolding interventions (ISI) on preservice teachers' knowledge structures (e.g., concept maps) and short essay responses over time. Participants were 60 preservice teachers from two universities who were enrolled in one of three introductory psychology courses. One course was used as the experimental group, and the other courses became the comparison groups. ISI interventions consisted of a series of guided informational feedback sessions, following concept mapping and writing activities. The interventions were initiated in the experimental group to support learning that would enable higher levels of short essay responses, particularly among lower achieving students. Short essay question sheets were used to assess participants' written expressions of conceptual understanding of motivation theory. A three-group, multivariate repeated measures design was used to compare the knowledge structure and short essay responses of students in both conditions. Seven criteria were used to judge the quality of each concept map. Results indicated that students' declarative and procedural knowledge, as well as metacognitive skills, developed. The expert-novices had a more developed knowledge of subject matter content, they knew how to represent their knowledge when engaged in a concept mapping task, and they were more aware of the task demands and the audience when engaged in a writing task. The appendixes present examples of concept maps and short essay responses, examples of students' concept maps with other students' feedback comments, and examples of collaborative concept maps. (SM)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Classroom Environment, *Classroom Techniques, Cultural Differences, Curriculum Development, *Diversity (Student), Educational Change, Elementary Secondary Education, Student Needs, Teacher Expectations of Students, Teaching Methods

Identifiers—*Differentiation

This book offers a solution to teachers who work with students of diverse backgrounds, readiness and skill levels, and interests. The book describes a way of thinking about teaching and learning called differentiated instruction. Differentiated instruction means that teachers begin where students are rather than the front of a curriculum guide, and they accept and build upon the premise that learners differ in important ways. The 10 chapters focus on the following: (1) "What is a Differentiated Classroom?" (2) "Elements of Differentiation," (3) "Rethinking How We Do School—and for Whom," (4) "Learning Environments that Support Differentiated Instruction," (5) "Good Instruction as a Basis for Differentiated Teaching," (6) "Teachers at Work Building Differentiated Classrooms," (7) "Instructional Strategies that Support Differentiation," (8) "More Instructional Strategies to Support Differentiation," (9) "How Do Teachers Make it all Work?" and (10) "When Educational Leaders Seek Differentiated Classrooms." Three of the chapters describe actual lessons, units, and classrooms with differentiated instruction in action, examining elementary and secondary classrooms in nearly all subject areas to show how real teachers turn the challenge of differentiation into a reality. An appendix presents two models to guide differentiated instruction. (Contains 84 references.) (SM)

Descriptors—Educational Environment, Elementary Secondary Education, Foreign Countries, Higher Education, Preservice Teacher Education, Student Teachers, *Teacher Attitudes

Identifiers—Concerns Analysis, *Taiwan, Teacher Concerns Checklist (Parsons and Fuller)

This study identified concerns of teachers in Taiwan and contrasted concerns of these teachers with the 56 concerns which comprise the Teacher Concerns Checklist (TCC), Form B, developed in the United States. A total of 294 teachers (155 preservice teachers and 139 inservice teachers) completed a Chinese version of the Survey of Teacher Concerns. The survey asked for demographic information, provided a definition of teacher concerns, then asked what issues concerned them about becoming or being a teacher. Respondents listed their concerns according to level of concern. Data analysis indicated that there were a total of 149 areas of concern. Preservice and inservice teachers generated similar statements of concern in 53 areas, differing considerably in level of concern in six of the areas. Both groups were concerned about 18 areas not included in the TCC, mainly related to traditional Chinese culture, educational reform, personal welfare of teachers, and the contemporary societal environment in Taiwan. Teachers in Taiwan expressed concern about 18 areas contained in the TCC. Overall, teachers were highly concerned about too many instructional duties; students' morals and behaviors; students' academic grades; students' safety; having proper and enough instructional equipment; instructional materials not being appropriate; students' attitude toward learning; communication with parents; and having opportunities for inservice training and/or advanced study. The survey of teacher concerns and

areas of concern identified by teachers are appended. (Contains 23 references.) (SM)

A Double Method Approach for a Double Need: To Describe Teachers' Beliefs about Grade Retention, and To Explain the Persistence of These Beliefs.

Pub Date—1999-04-00

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Academic Failure, *Attitude Change, Elementary Education, Elementary School Students, Elementary School Teachers, Foreign Countries, *Grade Repetition, Kindergarten Children, Preschool Teachers, Student Promotion, *Teacher Attitudes

Identifiers—Quebec

This study used a double method approach to examine Quebec kindergarten and elementary school teachers' beliefs about grade retention. The research combined a quantitative approach, in which 227 teachers responded to a questionnaire, with a qualitative study of a selected sub-sample of 12 teachers holding opposite beliefs about grade retention. Analysis of the questionnaire data indicated that teachers at all grade levels believed that retention was an acceptable school practice and an effective means of preventing students from facing daily failure in the next higher grade. Most teachers believed that retention did not harm students' self-concept, though they were not sure about this effect on students in higher grades. The interviews offered an explanation of the persistence of teachers' beliefs about retention. The results found that beliefs were rooted in the culture of the school curriculum. Those who believed in retention felt that schools should reach the goal of instruction rather than global development of all students. They believed that programs should remain the same for all students, and groups of students should be formed homogeneously. They had a tendency to use summative rather than formative evaluation. (Contains 20 references.) (SM)

Teacher Thinking and Student Diversity.

Pub Date—1999-04-23

Note—31p.

Pub Type—Information Analyses (070)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, Context Effect, *Diversity (Student), Educational Change, Elementary Secondary Education, Higher Education, Preservice Teacher Education, *Teacher Attitudes, Teacher Effectiveness, Teacher Expectations of Students, Teachers, Teaching Experience

This review investigated the available literature on diversity and its relationship to teacher thinking. The literature review produced 36 studies, from which five categories emerged: beliefs teachers hold about student diversity and student performance; effective teaching in diverse settings; the impact of teacher experience on teacher cognition and practice; the impact of context variables on teachers' responsiveness to diversity; and the impact of preservice education on teachers' beliefs and practices. The paper discusses each of the five categories in detail and closes with a discussion of the implication for theory and practice. Implications from the review suggest that teachers come with distinct beliefs and conceptualizations about diversity. These beliefs influence what teachers know, and the environment in which they work contributes to the implementation of classroom curriculum and policy. Principals can influence teachers' self-efficacy, commitment, and collegiality and be catalysts for change. These factors can contribute to an inclusive school environment that promotes diversity. Educational reform that addresses the needs of diverse students must examine what teach-

ers know and the environment in which they work. (Contains 48 references.) (SM)

Descriptors—Elementary Secondary Education, *Excellence in Education, *Field Experience Programs, Higher Education, Preservice Teacher Education, Student Teachers, Student Teaching, *Teacher Certification, Teacher Competencies

Identifiers—Ohio, Wright State University OH

This paper provides an overview of the components of Wright State University's (WSU's) present teacher preparation program and addresses the changes envisioned with Ohio's recently approved licensure programs. The paper explains how WSU's current program offers field experiences in three phases. Student teachers have the opportunity to work under different conditions in a variety of settings, gaining more teaching time as they gather experience. The paper also presents data from a student teaching survey and examines how best practices in the area of field experiences are being implemented in WSU's teacher preparation program. A survey was distributed to past and current student teachers to assess the impact of the WSU's field experience sequence. Data from 50 surveys indicated that most of the respondents felt positive about their ability to fill the role of a novice classroom teacher following their field experiences. They felt that the cooperating teacher and exposure to the real world of teaching made the program beneficial to them. (Contains 10 references.) (SM)

Descriptors—Educational Change, Educational Improvement, Elementary Secondary Education, *Faculty Development, Foreign Countries, Higher Education, *Inservice Teacher Education, *Open Education, *Politics of Education, Program Development, *Teacher Improvement, Teachers

Identifiers—*Albania

This paper focuses on the ongoing development of an inservice teacher education program for teachers in Albania following the downfall in the early 1990s of a repressive totalitarian regime. The Kualida project's name is an acronym based on the Albanian words for training, distance, and teachers and is very close in sound to the Albanian expression for quality. The project was one of the first initiatives to address the challenge of restructuring teacher education in that part of the world, and it remains unique in the southern Balkans in the way it utilizes open learning methodologies for inservice training. The first section of the paper examines research currently occurring regarding the history of teacher education in Albania and outlines the historical context in which the program is being developed. The second section presents the fieldwork and findings of the program evaluation, identifying three distinct but interwoven phases in the program: the context of criticism, the context of discovery, and the context of classroom practice. The paper concludes by formulating some key issues for those involved in the professional development of teach-

ers through open learning. (Contains 32 references.) (SM)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Computer Uses in Education, Educational Change, *Educational Technology, Elementary Secondary Education, Foreign Countries, Higher Education, *Online Systems, *Open Education, Preservice Teacher Education, Teachers, *Telecommunications

This paper argues that over time, future teachers will be offered and participate in more developed forms of professional development than is currently expected. The professional development will be significantly based on their own and local schools, and online electronic communication will be an important aspect of this increasingly international experience. Given this scenario, the paper argues that all forms of flexible and open learning will play increasingly more significant roles in teacher education. The paper suggests that traditional institutions developed around teacher education to serve the needs of the 20th Century are wholly inadequate for the 21st Century; the implicit and explicit models of development are insufficient to meet the changed circumstances of most national contexts; and developing a research agenda to inform the processes of institutional change and rebuilding is an urgent priority. The paper explores the scenario for development by emphasizing the interrelated but contrasting movements toward: globalization of debate provided by the emergence of new interactive technology; localization of action through giving greater prominence to making the school a more central site for learning in teacher education; and emergence of new forms of professional communities of practice working through new modes of communication. The paper concludes by exploring key dilemmas that will occur in the transformation of teacher education and institutions of teacher education in the coming decades. (Contains 54 references.) (SM)

Descriptors—Adapted Physical Education, Athletics, Body Composition, Cardiovascular System, *Disabilities, Elementary Secondary Education, Inclusive Schools, Life Style, Mainstreaming, Muscular Strength, *Physical Activities, *Physical Activity Level, *Physical Fitness, Recreational Activities, Regular and Special Education Relationship

Identifiers—Flexibility (Psychomotor)

Historically, the approach to physical activity for people with disabilities has been couched in medical rationale and focused on rehabilitation. This does not account for physical activity for the joy of it as in play, exercise to improve or maintain fitness, or activity required in employment. The new paradigm of healthy, active lifestyles for people with disabilities is one of inclusion and integration.

Today, adapted physical education programs in the schools include games, sports, rhythms, and aquatics suited to the individual needs, capabilities, and limitations of students with disabilities. This paper focuses on the benefits of physical activity and physical fitness for people with disabilities, the challenges to becoming physically active, and the effects of disabilities on health-related fitness components (cardiovascular fitness, muscular strength, flexibility, and body composition). The paper also discusses how communities can promote physical activity and fitness programs for people with disabilities. It examines the move to inclusive education for students with disabilities, and it considers issues related to sports for people with disabilities. A list of pertinent professional organizations is included. (Contains 25 references.) (SM)

Descriptors—Cultural Awareness, Diversity (Student), Educational Change, Elementary Secondary Education, Excellence in Education, Higher Education, *Preservice Teacher Education, *School Restructuring

Identifiers—University of Idaho

The College of Education at the University of Idaho (UI) is embarking on the first year of a project to restructure its teacher education program and refocus it to reflect national standards and place K-12 students at the center of preservice learning. Teacher education students are being prepared to meet the needs of school students through an inquiry-based program that incorporates self and learner examination, competent interaction with the knowledge base, habits of skilled inquiry and reflection, and professional and leadership development. Service learning is integrated into coursework. The program includes systematically designed field experiences culminating in a 1-year internship that will serve as a starting point for continuing professional development. The core experiences are based on: emphasis on learners, emphasis on self as a professional, emphasis on pedagogical constructs, and emphasis on school, community, and instructional context. Restructuring will occur in four phases: Diverse Learners in School and Social/Cultural Contexts; Pedagogical Development I (Creating a Learning Climate); Pedagogical Development II (Planning and Assessing Teaching and Learning); and the Teacher As Leader in School and Community Cultures. This paper provides details on the implementation of Phase I. (SM)

Descriptors—*Discussion (Teaching Technique), *Elementary School Mathematics, Elementary School Students, Elementary School Teachers, Grade 6, Intermediate Grades, Mathematics Instruction, Mathematics Teachers, Pedagogical Content Knowledge, Student Behavior, *Student Participation, *Teacher Influence, Thinking Skills

Identifiers—Teacher Knowledge

This study used a sociolinguistic and micro-ethnographic approach to examine whether the setting of a mathematics task had an impact on the type and

quality of classroom discourse, and it described the teacher's conflicts and resolutions in facilitating student discourse in a sixth-grade mathematics classroom. Data collection occurred from January to February of 1997. Twelve students in a suburban Maryland elementary school participated. The students were presented with three 2-week units over the 6-week study. They worked in groups of four and were switched to different small groups after each unit was taught. They applied their mathematical knowledge to complete hands-on geometry investigations. The researcher videotaped students as they performed activities in each of three task settings: applied, integrated, and abstract. The students completed three interviews (one after each unit). Data analysis examined students' participating behaviors and factors influencing the amount and quality of student discourse. Results found five types of participating behavior (giving information, asking or requesting information, directing others, helping others, and agreeing or disagreeing with others). Teacher variables significantly influenced the types of participating behavior. Variables included teacher pedagogical content knowledge, teacher questioning strategies, use of instructional strategies, and classroom norms. The quality of student discourse depended on the background knowledge students could apply to the task. (Contains 21 references.) (SM)

Descriptors—*Faculty Workload, Foreign Countries, High Schools, *Job Satisfaction, Secondary School Teachers, *Stress Variables, Student Behavior, *Teacher Attitudes, *Teacher Burnout, Teacher Morale, Teacher Motivation, Teaching Conditions

Identifiers—Hong Kong

This study investigated factors that affected stress, burnout, and job satisfaction among Hong Kong high school teachers. First, the researchers interviewed former Hong Kong teachers to determine possible teacher stress sources. On the basis of their suggested list of stress sources, the researchers created a questionnaire that included items specific to the Hong Kong situation. The six teacher stress sources were: students (misbehavior and undesirable attitudes); others (supervisors and inspectors); curriculum (exam demands); duty (nonteaching duties); teaching (time constraints and work output); and recognition (lack of recognition for teaching and administrative tasks). The three teacher burnout constructs were stress arousal, energy conservation, and exhaustion. A group of 259 high school teachers from Hong Kong responded to the survey, which examined sources of stress, burnout, and job satisfaction. Data analysis indicated that all six of the stress sources significantly related to all of the burnout outcomes. Among the six stressors, teacher workload was the strongest determinant of teacher burnout. The students and others factors had the strongest impacts on job satisfaction. (Contains 42 references.) Descriptors—*Curriculum Development, Educational Change, *Educational Innovation, Foreign Countries, Higher Education, Interdisciplinary Approach, Politics of Education, Student Participation

Identifiers—*Knowledge, *Malta

This monograph contains a case study of a controversial curricular innovation in Malta: the introduction of a subject called Systems of Knowledge at the postsecondary education level. The first part of the case study provides a historical interpretation of how Systems of Knowledge came into existence. The second part of the case study presents a detailed review of the present curriculum and examines issues that have arisen. The last part of the case study presents a discussion about how to further develop the subject. The chapters are as follows: "Introduction," "The Introductory State: 1987-89," "The Original Curriculum," "First Reactions, Results, and Responses," "Continuing Difficulties," "Confronting the Challenges," "A New Curriculum," "The New Syllabus," "The Three Core Modules," "The Teachers' Guide," "The Projects," "Communication Skills," "Interdisciplinarity," "Challenges and Problems in Teaching Systems of Knowledge," "Student Participation in Curriculum Development," "Future Development: Suggestions and Proposals," and "Conclusions." Descriptors—*Educational Research, Elementary Secondary Education, English, Generalization, Literacy Education, Personal Narratives, Research Methodology, Teacher Attitudes, *Teachers

Identifiers—*Life History Method, *Teacher Thinking

This paper describes how one researcher's understanding of life history research evolved while conducting research with a high school English teacher. The life history examined the history and evolution of the teacher's beliefs about literacy and how those beliefs related to her teaching practices throughout her career. The paper begins by explaining what life history research is, then it elaborates on two experiences that helped make sense of life histories for the researcher. The first experience was around the issue of life history as an artistic interpretation (following an experience in an art museum). The second experience was a troubling conversation with a former mentor about what constituted educational research and why life history research was controversial as a topic. The paper suggests that life history and narrative research can be as robust as or more robust than quantitative studies in terms of trustworthiness, and it notes that it can produce knowledge or insights that could be generalized to other teachers. The paper concludes by arguing for the importance of life history research. (Contains 58 references.) (SM)

Supporting Systematic Change through Action Research.

Pub Date—1999-00-00

Note—12p.

Pub Type—Reports - Descriptive (141)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Action Research, Classroom Research, College Faculty, *College School Cooperation, Collegiality, *Educational Change, Elementary Education, Elementary School Teachers, Higher Education, *Partnerships in

Education, Preservice Teacher Education, Public Schools, Student Teachers, *Systems Approach, Teacher Attitudes, *Teacher Researchers

Identifiers—Indiana University South Bend, *Systemic Educational Reform

This paper examines how a series of action research projects, supported and guided through a university-public elementary school partnership program, began. It also presents the content and impact of the action research projects from the voices of a university professor, classroom teacher, and principal. The partnership promoted study groups which involved preservice and inservice teachers and were led by university education faculty. The groups explored such topics as multiple intelligences, block scheduling, emotional intelligence, inclusion, literature-based reading programs, and cultural awareness of diverse students. The preservice and inservice teachers worked on their action research projects by focusing on five areas: problem formation, data collection, data analysis, reporting the results, and action planning. Participants found the projects exciting and rewarding. The action research helped create systematic change in teachers' attitudes about themselves, their teaching, and their teaching abilities. It also helped improve student learning as teachers researched new areas, improved teacher effectiveness as teachers experimented and reflected on educational innovations, contributed to teacher professional development as they shared what they learned with colleagues, and helped teachers overcome isolation. Identifying and Addressing Challenges Encountered by Educators of Aboriginal Children in an Urban Setting.

Pub Date—1999-04-00

Note—23p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Administrator Attitudes, *Canada Natives, Change Strategies, *Cultural Awareness, Cultural Differences, Diversity (Student), Elementary Secondary Education, Foreign Countries, *Indigenous Populations, Minority Group Children, Parent School Relationship, Parents, Students, Teacher Attitudes, Teachers, *Urban Schools

Identifiers—Alberta

This study examined challenges that Canadian educators faced when teaching aboriginal students in a large urban school. The study involved the school's principal, teachers, counselors, and coordinators of Aboriginal student programming. Participants, who were Aboriginal and Caucasian, completed semistructured interviews that examined personal information, challenges to teaching Aboriginal students, and suggestions for improvement. Data analysis indicated that challenges were directly influenced by students, parents, educators, and administrators. Most of the challenges were task-related rather than personal. Aboriginal and Caucasian respondents agreed on most of the challenges. Students' preparedness for school and inability to adapt to the school structure were challenges that were especially relevant. Participants agreed that Aboriginal students learned in unique ways which educators needed to understand and work with. Parental distrust of mainstream education was a significant challenge. Challenges related to educators and administrators were associated with lack of preparedness for diverse students, cultural conflict, and district disrespect for the school. Most of the strategies suggested by respondents treated symptoms of the challenges rather than the causes. Aboriginal and Caucasian educators developed their strategies differently. The paper makes recommendations for practice and for further research. An appendix provides the interview schedule. (Contains 33 references.) (SM)

Teacher Action Research as Professional Development in Schools: Four Paths Toward Change. School Wide Inquiry: A Self-Study of an "Outside" Teacher Researcher.

Pub Date—1999-04-00

Note—20p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Action Research, College Faculty, College School Cooperation, Educational Change, Educational Research, Elementary Secondary Education, *Faculty Development, Higher Education, Inservice Teacher Education, Partnerships in Education, Preservice Teacher Education, Self Evaluation (Individuals), Teacher Collaboration, *Teacher Improvement, *Teacher Researchers, Teachers

This paper examines a university professor's roles in and experiences with teacher action research to promote professional development. The first section discusses the importance of linking preservice teacher action research investigation with inservice action research teams in schools. It explains that this approach begins with a structure and organization for partnership among experienced and inexperienced teacher researchers. The second section focuses on mutual inquiry on an identified curricular theme or topic, which is taught at both the university and school level. This section explains that the strategy begins with the substance and not the procedure for doing research. The third section discusses how to facilitate the partnering of institutions by bringing teachers together across school systems for shared action research. The paper concludes that teacher action research has provided a forum for self-study and ongoing analysis of paths toward change in schools. It suggests that it is important to find and articulate the bridges between individual teacher research and large-scale action research. (Contains 20 references.) (SM)

Education Is a Human Right. EI Barometer on Human and Trade Union Rights in the Education Sector, 1998.

Education International, Brussels (Belgium).

Pub Date—1998-00-00

Note—362p.

Available from—Education International, 155, Bd Jacquemain, 1210 Brussels, Belgium; e-mail: educint@ei-ie.org

Pub Type—Reports - General (140)

EDRS Price — MF01/PC15 Plus Postage.

Descriptors—Access to Education, *Child Labor, Children, *Civil Liberties, Elementary Secondary Education, *Equal Education, Equal Opportunities (Jobs), Foreign Countries, Higher Education, Teacher Associations, *Unions

Identifiers—Education International (Belgium)

This report focuses on the extent to which the right to education is available to children, young people, and adults and the extent to which educators enjoy fundamental human and trade union rights set out in the major international deliberations and conventions. The report seeks to acknowledge the contributions of teachers and education support staff. For each country where Education International has members, the report examines these issues and also highlights the extent of child labor. The appendix presents information on the United Nations Convention on the Rights of the Child and various International Labor Organization Conventions related to child labor and labor rights (e.g., collective bargaining, equal pay, employment discrimination, minimum age, and indigenous and tribal peoples). Workshop on Body Image: Creating or Reinventing a Positive Body Image.

Pub Date—1999-03-00

Note—17p.; Paper presented at the Native American Women and Men's Wellness II Conference

(San Diego, CA, February 28-March 4, 1999). Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Body Image, Body Weight, Cultural Influences, Eating Habits, Females, Males, Self Esteem

This paper examines the culturization of body image and the impact of body image on women and men, noting that the strict definition of body size has made many women and men dissatisfied with their bodies. The first section defines body image and culturization, explaining how the current media images put tremendous pressure on men and women that was less present throughout history. The second section examines historical changes in body image, noting that historically, the standard for beauty in women and men has varied significantly. The third section discusses the importance of a good body image and how it relates to overall self-esteem and self-confidence. The fourth section focuses on body image distortion, explaining that a distorted body image means that the individual perceives him or herself to weigh more or be larger than actual measurements. The fifth section presents practical implications, in the form of questions and answers, related to losing weight, self-esteem, dieting, fat consumption, reasons to measure weight or percent fat, and improving body image. (Contains 29 references.) (SM)

MacDonald, Judith B.

When Mothers Become Teachers: Effects of the Mothering Experience on Prospective Teachers.

Pub Date—1999-04-00

Note—21p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, Females, Higher Education, *Mothers, Parent Attitudes, *Preservice Teacher Education, Student Characteristics, Student Teacher Attitudes, Student Teachers

Identifiers—*Dual Role

This study identified how mothering knowledge influenced students' development in becoming teachers and explored how becoming a student and prospective teacher affected students' perspectives as parents. Participants were preservice teachers who were also mothers. All participants were undergraduate and graduate students in a New Jersey teacher education program. Each student completed an interview (or a questionnaire for those unable to be interviewed) based on questions developed following discussions with mother/students about issues that they faced. The interview addressed such areas as demographics, reasons for becoming a teacher, difficulties in mothering, mothering characteristics that influence teaching, the influence of preservice teacher education on mothering, and advantages or disadvantages of being an older student. Results indicated that for most women, being a mother was the catalyst for becoming a teacher. Students believed that they would be flexible, patient, empathetic, and sensitive to children because of their mothering experience, and that they would be more realistic in terms of giving assignments knowing how long they can take. They believed they would have a more realistic understanding of the social and familial pressures pupils face. Overall, participants were enthusiastic about being in school at this time in their lives, with the advantages outweighing the disadvantages. (Contains 21 references.) (SM)

Making Effective Use of Mentoring Teacher Programs: A Collaborative Group Action Research Approach.

Pub Date—1999-03-00

Note—18p.; Paper presented at the Annual Meeting of the National Association for Research in

Science Teaching (72nd, Boston, MA, March 28-31, 1999).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Action Research, Beginning Teacher Induction, Beginning Teachers, College Faculty, Collegiality, Educational Research, Elementary Secondary Education, Higher Education, *Mentors, *Teacher Collaboration, Teacher Researchers

This study utilized collaborative group action research to investigate the effective use of mentoring teacher programs. The research group consisted of a new content area teacher, a transferring teacher from a different state, and a university researcher. The group met initially to finalize the research question, which addressed how they could make effective use of their mentoring program, then held meetings regularly throughout the study. Individual and group meetings were audiotaped, and participants kept journals. The researchers collected baseline data on current mentoring programs, teachers' attitudes, and future plans. They talked to other teachers and administrators about the current mentoring situations, then shared that information with the group. Teachers and mentors were assigned to one another, and mentors received training through a mentoring workshop. This paper describes participants' experiences in the mentoring program, including information from their journals. It concludes that the strategies and techniques established to maintain a positive mentoring experience for all participants were successful, and the program was very effective. The main concern about the program was the distance between the mentor and protégé, since they were not in the same school. (Contains 16 references.) (SM)

Reconsidering the Relevance of Veenman's (1984) Meta-Analysis of the Perceived Problems of Beginning Teachers.

Pub Date—1999-04-00

Note—33p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Beginning Teachers, *Cooperating Teachers, Educational Research, Elementary Secondary Education, Higher Education, Mentors, *Meta Analysis, Preservice Teacher Education, *Teacher Attitudes, *Urban Schools

Identifiers—Wisconsin

This study surveyed three groups of teachers to investigate their perceptions of problems faced by beginning teachers. The study reexamined the usefulness of Veenman's (1984) meta-analysis of the perceived problems of beginning teachers. Participants were Wisconsin beginning teachers, experienced urban teachers, and cooperating teachers. The participants received mailed surveys that investigated the extent to which they believed each of several areas were problems for beginning teachers. Participants also wrote in other comments and provided demographic information. Data analysis indicated that far more experienced cooperating teachers viewed beginning teachers as having more problems than did beginning teachers or teachers near the end of their beginning career stages. Wisconsin teachers and urban teachers ranked lack of spare time, burden of clerical work, and heavy teaching loads as the three greatest problems. All of those problems focused on limited time, whereas the three greatest perceived problems in Veenman's study focused on students (discipline, motivation, and individual differences). The correlation between respondents' rank order of perceived problems and Veenman's rank order was negligible or negative for Wisconsin teachers and urban teachers, and slightly positive for cooperating teachers. This study indicates that although Veenman's work is important, it is not current and requires careful treatment. Ten tables present relevant data. (Contains 20 references.) (SM)

Teacher Education Follow-Up Study, 1999.

Pub Date—1999-04-00

Note—24p.

Pub Type—Reports - Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, Followup Studies, Higher Education, Preservice Teacher Education, Principals, Program Effectiveness, Student Teachers, Teacher Attitudes, Teacher Characteristics, *Teacher Education Programs, *Teacher Employment

Identifiers—*Central Missouri State University

This report represents the eighth Follow-Up Study by the Teacher Education Assessment Committee (TEAC) at Central Missouri State University (Central). TEAC is a centralized system of data collection and assessment that conducts and publishes results of periodic assessments and evaluations of Central's teacher education programs by soliciting input from education faculty, preservice teacher candidates, program graduates (undergraduate and graduate levels), and principals of teachers prepared by Central. Study results indicate that 79 percent of the previous year's graduating class secured full-time teaching positions within the state (as opposed to 58 percent for 1996-97 graduates). Central's teacher education graduates were employed in 177 of Missouri's 525 districts. Most students in the preservice program were female and white. Most of the first and second year teacher respondents planned on teaching 5 or more years from now. Teachers' top three areas of dissatisfaction in their current positions were salary/fringe benefits, level of support from parents and community, and opportunities for professional advancement. Fifty-eight percent of principals hiring Central's graduates who responded to the survey felt the teachers were strongly prepared for their current positions. The principals felt that methods used to evaluate teaching performance was the top area of dissatisfaction for teachers. The bulk of this report is survey materials. (SM)

Descriptors—Educational Legislation, Elementary Secondary Education, Higher Education, Public Schools, *Retirement Benefits, State Government, State Legislation, Teacher Employment Benefits, *Teacher Retirement, Teachers

Identifiers—Texas

This report presents the Teacher Retirement System of Texas's (TRS's) strategic plan for teacher retirement in the state of Texas for the years 1999-2003. The mission of the TRS is to deliver retirement and related benefits authorized by law for members and their beneficiaries and to prudently invest and manage the assets held in trust for members and beneficiaries in an actuarially sound system. Section 1 of this report presents State of Texas Strategic Elements (state vision, mission, and philosophy regarding education and teaching). Section 2 discusses Internal and External Assessment at TRS: Legislative and Historical Framework, Agency Mission and Philosophy, Core Competencies, Major Challenges, TRS Organizational Structure, Membership Base, Legislative Impact, Fiscal Attributes, Resources, Technological Developments, Summary Statement, TRS Contributions to Texas Priority Goals, and Accomplishments and Commitments. Section 3 presents TRS Strategic Goals (including objectives and strategies). The four appendices present the Strategic Planning Steering Committee, the TRS strategic planning process, projections of outcomes for 5-year planning horizon, and performance measure definitions. The Goals of Effective Pre-Service Teacher Education Candidates: A Longitudinal Study.

Pub Date—1999-04-23

Note—21p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Career Choice, Catholic Schools, Elementary Secondary Education, Graduate Study, Higher Education, *Objectives, Preservice Teacher Education, *Student Teacher Attitudes, Student Teachers, *Teacher Effectiveness

Identifiers—University of Portland OR

This study investigated whether there would be a relationship between teacher candidates' pre-admission goal statements and their subsequent performance as intern teachers. Researchers examined graduate-level preservice teachers' personal motivations and interests in applying to be teachers with the Alliance for Catholic Education (which is based on faith, teaching, and service and offers 2 years of intern teaching experience in Catholic schools). They also asked students how the Alliance fit with their personal goals and what experiences, skills, and aptitudes they would bring to teaching. They compared student teachers' responses to university supervisors' and principals' ratings of teaching performance to determine if any patterns or themes existed. Analysis of data from student teachers rated effective and less effective indicated that more effective intern teachers clearly identified career goals of becoming teachers and possessed prior successful experiences as teachers. Less effective interns considered teaching a path of service to God and others, and they did not have any appreciable experience. The researchers conclude that admissions to graduate teacher education programs should not be based solely on previous academic performance or test scores. An appendix presents the principal/supervisor rating scale. (Contains 18 references.) (SM)

Coming To Know: The Role of the Concept Map—Mirror, Assistant, Master?

Pub Date—1998-00-00

Note—15p.

Pub Type—Reports - General (140)

EDRS Price — MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Cognitive Mapping, *Concept Mapping, Elementary Secondary Education, Foreign Countries, Higher Education, Learning Strategies, Memory

Identifiers—*Reflective Thinking, *Self Regulation

This paper explains the process of creating and managing concept maps, using reflection as a focus for its argument. Section 1, What is a Concept Map?, highlights the background and definition of concept mapping, explains how maps signify virtual conceptual structures, looks at structural knowledge, provides an example of a concept map, and discusses associationism. Section 2, Self-Regulation, focuses on self-regulation, which makes individuals goal directed and helps in implementing intentionality. It also discusses self-confrontation, which is the external juxtaposition of self-concept, feelings, or beliefs with some external physical manifestations of those feelings and beliefs. Section 3, Off-Loading, explains that off-loading occurs because of the limited capacity of working memory registers. Section 4, The Process of Concept Mapping, looks at phases in the construction of a concept map. Section 5, Mirror, Assistant or Master?, explains that this paper provided a tentative framework for the process involved in creating and maintaining concept maps, and it discusses the implications for learning and instructional design. Establishing Research-Based Knowledge in Teacher Education.

Pub Date—1999-04-00

Note—26p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, April 19-23, 1999).

Pub Type—Guides - Non-Classroom (055) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Educational Research, Elementary Secondary Education, Higher Education, *Preservice Teacher Education, Program Development, *Program Evaluation

Identifiers—*Teacher Knowledge

This paper provides an approach to building research-based knowledge in teacher education through program evaluation. This approach allows results of program evaluations to be compared and contrasted and theoretical constructs developed into practical models for use in improving teacher preparation. The paper examines Yarger and Smith's 1990 framework for studying teacher education programs. Their systematic approach included: antecedents or preexisting conditions, processes or transactions, and outcomes. They considered studies that followed this systematic approach "linking studies." Yarger and Smith believed that the three components and the associated links provided a vehicle for discussing appropriate methodology for research on teacher education, implementation of teacher education programs, and needs associated with program improvement. In following Yarger and Smith's writings, it is important to determine a unifying source which can pull teacher education institutions together in a common effort to build the research-based knowledge. Important initiatives are currently underway to develop more meaningful standards for teaching. This paper examines Stake's Countenance Model of Program Evaluation, which fits closely with Yarger and Smith's paradigm, and discusses a modification of Stake's Countenance Model, which is necessary to better fit the needs of today's education programs. The paper concludes that a research base in teacher education is possible if teacher education institutions publish research findings of their program evaluations (which are developed for each specific site, include Yarger and Smith's three components, and are based on a national perspective). (Contains 21 references.) (SM)

The Knowledge Arena: A Learning Environment That Underpins Concept Mapping.

Pub Date—1999-04-23

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, April 19-23, 1999).

Pub Type—Reports - General (140) — Speeches/Meeting Papers (150)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Cognitive Mapping, *Concept Mapping, Educational Environment, Elementary Secondary Education, Foreign Countries, Higher Education, Learning Strategies, Memory, Thinking Skills

Identifiers—*Learning Environment

This paper uses a theoretical framework for concept mapping as an instance of a learning environment - the knowledge arena - and examines it against an existing framework for active learning called REAL (Rich Environment for Active Learning). The paper is intended to help in the understanding of environments for learning. Section 1 defines a knowledge arena as a virtual space where learners can operate on ideas, or concepts. This engagement involves a concept map. Section 2 describes concept maps and their use. Section 3 focuses on concept mapping and how it facilitates concept development and reflection. Section 4 examines concept mapping attributes. Section 5 defines learning environments and notes the attributes of REALs. Section 6 focuses on knowl-

edge arenas and REALs, highlighting two consequences of what can be learned by using the knowledge arena as an example of a learning environment (the knowledge arena facilitates communication, and concept mapping influences the acquisition of cognitive skills in a knowledge arena). The paper concludes that concept mapping, construed as a knowledge arena, makes a useful contribution to understanding REALs and understanding learning. Similarly, REALs provide a useful framework for understanding concept mapping. (Contains 56 references.) (SM)

Identifiers—Texas

This booklet provides a history of teacher retirement benefits in the state of Texas from 1937-97, offering highlights of important state legislation related to retirement and its benefits. In 1936, Texas citizens approved an amendment to the Texas constitution establishing a retirement system for public school employees. Enacting legislation passed by the 45th Texas legislature put the Teacher Retirement System of Texas in business in 1937. The legislation limited membership to persons employed in professional and business administration, supervision, and instruction. Over the years, membership has been extended and retirement benefits have been increased. Various changes in retirement law have provided major benefit improvements to members. Legislation has also altered how benefits are paid, how much the state contributes, member contributions, survivor payments, disability payments, and annuity increases. (SM)

Descriptors—*Alternative Teacher Certification, Elementary Secondary Education, Graduate Study, Higher Education, Mentors, *Nontraditional Education, Preservice Teacher Education, Program Effectiveness, Self Esteem, *Teacher Attitudes, Teacher Characteristics, Teacher Influence, Teachers

Identifiers—University of Portland OR

This study investigated the effect of an alternative teacher preparation program on participants' attitudes and beliefs regarding personal attributes and characteristics they possessed when they were admitted to the program. The study examined programmatic features that interns considered influential in contributing to their success as teachers. Participants were graduates of a graduate-level preservice program within the Alliance for Catholic Education who had been rated as effective teachers by supervisors, mentors, and principals via a mailed survey. They completed an 11-question, open-ended, mailed survey that discussed influences on their success in the program. Questions addressed: public persona, personal and professional growth, beliefs about learning, self-confidence, teaching skills, effect on student performance and achievement, support structures, achievement motivation,

idealism versus realism, beliefs about teaching, the value of modeling respect and honesty for students, and recognition of the value, demands, and standards of teaching. Data analysis showed four major clusters: a learning frame of mind with a healthy self-concept, support from learning communities, thinking from the learner's frame of reference, and the emerging professional. The program had a profound positive impact on attitudes and beliefs and significantly influenced persona. Many program features contributed to participants' success as teachers. Participants named support by school administrators, mentors, and university supervisors as invaluable. (Contains 37 references.) (SM)

Descriptors—Administrator Attitudes, *Diversity (Student), Elementary School Teachers, Higher Education, *Mexican Americans, *Middle Schools, Minority Group Children, Poverty, Preservice Teacher Education, Principals, Secondary School Teachers, Student Characteristics, Teacher Attitudes, Teacher Characteristics, Teacher Competencies, Teacher Qualifications, *Teacher Selection, Teacher Student Relationship

Identifiers—*Mexico United States Border, Texas

This study investigated the characteristics of principals, students, teachers and middle-grades schools located in port of entry communities along the Texas-Mexico border, examining principals' opinions about the degree to which new teachers' education and preparation experiences were appropriate. The study also examined principals' opinions about how well Texas universities prepared teachers to interact with and nurture growth in students attending these schools. The 44 participating principals completed a survey that asked for demographics on the principals, schools, students, and teachers and asked questions about the three research issues. Data analysis indicated that most of the principals were male and Hispanic, most of the teachers were Hispanic, and most of the students were Hispanic and qualified for the free lunch program. This is in contrast to most schools in the U.S. and Texas. Teacher-student ratios in large schools along the border were above the national average. Principals reported highly valuing new teachers with an understanding of themes centered around the middle school, and they wanted to see preservice teachers get more exposure to middle grades classrooms. (However, there is no certification or endorsement for middle grades in Texas teacher preparation programs.) Principals believed Texas universities adequately prepared preservice teachers, but preservice teachers needed more information about working with children and parents living in poverty. (Contains 37 references.) (SM)

Are Preservice Teachers Literate in Grammar and Usage?

Pub Date—1999-04-16

Note—11p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Communication Skills, Elementary Secondary Education, *English, Evaluation Methods, *Grammar, Higher Education, Preservice Teacher Education, *Preservice Teachers

This paper presents an instrument, the Grammar Inventory for Teachers (GIFT), that may be used to determine preservice teachers' knowledge and use of correct grammar. The paper explains that communication skills are critical characteristics of effective teachers, and preservice teachers must be competent in their knowledge and use of grammar in order to communicate effectively with students and the general public. Teachers in graduate classes

helped ascertain what grammar and usage knowledge was important for teachers to know. Researchers constructed evaluation items, and teachers were asked to affirm that the items had face validity. Four language arts instructors examined the test items and agreed that the items had validity. Researchers used the split-half method to determine the reliability of the GIFT. They administered two forms of the GIFT to 40 preservice teachers to determine the split-half reliability coefficient (.76). The final instrument measured grammatical knowledge and knowledge of standard English usage, focusing on parts of speech, sentence elements, correct use of verbs, subject and verb agreement, and pronoun usage. The paper includes a copy of the GIFT. (Contains 13 references.) (SM)

Reciprocal Teaching and Learning: What Do Master Teachers and Student Teachers Learn from Each Other?

Pub Date—1999-04-23

Note—21p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Classroom Techniques, Collegiality, *Cooperating Teachers, Discipline, Elementary Education, Elementary School Teachers, Faculty Development, *Feedback, Higher Education, *Master Teachers, Preservice Teacher Education, *Reciprocal Teaching, *Student Teachers, Teacher Improvement, *Teacher Influence

This study investigated what master teachers and student teachers learned from one another during reciprocal teaching. Data came from two exploratory case studies at elementary schools in southern California. The first study focused on the contributions of partner elementary student teachers to the professional development of their master teachers. It involved 16 elementary student teachers, their 8 master teachers, and 3 additional supervising teachers who did not have students at the time of the study. The second study involved 56 elementary student teachers at the end of their student teaching experience. It questioned what they believed were the strengths of their master teachers and how those strengths contributed to their personal professional development. The two studies spanned 1 academic year. Both studies used observation data, questionnaires, journal entries, and interview data. Findings fell into the following categories: professional development and interaction; tacit learning of how schools and classrooms ran; practice of generic and specific instructional models/strategies; translating knowledge from the disciplines into appropriate curriculum concepts, lesson planning, and assessment; practice of situational appropriate discipline; and classroom management. Student and master teachers found the partnering experiences positive and supportive and the feedback helpful. (Contains 21 references.) (SM)

Self Efficacy and Cultural Awareness: A Study of Returned Peace Corps Teachers.

Pub Date—1998-04-00

Note—59p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Diego, CA, April 13-17, 1998).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price — MF01/PC03 Plus Postage.

Descriptors—*Cultural Awareness, Elementary Secondary Education, Questionnaires, *Self Efficacy, *Teacher Attitudes, Teachers, *Teaching Experience

Identifiers—*Peace Corps

This study investigated how returned Peace Corps teachers viewed the Peace Corps experience and its impact on their self-efficacy and cultural awareness. Participants were 154 returned Peace

Corps teachers who completed a questionnaire that contained demographic questions, a self-efficacy scale, and a teacher-efficacy scale. A subset of 15 teachers were interviewed to examine cultural awareness, self-efficacy, teacher-efficacy, and the importance of the Peace Corps experience. A group of 6 teachers out of the 15 were observed in their classrooms. The observation focused on practices that were associated with high self-efficacy teachers and effective multicultural teachers. Data analysis indicated teachers ranked the Peace Corps experience highly in its effect on their self-efficacy and cultural awareness, and less highly in its effect on their teaching. The results indicate that the Peace Corps functioned as a mastery experience. The effect was robust and persistent. Returned volunteers attributed many changes to the Peace Corps, even if the experience had been more than 30 years ago. Teachers ranked the Peace Corps experience as very important in affecting their personality and somewhat important in affecting their teaching. The questionnaire is appended. (SM)

Enhancing the Profile of Teachers as Curriculum Decision-Makers: Some International Perspectives.

Pub Date—1999-04-00

Note—41p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, April 19-23, 1999).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Curriculum Development, Decision Making, Elementary Secondary Education, Faculty Development, Foreign Countries, Teacher Attitudes, *Teacher Participation, Teacher Role, Teachers

This paper presents information from a series of preliminary asynchronous international conversations across four cultural contexts that focus on enhancing the profile of teachers in curriculum decision making. The paper challenges education systems to match the rhetoric about the place of teachers in curriculum decision making with curriculum change and professional development practices. It sets a context for the preliminary conversations by addressing the place of and space for teachers in curriculum decision making, their readiness to engage in it, and the potential for them to have authentic inclusion in curriculum decision making at the classroom, school, and wider policy levels. The paper also considers the methodological framework within which the issue was developed and how the processes associated with it have developed. The three appendixes offer initial comments from participants, followup comments from participants, and an invitation to be part of the continuing conversation. (Contains 25 references.) (SM)

Peer Assistance & Peer Review. An AFT/NEA Handbook.

National Education Association, Washington, DC.; American Federation of Teachers, Washington, DC.

Pub Date—1998-09-00

Note—106p.; Prepared for "Shaping the Profession that Shapes the Future," an AFT/NEA Conference on Teacher Quality (Washington, DC, September 25-27, 1998).

Available from—American Federation of Teachers, 555 New Jersey Avenue, NW, Washington, DC 20001-2079; Tel: 202-393-8636; Fax: 202-879-4537.

Pub Type—Guides - Non-Classroom (055) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC05 Plus Postage.

Descriptors—*Beginning Teacher Induction, Beginning Teachers, Educational Quality, Elementary Secondary Education, Evaluation Methods, Mentors, *Peer Evaluation, Program Development, Teacher Associations, Teacher Compe-

tencies, Teacher Evaluation, Teachers, Teaching Skills, Unions

Identifiers—American Federation of Teachers, National Education Association, *Peer Coaching

This manual assists American Federation of Teachers (AFT) and National Education Association (NEA) affiliates interested in developing peer assistance and/or peer assistance and review programs in their local sites. The first section provides the context in which these programs are developing and their importance to union efforts to increase teacher quality. The second section presents materials regarding how best to communicate what peer programs are all about in order to develop support for the program among affiliate members and with management. The third section describes the features that must be addressed in developing a peer assistance or peer assistance and review program (e.g., who is assisted, who does the assisting, how do the programs operate, and what are the legal considerations). The fourth section discusses contract language considerations as affiliates negotiate with districts to develop peer assistance and peer assistance and review programs for professional staff. The eight appendixes present AFT and NEA policy supporting peer programs; peer mentoring and/or evaluation programs; a legal analysis of the NEA Peer Assistance and Peer Review Resolution; AFT's questions and answers regarding a union's duty to fairly represent its members; legal protections for teacher employment; peer assistance and review programs; guide to contract language; Cincinnati Public Schools peer assistance and evaluation guidelines; and contract language for peer programs. Making Standards Matter 1998. An Annual Fifty-State Report on Efforts To Raise Academic Standards.

American Federation of Teachers, Washington, DC.

Pub Date—1998-00-00

Note—175p.

Available from—American Federation of Teachers, 555 New Jersey Avenue, NW, Washington, DC 20001-2079; Tel: 202-393-8636; Fax: 202-879-4537.

Pub Type—Reports - Descriptive (141)

EDRS Price — MF01/PC07 Plus Postage.

Descriptors—Academic Achievement, *Academic Standards, Change Strategies, Educational Change, Educational Improvement, *Educational Quality, Elementary Secondary Education, State Government, *State Standards, Student Evaluation, Teachers

This annual report analyzes the quality of academic standards in the 50 states, the District of Columbia, and Puerto Rico and monitors the extent to which those standards are driving education reform. The report describes criteria used to evaluate state standards and provides commentary on each state's standards, highlighting areas of strength and pinpointing weaknesses that must be addressed to improve the standards. The report also examines: states' activities and intentions to assess whether students are meeting the standards; whether states are providing extra academic help to students who are having difficulty meeting the standards; and whether states are attaching meaningful consequences to the standards so that students and others take them seriously. Findings indicate that the standards-based reform movement is getting stronger in the states, and the overall quality of state standards continues to improve. Twenty states have incentives to motivate students to achieve a higher standard than required of all students. Recommendations for how states can strengthen their standards and develop policies to support their reform efforts are included. Two appendixes review state documents and present content resources. Pub Type—Information Analyses (070)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Educational Change, *Educational Improvement, Elementary Secondary Education, Inservice Teacher Education, *Professional Development, Teacher Collaboration, *Teacher Improvement, Teachers

This publication examines the literature on promising practices in professional development, focusing on the role of effective inservice professional development in successful elementary school reform, promising practices, and results of a survey of educators from the northwest United States. After an introduction, Section 1 discusses "Learning in Our Nation's Schools: Simple-Minded or Muddle-Headed?" Section 2 focuses on "Teaching for Understanding." Section 3 examines "Barriers to Effective Professional Development and School Reform." Section 4 discusses "Inquiry-Based Professional Development." Section 5 focuses on "Collaboration with Children, Families, and Colleagues." Section 6 looks at "Cherry Valley Elementary School, Polson, Montana." The report concludes that effective professional development is moving away from the model in which an expert transmits knowledge to teachers; is grounded in the questions and concerns of those who work closely with children; views teachers as intellectuals, leaders, peer coaches, and researchers; and allows ample opportunities for teachers and principals to engage in reflective study of teaching practices, experimentation, collaborative problem solving, and peer mentoring in a supportive climate. Two appendixes include the District Staff Development Activities Survey and data on how often teachers are included in several district-provided staff development activities. (Contains 107 references.) (SM)

Multicultural Reflection.

Pub Date—1999-02-00

Note—21p.; Paper presented at the Annual Meeting of the American Association of Colleges for Teacher Education (51st, Washington, DC, February 24-27, 1999).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Cultural Differences, *Cultural Influences, Discussion (Teaching Technique), Diversity (Student), Elementary Secondary Education, Higher Education, Multicultural Education, *Reflective Teaching, Student Teachers, *Teacher Attitudes, Teacher Collaboration, *Teacher Effectiveness

Identifiers—*Reflective Thinking

This paper examines how people reflect, individually and collaboratively, in different cultural contexts, discussing the consequences for teacher education. The paper suggests that the ways in which people reflect individually are shared across cultures, but the ways in which people reflect together are structured differently by their varied cultures, and this may have important consequences for teacher education since student teachers come from diverse cultures. After presenting research on and examples of individual and collaborative reflection from several diverse cultures, the paper concludes that teacher educators must be prepared to teach their students how to access the tools of discussion, and the teaching should be guided by various cultural considerations. The considerations include: learning to embrace one's own cultural tools for collaborative reflection; learning not to take for granted that other people share the same customs of reflection; being aware of the importance of establishing group norms for the college; welcoming the insights of other cultures into the reflective process; and meeting the challenge of learning how to share one's own understandings with people from different cultures. Collaborative Research and Evaluation in French Teacher Education.

Pub Date—1999-04-00

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, April 19-23, 1999).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—College Faculty, *College School Cooperation, Educational Research, Elementary Secondary Education, Foreign Countries, Higher Education, Preservice Teacher Education, Teacher Researchers, Teachers

Identifiers—*Collaborative Research, *France

This paper examines France's attempts, difficulties, and issues related to developing a new collaborative relationship between university-based researchers and school-based practitioners and a new evaluative policy that includes social partners. The first section of the paper introduces the theoretical background and methodology of the study. The second section discusses collaborative research and teacher education in France. The third section discusses participatory evaluation of teacher education in France. The paper highlights two main trends: 1) making trainers and teachers benefit from an actual research project, which is useful for the university and the schools; and 2) making all involved parties concerned with the analysis and evaluation of activities. A final section discusses the possible impact of the evaluation on training and education. (Contains 46 references.) (SM)

Mentoring in Adolescence: A Sociocultural and Developmental Study of Undergraduate Women and Sixth Grade Girls Paired in a Mentoring Program.

Pub Date—1999-04-00

Note—36p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—College Students, Developmental Stages, Early Adolescents, *Females, Grade 6, Higher Education, Interpersonal Relationship, *Mentors, Middle School Students, Middle Schools

This study investigated the experiences of 10 sixth-grade girls and 10 female undergraduate students, paired during the 1997-98 school year, as they took on the role of mentor or mentee in a planned mentoring relationship. A sociocultural analysis explored processes occurring on the personal, interpersonal, and community level that shaped their mentoring experiences. Organized by the university, the mentoring program paired a total of 52 female sixth graders from six middle schools with 52 female undergraduate students in their second year of college for a weekly after school mentoring program hosted by the middle schools. The undergraduates also enrolled in a 2-semester undergraduate seminar which included reflective writing, discussion, and readings about mentoring, tutoring, communication skills, and studies of adolescent girls. The experiences of the pairs were documented through observations, interviews, written reflection papers, and log sheets. Additionally, the developmental stage of each participant was assessed in both the fall and the spring using the Subject-Object interview. A sociocultural and developmental analysis of the experiences of being a mentor or mentee was constructed. The study concluded that the type of support each person in a mentoring program needed in order to feel successful taking on different roles and developing a relationship with an assigned partner varied according to her developmental stage (early or late adolescence). A Correlational Study of the Tests of Achievement and Proficiency and the Georgia High School Graduation Test in the Area of Mathematics.

Pub Date—1998-00-00

Note—49p.; Education Specialist Research Report, Mercer University.

Pub Type—Dissertations/Theses (040)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Achievement Tests, *Correlation, *High School Students, High Schools, *Mathematics Tests, Prediction, Standardized Tests, State Programs, *Test Results, Testing Programs

Identifiers—*Georgia High School Graduation Test, *Tests of Achievement and Proficiency

The purpose of this study was to determine if there is a correlation between a high school student's score on the Tests of Achievement and Proficiency (TAP) and the same student's score on the Georgia High School Graduation Test (GHS GT) in the area of mathematics. Student test scores were secured from 182 students at a middle Georgia high school in mathematics for both tests. The study reveals that a significant relationship does exist between the mathematics scores on these tests. Therefore, the results of the TAP mathematics test are predictive of the results of the GHS GT mathematics test. Appendixes contain TAP and GHS GT skills and objectives and tables of correlations for each student. (Contains 2 tables and 23 references.) (SLD)

Identifiers—ERIC Digests

This Digest lists some of the common mistakes made by young readers and suggests teaching strategies that may be useful to teachers who are preparing their classes to take standardized tests. Children must learn to use the text to pick the answer, rather than relying on memory, especially when the story is a familiar one. Teachers can help students learn to look through the text and can provide practice opportunities with easy or familiar text in a format that resembles that of the test. Teachers can also help students create a context for words that may be on a test by relating those words to their own experiences. Learning to read the questions accurately is important, as is practicing choosing the answer based on the true meaning of the questions. Teachers should also advise students not to overlook an answer choice because it contains an unfamiliar word. Students can also be taught to check their answers without reviewing every single response. In addition to teaching students these strategies,

teachers need to set a positive tone for the day of the test. (Contains four references.) (SLD)

Identifiers—ERIC Digests, *Nation at Risk (A)

In 1983 the National Commission on Excellence in Education declared the United States "A Nation at Risk" because of inadequate education. A decade and a half later, the United States is still at risk because U.S. schools are failing children. Dropout rates have declined, and college attendance has risen, but student achievement has remained flat and college remediation rates have risen to unprecedented levels. The United States is the only country in the world in which children fall farther behind the longer they stay in school. In fact, a dual school system is developing, with a widening gap between good schools and poor schools. Poor and minority children usually go to worse schools, and their families have the least power to alter bad situations. Power over the education system has increasingly concentrated in the hands of a few who really don't want change. Equal educational opportunity is the next great civil rights frontier. The main strategies for change should center on standards, assessment, and accountability and allow for pluralism, competition, and choice to ensure the best for all children. The premise of this book is that the primary purpose of classroom assessment is to inform teaching and improve learning, not to sort and select students or to justify a grade. The common principles of effective assessment are covered, and the strengths and limitations of a variety of effective approaches are reviewed. Vignettes illustrate classroom assessment in action, and guiding questions and a framework for planning classroom assessments supplement each discussion. The following chapters are included: (1) "Ongoing Assessment of Student Learning"; (2) "Large-Scale versus Classroom Assessment"; (3) "Effective Classroom Assessment"; (4) "Assessment Approaches and Methods"; (5) "Evaluation Methods and Rules"; and (6)

"Communication and Feedback Methods." A glossary is included. (Contains 23 references.) (SLD)

To make the transition from traditional assessment, which was often counterproductive, to an array of assessment applications that will be more constructive for students, teachers must expand their vision of the relationship between assessment and effective schools. Assessment must be used to inform classroom decision making, and it must become part of the instruction process. The following chapters lead educators through the process of finding a new view of assessment: (1) "Relating Assessment to Effective Schools"; (2) "Assessment and Student Motivation"; (3) "Achieving Excellence in Assessment"; (4) "Developing Assessment Literacy"; and (5) "A Professional Development Strategy." Appendixes contain suggested readings for learning teams and a list of standards for the self-evaluation of classroom assessment performance. (SLD)

Purposes in Learner Assessment.

Pub Date—1999-04-14

Note—10p.

Pub Type—Reports - Evaluative (142)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, Achievement Tests, *Computer Assisted Testing, *Constructivism (Learning), Criterion Referenced Tests, *Educational Assessment, Norm Referenced Tests, *Portfolio Assessment, Standardized Tests, *Test Use

Different kinds of tests are given to determine student achievement. Standardized achievement tests are often used, but have many limitations. They may be useful in determining the content students should learn and its relevance for future learning and the curriculum. Criterion referenced tests eliminate a major weakness of standardized tests in that there are accompanying objectives teachers can use in teaching students. When a constructivist approach is taken to assessment, evaluation is based on contextual situations. The portfolio represents a constructivist approach that can really sample student achievement. Computer-based tests have many advantages, especially in the immediacy of feedback to students, but they also have limitations centering on the lack of opportunity for students to raise questions or have input into the curriculum. Many problems remain to be resolved with regard to assessing student attainment, but new ways to assess student achievement are definitely needed. (Contains nine references.) (SLD)

This is the year-end evaluation for fiscal year 1998 of the Connecticut Statewide Systemic Initiative (SSI), known as Project CONSTRUCT. The Connecticut Academy for Education in Mathematics, Science, and Technology is the fiscal agent for the SSI grant from the National Science Foundation. Data collection methods for this evaluation included interviewing key participants, observing activities and events organized or sponsored by the Academy, conducting surveys, analyzing student assessment data, and collecting relevant documents. The accomplishments of the Academy in this 7th year of operation include: (1) establishment of accountability procedures; (2) organization of a statewide technical assistance program to help school districts; (3) publication of mathematics and science program evaluation guides; (4) progress toward completion of an assessment project for science achievement; (5) organization and coordination of professional development services for teachers; and (6) solicitation of proposals from major technology corporations for partnerships to design an educational information management system. Information from a variety of sources indicates that the Connecticut Academy is making significant progress toward its goals for educational improvement and teacher professional development. Some issues for future program development are discussed. (SLD)

Descriptors—*Educational Change, Educational Planning, Elementary Secondary Education, Needs Assessment, *Participation, Problem Solving, *Program Development, Research Methodology

Identifiers—Reform Efforts, *Stakeholders

This document is the first of a series that will address five stages of the school reform process. It focuses on the first stage of the change process, managing key stakeholders and external groups and engaging them in the planning and development of the reform or innovation. A stakeholder is any group or individual who can affect or be affected by an organization's attainment of its goals. Managing stakeholders is necessary for an organization to maintain focus on its goals, to function efficiently, and to achieve its goals. The following steps in the planning and development process are addressed: (1) engagement and recruitment of key stakeholders; (2) identification of major problems, concerns, and needs; (3) identification of obstacles, predisposing conditions, and enabling factors; (4) verification of subjective assessments with more objective data and information; and (5) prioritization and selection of the problem or need that the reform/innovation will attempt to remedy. Planning materials in this document are based on problem-solving approaches and implementation models developed in the health promotion/prevention field. Worksheets are included for stages of the planning process. (SLD)

Appraising Learner Progress in the Social Studies.

Pub Date—1999-04-14

Note—12p.

Pub Type—Reports - Descriptive (141)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Criterion Referenced Tests, Educational Assessment, Evaluation Methods, *Journal Writing, *Portfolio Assessment, *Social Studies, Standardized Tests, Student Evaluation, *Test Use

Identifiers—Student Engagement

Many changes have occurred in techniques used to appraise student achievement in social studies, and these new approaches may put teachers in a better position to notice the progress of individual students and then plan for sequential learning. Some of the deficiencies of traditionally used standardized tests have been overcome through the use of criterion-referenced tests, which ensure better fit with a set of standards and better test validity. Weaknesses in criterion-referenced tests may be overcome with newer approaches. Among these are journal writing by students, student diaries, and student logs, techniques particularly appropriate for social studies. Pupil ownership and empowerment are enhanced when students are actively involved in developing portfolios for social studies classes. Portfolio development emphasizes contextual skills and knowledge developed by students, rather than results from externally developed tests. Professional development portfolios are equally useful for teachers. Any approach to assessment should determine what students have learned and what remains to be learned. Appraisal procedures need to be "user friendly" so that plans may be made from the appraisal for improved teaching and learning. (Contains eight references.) (SLD)

Identifiers—New Zealand

Two instruments were developed to elicit information about students' abilities and their instructional needs in finding information in a library. Tests of student skills were developed through a series of empirical trials and reviews. The third trial of the test was carried out by using whole classes selected randomly to yield two classes from four schools for each test. Results show that the developed elementary (grades 5 and 6) and intermediate (grades 7 and 8) tests are sufficiently reliable to proceed to national standardization. The tests for secondary school students have many difficult items, and will require further developmental trials before national standardization. Test results show that girls score higher and are rated higher than boys, and that students in high-performance schools ("high decile") score better than those at low and middle levels of performance. Older students also tend to do better than younger ones. The tests seem to be moving in the right direction in terms of their ability to discriminate reliably among candidates, and they should permit teachers to make informed decisions about the learning needs of a wide variety of students. Descriptors—Administrator Attitudes, *Administrators, Elementary Secondary Education, *Portfolio Assessment, Portfolios (Background Materials), *Program Implementation, *School Districts, State Programs, Teacher Attitudes, *Teachers, Testing Programs

Identifiers—*New Jersey

The progress school districts throughout New Jersey made in implementing a system of portfolio assessment and the factors that promoted or prohibited the implementation of this system were studied. In all, 262 teachers and 109 administrators completed and returned questionnaires on portfolio assessment. Findings indicate that teachers and administrators believe that portfolio assessment can provide an effective means of assessing students' performance in schools, but that actual practices in their schools have not been as successful. Critical to the success of implementing a system of portfolio assessment is the need to identify clearly when and how portfolios are to be used. It is also important to identify the information that portfolios will contain, and teachers and administrators thought that these issues had not been resolved. Survey results highlight the importance of adequate staff training for teachers and administrators involved in the implementation process. (Contains 17 references.) (SLD)

Descriptors—*Ability, *Adaptive Testing, *Computer Assisted Testing, Difficulty Level, *Item Banks, *Test Construction, Test Items

The convention for selecting starting points (that is, initial items) on a computerized adaptive test (CAT) is to choose as starting points items of medium difficulty for all examinees. Selecting a starting point based on prior information about an individual's ability was first suggested many years ago, but has been believed unimportant provided that the CAT is reasonably long. However, starting with a medium difficulty item for all examinees has two potential disadvantages: unnecessary uses of the first one or two items and overexposure of the items around the medium difficulty. This study analyzed simulated CAT results and suggests significant benefits from administering the first CAT item at a difficulty level suitable to each examinee. Such an adjustment can reduce the use of items around the medium difficulty in the item pool, providing extra help in controlling the exposure rate of the items beyond what standard exposure control methods can achieve. The effect of selecting examinee-appropriate starting points can vary depending on the quality of the information used about examinees' ability levels and the test termination rules applied. Descriptors—*Ability, Estimation (Mathematics), Factor Analysis, *Item Response Theory, Models, *Robustness (Statistics), Simulation

Identifiers—*Polytomous Variables, Unidimensionality (Tests), *Violation of Assumptions

The robustness of the polytomous Item Response Theory (IRT) model to violations of the unidimensionality assumption was studied. A secondary purpose was to provide guidelines to practitioners to help in deciding whether to use an IRT model to analyze their data. In a simulation study, the unidimensionality assumption was deliberately violated by using two-dimensional data. The "impact," or change in the error due to violating the assumption, was calculated to assess the effects of the violation on ability estimation. The effects of problematic variables on absolute impacts and their interactions were analyzed, and a factor analysis using the principal component method was conducted to provide guidelines to practitioners on the computer-generated data. The precision of the estimated ability was determined in four ways. When the ability estimate was assumed to measure the average ability and the major ability of two unequally important abilities, the procedure was generally robust to the violation. However, when the ability estimate was assumed to measure one of the two equally important abilities and the minor ability of two unequally important abilities, the estimation procedure was not robust. Results from the analysis of variance were consistent with the results from analyzing the relative impacts. (Contains 5 tables and 47 references.) (Author/SLD)

Decomposition of DIF Effects for Polytomous Items.

Pub Date—1998-04-00

Note—26p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Diego, CA, April 13-17, 1998).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Foreign Countries, Identification, *Item Bias, Models, Simulation

Identifiers—*Decomposition Analysis (Statistics), *Polytomous Items

Conventional two-group differential item functioning (DIF) analysis for dichotomous items is extended to factorial DIF analysis for polytomous items where multiple grouping factors with multiple groups in each are jointly analyzed. By adopting the formulation of general linear models, item parameters across all possible groups are treated as a dependent variable and the factors as independent variables. These item parameters are then reparameterized as a set of grand item parameters and sets of DIF parameters representing main and interaction effects of the factors on the items. Results of simulation studies show that the parameters of the proposed modeling could be satisfactorily recovered. A real data set of 10 polytomous items with 1,924 subjects was analyzed. Applications and implications of the proposed modeling are addressed. (Contains 3 tables, 4 figures, and 18 references.) (Author)

Schools, Self Concept, Single Sex Schools, *Student Attitudes

Identifiers—*Academic Self Concept, *Japan

The purpose of this study was to examine a profile of academic self-concept for a sample of 293 students of a private girls-only high school in Japan as measured by the Dimensions of Self-Concept (DOSC)-Form S, Japanese version (W. Michael and others, 1984). The DOSC-Form S, Japanese version, yields five scores associated with the five underlying dimensions of academic self-concept: Level of Aspiration, Anxiety, Academic Interest and Satisfaction, Leadership and Initiative, and Identification versus Alienation. Past studies involving Japanese college students have reported that Japanese college students display dispositions indicative of low self-concept relative to their American counterparts, but little empirical study has been done on the academic self-concept of Japanese high school students. Japanese high schools constitute a unique subculture within the entire Japanese educational system, characterized by intensive preparation and competition for college entrance. Data from this study show lower academic self-concept for these students compared with U.S. high school students, but the subjects in this study represent only one segment of the diverse Japanese high school population. (Contains 2 tables and 23 references.) (Author/SLD)

Descriptors—*Estimation (Mathematics), *Item Response Theory, *Maximum Likelihood Statistics, *Sample Size, Simulation

Identifiers—*Generalized Graded Unfolding Model, Item Parameters, *Unfolding Technique

The generalized graded unfolding model (GGUM) (J. Roberts, J. Donoghue, and J. Laughlin, 1998) is an item response theory model designed to analyze binary or graded responses that are based on a proximity relation. The purpose of this study was to assess conditions under which item parameter estimation accuracy increases or decreases, with special attention paid to the influence that a given item parameter value has on the estimation of another item parameter. This assessment was based on a recovery simulation in which the effects of sample size, item location, degree of item discrimination, and extremity of subjective category thresholds were varied. Results indicate that with 750 or more respondents, sample size has negligible effect on all but the estimation of subjective response category thresholds. The true extremity of both item location and item discrimination did affect the estimation of these parameters themselves, and also affected the estimation of other item parameters in the model. However, these effects were modest and had little impact on the estimation of the corresponding item response functions. These results suggest that marginal maximum likelihood estimates of item parameters will provide accurate results across a variety of item parameter configurations when the sample size is at or above the recommended levels. (Contains 1 table, 3 figures, and 14 references.) (Author/SLD)

The present system of education in the United States is wasteful of human and monetary resources and is organized to deny learning opportunities to most students. Education is the biggest business in the United States, and it is the most important business because it molds the character and ability of current and future citizens. Schools should be organized and managed so that the resources of students, parents, teachers, and support personnel are used wisely in an environment that stresses openness, liberty, competition, individual achievement, and social responsibility. The school curriculum and its presentation should help each student earn and enjoy a living and support the United States in worldwide competition. The following chapters are included: (1) "The Problems"; (2) "Why We Need Standards"; (3) "The University"; (4) "The College of Education"; (5) "Recollections of a Junior College"; (6) "The Learning Unit"; (7) "Our Elementary Schools"; (8) "The Public High Schools"; (9) "Public, Private, and Parochial Schools"; (10) "The Discouragement of Teachers"; (11) "Some Pertinent Remarks on Knowledge and Skills"; (12) "Academics and Athletics"; (13) "Sociology"; (14) "Recommendations"; and (15) "References" (endnotes). South Dakota Annual Report of Academic

Progress.

South Dakota State Dept. of Education and Cultural Affairs, Pierre.

Pub Date—1999-00-00

Note—222p.

Pub Type—Numerical/Quantitative Data (110) — Reports - Descriptive (141)

EDRS Price — MF01/PC09 Plus Postage.

Descriptors—*Academic Achievement, Achievement Tests, *Attendance, College Bound Students, College Entrance Examinations, *Dropouts, Elementary Secondary Education, *Enrollment, Tables (Data), *Test Results

Identifiers—ACT Assessment, *Educational Indicators, *South Dakota

Key indicators of educational progress in South Dakota are presented for the 1996-97 school year to fulfill the legislative requirement for reporting. The publication includes attendance and dropout rates, achievement test scores, American College Testing assessment scores, and feedback from the Board of Regents on students entering state colleges and universities. These scores are a snapshot in time and should be used with other indicators of progress. In 1997-98, South Dakota enrolled 132,780 students in its 767 schools. Of the total, 11.98% were from minority groups, and 30.17% were eligible for free lunch. South Dakota's high schools graduated 9,135 students in 1997-98. Information for the following indicators is given for each of the state's school districts: (1) attendance rate; (2) dropout rate; (3) grade 4 Stanford 9 achievement test scores; (4) grade 8 Stanford 9 scores; (5) grade 11 Stanford Achievement Test Series results; (6) Stanford Writing Assessment Program results; (7) American College Test composite scores; and (8) Board of Regents feedback report. A data tables/technical notes section is included. (Contains 190 tables.) (SLD)

Descriptors—*Cutting Scores, *Estimation (Mathematics), *Judges, Performance Factors, Reliability, Standards, *Test Items, *Validity Identifiers—Accuracy, *Angoff Methods, *Standard Setting

Judgmental standard setting methods, such as the Angoff method (W. Angoff, 1971), use item performance estimates as the basis for determining the minimum passing score (MPS). Therefore the accuracy of these item performance estimates is crucial to the validity of the resulting MPS. Recent researchers (L. Shepard, 1994; J. Impara, 1997) have called into question the ability of the judges to make accurate item performance estimates for target subgroups of candidates, such as minimally competent candidates. The purpose of this study was to examine both the reliability and accuracy of item performance estimates from an Angoff standard setting application using as a model the framework suggested by M. Kane (1994). Results from the standard setting example involving 29 judges for an international certification program in financial management provide evidence that item performance estimates were both valid and reliable. Factors that might have influenced this high degree of reliability and validity in the item performance estimates in a standard setting study are discussed. (Contains five tables and nine references.) (Author/SLD)

Descriptors—*Academic Standards, *Bias, *Elementary School Students, Intermediate Grades, *Performance Based Assessment, Reading Achievement, Student Evaluation, *Student Promotion, Urban Schools

Identifiers—*Exit Examinations, *Fairness, Iowa Tests of Basic Skills

A standards-based exit policy was implemented in an urban district in the northwestern United States. This paper considers the second year of implementation with a group of 2,581 students in the fifth grade. Of these, 104 were identified as not having the skills to exit fifth grade. Reading achievement as measured by two tests, the Iowa Tests of Basic Skills and the Washington Assessment of Student Learning, was cross tabulated with teacher judgments. There was over 90% correspondence between the two tests, both of which were published by the same company, and there was a high relationship between teacher judgments and student achievement on external measures. Teachers had high validity in making judgments about student learning relative to their performance on external measures, with good agreement for 90% of students. Some reasons for misjudgments about student achievement are discussed, and the need for additional professional development to ensure equity standards-based exit requirements is emphasized. (Contains 3 tables and 28 references.) (SLD)

Identifiers—Paper and Pencil Tests, Scoring Rubrics, *Writing What You Read

The reliability and developmental and concurrent validity of the Writing What You Read (WWYR) rubric, designed for use with paper and pen, for hypermedia-authored narrative productions of students in grades 2 and 3 were studied. Sixty students from 4 classrooms produced hypermedia narratives (interactive multimedia presentations) that were rated by 5 trained raters (doctoral students) with knowledge in the teaching of writing process and the use of hypermedia software. The study used an ex post facto design with a comparative component to examine the reliability and developmental validity of the WWYR rubric through percentages of agreements and Pearson correlations. Student achievement was also assessed through the Iowa Tests of Basic Skills (ITBS), and scores from the ITBS and the WWYR were positively correlated. Other reliability and validity analyses suggest that teachers may benefit from applying the WWYR assessment to their students' hypermedia productions. (Contains 7 tables, 3 figures, and 19 references.) (SLD)

Descriptors—Comparative Analysis, *Computer Assisted Instruction, Computer Software, Elementary Education, Elementary School Students, Evaluation Methods, *Hypermedia, Reliability, Test Construction, Test Format, *Test Use, Validity

Identifiers—Paper and Pencil Tests, Scoring Rubrics, *Writing What You Read

This study investigated the reliability and developmental and concurrent validity of the Writing What You Read (WWYR) rubric, an instrument originally designed for use with paper-and-pen-created narratives, for hypermedia productions of students in grades 2 and 3. Four teachers guided their students in a 3-month-long hypermedia/process writing curriculum. The 60 students created narratives in HyperStudies 3.1 on Windows-based computers. In addition to test elements, the narratives contained audio, video, graphic, and hyper-travel elements. Five raters evaluated the hypermedia narratives using the WWYR. Results indicate that, for WWYR values as classroom tool, rater judgments were reliable and valid. However, it is noted that, for WWYR usefulness in guiding educational policy, the reliability and validity issues need to be further evaluated. (Contains 1 figure, 7 tables, and 29 references.) Expectancy, Value, and Motivation for Test Taking When Optimism Declines: A Continuation.

Pub Date—1999-04-00

Note—10p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-

23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*College Students, *Expectation, *Grades (Scholastic), Higher Education, *Objectives, Prediction, *Student Motivation, Test Results

Identifiers—*Optimism

Consistent with prior research, expected performance on a midterm examination decreased for 48 college students as the test approached in time, as did grade-level goal and perceived adequacy of effort, although indices of goal value and of motivation to achieve the goal remained constant. Changes were generally monotonic across three occasions. These data implicate test proximity and overestimation of future effort as influences on academic expectations that seem worthy of more attention by teachers. They may reflect a tacit student strategy of changing goal levels in order to maintain desire in the face of declining expectations. Also the influence of expectancy and two types of value on motivation seemed to vary with proximity to an examination. Results support the importance of expectancy-value variables but also indicate the complexity of their contribution to classroom motivation. (Contains two tables and eight references.) (Author/SLD)

Descriptors—*Academic Achievement, *Achievement Tests, Decision Making, *Educational Assessment, Educational History, Elementary Secondary Education, National Surveys, Standardized Tests, *Test Use

Identifiers—*High Stakes Tests, *National Assessment of Educational Progress, Tyler (Ralph W.)

The use of achievement tests for high-stakes decision making is discussed, and some comments are made about Ralph Tyler's contributions to educational assessment and what has resulted from them. The assessment war was raging more than 100 years ago, as historical records of testing student achievement demonstrate. Ralph Tyler, in the 1960s, did his best to bring about a truce in the assessment war by inventing the term "assessment" and suggesting that the focus be on the educational attainments of large numbers of people. The National Assessment of Educational Progress (NAEP) advocated by Tyler called for the assessment of a sample of students, each of whom took only a fraction of the exercises, and none of whom received an individual score. Over the past 30 years these objectives have just barely survived. Among other changes, scores are imputed for each child, and these are averaged for any specific subgroup. Many changes in the NAEP have been supported by psychometric considerations, but some have compromised Tyler's vision by supporting pressures for reported scores for school districts, schools, classrooms, and individual students. Many of the problems evident as testing stakes become higher are identified. It is shortsighted to accept test scores as the ultimate criterion of the benefits of education, and more appropriate criteria must be developed. Some attachments illustrate historical controversy over assessment. (Contains four references.) (SLD)

Identifiers—*Reflective Practice

After individual members completed self-study dissertations, a collaborative of four researchers examined their self-study experiences and formulated a narrative methodological framework and a system of mentoring novices in self-study practices. The first section of this paper focuses on the implicit connection between self-study and narrative methodology. Self-study is conceptualized as a rigorous and vigorous methodology that is capable of producing personal and professional transformation. The second section discusses mentoring doctoral self-study work. Intensive self-study provides for authentic learning, self-development, reflection, insight, connection with others, real-world relevance, and practical application. Self-study is fundamental for authentic professional development and personal growth. (Contains 3 figures and 29 references.) (SLD)

Descriptors—Ability, Attitudes, *Coeducation, *Females, *Mathematics, Mathematics Achievement, *Middle School Students, Middle Schools, Private Schools, *Single Sex Schools, Teaching Methods

The mathematics achievement and mathematics attitudes of eighth-grade female students attending independent coeducational middle schools were compared with those of students in independent all-girls middle schools. Participants were 467 8th-grade girls from 10 all girls middle schools, 208 girls from 10 independent coeducational middle schools, and 123 11th and 12th grade girls from 2 independent high schools. An attitude questionnaire was completed by all subjects, and achievement test data were obtained. Results from high school students were used to support attitude measures. The only statistically significant difference in mathematics achievement was found for one (higher) level of the Comprehensive Testing Program. Overall, large differences were not found for mathematics achievement quantitative ability or attitude for mathematics for eighth-grade girls in single-sex or coeducational schools. Implications for mathematics education for females are discussed. (Contains 6 tables and 62 references.) (SLD)

Descriptors—*Bayesian Statistics, *Estimation (Mathematics), Item Response Theory, Mark-

ov Processes, Monte Carlo Methods, Simulation

Identifiers—*Gibbs Sampling, Parameter Identification

The accuracy of Gibbs sampling, a Markov chain Monte Carlo procedure, was considered for estimation of item and ability parameters under the two-parameter logistic model. Memory test data were analyzed to illustrate the Gibbs sampling procedure. Simulated data sets were analyzed using Gibbs sampling and the marginal Bayesian method. The marginal Bayesian method combined with the expected a posteriori estimation of ability yielded consistently smaller root mean square errors and better bias results than Gibbs sampling. Descriptors—*Academic Achievement, *Achievement Tests, Comparative Analysis, *Elementary School Students, Intermediate Grades, Music, *Music Education, Scores, Test Results

Identifiers—*California Test of Basic Skills, *Pullout Programs

The purpose of this study was to examine the effects of an instrumental music pullout program on student achievement. Two hundred and twenty-three students were divided into 2 groups. The first group consisted of 46 instrumental music students in grades 4 and 5. The second group consisted of 177 students who did not participate in the instrumental music program. A two-sample independent t-test analysis was used to determine if there was a significant difference between the test scores of the students who were excused from class for 30 minutes twice a week for instrumental music study and those who were not involved in the music program. It was hypothesized that there would be no significant difference between the test scores of the two groups or that the test scores of the music students would be higher than the nonmusic students as measured in five academic areas of the California Tests of Basic Skills: reading, language comprehension, mathematics comprehension, science, and social studies. Findings support the first hypothesis; that is, no significant difference exists between the scores of instrumental music participants and non-participants. (Contains four tables.) (Author/SLD)

How Critical Is Back Translation in Cross-Cultural Adaptation of Attitude Measures?

Pub Date—1999-04-00

Note—38p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

Descriptors—*Attitude Measures, *Cross Cultural Studies, *Elementary School Students, Foreign Countries, Higher Education, *Test Construction, Test Format, *Translation

Identifiers—*South Korea

The purpose of this study is to compare the effectiveness of three types of practices applied in Korea in enhancing the validity and equivalency of test instruments when cross-cultural adaptation of attitude measures is necessary. The three types of practices are: (1) translation and review (translation version); (2) translation, back translation, and review (back translation version); and (3) translation, back translation, review, and empirical validation study (validation version). The focus was on the relative effectiveness of back translation applied to the construction of Korean versions of instru-

ments. Participants were 734 fifth graders from 3 public elementary schools in Seoul (Korea). Responses on the three test versions and two other motivation scales were collected within a 3-week period at approximately 1-week intervals. Results show that the back translation version is superior to the translation version in terms of its similarity to the validation version and construct-related evidence. However, results from item-response theory analyses reveal that the quality of the translated items is similar. The nature of adapted attitude scales is discussed. Appendixes contain the Academic Failure Tolerance Scale (M. Clifford 1988, 1991) and two back translation versions. (Contains 13 tables and 33 references.) (Author/SLD)

SAM: A Student Achievement Model Designed To Empower Teachers and Increase Student Achievement through Action Research.

Pub Date—1999-00-00

Note—19p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Action Research, Data Analysis, Data Collection, Educational Assessment, Elementary Secondary Education, Models, *Teacher Empowerment

The Student Achievement Mode (SAM) gives teachers a system for collecting and analyzing data in order to increase student achievement in classrooms and schools. Developed in 1 school, the model is currently used in 63 elementary and 8 secondary schools in a large school district in Florida. The purpose of SAM is to increase student achievement, increase student ownership and responsibility in the learning process, and increase the effectiveness of teachers through their involvement in a continual process of inquiry. Student performance data, observational data, anecdotal notes, and survey data reveal that the model has improved teachers' involvement in problem-solving educational issues and has led to higher student achievement. (Contains 5 tables and 18 references.) (Author)

Descriptors—*Academic Achievement, Foreign Countries, Higher Education, *Instructional Program Divisions, Medical Education, *Medical Students, *Study Habits, Teaching Methods, Time Factors (Learning)

Identifiers—Netherlands, *Problem Based Learning

This study conducted in the Netherlands examines the role of student-generated learning issues in a problem-based curriculum. The first questions was in which way students make use of the learning issues generated (as strict guidelines or as global guidelines) and does this differ between years of training? The second questions was what the relation is between the way students make use of their learning issues and the time spent on individual study and achievement? Questionnaires were completed by 479 students in the first 4 years of a 6-year medical training program. Results show that students in the first year study strictly according to the content of the learning issues. In later years, students who tend to study beyond the generated learning issues spend more time on individual study and also achieve better. (Contains 4 tables and 15 references.) (Author/SLD)

Testing a Causal Model for Learning in a Problem-Based Curriculum.

Pub Date—1999-04-00

Note—15p.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Causal Models, Foreign Countries, Higher Education, Instructional Program Divisions, Medical Education, *Medical Students, *Study Habits, Teaching Methods, Time Factors (Learning) Identifiers—Netherlands, *Problem Based Learning, *Study Groups

The aim of this study was to identify the relationship between elements that are important for the tutorial group process and the individual learning process in a problem-based curriculum. The variables under investigation were: (1) student-generated learning issues; (2) individual learning process; (3) reporting in the tutorial group; and (4) achievement. A questionnaire containing 21 items was developed. Data were collected in the first year from 195 students at the Medical School of Maastricht University (the Netherlands) in the 1997-98 school year. Data were analyzed with a structural modeling approach. Results indicate that the model fitted the data well. The path coefficients were moderately high, particularly between the explanation-oriented approach and the depth of the reporting in the tutorial group. High path coefficients were also found between the depth of the reporting and achievement. In sum, the model gives insight into how important variables are related. It is recommended that data be collected to test the model repeatedly. (Contains 2 tables, 2 figures, and 14 references.) (Author/SLD)

Contracting for Statewide Student Achievement Tests: A Review. Department of Public Instruction 98-4.

Wisconsin State Legislative Audit Bureau, Madison.

Pub Date—1998-03-00

Note—41p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Achievement Tests, *Contracts, Elementary Secondary Education, State Legislation, *State Programs, *Testing Problems, Testing Programs

Identifiers—*TerraNova Multiple Assessments, Test Publishers, *Wisconsin

The Wisconsin legislature has required the Department of Public Instruction to adopt or approve standardized tests for statewide use to measure student attainment of knowledge and concepts in grades 4, 8, and 10. Although school districts generally gave high ratings to the contents of TerraNova (McGraw Hill), the testing instrument most recently used, there was dissatisfaction with the administration of the testing program in 1996-97. A review of testing program administration, scoring, and reporting was conducted, and the test procurement process was also evaluated. Three problems were identified as leading to significant inconvenience and frustration: (1) a delay in receiving testing materials for the Milwaukee public schools with an associated delay in testing and scoring, delaying statewide results; (2) missing questions from the fourth-grade examination that required software modifications; and (3) pages that separated from test booklets, which caused scoring problems. Evaluation indicated that the testing process improved in the 1997-98 school year. Some issues in the test bidding process are considered, including problems of testing program continuity if the test vendor changes due to cost or other administrative requirements. Some changes are recommended to improve the testing program, but it is noted that frequent structural changes can diminish the program's ability to identify long-term trends. A response from the Department of Public Instruction to the State

Legislative Audit Bureau is included. (Contains three tables.) (SLD)

Descriptors—Educational Environment, Elementary Secondary Education, English (Second Language), Focus Groups, *Instructional Effectiveness, Limited English Speaking, Meta Analysis, Qualitative Research, *Second Language Learning, *Synthesis, Teachers, Teaching Methods

The current state of the knowledge base on the effectiveness of specific instructional practices for English-language learners was examined by conducting an exploratory meta-analysis on eight studies of instructional interventions and using qualitative synthesis to supplement this analysis. The first data source was the eight intervention studies located through electronic searches. The second data source consisted of studies of the learning environments of English-language learners that focused on analyzing and describing instructional practices. The third data source consisted of information gathered from 5 professional work groups, which differed from focus groups in that all 44 participants were professionals. Within the eight empirical studies, no clear pattern emerged regarding effective instructional practices for English-language learners. A synthesis of these studies and other data sources suggests that a good English language development program should include three components: (1) a focus on the development of fluency and proficiency in English; (2) a concern with more formal, grammatical aspects of English; and (3) an emphasis on learning new academic content. (Contains 4 figures, 6 tables, and 79 references.) (SLD)

Identifiers—Reform Efforts, *Tennessee Comprehensive Assessment Program

Evidence provided by analysis of science scale scores on the McGraw-Hill CTB/4 science test for grades 2 through 8 in Tennessee, part of the Tennessee Comprehensive Assessment Program (TCAP), shows that it is possible for high achieving school systems to show continuous improvement from year to year. These results would tend to offset fears that regression to the mean precludes the highest achieving school systems from maintaining gains over a period of several years. Results show that it is possible for schools with a high percentage of disadvantaged students also to be high achieving, although

the lowest achieving school systems had the highest percentages of students on free and reduced lunch status. Results also show that over the 8-year period from 1990 to 1997 the mean science scale score by year statewide showed gains for 5 of the 8 years, with a slight decrease in 1997 prior to replacement of the CTBS/4 with the newer McGraw Hill TerraNova Test. The Problem of High Stakes Assessment in Public Education.

Pub Date—1997-00-00

Note—17p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Accountability, *Educational Assessment, Educational Policy, Elementary Secondary Education, *Evaluation Methods, Program Development, *Public Schools, *Test Use, Testing Problems

Identifiers—*High Stakes Tests

Whether increasing reliance on policy-driven assessment for accountability and control of educational institutions is actually sabotaging long-term goals and purposes of the schools is explored, questioning whether current practices of high-stakes testing are anathema to real education values. The distinction between policy-driven assessment and instructional evaluation is described. The assumptions and purposes underlying scientific and political evaluation as opposed to those of diagnostic assessment are probed, and the work of Jennie Oakes and others is used as the basis for deriving a recommendation for valid, reliable, and appropriate assessments on both individual and institutional levels to facilitate the development of effective schools. Despite the criticism of high-stakes testing, it is not recommended that policy-driven high-stakes tests be abolished. Instead, their rational, effective, and judicious use should be the objective. Formative diagnostic methods and approaches are needed as an integral part of effective instructional programs and program development. (Contains 18 references.) (SLD)

"My Learning Curve": Using Visual Rapid Appraisal in the Evaluation of the Extended Practicum in a Teacher Education Program.

Pub Date—1999-04-00

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999). This paper is from the research project, "Mapping the Authority of Experience in Learning To Teach," funded by the Social Sciences and Humanities Research Council of Canada.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Focus Groups, Foreign Countries, Graphs, Higher Education, *Practicums, *Pre-service Teachers, *Professional Development, *Self Evaluation (Individuals), *Teacher Education, Teacher Evaluation

Identifiers—Canada

"My Learning Curve" is a visual rapid appraisal technique that was developed in Canada for exploratory use in one of a series of loosely coupled evaluation studies of a redesigned teacher education plan. It is designed to allow teacher candidates enrolled in the program to depict quickly and visually, rather than verbally, their perceptions of how their rates of professional growth changed over the course of the extended practicum portion of the program. The technique is described and its potential usefulness as an evaluative technique is assessed. "My Learning Curve" is a graph with the number of practicum weeks on the "x" axis. The "y" axis is labeled "learning." Teacher candidates draw lines reflecting their own perceptions of their rates of professional learning. The responses of 31 Canadian teacher candidates in 4 focus groups show that the appraisal technique is effective when used

within a focus group setting. The technique appears to have less promise as a stand-alone approach because of difficulties in comparing data. (Contains 3 figures and 10 references.) (SLD)

Descriptors—*Cooperative Education, Data Collection, Foreign Countries, Models, *Qualitative Research, *Research Methodology, Secondary Education, *Work Experience

Identifiers—Canada
This paper is concerned with the challenges of qualitative research on workplace learning that occurs within co-operative (co-op) education. Co-op education is extensive in Canada, with an estimated 10% of the student population enrolled in co-op secondary education each year. The context for this study was a veterinary clinic in which four co-op students participated. The theoretical framework for the study considered the workplace experiences as curriculum, the special character of experiential learning, and a cognitive perspective on learning from experience. Methodological challenges were evident in four related areas: (1) observation in an unfamiliar setting; (2) goals of the workplace setting; (3) conceptions of knowledge and curriculum; and (4) varieties of learning. The methodological challenges recognized in this study highlight the interplay among the theoretical framework, data collection methods, and data analysis procedures. (Contains 16 references.) (SLD)

New Perspectives on Evaluating Professional Development.

Pub Date—1999-04-00

Note—25p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Data Analysis, Data Collection, *Evaluation Methods, *Professional Development, *Research Methodology

Basic questions about the evaluation of professional development efforts are explored, including the nature and purposes of evaluation, the critical levels of professional development evaluation, and the difference between evidence and proof in evaluation. Evaluation, which is defined as the systematic investigation of merit or worth, can be characterized as planning, formative, or summative evaluation. All three types of evaluation involve the collection and analysis of data. In evaluating professional development, there are five critical levels of information to consider. These are: (1) participants' reactions; (2) participants' learning; (3) organization support and change; (4) participants' use of new knowledge and skills; and (5) student learning outcomes. In the real-world setting of professional development evaluation, it is nearly impossible to obtain proof of the impact of the effort, but it is possible to obtain good evidence. A list of guidelines is included to help improve the quality of professional development evaluations. (Contains 1 figure and 25 references.) (SLD)

Descriptors—Biology, Computer Software, *Genetics, *High School Students, High Schools, Learning, Participation, Scientific Attitudes, *Student Attitudes

Identifiers—*GenScope Computer Program

The experiences and responses of high school biology students using the GenScope computer program are described. GenScope represents genetic concepts in a linked multilevel fashion to teach students to think like scientists. Many GenScope problems use a fictitious dragon species to illustrate genetics. Students can manipulate the dragons' genes to produce offspring with particular characteristics. Students in the two high school biology classes responded enthusiastically to using the computers and to the dragon "design" problems. The freedom to operate outside of typical instructional routines and related teaching methods appeared to begin a transformative experience for these students. Participating in learning through action also engaged students and changed their attitudes about biology. An appendix describes the GenScope problem about the genetics of the dragons' horns. (Contains three references.) (SLD)

Descriptors—*Beginning Teachers, *College Students, Curriculum, Foreign Countries, Higher Education, *Item Response Theory, Secondary Education, *Secondary School Teachers, Teacher Education, *Teaching (Occupation)

Identifiers—*Rasch Model, *Taiwan

Fifty core tasks that are generally performed by and important for secondary school beginning teachers are identified. Participants (n=297) were asked to judge the importance of each task. College students (n=476) were asked how confident they would be in doing these tasks as if they were beginning teachers. Rasch technique was used to scale the importance and confidence of the tasks. Most of the teachers considered these tasks important, especially those pertaining to "guidance and counseling." Most of the college students considered themselves very confident in doing these tasks, especially those related to "planning and preparing for instruction." They felt less confident about the tasks pertinent to "classroom management." Nine tasks were identified as important but relatively difficult to accomplish. The curriculum for teacher education should make efforts to cultivate the corresponding skills and knowledge for these nine tasks. The applications of this study to college students, institutions offering teacher education programs, and secondary schools are addressed. (Contains 2 tables, 6 figures, and 17 references.) EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Cognitive Structures, Comprehension, *Intellectual Disciplines, *Knowledge Level, *Learning, *Thinking Skills

Identifiers—*Postmodernism

This paper addresses contemporary (i.e., post-modern) concerns with the disintegration of meaning and fragmentation of knowledge. As society continues to move towards increased specialization and separation of disciplines, people are becoming increasingly disconnected from the broad connecting conceptions within the disciplines, i.e., the patterns that bridge the disciplines, to the natural world, and to each other. A potential remedy, based on the work of Gregory Bateson and Mary Catherine Bateson, for providing a way to develop such connections is explored. Such as remedy is founded on the framework of "patterns that connect" (G. Bateson, 1979). In this paper, the discussion of such patterns is situated in the context of a view of learning that is based on nonlinearity of thought processes and on variation both as a source and outcome of thinking (J. Bloom, 1998; F. Capra, 1996). This view of learning leads to: (1) more cohesive and elaborate understandings; (2) an emphasis on meaning rather than decontextualized content; (3) emphasis on creativity; (4) a greater sense of connection to the learner's world; and (5) the development of a sense of ownership over what is learned. (Contains 5 figures and 19 references.) (SLD)

Identifiers—Scoring Rubrics

The purposes of this book are to help teachers understand the rationale and nature of the current emphasis on U.S. education on standards and to provide classroom teachers with guidance on the many ways the standards movement might affect their classrooms. Approaches to implementing standards may be organized into two general categories, indirect and direct. Indirect approaches are based on the assumption that even though student performance on standards is not directly tied to their performance in individual classes, teachers will naturally want to provide assistance to their students and will organize their classrooms accordingly. Teachers will usually choose the standards they will address in their classrooms. Direct approaches necessitate a change in classroom practice for teachers because the specific standards teachers must address are mandated. Section 2 considers indirect approaches, and section 3 considers direct approaches. Appendices contain: (1) "Steps to Reasoning Processes"; (2) "Rubrics for Reasoning Processes"; (3) "Rubrics for Effective Communication Standards"; and (4) "Rubrics for Lifelong Learning Standards." Descriptors—Elementary Education, Elementary School Students, *Least Squares Statistics, *Measurement Techniques, Predictor Variables, *Reliability

Identifiers—Hierarchical Linear Modeling, Maryland School Performance Assessment Program, *School Effects

This study evaluated the comparative stability and agreement of three approaches to calculating school effects given both student-level and school-level data. The approaches were hierarchical linear modeling (HLM), ordinary least squares (OLS), and weighted least squares (WLS). Analyses were conducted using data from the 1998 Maryland School Performance Assessment Program for 23,461 third graders and 21,226 fifth graders. A two-level model was used for computing HLM school effects with four student-level predictors used to predict achievement in level one, and the school size used in level two to predict the level-1 intercept. The dependent achievement measure in OLS and WLS analyses was the average student score across the six content areas of the assessment. In OLS five variables were used as predictors, at the school level only, and in WLS the same strategy was used except that the sampling variance of the dependent variable was estimated for each school and used as the weighting variable. For OLS and WLS studentized residuals were used as the school effects measure. Results of the analyses indicate that, from a practical perspective, and all other considerations being equal, the HLM approach should be used for school effects measures on the basis of stability. The use of either of the school-level models appears to be viable in the event that only school-level data are available. Reasons for the greater stability of the HLM approach are discussed. (Contains 5 tables and 10 references.) (SLD)

Descriptors—Academic Achievement, Biology, Civics, Constructed Response, Educational Assessment, English, High School Students, High Schools, *Knowledge Level, Mathematics, Scoring, *Secondary School Teachers, Student Attitudes, Student Evaluation, *Teacher Role, Test Construction

Identifiers—*Scoring Rubrics

The hypothesis that enhanced knowledge of assessment rubrics by teachers and thus by students results in improved student achievement was studied in the context of the development of mandatory high school assessments for the Maryland State Department of Education. Rubrics were under development to score constructed-response items in the content areas of English, biology, mathematics, and government. Each of the state's 24 local education agencies was represented for 2 or 3 content areas. Forty-six pairs of teachers provided data. Half (the experimental group), received training in the state's Core Learning Goals, instructional strategies, and the use of rubrics as instructional tools. The remainder (control group), did not receive training. Data analyzed were effect sizes by form by item type within teacher pair. Results provide some

empirical support for instructional uses of rubrics. Support was strongest for constructed-response items in biology, but was also seen for selected-response and constructed-response items in algebra. Neither positive nor negative effects were seen for English or government. Whether positive effects remain at the same levels across different types of rubrics remains for additional study. An appendix contains the generic rubrics. (Contains two tables and eight references.) (SLD)

Identifiers—Taiwan

The purposes of this study were to describe the validation of a new instrument, the Teacher Communication Behaviour Questionnaire (TCBQ) and to show its use in assessing students' perceptions of their interactions with their teachers by focusing on their teachers' communicating behaviors. Participants were 1,202 students in grades 7 through 9 from 30 science classes in Taiwan. Quantitative and qualitative approaches were used in the development and validation process, and the questionnaire was then used to study the teachers' behaviors and their associations with students' perceptions and attitudes toward science and science academic achievement. Results show that all five scales of the TCBQ have satisfactory internal consistency reliability, discriminant validity, and factor validity. There were strong associations between the scales of the instrument and students' attitudes toward science. Two of the scales were associated with cognitive achievement. This instrument adds to research on teacher-student interactions by focusing on the use of challenging questioning to promote students' creative thinking ability and the use of verbal and nonverbal feedback to enhance students' attitude toward science and their academic achievement outcomes. (Contains 5 tables and 22 references.) (SLD)

Descriptors—Algorithms, *Computer Assisted Testing, *Difficulty Level, *Item Banks, Monte Carlo Methods, Simulation

Identifiers—*Classification Tests, National Assessment of Educational Progress, Partial Credit Model, Polytomous Variables, *Sequential Probability Ratio Test (Wald)

A study was conducted to extend the sequential probability ratio testing (SPRT) procedure with the polytomous model under some practical constraints in computerized classification testing (CCT), such as methods to control item exposure rate, and to study the effects of other variables, including item information algorithms, test difficulties, item pool sizes, and widths of the indifference region in SPRT. SPRT was applied for polytomous items under the generalized partial credit model of

E. Muraki (1992). Monte Carlo simulation technique was used. Independent variables manipulated were: (1) item information algorithm; (2) item exposure control methods; (3) location of the theta cut point (test difficulty); (4) item pool size; and (5) width of indifference region in SPRT. Item parameters from the 1996 National Assessment of Educational Progress were used to build the item pool, and item response data were generated for 10,000 simulated examinees. Polytomous items were found to work well with the SPRT procedure in CCT. Considerations in using the procedure are discussed. (Contains 5 tables and 18 references.) (SLD)

Descriptors—*Computer Assisted Testing, *Cutting Scores, *Item Response Theory, *Mastery Tests, Monte Carlo Methods, Simulation

Identifiers—*Classification Tests, Dichotomous Variables, National Assessment of Educational Progress, Polytomous Items, *Sequential Probability Ratio Test (Wald)

The purposes of this study were to: (1) extend the sequential probability ratio testing (SPRT) procedure to polytomous item response theory (IRT) models in computerized classification testing (CCT); (2) compare polytomous items with dichotomous items using the SPRT procedure for their accuracy and efficiency; (3) study a direct approach in combining these two types of items in CCT; and (4) study a simple method to control item exposure rate in CCT. The Monte Carlo simulation technique was used, manipulating several independent variables. Item parameters from the 1996 National Assessment of Educational Progress (NAEP) science assessment were used, resulting in 247 dichotomous items and 266 polytomous items for the 3 NAEP grades. The results of using the three item pools (polytomous, dichotomous, and combined) were generally consistent. Items selected according to item information at the cutting theta resulted in the best classification accuracy and efficiency. Results show that polytomous items work well with SPRT in CCT. SPRT was also found to be a good procedure for mastery decision making. (Contains 2 tables and 14 references.) (SLD)

Motivational Effects of the Informativeness of Feedback.

Pub Date—1999-04-00

Note—9p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Cognitive Processes, Computer Assisted Instruction, Concept Formation, *Feedback, Foreign Countries, Higher Education, *Knowledge Level, *Motivation, Undergraduate Students

Identifiers—Germany

The motivational effects of feedback types consisting of the same evaluative components, but differing in the informative components, were studied with 156 German undergraduates in a computer-based learning experiment. A concept-formation task was the learning material. Three feedback conditions were designed: (1) knowledge about result (low informativeness); (2) knowledge about mistakes (medium informativeness); and (3) knowledge on how to proceed (high informativeness). Results show that the informativeness of feedback exerts an influence not only on information process-

ing but also on learner motivation. Greater informative value of the feedback was related to better performance, but the effects of the informativeness of feedback on the motivational variables were moderated by the motivational characteristics of the subjects. Results from the North Carolina—NAEP Comparison and What They Mean to the End-of-Grade Testing Program.

Pub Date—1999-04-00

Note—18p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Comparative Analysis, Educational Assessment, *Grade 8, *Judges, Junior High Schools, *Mathematics Tests, National Surveys, *Test Results, *Testing Programs

Identifiers—Experts, *National Assessment of Educational Progress, *North Carolina End of Grade Testing Program, State Competency Tests

The North Carolina End-of-Grade (NCEOG) Test of Mathematics, Grade 8 was compared to the National Assessment of Educational Progress (NAEP)—Grade 8 along three dimensions: technical, content, and cognitive. An expert panel of six judges (mathematics educators) examined the supporting documents, the content frameworks, the items, and actual test forms to determine the level of congruence between the two assessments. Although differences were observed between the two assessments on each of the three dimensions, they were not enough to explain the differences in student performance on the assessments. The most important result of the study was a clearer understanding of the NCEOG, and following that an improved understanding of the NAEP. Further research to investigate the differences between the two assessments is outlined. (Contains 4 tables and 14 references.) (SLD)

Measuring Achievement Growth in an 18-Day Summer School Session.

Pub Date—1999-04-00

Note—25p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Achievement Gains, Elementary Education, Grade 5, Grade 8, Grade Repetition, Low Achievement, Measurement Techniques, *Pretests Posttests, Program Effectiveness, *Summer Programs, *Test Construction

Identifiers—Durham County School District NC, North Carolina Competency Tests

In 1997 the Board of Education of the Durham (North Carolina) Public Schools passed a policy that required all students performing below grade level on the Eighth Grade Competency Test in either reading or mathematics to attend summer school and demonstrate progress in order to be eligible for promotion to the next grade. This requirement was later extended to fifth grade students as well. Tests were constructed to measure student growth in mathematics during the summer school session. Differences between results on the test taken as a pretest and as a posttest were used as a measure of growth for each student. The average student gained between 3 points (grade 5) and 3.5 points (grade 8) in mathematics during the 15 days of instruction between the pretest and posttest. Over 76% of fifth graders had positive gain scores, and about 70% of eighth graders had positive scores. The proportion of students who demonstrated growth may be attributed, at least in part, to the provision of instruction-

ally relevant diagnostic information to teachers at the beginning of the summer school session as well as to the seriousness with which students faced the summer school experience. Appendixes contain test item specifications and characteristics, a sample principal memo and report, and information on the frequency distribution of student gain scores. (Contains seven tables.) Does the Relationship between Motivation and Performance Differ with Ability?

Pub Date—1999-04-00

Note—11p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (Montreal, Quebec, Canada, April 20-22, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Ability, *College Students, Higher Education, *Performance Factors, Science Tests, Social Studies, *Student Motivation, *Testing

Identifiers—*Low Stakes Tests, Scholastic Assessment Tests

How the relationship between test-taking motivation and performance might depend on ability was studied with college students taking a science (n=249) or social studies (n=473) test that had no academic consequences. Students taking these tests are told that their responses provide important information for evaluating the university's programs but that there are no individual consequences from test results. A brief survey measured student motivation during this testing. Results from the Scholastic Assessment Tests were used as measures of general ability. Motivation for these students was not correlated with ability, but the relationship between motivation and performance depended on ability, at least for the science test. The interaction between ability and motivation suggests that conclusions about the overall effects of motivation do not apply to all ability levels equally. However, this interaction is an ordinal one in that motivation increases performance at all ability levels, but especially so for high ability students. (Contains two figures and nine references.) Descriptors—College Bound Students, *Educational Assessment, Foreign Countries, *Mathematics Education, National Competency Tests, Secondary Education, *Secondary School Students, *Testing Programs, *Transitional Programs

Identifiers—*England, *General Certificate of Secondary Education

A study was conducted in England in 1997 to consider materials that were available to support students making a transition from compulsory education to the study of mathematics in noncompulsory post-16 education. This report on the study also contains an outline of the basic structures of the English education system and its assessment provisions. Recent changes in the English educational assessment system and to the curriculum with the adoption of the National Curriculum have created considerable interest in the transition students face between the General Certificate of Secondary Education (GCSE) mathematics and the "A level" examinations required for university entrance. Responses by 67 colleges and schools to a questionnaire about the transition were used to select 5 institutions for case studies and interviews about practices. Specific information about difficulties schools and colleges noted about gaps between the

two mathematics curricula are identified and grouped into concerns about teaching in the "pre-16" years, teaching related to the GCSE, and teaching for students after the age of 16 who are beginning their A-level courses of study. Five recommendations are made for easing students' transition between the two curricula. Appendixes contain the attainment target for mathematics, a mathematics task, and a list of A-level prerequisites in mathematics. (Contains six references.) (SLD)

Modeling Time To Respond and Probability of Correct Answer in a Simulated Computerized Test-taking Situation.

Pub Date—1999-04-00

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Computer Assisted Testing, *Difficulty Level, Higher Education, Probability, *Responses, Simulation, *Test Items, Testing, Time Management, *Timed Tests, Undergraduate Students

Two experiments reproduced in a simulated computerized test-taking situation the effect of two of the main determinants in answering an item in a test: the difficulty of the item and the time available to answer it. A model is proposed for the time to respond or abandon an item and for the probability of abandoning it or answering it correctly. In the first experiment, the 47 undergraduate participants were instructed to answer before a certain number of seconds. Results of this experiment suggest that the process to cope with an item is a two-stage decision process in which subjects check to see if the demands of an item match the available time resources. If so, they continue looking for a solution, and if not, they abandon the item. The 48 subjects in the second experiment had to meet an overall deadline of 12 seconds when "tests" or triplets of 3 items were presented. In most subjects, the probability of abandoning the item was still a function of the item's difficulty, but fewer subjects showed an effect of the item's deadline. These results show that under a more realistic test-taking situation, the subject's perception of a deadline to produce an answer is not clearly affected by the external indicators of time availability. This research contributes to the understanding of test-taking behavior in the context of computer-based tests. (Contains 13 figures and 30 references.) (SLD)

Descriptors—*Academic Achievement, *Achievement Tests, Elementary Secondary Education, Foreign Countries, Item Bias, *Item Response Theory, *Mathematics Tests, Models, Test Items

Identifiers—Canada, Dimensionality (Tests), Educational Indicators, *School Achievement Indicators Program (Canada), *Two Stage Testing

New ways are proposed to look at data from the Canadian School Achievement Indicators Program (SAIP) using item response theory (IRT) modeling. The focus is on the traditional test of the SAIP 1997 mathematics study. The test is two-staged in that the first 15 items, of median difficulty, were to be completed beforehand by all students as a "placement" test. Where students were to start the second portion of the test was determined by their scores on the

first 15 items. The dimensionality of the scale, the item fit, item bias, and item invariance were considered in applying IRT modeling. The scale obtained reflected the relative ability of the students. Results suggest that mean scale scores can be safely compared between jurisdictions, genders, or age groups. The proposed approach seems reasonably appropriate when a two-stage testing procedure has been used to evaluate students' performance. (Contains 1 table, 5 figures, and 19 references.) (SLD)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Blacks, *Ethnography, *Females, *Fiction, Power Structure, *Qualitative Research, Racial Discrimination, *Research Methodology

Identifiers—African Americans, *Hurston (Zora Neale)

The conduct and use of qualitative research and the role of fiction as a way of examining the experiences of an African American woman are explored. The paper uses an alternative qualitative model to examine issues of power, equity, and race in the particular context of the African American woman. It discusses the writings of Zora Neale Hurston as a framework and compares the ethnographic stories in three Hurston short stories with a fictional ethnographic interpretation of related academic experiences. Telling a life experience as fiction is comparable to, and perhaps the same as, the "fiction" gathered during ethnographic moments. Researchers accept the ethnographic narratives gathered as data as experiences recreated by the narrator. Creating fiction can be a way to create objectivity through distance from a complex experience. (Contains 36 references.) (SLD)

Descriptors—*Academic Achievement, Algebra, *Black Colleges, Black Students, *College Students, *Developmental Studies Programs, *Educational Environment, *Family Influence, High Risk Students, Higher Education, Institutional Characteristics, Student Characteristics

This study identified predictors of academic performance in college algebra for postdevelopmental students at a predominantly black college. Questionnaires were randomly distributed to 175 students who were enrolled in college Algebra I and II. The sample included 142 students (classified as developmental on college entry by their own reports) who responded to a 21-item questionnaire, which included both traditional and nontraditional variables. Results indicate that students' entry-level characteristics, aptitude, and family-support variables were interrelated and had indirect effects on students' academic performance through institutional experiences and integration. Course grades have direct effects on academic performance, and students' motivation, ability, and familial influence on students' personal goals, have direct and indirect effects on academic performance through course grades. The result favors the developmental students regardless of gender and female students without regard to college grade point average. The trend

analyses indicate that as levels of family income, family education, and school and community activities increased, the student's academic performance decreased. (Contains 7 tables and 61 references.) (SLD)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Computer Assisted Instruction, *Distance Education, *High School Students, High Schools, *Interactive Video, Program Effectiveness, Research Methodology, Rural Schools, *Student Attitudes

Identifiers—*Log Linear Models

This study used log-linear modeling to examine responses of high school students enrolled in an interactive video program during the 1995, 1996, 1997, and 1998 program years to open-ended questions concerning the strengths and weaknesses of the program. Respondents, 1,024 students from a rural Appalachian area, were categorized by home or remote site and by semester. Analyses of the strength responses provided a model with a relationship between strength and site and between strength and semester. The weakness response required a model including the interaction of weakness, site, and semester. Results are discussed. (Contains 7 figures and 13 references.) (Author/SLD)

Descriptors—*Chi Square, *Educational Technology, Higher Education, *Hypothesis Testing, Research Methodology, *Spreadsheets

Identifiers—*P Values

The use of technology such as computers and programmable calculators enables students to find p-values and conduct tests of hypotheses in many different ways. Comprehension and interpretation of a research problem become the focus for statistical analysis. This paper describes how to calculate chi-square statistics and p-values for statistical tests of hypothesis with spreadsheets, especially LOTUS 1-2-3 for Windows. The chi-square probability distribution is approximated by techniques including series expansions and Simpson's Rule. The construction of spreadsheet macros to perform these calculations is demonstrated. Meanings and applications of the chi-square probability distribution to a number of examples are illustrated for students with various mathematical backgrounds. A description of the use of a computer algebra system, DERIVE, for computing p-values is also provided in the appendix. The use of technology as a tool for learning and doing statistics is emphasized. An appendix discusses other ways to find p-values. (Contains 10 tables and 9 references.) (Author/SLD)

Descriptors—Administrators, Coding, Elementary Secondary Education, *Factor Structure, *Graduate Students, Graduate Study, Higher Education, Leadership, Reliability, *Teachers, *Test Use, Textbooks

Identifiers—Confirmatory Factor Analysis, Cross Validation, *Leadership Behavior Description Questionnaire

The construct validity and internal consistency (reliability) of the 30-item form of the Leadership Behavior Descriptive Questionnaire (E. Fleishman, 1957; A. Halpin and B. Winer, 1957) as presented in a current leadership text was assessed. Classroom teachers and administrators (n=187) completed the instrument. Although reliability was found to be acceptable, neither the two-factor nor the five-factor model was adequate. Although the two-factor model produced adequate estimates of reliability, it should not be used without reverse coding. Reasons for these findings are discussed. An appendix contains two-factor and five-factor rotated convergent matrices. (Contains 5 figures, 3 tables, and 15 references.) (Author/SLD)

Evaluating College Services Using Student Ratings with Incomplete Data: An IRT Rating Scale Model Approach.

Pub Date—1999-04-00

Note—32p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*College Students, Colleges, Comparative Analysis, Evaluation Methods, Higher Education, *Item Response Theory, *Rating Scales, Responses, *Student Personnel Services, Surveys

Identifiers—*Missing Data

Missing data create problems for the interpretations and inferences of survey results, especially if the amount of missing data is substantial. This study considers issues of missing data when comparisons are made across survey items. It is suggested that if the groups responding to different items differ in their tendency to use one end of the measurement scale or the other, named as "pleasability" according to the specific nature of the data used in the study, then the comparisons of these items should be adjusted for this difference. Data for the study were obtained from the Student Opinion Survey processing history files of ACT Inc. for 10 institutions. Students at these colleges had responded to the survey about college services used, but the average number of students responding to all items was less than half the total number of respondents. The results of the study show a consistent difference in pleasability among the respondents and that an item response theory rating scale model can improve comparisons among survey items when the data consist of ratings on a Likert scale and respondents rate only selected items. (Contains 4 figures, 11 tables, and 17 references.) (Author/SLD)

Choosing a Multiple Comparison Procedure Based on Alpha.

Pub Date—1999-04-21

Note—18p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-

23, 1999).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Comparative Analysis, Monte Carlo Methods, Research Methodology, Selection, Simulation

Identifiers—*Alpha Coefficient, *Multiple Comparisons, Type I Errors

Four of the most commonly used multiple comparison procedures were compared for pairwise comparisons and relative to control of per-experiment and experimentwise Type I errors when conducted as protected or unprotected tests. The methods are: (1) Dunn-Bonferroni; (2) Dunn-Sidak; (3) Holm's sequentially rejective; and (4) Tukey's honestly significant difference procedure (HSD). Monte Carlo methods were used to generate replications, and means and standard deviations of observed Type I error-rates and percentages of observed Type I errors within the 0.95 confidence intervals were determined for per-experiment and experimentwise conditions. Effects of numbers of groups and group sizes on these Type I error rates were examined. Of primary concern was the accuracy of these procedures compared with the nominal alpha. Results indicate that none of these tests should be conducted as protected tests, but only as unprotected tests, particularly when alpha is 0.05 or less. If the Type I error control philosophy is experimentwise, Tukey's HSD, as an unprotected test, is clearly the most accurate procedure across all three alpha levels. If the Type-I error control philosophy is per-experiment, the Dunn-Bonferroni, as an unprotected test, is clearly the most accurate procedure across all three alpha levels. Parental Involvement and Students' Academic Achievement: A Meta-Analysis.

Spons Agencies—National Science Foundation, Arlington, VA.; National Center for Education Statistics (ED), Washington, DC.

Pub Date—1999-04-00

Contract—RED-9452861

Note—35p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, Academic Aspiration, Elementary Secondary Education, Expectation, *Meta Analysis, *Parent Participation, Qualitative Research

The idea that parental involvement has a positive influence on students' academic achievement is so intuitively appealing that society in general, and educators in particular, have considered parental involvement as the remedy for many problems in education. The vast proportion of the literature in this area, however, is qualitative without empirical data. Among the empirical studies that have investigated this issue quantitatively, there appear to be considerable inconsistencies. A meta-analysis was conducted to synthesize the quantitative literature about the relationship between parental involvement and students' academic achievement. The findings reveal a moderate, and practically meaningful, relationship between parental involvement and academic achievement. Using moderator analysis, it is revealed that parental aspiration/expectation for children's education achievement as the strongest relationship, while parental home supervision has the weakest relationship, with students' academic achievement. In addition, the relationship is stronger when academic achievement is represented by a global indicator than by a subject-specific indicator. Limitations of the study are noted, and suggestions are made for future studies. (Contains 5 tables and 85 references.) (Author/SLD)

When Inter-Rater Reliability Is Obtained from Only Part of a Sample.

Pub Date—1999-04-00

Note—20p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Estimation (Mathematics), Generalizability Theory, *Interrater Reliability, *Sample Size, Sampling, Scores, *Scoring

It is erroneous to extend or generalize the inter-rater reliability coefficient estimated from only a (small) proportion of the sample to the rest of the sample data where only one rater is used for scoring, although such generalization is often made implicitly in practice. It is shown that if inter-rater reliability estimate from part of a sample is available, the score reliability for the rest of the sample data rated by only one rater can be estimated both within the classical reliability theory framework, and within the framework of generalizability theory. As intuitively expected, score reliability for the data for which only one rater is used for scoring is always lower than the score reliability for the portion of sample data for which two raters are used. A sample of published studies is provided from difference disciplines that gives inter-rater reliability coefficients obtained from a small proportion of a sample. For this sample of published studies, by applying the method discussed in this paper, the estimated score reliability is given for the data rated by only one rater. (Contains 1 table and 20 references.) (Author/SLD)

Assessing the Effect of Model-Data Mismatch on the Invariance Property of IRT Parameter Estimates.

Pub Date—1999-04-00

Note—37p.; Paper presented at the Annual Meeting of the American Educational Research Association (Montreal, Quebec, Canada, April 19-23, 1999).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Estimation (Mathematics), *Goodness of Fit, High Schools, *Item Response Theory, Models, State Programs, Testing Programs

Identifiers—*Invariance, Large Scale Programs, Parameter Identification

This study empirically investigated the potential negative effect of item response theory (IRT) model-data mismatch on the degree of invariance of: (1) IRT item parameter estimates (item difficulty and discrimination); and (2) IRT person ability parameter estimates. A large-scale statewide assessment program test database was used, for which the one-parameter IRT has poor model-data fit, and the three-parameter model has exceptionally good model-data fit. Three examinee sampling plans were used to investigating the effect of model-data mismatch on the invariance of item parameter estimates, and two test sampling plans were used for investigating the effect of model-data mismatch on the invariance property of IRT person ability parameter estimates. Overall, the results failed to confirm that model-data mismatch in an IRT application is related to the invariance property of IRT item/person parameter estimates. Major limitations of the study are noted, and future directions are suggested. (Contains 1 figure, 7 tables, and 15 references.) (Author/SLD)

Identifiers—City University of New York, New York University

The New York Collaborative for Excellence in Teacher Preparation (NYCETP) is a project jointly undertaken by five college campuses of the City University of New York and New York University to enhance teacher education and to design and develop mathematics and science content and education courses for students preparing to be teachers. Over the first 3 years of the collaborative, the faculty development activities that involved cross-campus and cross-discipline collaboration occurred in large conferences, workshops, curriculum working groups, and through case studies. Formative evaluation has focused on facilitating faculty development, providing baseline data on courses, documenting change within the Collaborative courses, developing peer reviews of course documents, and to a lesser degree, assisting faculty in end-of-year course evaluations. Case studies of the Collaborative courses have been an important part of the ongoing evaluation, and an outline has been developed to guide faculty members in writing case studies. Evaluation of the CETP is important for both funders and evaluators. Both funders and evaluators are interested in careful review of project proposals and early warning systems for potential problems. Evaluators may have a more consultative function, but funders, who have responsibility to a broader constituency, may need to serve more as judges. Four appendixes contain a self-study guide, a related glossary, a campus peer review summary table, and the case study outline. (Contains 1 table and 26 references.) (SLD)

Identifiers—Curriculum Alignment, Exit Examinations, Value Added Model

This report starts with a quick review of the beginning of standardized testing in U.S. schools and the reasons for growing reliance on testing. It summarizes the recent promising trends and suggests how testing for accountability could be less intrusive and provide better information about achievement in schools. The proposal for a voluntary national test is examined, and an alternative is offered in view of the political stalemate in which the proposal is mired. The most promising development on the horizon, setting content standards and aligning curriculum and assessment to them, is

described in what is called the "patient approach." The challenge in setting performance standards is also set forth. The purposes of accountability assessment are recognized; the alternative of measuring "value added" for these assessments is described; and exit examinations are discussed. The critical role of the teacher in assessing students is examined, as is the need to equip teachers with the knowledge and tools to use assessment in day-to-day instruction. (SLD)

The Essence of Text: A Dialogue on Perspective Text Analysis. No. 70.

Lund Univ. (Sweden). Cognitive Science Research; Copenhagen Univ. (Denmark). Cognitive Science Research.

Report No.—ISSN-0281-9864

Pub Date—1999-00-00

Note—38p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Attitudes, Beliefs, Foreign Countries, Models, Researchers, Synthesis, *Text Structure, *Writing (Composition)

Identifiers—*Perspective Text Analysis

A method for providing a synthesis of the perspective that a text producer gives to a text in the moment of its production is presented in the form of a dialogue between reader and author. Perspective Text Analysis, the system presented, is a basic methodological part of a larger system of analyses. Linguistic data in the form of free text production is important so that the prejudices and attitudes, that both the researcher and the text producer may have, do not enter into the researcher's analysis. This guide describes the fundamentals of the method, and the principles of text analysis are given through prototypical examples. The applied model is based on the assumption that its components are reflecting "perspectivation," in which a source and one or more operators can be distinguished and differentiated from one another in the building up of a perspective. When the perspective is formed, the text producer takes a position toward something he or she wants to express. (Contains 41 references.) (SLD)

Descriptors—Elementary Secondary Education, *Enrollment, Enrollment Trends, Ethnicity, *Minority Groups, *Public Schools, Racial Differences, Tables (Data)

Identifiers—*Maryland

This report presents enrollment data for the Maryland public schools. School systems reported individual student-level data that were edited and aggregated to school system and state levels. The report categorizes data by race/ethnicity, gender, and grade level. In September 1998 there were 431,396 male students and 410,275 female students in membership. Enrollment has increased since 1990, and 57% of Maryland's students are in the elementary grades. The enrollment increased in 1998 in all but six of the state's school systems. Since 1990, the percentage of minority students has increased from 38.9% to 44.9%. In conjunction with increases in student enrollment, the number of schools has also risen, from 1,217 in 1990 to 1,326 in 1998. Twenty-eight tables contain data about Maryland's enrolled students. Descriptors—*Educational Equity (Finance), Elementary Secondary Education, Equal Education, *Finance Reform, Financial Needs, Income, Public Policy, School District Size, School District Spending, *School District Wealth, State Legislation, *Urban Schools

Identifiers—*Philadelphia School District PA

The degree of inequality of selected fiscal variables between a big city school district (the school district of Philadelphia, Pennsylvania), and the top spending school districts in the same state was studied across time. Comparisons were made on the basis of size and location of districts and the following variables: expenditures, wealth, local revenue, state revenue, and federal revenue per student. The study was conducted during a period of conflict between the Commonwealth of Pennsylvania and the School District of Philadelphia over the state's funding of the district. Data were extracted from reports from the state department of education. Philadelphia educates 12% of the state's students. Study findings suggest that the state's efforts to compensate for the needs of the big city still leaves a wide gap between the fiscal capabilities of the big city and the state's 25 top spending districts. State legislators need to be aware that their actions on fiscal policy have much more impact on the big city than on the top spending districts, which are much more dependent on local politics. A glossary is attached. (Contains 2 tables, 5 graphs, and 11 references.) (SLD)

Descriptors—Academic Failure, *Attention, Comparative Analysis, Cooperation, Correlation, *Elementary School Students, *Grade Repetition, *Incidence, Low Achievement, Primary Education, *Student Motivation, Student Promotion, Time Factors (Learning)

This study investigates the correlates and consequences of grade repetition on student academic progress and social and emotional development using the first grade cohort data from the "Prospects" longitudinal database. Analyses looked at two types of comparisons, same age and same grade, on three contrasting groups of students: (1) retained students versus all never retained children; (2) retained students versus all never retained students adjusting for factors that influence retention; and (3) retained students versus a low-achieving sample of nonretained children. In this study, consequences of grade retention on social and emotional development were measured by teacher rating of student attention, cooperation, and participation. Patterns of differences between retained and promoted students varied somewhat with the sample used and whether same age or same grade comparisons were being made. Differences in ratings of attention/motivation to learn, however, were consistently observed prior to retention. These differences were consistently reduced after retention across the various samples and comparisons being made. Differences between ratings of cooperation and participation prior to and following retention were not as striking or as consistent as those for attention/motivation. Comparison of the experiences, classroom

UD 032 894

organization, instructional content, and approaches in the regular and retained year found the two years highly similar in many dimensions, suggesting that grade retention does amount to repeating the same grade. Implications for practice are discussed. Six appendices provide study data and detailed analyses. (Contains 40 exhibits and 14 references.) (SLD)

Descriptors—Academic Achievement, *Compensatory Education, *Educational Change, Elementary Education, Federal Aid, *Federal Legislation, School Districts, *Standards, *Urban Schools

Identifiers—*Council of Great City Schools, *Elementary Secondary Education Act Title I, Reauthorization Legislation, Reform Efforts

The impact of changes in the 1994-95 reauthorization of Title I of the Elementary and Secondary Education Act on the operations and effectiveness of Title I programs in the Great City Schools was studied through a survey of urban school districts. Responses were submitted by 34 school districts, representing approximately 23% of the Title I student population. Survey findings indicate that the 1994-95 reauthorization of Title I had a substantial impact in the member districts of the Council of Great City Schools in terms of those served by the program, how it is operated, and the results it achieves. The number of students and schools benefiting from the program increased significantly, a growth that was partly the result of increased funding and partly the result of changing the eligibility of schools designated as "schoolwide" program sites. The number of eligible students in private schools increased, as did the number of private schools served. The survey also shows that a number of urban school districts also have content and performance standards in place for their Title I students, indicating that the work that has been done to raise standards in urban schools since the reauthorization has been significant. These findings are a progress report on Title I in urban schools, but do not represent the results from a complete program evaluation. They do suggest that the standards-based approach of the reauthorized Title I is bearing fruit in urban schools. Appendixes contain Title I data by district and sample Title I program descriptions. (Contains 29 figures.) (SLD)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Antisocial Behavior, *Children, Elementary Education, *Interpersonal Relationship, *Parent Role, *Social Development, Social Discrimination, *Teacher Role

By understanding why children engage in name calling and responding thoughtfully to such events, parents and teachers can help both the name caller and the victim to grow in their abilities to understand themselves and others. In their own social interactions, children mirror the negative evaluations they have observed. Left unchecked, such beliefs and attitudes can become the foundation of life-long prejudices. Name calling doesn't have to be part of childhood. Children can learn that words do hurt. When a child has been hurt by someone else's language, it is important for the child not to internalize the negative messages he or she has received. The parent or teacher should assure the child that the name caller was wrong. If name calling or exclusion is a frequent problem in school, teachers can implement character-education lessons that help all the children in the class be more sensitive to and accepting of each other. Those who work with children must be sure that they model appropriate behavior and they don't ignore the use of bigoted language by other adults so that children can learn that they can help overcome racism, sexism, and other forms of bigotry. Descriptors—*Adolescents, Inner City, Low Income Groups, *Neighborhoods, Psychological Characteristics, *Test Construction, *Urban Youth, *Violence

Identifiers—*Affiliative Behavior

A study was conducted to develop a theoretically and statistically sound measure of neighborhood affiliation for use with low-income urban youth. The aim was to develop a measure that can be used in future studies to predict community violence exposure among adolescents from inner-city neighborhoods. Participants were 167 adolescents from a public high school in Baltimore (Maryland). They completed a self-report scale, a measure of exposure to violence, a risk behavior survey, a demographic questionnaire, and the newly developed measure, "Me and My Neighborhood," which was based on other measures in the adult literature assessing neighborhood cohesion and reports from focus groups and clinical work in the community of interest. Findings support the reliability of this new measure of neighborhood affiliation. Future studies are planned to replicate reliability findings, demonstrate convergent and discriminative validity, and examine the association of neighborhood affiliation

and exposure to violence among inner-city youth. (Contains 4 tables and 27 references.) (SLD)

Using the Scale of Intrinsic versus Extrinsic Orientation in the Classroom (S. Harter, 1980) and the Self-Perception Profile for Children (S. Harter, 1985), this study of 222 urban early adolescents (median age=14.9 months) examined differences in motivation that might affect academic achievement and perceptions of competence. Socioeconomic status (SES) was found to be an important factor in academic performance, with poorer performance noted for lower income students. Like earlier research, cross-sectional analysis (controlling for SES) of composite intrinsic/extrinsic scores indicated a decline in the motivational component and an increase in the informational component from sixth to seventh grade. However, in contrast to previous research on predominantly white samples, this study finds these urban and minority students to be more intrinsically motivated. Academic motivation of students from single-parent families was found to be greater than that of peers living in two-parent families. Other within-group differences also contributed to academic outcomes. Actual academic achievement was higher for students who did not rely on teacher evaluation to know when they had succeeded or failed academically. Variability in perceived scholastic competence influenced motivational orientation more than did actual academic achievement. These findings suggest ways in which schools can help at-risk students succeed. (Contains 3 tables and 17 references.) (Author/SLD)

A hearing before the oversight committee for the District of Columbia (D.C.) public schools provided the opportunity for several senators and edu-

cators to comment on the progress of educational reform in the District's public schools. The hearing was held at a time when the opening of the city's public schools was delayed because of their many safety and code violations. Representative Richard K. Arney spoke about the conditions in the D.C. schools and discussed the school choice legislation he has sponsored. Jeanne Allen, president of the Center for Education Reform, discussed charter schools and emphasized that the priorities of the public school system are not consistent with fundamental education reform. Nina Shokrai of the Heritage Foundation advocated vouchers to allow parents to send their children to schools of their choice. Kent B. Amos discussed a proposal to change the funding of charter schools in the District of Columbia. Bruce K. MacLaury, Chairman of the Emergency Transition Education Board of Trustees of the District of Columbia Public Schools, presented the views of the transitional board about the progress toward school reform in the city's schools and offered support for charter schools. General Julius W. Becton, Jr., the appointed Superintendent of Schools, discussed the condition of the schools in general and outlined some improvements made under his administration, focusing on the ongoing physical plant repairs. An appendix contains the District of Columbia Student Opportunity Scholarship Act of 1997 and some supporting statements, including prepared remarks of those who testified at the hearing. (SLD)

Descriptors—Academic Achievement, *Educational Equity (Finance), Educational Quality, Elementary Secondary Education, Expenditure per Student, *Public Schools, *Resource Allocation, School District Wealth, *Urban Schools

Identifiers—*New York City Board of Education

This report sets forth, through an analysis of both quantitative and qualitative data, a vivid picture of the severe shortage of basic resources in 228 of New York City's public schools. Data come from detailed questionnaires filled out by parents, teachers, and administrators from these schools. These responses indicate that 55% of these school buildings are virtually a half century old, and 9% of the elementary schools and 7% of the high schools date back to the 19th century. Many of the schools need major repairs, and in 29% of the elementary schools, instruction takes place in hallways, gyms, and other converted spaces. In 41% of the elementary schools, 63% of the middle schools, and 64% of the high schools, 6 or more full-time teachers lack permanent state certification. Class sizes are large, and equipment is often missing. Textbooks and even desks and chairs are often lacking. The causes of these resource deficiencies are structural problems in the present state aid system. New York City is routinely shortchanged by the state aid system. For the past 15 years, its per-pupil expenditures have lagged behind the statewide average. The documented gap grows even larger when the needs of the city's students are taken into account. (Contains 1 table, 11 graphs, and 13 endnotes.) (SLD)

Descriptors—Academic Achievement, Behavior Patterns, *Grade 8, *Junior High School Students, Junior High Schools, *Mathematics Achievement, Questionnaires, *Reading

Achievement, *School Safety, Student Attitudes, Victims of Crime, *Violence
 Identifiers—National Education Longitudinal Study 1988

This study analyzed base-year student data files from the 1988 National Education Longitudinal Study (NELS:88) cross-sectionally to identify relationships between school violence and student achievement in reading and mathematics. The analysis identified student behavior variables related to three measures of school violence: (1) personal behavior, such as being sent to the office for misbehaving, parents being warned about behavior, or fighting with other students; (2) victimization, whether having something stolen, receiving a drug offer, receiving threats or harm; and (3) perception of violence indicated by student responses to how they perceived violence problems in their school. Background variables included in the analyses were sex, race/ethnicity, socioeconomic status quartile, school type (public, Catholic, other religious private, nonreligious private), and school community location (urban, suburban, and rural). Associations of school violence measures plus student background characteristics on student achievement show that when the incidence of negative personal behavior increases, there is a negative effect on achievement. Students experiencing victimization and students' perceptions of violence in their schools show lower levels of effect on achievement. Implications for school practices and suggestions for future research are discussed. Three appendices contain summaries of school violence reports, a description of the NELS:88, and the NELS:88 eighth grade questionnaire. (Contains 14 tables and 138 references.) (SLD)

Descriptors—*Adolescents, Audiences, *Black Students, Ethnicity, High School Students, High Schools, Interpersonal Relationship, *Males, Minority Groups, Racial Discrimination, *Racial Identification, Responses
 Identifiers—*African Americans

The responses of male ethnic minority students to acts of racial discrimination were studied as a function of ethnic identity status, audience presence, and attributions of personal control. It was hypothesized that individuals with an unexamined ethnic identity would be more likely to have explored the meaning and significance of their ethnic group membership and that those with an achieved ethnic identity would be more likely to endorse active responses to acts of discrimination. It was also hypothesized that adolescents who were alone during an act of discrimination would respond differently from those who were accompanied. Two hundred male African American adolescents at an urban high school participated, completing a discrimination response index presenting scenarios of acts of discrimination and a measure of ethnic identity status. Both hypotheses were partially supported. Regardless of the audience present, adolescents who had explored the meaning and significance of their ethnic group membership were more likely to endorse hostile responses than adolescents who had not explored their ethnic group membership. (Contains 89 references.) (SLD)

Descriptors—*After School Programs, Aggression, *Behavior Problems, *Children, Control Groups, Elementary Education, Program Evaluation, *Risk

Identifiers—4 H Clubs, *Protective Factors

Findings from the first round of evaluation of an afterschool youth development program are presented. This program, the 4H Afterschool Activity Program, incorporated a specific curriculum of aggression reduction, the BrainPower program, into its ongoing activities, which cover a wide range from homework assistance to arts and crafts. The BrainPower curriculum is a systematic application of principles of attribution theory. The experimental group for this study consisted of 50 children, aged 7 to 11 years, from 2 Los Angeles housing projects. A comparison group of 40 children did not participate in the afterschool program. Teacher and parent ratings of aggressive behavior were collected, and children's intentionality beliefs and beliefs about aggression were assessed with an instrument designed for this research. Data support the characterization of a supervised program of activities as a protective factor in the face of high rates of community crime. Afterschool program participants were perceived by teachers and parents to display fewer problem behaviors, and the differences between experimental and comparison groups increased over the 6-month study. (Contains 29 references.) (SLD)

Descriptors—*Achievement Gains, *Early Intervention, *Grade 1, Longitudinal Studies, Primary Education, Program Effectiveness, Program Evaluation, Reading Achievement, Reading Tests, Standardized Tests, Tables (Data), Urban Schools

Identifiers—*Detroit Public Schools MI, *Reading Recovery Projects

Reading Recovery is an early intervention program for first grade designed to reduce reading failure. It is based on the assumption that intensive, high-quality help during the early years of schooling is the most productive investment of resources. Individually tailored intervention procedures are implemented for children identified by classroom teachers as achieving below-grade level. A longitudinal study was designed to assess the success of this program in the Detroit Public Schools (Michigan) over the 5 years from 1993-94 to 1997-98. A total of 135 students were studied, 75 in the experimental group participating in Reading Recovery and 60 in a comparison group who were approximately at the same reading achievement level at the start of the study. Data from the California Achievement Test, the Metropolitan Achievement Test, and the Michigan Education Assessment Program were used to measure student achievement. The Reading Recovery group showed improvement throughout the study—an improvement sustained over the 5 years. However, the Reading Recovery group consistently scored below the achievement levels of the comparison group. It is recommended that the program, if continued, be monitored closely for documentation of academic achievement and effectiveness. An appendix contains information about assessment tasks administered in Reading Recovery. (Contains 20 tables.) (SLD)

This "sampler" package has been developed to provide immediate information on resources related to educational policy related to addressing barriers to learning. The first section lists 69 resources for information about educational improvement and learning, including ERIC. The second section lists 14 print resources for facts relevant to showing policy need. Section 3 lists guides and model programs, including some state initiatives relevant to addressing barriers to learning. Section 4 lists agencies and resource centers that focus on policy concerns or offer resources for the study and formulation of policy. Section 5 lists Web sites related to educational policy, and the sixth section describes the three major resources from the Center: documents from the Clearinghouse, the consultation cadre, and center staff. An attachment lists some documents from the Clearinghouse of the Center for Mental Health in Schools. An appendix contains four documents prepared by the Clearinghouse: (1) "Some Points about Influencing Policy"; (2) "Fundamental Concerns about Policy for Addressing Barriers to Student Learning"; (3) "Addressing Barriers to Learning/Strengthening Schools, Families, and Neighborhoods: Framework Outlining Areas of Interest"; and (4) "Worksheet: Examples of Initiatives that Need To Be Mapped and Analyzed." Identifiers—ERIC Digests

This digest reviews current research on girls' delinquent and violent behavior, the factors contributing to it, and effective programming strategies to prevent it. Girls are more involved in violent crime than they were a decade ago. Their murder rate is up 64%, although status offenses (offenses only because the perpetrator is a minor) continue to comprise most of girls' arrests. The violent crimes committed by girls differ from offenses by boys. Girls are more likely to use knives, more likely to kill someone as a result of a conflict rather than during a crime, and more likely to murder or fight with family members. Current research on adolescent violence and delinquency considers how social class, race, ethnicity, and culture interact to cause young women to behave violently. To serve young women effectively, programs must develop culturally sensitive, gender-specific approaches to intervention. A

recent review of existing programs for girls suggests that three common elements combine in program success: (1) comprehensive counseling; (2) educational and occupational support; and (3) support for young women not able to remain with their families. (Contains 13 references.) (SLD)

This second annual report on the condition of U.S. cities outlines the challenges for cities if the United States is to reach its full potential in the 21st century. Data from many sources reveal three major findings: (1) cities are fiscally and economically the strongest they have been in a decade; (2) cities still face the triple threat of concentrated poverty, shrinking populations, and middle-class flight; and (3) cities face fundamental opportunity gaps in jobs, education, and housing. Urban schools are failing to prepare an alarming number of U.S. children to meet the challenges of the new high-technology economy, and minority children are paying the highest price. In addition, many urban schools have trouble recruiting and keeping teachers. Basic achievement is lagging, and there are low graduation rates in urban high schools. School violence is concentrated in large urban schools, and many urban schools are literally falling apart. Some suggestions are made for urban school reform, including linking schools and universities and improving school facilities through School Modernization Bonds. Reducing class sizes, attracting teachers, accessing the information superhighway, and expanding before- and after-school opportunities and opportunities for lifelong learning are all necessary for school improvement. An appendix contains highlights for cities from the 1999 federal budget. (Contains 20 exhibits.) (SLD)

Identifiers—*Pittsburgh School District PA

This is the third report from the evaluation of the Multicultural Education Program in Pittsburgh (Pennsylvania), a major effort to address racial and ethnic diversity in a middle school. Section 1 of the report provides background on the multicultural education movement and the aims of the Pittsburgh program. Section 2 describes the status of the program's challenges, presenting information on program implementation based on information from students, staff, and parents who are participants in the demonstration program. The third section describes the levels of implementation achieved and the implications of development to date. Seven program components have been developed to address the challenges of multicultural education: (1) conflict resolution; (2) cultural awareness; (3) learning and teaching styles; (4) cooperative learning; (5) multicultural curriculum; (6) parent and community involvement; and (7) elimination of tracking. The evaluation found mixed results at the Prospect Center, the school at which the program was implemented, but substantial progress was made at the district level. Multicultural education continues to be a priority for the Pittsburgh Public Schools, but the responsibility for change resides mainly in the individual schools. An appendix contains a policy statement on multicultural education, and student, staff, and parent surveys. (Contains 13 figures and 32 tables.) (SLD)

Identifiers—*Elementary Secondary Education Act Title I, *Improving America's Schools Act 1994 Title I, Reauthorization Legislation

The largest single federal investment in schooling, Title I of the Elementary and Secondary Education Act (P.L. 103-382) has provided supplementary resources to schools with large numbers of low-income students throughout the past three decades. In 1994 the program was reauthorized according to the Improving America's Schools Act (IASA), which carries with it a number of revised legislative expectations even as it increases the number of schools eligible to operate schoolwide programs.

The new legislation expands opportunities for schools operating schoolwide programs to integrate their services, strategies, and resources to reform their entire educational programs. This document provides an overview of the legislative intent and expectation of the Schoolwide Program Provisions of the IASA. Summary statements are given in shaded boxes, and these statements are followed by questions that administrators, teachers, and other school staff can use to reflect on their activities in the context of what is expected by the legislation. Information on basic programs and procedural components is followed by material about legislative expectations in the areas of: (1) student performance; (2) state standards and assessments; (3) curriculum and instruction; (4) professional development; (5) parent and community involvement; and (6) resource flexibility, system supports, and accountability. (Contains three references.) (Author/SLD)

Identifiers—*Elementary Secondary Education Act Title I, Improving America's Schools Act 1994 Title I

This report provides a synopsis of findings from an interim report of an ongoing national study of Title I schoolwide programs conducted by the Laboratory for Student Success in conjunction with other Regional Educational Laboratories. The study is designed to develop a national database on program features, implementation requirements, and outcomes of Title I schoolwide projects in order to provide assistance to local schools with their own schoolwide projects. Initial findings from this study indicate that more effective schools are implementing the Title I schoolwide legislative expectations more faithfully than less effective schools. Teachers from more effective schools agreed that their schools were emphasizing high standards for all students and implementing instructional practices to promote academic achievement. Parent responses were not as favorable, with parents who speak a language other than English or are bilingual tending to rate the schools lower in most areas. Classroom observations indicate that students predominantly meet in large groups and are usually independently working on-task. The difference in instructional interaction time for more effective and less effective schools is not statistically significant. (Contains one figure and three references.) (SLD)

Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the *Thesaurus of ERIC Descriptors* and the *Identifier Authority List*, are in word-by-word alphabetical order.

As shown in the examples below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author Index

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the examples below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author _____	McKeachie, Wilbert J.	
Title _____	Teaching Tips: A Guidebook for the Beginning College Teacher, Eighth Edition.	ED 298 813 Accession Number

Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g., Wisconsin University (for the University of Wisconsin).

As shown in the examples below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Institution _____ **American Association of State Colleges and Universities, Washington, DC.**
Title _____ **Planning Now for College Costs: A Guide for Families.**
ED 298 804 _____ **Accession Number**

Action Alliance for Virginia's Children and Youth, Richmond.

Affordability and Accessibility of Child Care in Virginia. Critical Issues in Child Care. White Paper 2.

Publication Type Index

This index lists documents under the Publication Type that has been assigned to them to characterize their form or organization, as contrasted to their subject matter.

As shown in the examples below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The Publication Types are displayed in a classified index arrangement, according to the outline below.

Code ————— (052) Guides - Classroom - Teacher ————— Publication Type
 Title ————— The First Amendment: Free Speech & Free Press.
 A Curriculum Guide for High School Teachers. ————— Accession Number
 ED 261 929

Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession numbers to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education (RIE)*. Readers who have only a Clearinghouse number for a given document may use this index to trace the item to its ED number and hence to its location in *RIE*.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index.

AA – ERIC Processing and Reference Facility
CE – Adult, Career, and Vocational Education
CG – Counseling and Student Services
CS – Reading, English, and Communication
EA – Educational Management
EC – Disabilities and Gifted Education
EF – Educational Facilities
FL – Languages and Linguistics
HE – Higher Education
IR – Information & Technology

JC – Community Colleges
PS – Elementary & Early Childhood Education
RC – Rural Education and Small Schools
SE – Science, Mathematics, & Environmental Education
SO – Social Studies/Social Science Education
SP – Teaching and Teacher Education
TM – Assessment and Evaluation
UD – Urban Education

THESAURUS ADDITIONS AND CHANGES

307

The following additions and modifications have been made to the ERIC controlled vocabulary since December 1994. They are, therefore, not included in the main body of the 13th (1995) edition of the *Thesaurus of ERIC Descriptors*.

Academic Senates (Colleges)

USE COLLEGE GOVERNING COUNCILS (unqualified use reference "Academic Senates" was deleted)

ACIDS Jun. 98

ADOLESCENT ATTITUDES Aug. 99
SN Attitudes of, not toward, adolescents

AFROCENTRISM

Aug. 99
SN Political and educational movement stressing African cultural values and the achievements of African civilizations, aimed at increasing confidence, identity, and unity among African-Americans and others of African descent
UF African Centered Perspective
Africentrism

Alternate Day Block Scheduling
USE ALTERNATE DAY SCHEDULES
and BLOCK SCHEDULING

ALTERNATE DAY SCHEDULES Dec. 89
SN (Scope Note Changed) Scheduling attendance on alternate days—frequently refers to kindergarten, preschool, or day care programs

AMERICAN DREAM

Jan. 96
SN The ideals of freedom, equality, and opportunity traditionally held to be available to everyone in the U.S.—also, the popular belief that perseverance and hard work in the U.S. will bring forth happiness, success, and material well-being

ATTITUDES TOWARD DISABILITIES

Jun. 99
SN Predispositions or opinions, of individuals or of societies, concerning people with disabilities or concerning disabilities (note: see also the Identifier "Ableism")

Bathrooms
USE TOILET FACILITIES

BEGINNING PRINCIPALS

Aug. 97
SN Certified administrators entering their initial career position as executive or administrative officer of a school
UF First Year Principals

BENCHMARKING

Feb. 98
SN Systematically measuring and comparing the operations and outcomes of organizations, systems, processes, etc., against agreed upon "best-in-class" frames of reference

BEREAVEMENT

Jun. 96
SN Deprivation or loss, especially of loved ones by death (note: prior to Jun96, this concept was frequently indexed by "Grief")

BIRTHS TO SINGLE WOMEN

Dec. 95
UF Illegitimacy
Illegitimate Births (1967 1995)
Nonmarital Childbirth
Out of Wedlock Births
Single Mother Births
Unmarried Mother Births

BISEXUALITY

Jun. 98
SN Sexual responsiveness to both sexes

BLOCK SCHEDULING

Aug. 96
SN An instructional arrangement whereby part or all of the daily class schedule is organized into blocks of time longer than an hour, to facilitate flexibility and diversity in instructional activities (note: prior to Aug96, this concept was indexed as "Time Blocks")
UF Block Time Teaching (former UF of "Time Blocks")

Bosnian
USE SERBOCROATIAN

BRAIN Sep. 97
UF Brain Research

BULLYING Jul. 98
SN Cruelty and intimidation by teasing, taunting, threatening, hitting, stealing, excluding, ignoring, etc.

CAPITAL PUNISHMENT Aug. 98
UF Death Penalty
Executions (Criminal Law)

CAREER ACADEMIES

Aug. 95
SN Schools-within-schools (usually high-school level) focusing on broadly defined career themes (health careers, electronics, etc.), with highly integrated academic and vocational curricula and active involvement of local employers
UF High School Academies (Career Development)
Job Training Academies
Partnership Academies (School and Business)
Vocational Academies

CASE METHOD (TEACHING TECHNIQUE)

Dec. 97
SN The practice of using cases as a pedagogical tool in fields such as law, business, medicine, and education—cases may include real and imagined scenarios, critical incident analysis, case studies, vignettes, and anecdotal accounts
UF Case Based Instruction
Case Study Approach (Teaching)

CASE STUDIES

Apr. 70
SN (Scope Note Changed) Detailed analyses, usually focusing on a particular problem of an individual, group, or organization (note: do not confuse with "Medical Case Histories"—as of Dec97, use "Case Method (Teaching Technique)" for case-based instruction—as of Oct81, use as a minor Descriptor for examples of this kind of research—use as a major Descriptor only as the subject of a document)

CENTRAL OFFICE ADMINISTRATORS

Feb. 98
SN School district administrators, responsible to the superintendent and board of education for such areas as curriculum, personnel, budget, assessment, student services, and community relations (occasionally may be interpreted to include the superintendent and board of education)

CHAOS THEORY

Jan. 99
SN Study of complex, replicated patterns in seemingly random phenomena
UF Butterfly Effect

CHARTER SCHOOLS

Oct. 95
SN Public schools run by groups of parents, teachers, and administrators under contract with local or state school boards, and given broad freedom from regulations in exchange for the promise of such favorable outcomes as improved test scores, attendance rates, and dropout rates

CHILDRENS WRITING

May 95
SN Writing by, not for, children (note: see also the Identifiers "Beginning Writing" and "Early Writing")

CLASSICAL LITERATURE

Jul. 66
SN (Scope Note Changed) Literature of ancient Greece and Rome (note: do not use for outstanding or time-honored books generally, for which see "Classics (Literature)")

CLASSICS (LITERATURE)

Aug. 96
SN Literary works of demonstrably enduring appeal and quality (note: do not confuse with the literature of ancient Greece and Rome, for which use "Classical Literature"—see also the Identifiers "Great Books Curriculum" and "Junior Great Books Program")
UF Literary Classics

Cocaine Prenatal Exposure
USE COCAINE
and PRENATAL DRUG EXPOSURE

Collaborative Teaching
USE TEAM TEACHING

Community Based Education
USE COMMUNITY EDUCATION

COMMUNITY EDUCATION

Jul. 66
SN (Scope Note Changed) Extending existing educational resources (including those of schools, colleges, and local organizations) into the community to serve all age groups and special target groups not ordinarily served by regular educational programs (note: do not confuse with community-focused place-based education, for which use the Identifier "Place Based Education," coordinated as appropriate with a second Identifier "Sense of Community")

COMMUNITY NEEDS

Aug. 98
SN Necessary conditions for optimal function, development, or well-being of the community

COMPREHENSIVE SCHOOL HEALTH EDUCATION

Nov. 95
SN Sequential programs of health instruction, health services, and healthful school environments that enable students in kindergarten through grade 12 to develop the awareness, knowledge, and skills needed for healthy behaviors—health areas covered include mental and emotional health, community and environmental health, consumer health, family life, growth and development, nutrition, personal health and fitness, safety and accident prevention, disease prevention and control, and substance use and abuse
UF Comprehensive School Health Programs

CONCEPT MAPPING

Nov. 96
SN The identification, organization, and graphic depiction of relationships among concepts in a knowledge domain—the technique employs a node-link formalism in which domain key concepts are circled, bracketed, etc., arranged hierarchically (general to specific), then interconnected by lines labeled with short explanations

CONJUNCTIONS

Sep. 96
SN Connective words, as "and," "but," "because," "even though," that join words, phrases, clauses, or sentences (note: see also the Identifier "Connectives (Grammar)")

Crack Babies
USE CRACK
and PRENATAL DRUG EXPOSURE

- CRISIS INTERVENTION** *Mar. 80*
 SN (Scope Note Added) Techniques used to avert or deal with psychiatric or medical emergencies, as potential suicide, domestic violence, and drug overdose (note: prior to Aug99, this term was not restricted by a scope note)
- CRISIS MANAGEMENT** *Aug. 99*
 SN Implementation of processes designed to prevent or alleviate crisis situations (e.g., violence, threats of violence, natural disasters, significant failures, scandals) in an organization, system, community, or environment (note: prior to Aug99, this concept was occasionally indexed "Crisis Intervention," which was not scoped)
- CULTURAL RELEVANCE** *May 95*
 SN Applicability of materials, methods, or programs to one's own ethnicity, social status, gender, religion, home and community environment, and/or personal experiences (note: if possible, use the more specific term "Culturally Relevant Education")
 UF Relevance (Cultural)
- CULTURALLY RELEVANT EDUCATION** *May 95*
 SN Educational practices and resources that reflect the culture, values, customs, and beliefs of students (i.e., help to connect what is to be learned with the students' own lives)
 UF Culturally Appropriate Education
 Culture Based Curriculum
- CYSTIC FIBROSIS** *Oct. 98*
 SN Hereditary disease of the exocrine glands characterized by salty sweat and the overproduction of thick, sticky mucus that may obstruct passageways (including pancreatic and bile ducts, intestines, and bronchi)
- DEBT (FINANCIAL)** *Jun. 99*
 SN Money owed by one party to another (note: see also such Identifiers as "External Debt," "International Debt," and "National Debt")
- DENIAL (PSYCHOLOGY)** *Nov. 97*
 SN Refusal or inability to accept painful or difficult realities
- DENSITY (MATTER)** *May 98*
 SN Mass per unit volume of a substance
- DEWEY DECIMAL CLASSIFICATION** *Oct. 97*
 SN Widely used hierarchical system for classifying library materials, devised by Melvil Dewey in 1873 and revised many times since then, that divides knowledge into ten 3-digit numeric subject classes, with further specification expressed by numerals following decimal notation
 UF Decimal Classification (Dewey)
 DDC (Classification)
- DISSECTION** *Oct. 96*
 SN Examining the structure of an animal or plant by cutting it apart—frequently computer-simulated, and may include human anatomical study (note: for operative medical treatment, use "Surgery")
- DIVERSITY (FACULTY)** *Aug. 97*
 SN Variation within a faculty population of such characteristics as race, religion, gender, cultural background, sexual orientation, or socioeconomic class
- DIVERSITY (STUDENT)** *Aug. 97*
 SN Variation within a student population of such characteristics as race, religion, gender, cultural background, sexual orientation, or socioeconomic class
- DOCUMENT DELIVERY** *Nov. 95*
 SN Transmission of a print or electronic document, such as a journal article, from a vendor or a library to the requestor—may be fee-based or free
- DROUGHT** *Nov. 95*
 SN Climatic period(s) of extreme dryness, in which natural water supplies are insufficient for plant life and other needs (note: see also the Identifier "Desertification")
- EARLY IDENTIFICATION** *Jun. 96*
 SN Diagnosis of an exceptionality (disability and/or giftedness), medical condition, or risk factor early in life or in the condition's early stages (note: prior to Jun96, the instruction "Early Detection, USE Identification" was carried in the Thesaurus)
 UF Early Diagnosis
 Early Detection (former UF of "Identification")
- ELECTRONIC JOURNALS** *Aug. 96*
 SN Periodicals, usually topical and moderated, that are published and disseminated (sometimes on an irregular schedule) in the form of electronic text or hypertext on computer networks (such as the Internet) or other computerized media (e.g., CD-ROM)
 UF Electronic Magazines
 Online Journals
- ELECTRONIC LIBRARIES** *Sep. 96*
 SN Services and collections of information made accessible through computer networks—including services such as document delivery, end-user searching and training, network access, and online catalog enhancements, and access to collections of bibliographic and full-text databases, electronic journals, and digital images
 UF Digital Libraries
 Virtual Libraries
- EMERGENT LITERACY** *Mar. 96*
 SN The early stages of learning to read and write—an increasing awareness of the print world, usually associated with young learners observing and experimenting with reading and writing processes (note: in the 1980s, the emergent literacy perspective was a departure from the more traditional stage view of reading/writing readiness followed by formal learning)
 UF Early Literacy
- EMPOWERMENT** *Jul. 96*
 SN Promotion or attainment of autonomy and freedom of choice for individuals or groups (note: use a more specific term if possible—see the identifiers "Community Empowerment," "Employee Empowerment," and "Staff Empowerment")
 UF Personal Empowerment
 Self Empowerment
- ENGLISH ONLY MOVEMENT** *Dec. 95*
 SN Efforts to make English the single official language of a government or other group (commonly, of the nation and states of the U.S.A.)
- ENGLISH TEACHERS** *Sep. 95*
 SN Teachers of English-language arts and letters (note: may be coordinated with "English (Second Language)" for teachers of English as a second language)
- Euskara**
 USE BASQUE
- EUTHANASIA** *Oct. 97*
 SN Inducing the death of persons or animals suffering from incurable conditions or diseases (note: related Identifiers are "Assisted Suicide" and "Right to Die")
 UF Mercy Killing
- Faculty Senates (Colleges)**
 USE COLLEGE GOVERNING COUNCILS (unqualified use reference "Faculty Senates" was deleted)
- FAMILY ENGLISH LITERACY** *May 97*
 SN English literacy for limited-English-proficient and non-English-speaking families—family English literacy programs usually include adult literacy, preschool/school-age education, and parenting education (note: use only for English as a second language programs—otherwise, use "Family Literacy")
- FAMILY LITERACY** *May 97*
 SN Literacy for all family members—family literacy programs frequently combine adult literacy, preschool/school-age education, and parenting education (note: use the more specific term "Family English Literacy" for English as a second language programs)
 UF Child Parent Literacy
 Parent Child Literacy
- FAMILY NEEDS** *Jun. 96*
 SN Conditions or factors necessary for optimal function, development, or well-being of families
- FEMINIST CRITICISM** *Sep. 96*
 SN Description, interpretation, and evaluation of literature, art, music, educational programs, etc., from a feminist perspective (i.e., of female consciousness, women's rights, and the resistance to male domination)
- FLOODS** *Nov. 95*
 SN Bodies of water that overtop their natural or artificial confines and that cover areas not normally underwater
- FOCUS GROUPS** *May 96*
 SN Small, roundtable discussion groups charged with examining specific topics or problems (e.g., consumer preferences, product attributes, educational issues), including possible options or solutions—focus groups usually consist of 4-12 participants, guided by moderators to keep the discussion flowing and to collect and report the results
 UF Focused Group Interviews
- FRAUD** *Jun. 99*
 SN Deceit, trickery, or breach of confidence in order to gain unfair or dishonest advantage
- GLOBAL APPROACH** *Oct. 94*
 SN (Scope Note Changed) Approach to social, cultural, scientific, and humanistic questions involving an orientation to the world as a single interacting system (note: do not confuse with outlooks or philosophies of life, for which see "World Views")
- Global Perspectives**
 USE GLOBAL APPROACH
- Government Policy**
 USE PUBLIC POLICY
- GRAPHING CALCULATORS** *Jun. 97*
 SN Calculators capable of producing animated graphing sequences based on mathematical formulas (note: prior to Jun97, the Identifier "Graphing Utilities" was commonly used to index this concept)
- GUN CONTROL** *Sep. 98*
 SN The regulation of the manufacture, transport, sale, ownership, and use of firearms
 UF Firearms Control
- GUNS** *Sep. 98*
 SN Weapons using an explosive, usually gunpowder, to hurl bullets or other projectiles (note: do not use for the Identifier "Toy Guns")
 UF Firearms
 Small Arms
- Hands on Learning**
 USE EXPERIENTIAL LEARNING

HANDS ON SCIENCE *Dec. 95*
SN Science activities and programs that require active personal participation

HEALTH MAINTENANCE ORGANIZATIONS *Nov. 95*
SN Prepaid comprehensive medical service systems (note: see also the Identifier "Social Health Maintenance Organizations")
UF HMOs
Managed Care (HMOs)

HISTORIANS *Nov. 96*
SN Scholars or writers of chronological accounts of human events

Home Child Care
USE CHILD REARING

HONESTY *Nov. 97*
SN Truthfulness — freedom from deceit or fraud
UF Dishonesty
Truthfulness

HOUSEWORK *Nov. 96*
SN Tasks, including cleaning, food preparation, and doing laundry, that are necessary for the maintenance of a household (note: see also the Identifier "Division of Labor (Household)")
UF Household Chores
Housekeeping (Households)

HURRICANES *Nov. 95*
SN Tropical cyclones with high-speed winds equaling or exceeding 64 knots (73 mph)
UF Tropical Cyclones
Typhoons

Illegitimate Births (Del Dec95)
USE BIRTHS TO SINGLE WOMEN

INFORMAL EDUCATION *Jan. 99*
SN Casual and continuous learning from life experiences outside organized formal or nonformal education (note: do not confuse with "Nonschool Educational Programs" or "Nonformal Education")

INTERNET *Feb. 96*
SN The international network of computer networks interconnected by routers or gateways and using the standard TCP/IP telecommunications protocol to transfer data such as electronic mail—the Internet connects millions of users among industry, education, government, research, commerce, and private households (note: see also the Identifier "National Information Infrastructure" for documents related to the U.S. Government's Federal NII/Internet policy initiative)
UF Electronic Superhighway
Information Superhighway

ISLAM *Jun. 99*
SN Religion that professes belief in Allah as the sole deity and in Muhammad as the Prophet of Allah

JAPANESE CULTURE *Mar. 96*

JOURNAL ARTICLES *Jun. 96*
SN Works of prose, complete in themselves, that are published with other such works in periodicals (note: corresponds to Pubtype Code 080—do not use except as the subject of a document)
UF Articles (Journals)
Magazine Articles
Periodical Articles

JOURNALISM RESEARCH *Sep. 95*
SN Basic, applied, and developmental research conducted to advance knowledge about journalism (note: use as a minor Descriptor for examples of this kind of research—use as a major Descriptor only as the subject of a document)

KEYWORDS *Sep. 96*
SN In information science, words and phrases in an abstract, title, text, etc., of a work that identify its significant content (note: keywords are usually the uncontrolled or "natural-language" vocabulary—do not confuse with controlled subject headings, for which use "Subject Index Terms")—in learning and language development, words and phrases of prime importance to a particular task/activity, frequently associated with one another or with pictorial images for easy remembrance (note: see also more precise Identifiers "Keyword Mnemonics," "Keyword Method (Language Learning)," and "Keyword Method (Second Language Learning)")
UF Key Word Access Points

Kirghiz (Del Apr98)
USE KYRGYZ

KYRGYZ *Apr. 98*
UF Kirghiz (1968 1998)
Kirgiz
Kyrghyz

Language Evolution
USE DIACHRONIC LINGUISTICS

LANGUAGE MINORITIES *Aug. 96*
SN Groups whose native language is not the dominant language of the larger society (note: "Limited English Speaking" may be more appropriate for documents dealing with English-as-a-second-language instruction)
UF Linguistic Minorities
Minority Language Groups

LIBRARY ADMINISTRATION *Sep. 75*
SN (Scope Note Added) Planning, organizing, directing, and controlling human or material resources within a library or library network

LIBRARY ADMINISTRATORS *Aug. 96*
(former UF of "Library Administration")
SN Library personnel whose responsibilities may include managing library staff, evaluating programs, planning and managing budgets, developing collections, and planning library services (note: prior to Aug96, the instruction "Library Administrators, USE Library Administration" was carried in the Thesaurus)

LIBRARY DIRECTORS *Aug. 96*
SN Chief executive officers of libraries or library systems responsible for overall direction and coordination of library services, resources, and programs
UF Head Librarians

LIBRARY OF CONGRESS CLASSIFICATION *Apr. 98*
SN Library material classification system, designed for large collections and used widely by academic libraries, that represents knowledge by a mixed notation of letters and numbers—developed initially in 1897 for the U.S. Library of Congress
UF LC Classification

LIMITS (MATHEMATICS) *Jun. 97*
SN The minimum and maximum points of variable x —also, the values approximated by a function $f(x)$ as the independent variable x approaches a specific value, usually associated with calculus

LISTSERVS *Nov. 98*
SN Electronic mailing lists that serve specific purposes or areas of interest and that automatically distribute messages from subscribers to all other subscribers
UF Electronic Discussion Lists
Internet Discussion Lists
Mailing List Servers

MANDATORY CONTINUING EDUCATION *May 97*
SN Education required by regulation or law for occupational and professional development, e.g., for work licensure or certification

MANDATORY RETIREMENT *Jun. 96*
SN Forced retirement upon reaching a maximum age—this age can be set through statute, court ruling, or contract
UF Compulsory Retirement

MAORI *Sep. 96*
SN Language of the indigenous Polynesian people of New Zealand

MAORI (PEOPLE) *Sep. 96*
SN Indigenous Polynesian people of New Zealand

Mapping (Cartography)
USE CARTOGRAPHY
(unqualified use reference "Mapping" was deleted)

MATHEMATICS ACTIVITIES *Aug. 97*
SN Methods of mathematics instruction that usually involve some participation by students—may include projects outside the school

MATHEMATICS HISTORY *Feb. 97*
SN Study of mathematical sciences and activities through the ages, including specific periods, geographic areas, branches, and mathematicians

MAYA (PEOPLE) *Aug. 97*
SN Indigenous people of Guatemala, Belize, southern Mexico, and the Yucatan peninsula (note: see also the Identifier "Mayan Civilization")
UF Mayans

MIDDLE SCHOOL STUDENTS *Jul. 99*
SN (Note: coordinate with the appropriate mandatory educational level descriptor)

MIDDLE SCHOOL TEACHERS *Jul. 99*

MIDDLE SCHOOLS *Jul. 66*
SN (Scope Note Added) Various combinations of grades 5 through 9—mainly 6-8, but also 5-7, 5-8, 7-8, or 7-9 (note: added Jul99 to list of mandatory educational level Descriptors—indexed with levels "Intermediate Grades" and/or "Junior High Schools" prior to that time)

MULTIPLE INTELLIGENCES *Aug. 98*
SN Theory or view of human intellect, originated in 1983 by Howard Gardner, that every individual has at least seven different autonomous intelligences, i.e., linguistic, logical-mathematical, spatial, bodily-kinesthetic, musical, interpersonal, and intrapersonal—more recently, an eighth intelligence (naturalist) has been recognized, and a ninth (existential) is being considered

MUSLIMS *Jun. 99*
SN Persons who accept the creed and teachings of Islam (note: do not confuse with Identifiers "Black Muslims" and alternate "Nation of Islam")
UF Moslems

NATIONAL PARKS *Sep. 96*
SN Areas of scenic, historical, scientific, or ecological importance protected and preserved by a national government for public enjoyment or study

NATIONAL STANDARDS *Nov. 97*
SN Guidelines, requirements, and other specifications that are enacted and administered, publicly or privately, at the national level (note: see also Identifiers for specific national educational standards, cross-indexed under "National Standards..." in the Identifier Authority List)
UF National Skill Standards

NATIONAL TEACHER CERTIFICATION *Dec. 95*
SN Use of nationwide competency assessment and testing to certify teachers (Note: Do not confuse with the Identifier "National Teacher Examinations," which is a specific test series published by the Educational Testing Service)
UF National Certification (Teaching)

Nature of Science **USE SCIENTIFIC PRINCIPLES**

NAVIGATION

SN (Scope Note Added) Managed point-to-point movement in any environment or medium (note: if appropriate, use the more specific terms "Orienteering" for the sport of cross-country navigation and "Navigation (Information Systems)" for movement among or within Internet sites and other locations on computers) *Jul. 66*

NAVIGATION (INFORMATION SYSTEMS)

SN The process of finding one's way around the contents of a database or hypermedia-based program—navigation is a chief goal of those who design computer systems, human-computer interfaces, and hypermedia links, and also a leading criterion for those who evaluate them *Jan. 97*

NONFORMAL EDUCATION

SN (Scope Note Changed) Organized education without formal schooling or institutionalization in which knowledge, skills, and values are taught by relatives, peers, or other community members (note: do not confuse with "Nonschool Educational Programs" or "Informal Education") *Jul. 73*

NUCLEAR WEAPONS

UF Atomic Bombs
Nuclear Arms *Jan. 99*

NURSERY RHYMES

SN Short rhymed poems or songs for children that often tell a story *Dec. 95*
UF Mother Goose Rhymes

Nutrient Deficiencies

USE NUTRITION

Nutritional Deficiencies

USE NUTRITION

Official English Movement

USE ENGLISH ONLY MOVEMENT

OLDER WORKERS

SN Personnel, aged 40+, employed full- or part-time (note: for specificity, coordinate with appropriate age-level Descriptors—"40+" in definition is per Age Discrimination in Employment Act of 1967 (U.S.)) *Jul. 97*

OLYMPIC GAMES

SN (Scope Note Changed) International program of sports competition held in a different country every 4 years (summer and winter games alternate in even-numbered years)—the modern Olympic Games, first held in 1896, are a revival of similar quadrennial contests held in ancient Greece (note: do not confuse with "Special Olympics") *Aug. 89*

OTITIS MEDIA

SN Infection, and/or collection of fluid, in the middle ear, occurring most often in infants and young children—may cause hearing loss in recurrent or long-standing cases *Nov. 96*
UF Ear Infections (Middle Ear)
Middle Ear Disease

OUTCOME BASED EDUCATION

SN The effort, often by a state or local education agency, to organize all the features of schooling (including aims, curriculum, instruction, and assessment) so as to produce specifically delineated results (often including noncognitive as well as cognitive results) and generally with the expectation that all students will demonstrate such results *Aug. 95*

UF

OBE
Outcomes Based Education
Results Based Education

OUTDOOR LEADERSHIP

SN Management or direction of groups in the outdoors—includes planning and conducting outdoor group activities, evaluating risks and safety concerns, influencing group dynamics, and facilitating participant reflection on the experience *Aug. 98*

PACIFIC ISLANDERS

SN Indigenous peoples of Micronesia, Polynesia, and Melanesia, and their descendants (note: use a more specific term, if appropriate—see also the geographic Identifiers "Pacific Islands" and "Oceania") *Jan. 96*

PAPAGO

SN (Scope Note Added) The Uto-Aztecan language of the Tohono O'odham nation of American Indians—related to Pima, the two languages are sometimes referred to collectively as O'odham, the Papago and Pima word for "people" *Jul. 66*

PARENT EMPOWERMENT

SN Promotion or attainment of autonomy and freedom of choice for parents *Jul. 96*

PARENTS WITH DISABILITIES

SN Parents who have a disability or impairment of any type *Apr. 96*
UF Disabled Parents

PATTERNS IN MATHEMATICS

SN Numerical and geometrical configurations of natural or human origin (note: see also the Identifier "Number Sequences") *Aug. 99*
UF Mathematical Patterns

PEDAGOGICAL CONTENT KNOWLEDGE

SN An integration of teacher understanding that combines content (subject matter), pedagogy (instructional methods), and learner characteristics *Mar. 98*

PERFORMANCE BASED ASSESSMENT

SN Evaluation of achievement, learning, etc., that requires direct demonstration of knowledge and skills via the construction of responses, and for which scoring can be based on the processes of the response construction as well as the final product—typically, performance-based assessments are designed to elicit and strengthen examinees' critical-thinking skills, problem-solving strategies, self-evaluation skills, and other higher-order thinking skills (note: do not confuse with "Performance Tests," whose usage is restricted to evaluations of manual manipulations and body movements—see also related Identifiers "Alternative Assessment," "Authentic Assessment," and "Direct Assessment"—prior to Apr96, the Identifier "Performance Based Evaluation" was used to index this concept) *Apr. 96*
UF Performance Assessment (Higher Order Learning)
Performance Based Evaluation

PERFORMANCE TESTS

SN (Scope Note Changed) Tests that require the manipulation of objects or skilled bodily movements (note: do not confuse with "Nonverbal Tests," which minimize the use of language but may not emphasize the manipulation of objects or skilled movement—prior to Mar80, the use of this term was not restricted by a scope note—use "Performance Based Assessment" for "higher-order" performance testing) *Jul. 66*
UF Performance Assessment (Skilled Bodily Movements)

PETS

SN Animals kept for pleasure and companionship (note: coordinate with individual animals as appropriate, e.g., Descriptors "Birds," "Horses" or Identifiers "Cats," "Dogs") *Mar. 96*
UF Companion Animals

PHONATHONS

SN Fund raising or other solicitation activities using the telephone *May 98*
UF Telephone Solicitation Programs

Physical Self Concept

USE BODY IMAGE

POLITICAL CORRECTNESS

SN The attempt in communication or other activity to be inoffensive and inclusive—may lead to censorship and intolerance in some cases, and is regarded with derision by many (note: see also the Identifiers "Speech Codes" and "Hate Speech") *Jun. 96*
UF Politically Correct Communication

POPULAR EDUCATION

SN Education that encourages learners to critically examine their day-to-day lives and collectively take action to change social conditions and systems (frequently associated with Paulo Freire's critical pedagogy and participatory literacy campaigns) *Feb. 97*
UF Peoples Education

POPULAR MUSIC

SN Music enjoyed by the general public and commonly disseminated via the mass media (note: prior to Jan96, this concept was frequently indexed by "Popular Culture" coordinated with "Music" terms) *Jan. 96*
UF Pop Music

POSTTRAUMATIC STRESS DISORDER

SN Acute or chronic delayed reaction to highly stressing events such as military combat, sexual assault, childhood abuse, natural disasters, unexpected deaths, and life-threatening accidents—symptoms include anxiety, depression, intrusive recollections, and emotional detachment *Oct. 95*
UF Post Traumatic Stress Syndrome
Posttraumatic Neurosis
PTSD

PRENATAL DRUG EXPOSURE

SN Maternal drug use during pregnancy—also, a medical condition in infants and children resulting from such use *Oct. 96*
UF Drug Exposure in Utero
Fetal Drug Exposure
Prenatal Exposure to Drugs

PRENATAL INFLUENCES

SN (Scope Note Changed) Factors occurring between conception and birth and affecting the physical or mental development of an individual (note: use the more precise "Prenatal Care" or the narrower "Prenatal Drug Exposure," if appropriate) *Aug. 68*

PRESERVICE TEACHERS

SN Students in a teacher education program, at a college or university, preparing for professional-level teaching positions (note: prior to Aug98, this concept was sometimes indexed by "Student Teachers" or "Education Majors") *Aug. 98*
UF Prospective Teachers

PUBERTY

SN Period of life at which the individual reaches sexual maturity and is capable of reproduction (note: see also the Identifier "Puberty Rites") *Dec. 95*

Putonghua

USE MANDARIN CHINESE

RAINFORESTS

SN Woodlands of dense, mainly broad-leaved evergreen trees in areas of high annual rainfall (note: coordinate with Identifiers "Deforestation," "Tropics," etc., as appropriate) *Apr. 95*
UF Rain Forest Preserves
Temperate Rainforests
Tropical Rainforests

READING MOTIVATION

SN The arousal, direction, and sustaining of reading interest and activity for work, school, pleasure, or other purpose *Nov. 95*

RECIPES (FOOD) *Sep. 96*
SN Instructions and ingredients for preparing food dishes

RESILIENCE (PERSONALITY) *Sep. 97*
SN The ability to withstand and move beyond difficult life situations

Restrooms
USE TOILET FACILITIES

RHyme *May 97*
SN Correspondence of sounds among words or lines of verse
UF Rime (Sound)

Rundi
USE KIRUNDI

SCHOOL CULTURE *Feb. 96*
SN Patterns of meaning or activity (norms, values, beliefs, relationships, rituals, traditions, myths, etc.) shared in varying degrees by members of a school community

SELF ADVOCACY *Jan. 97*
SN The process of exercising, defending, and promoting one's rights — most often refers to people with disabilities speaking and acting on behalf of themselves

Self Centeredness
USE EGOCENTRISM

Semiology
USE SEMIOTICS

SERVICE LEARNING *Mar. 96*
SN Learning through community service (or public service in a wider sphere), usually integrated with regular instruction in school or college (note: see also related Identifiers "Community Service," "Youth Community Service," and "National Service")
UF Community Service Learning

Silent Speech
USE INNER SPEECH (SUBVOCAL)

Social Context
USE SOCIAL ENVIRONMENT

SOCIOLOGISTS *Feb. 96*
SN Scholars who systematically study and critique the development, structure, functioning, and dilemmas of human society

SPIRITUALITY *May 99*
SN Openness to an existence or superior being beyond ordinary sensory and intellectual experience, i.e., to a transcendent or supernatural reality or creative spirit

STATISTICAL SIGNIFICANCE *Mar. 80*
SN (Scope Note Changed) Property of having low probability of occurrence on the basis of chance alone (in this sense, "significance" means neither "bigness" nor "importance" — usually, the odds have to be at least 20 to 1 and preferably 100 to 1 against pure chance for significance to be claimed)

STRING INSTRUMENTS *Aug. 99*
SN Musical instruments, ordinarily the violin family (violin, viola, cello, double bass) but occasionally also the guitar, lute, harp, etc., in which tone is produced with strings stretched on a frame and bowed or plucked by hand—excludes keyboard instruments, such as the piano or harpsichord, with strings struck or plucked mechanically (note: see also more precise Identifiers "Violins," "Violin Instruction," "Guitars," etc.)
UF Stringed Instruments

STUDENT EMPOWERMENT *Jul. 96*
SN Promotion or attainment of autonomy and freedom of choice for students

TEACHER COLLABORATION *May 96*
SN An interactive process that enables teachers with diverse expertise to work together as equals and engage in shared decision making toward mutually defined goals
UF Collaborative Teachers
Teacher Cooperation

TEACHER EMPOWERMENT *Jul. 96*
SN Promotion or attainment of autonomy and freedom of choice for teachers

TEACHER RESEARCHERS *Nov. 97*
SN Teachers who engage in educational research, generally to improve their own classroom practices
UF Teachers as Researchers

TEACHER SURVEYS *Oct. 97*
SN Studies in which data are gathered from teachers on their attitudes, interests, activities, characteristics, etc. (note: use as a minor Descriptor for examples of this kind of survey—use as a major Descriptor only as the subject of a document)

TEACHERS WITH DISABILITIES *Apr. 96*
SN Teachers who have a disability or impairment of any type
UF Disabled Teachers

TECH PREP *Mar. 95*
SN Sequential programs of study that integrate preparation for technical careers with academic education in a highly structured and closely articulated secondary and postsecondary curriculum, leading to a minimum of an associate degree or 2-year certificate in a specific career field
UF Two Plus Two Tech Prep

TEMPORARY EMPLOYMENT *Jul. 99*
SN Work arrangement in which it is understood that the job is of limited duration (note: see also the Identifier "Temporary Faculty")

Temporary Help Services
USE EMPLOYMENT SERVICES
and TEMPORARY EMPLOYMENT

TIME BLOCKS *Jul. 66*
(now a narrower term of "Time")
SN (Scope Note Added) (Note: prior to Aug96, this concept was a narrower term of "School Schedules," and its usage generally was reserved for that context—"Block Scheduling" has replaced it in the "School Schedules" hierarchy)

TIME TO DEGREE *Apr. 98*
SN Total length of time between original enrollment to completion of all requirements for a postsecondary degree
UF Degree Completion Time

Timetables
USE SCHEDULING

Timetables (School)
USE SCHOOL SCHEDULES

TOHONO O ODHAM PEOPLE *Dec. 95*
SN A desert-dwelling American Indian people of southern Arizona and the province of Sonora in northwest Mexico (also, dispersed kin)
UF Papago (Tribe)

TORNADOES *Nov. 95*
SN Violently rotating storms, usually visible as funnel clouds, with wind speeds of 100-200 mph and causing considerable destruction when touching ground—most common in the U.S. and Australia

TRANSFER RATES (COLLEGE) *Jan. 98*
SN Percentages of students who have transferred from one institution of higher education to another (calculation varies, depending on the definition of transfer utilized)
UF College Transfer Rates

Truant Officers
USE ATTENDANCE OFFICERS
and TRUANCY

Two Plus Two Tech Prep Associate Degrees
USE ASSOCIATE DEGREES
and TECH PREP

UNIVERSAL DECIMAL CLASSIFICATION

Apr. 98
SN Elaborate system for classifying library materials that divides the total field of knowledge into 10 main branches, with increased specialization provided by further subdivisions of 10 and additional auxiliary notations of special signs and numbers—devised in 1895 as an expansion of the Dewey Decimal Classification, and revised continually since then
UF Decimal Classification (Universal)
UDC (Classification)

UNIVERSITY PRESSES *Oct. 98*
SN Publishing houses associated with higher education institutions and often specializing in scholarly or creative works

VELOCITY *May 98*
SN Rate of motion in a specified direction (note: see also the Identifiers "Angular Velocity" (rate of rotational motion) and "Nerve Conduction Velocity")

VIRTUAL REALITY *Aug. 96*
SN Computer-generated simulations of three-dimensional environments, intended to seem real, with which users interact using combinations of sensing and interface devices and software

Viracnon
USE BIKOL

WALKING *Jul. 97*
SN (Note: see also the Identifier "Hiking")

Washrooms
USE TOILET FACILITIES

WEAPONS *Jan. 99*
SN Instruments, devices, or techniques used to attack or to counter an attack
UF Arms (Weapons)
Combat Instruments

WORD ORDER *Oct. 98*
SN The arrangement of words in a phrase, clause, or sentence—the sequence in which words are placed according to the conventions of a given language

WORKPLACE LITERACY *Feb. 96*
SN Reading, writing, computation, and communication skills performed in the context of job tasks
UF Job Literacy
Job Related Literacy
Occupational Literacy

WORLD VIEWS *Jul. 98*
SN Comprehensive belief/value systems held by individuals or groups—fundamental frameworks for perceiving and interpreting life and the universe (note: do not confuse with international or whole-world orientations and undertakings, for which see "Global Approach")
UF Life Views
Outlooks on Life
Philosophy of Life
Weltanschauungen
Worldviews

WORLD WIDE WEB *Jun. 96*
SN A hypertext-based information system for disseminating and retrieving text or multimedia files via the Internet—the files can be accessed with a browser program installed on the user's computer
UF Web (The)
WorldWide Web Service
WWW

Writing Development
USE WRITING (COMPOSITION)

Submitting Documents to ERIC

What Kinds of Documents to Send ERIC

ERIC would like to be given the opportunity to examine virtually any document dealing with education or its aspects. The ERIC audience is so broad (encompassing teachers, administrators, supervisors, librarians, researchers, media specialists, counselors, and every other type of educator, as well as students and parents) that it must collect a wide variety of documentation in order to satisfy its users. Examples of the kinds of education-related materials collected are the following:

- Bibliographies
- Books
- Conference Papers
- Curriculum Materials
- Dissertations
- Evaluation Studies
- Feasibility Studies
- Handbooks
- Instructional Materials
- Legislation and Regulations
- Manuals
- Monographs, Treatises
- Opinion Papers, Essays, Position Papers
- Program/Project Descriptions
- Research/Technical Reports
- Resource Guides
- Speeches and Presentations
- State of the Art Studies
- Statistical Compilations
- Syllabi
- Taxonomies and Classifications
- Teaching Guides
- Tests, Questionnaires, Measurement Devices
- Vocabularies, Dictionaries, Glossaries, Thesauri

ERIC also accepts non-print materials (such as films, audiotapes, videotapes, CD-ROMs, databases, etc.), referring users to the original publishers/distributors for availability. However, if such material accompanies a printed text, ERIC may process the printed text, as well as referring the user to the publisher for the accompanying non-print components.

A document does not have to be formally published to be entered into the ERIC database. In fact, ERIC seeks out the unpublished or "fugitive" material not usually available through conventional library channels.

Selection Criteria Employed by ERIC

• QUALITY OF CONTENT

All documents received are evaluated by subject experts against the following kinds of quality criteria: contribution to knowledge, significance, relevance, newness, innovativeness, effectiveness of presentation, thoroughness of reporting, relation to current priorities, timeliness, authority of source, intended audience, and comprehensiveness.

• LEGIBILITY AND REPRODUCIBILITY

Documents may be composed, typewritten, xeroxed, or otherwise duplicated. They must be legible and easily readable. Letters should be clearly formed and with sufficient contrast to the paper background to permit filming. Colored inks and colored papers can create serious reproduction problems. Standard 8" x 11" size pages are preferred.

Two copies are desired, if possible: one for processing into the system and eventual filming, the other for retention and possible use by the appropriate Clearinghouse while processing is going on. However, single copies are acceptable.

• REPRODUCTION RELEASE

For each document submitted, ERIC requires a formal signed Reproduction Release form indicating whether or not ERIC may reproduce the document. A copy of the release form appears as a separate page in each issue of ERIC's abstract journal "Resources in Education" (RIE) and is also available via the ERIC Facility's web site: <http://ericfac.piccard.csc.com>. Additional release forms may be copied as needed or can be obtained from the ERIC Facility or any ERIC Clearinghouse. Items for which releases are not granted, or other non-reproducible items, will be considered for announcement only if they are noteworthy education documents available from a clearly identified source, and only if this information accompanies the document in some form.

Items that are accepted, and for which permission to reproduce has been granted, will be made available by the ERIC Document Reproduction Service (EDRS).

Advantages of Having a Document in ERIC

Contributors of documents to ERIC can benefit in the following ways:

• ANNOUNCEMENT

Documents accepted by ERIC are announced monthly to all organizations receiving the abstract journal *Resources in Education* (RIE).

• PUBLICITY

Organizations that wish to sell their own documents in original copies can have this availability (together with address and price information) announced to users in RIE, thus serving to publicize their product. After the document is sold out at the original source, it is then still available through EDRS, if permission to reproduce has been granted to ERIC. (Original copy prices, while the supply lasts, are generally less, and are therefore more attractive to users, than EDRS on-demand duplication prices).

• DISSEMINATION

Documents accepted by ERIC are reproduced on microfiche and distributed (at no cost to the contributor) to the nearly 1,000 current subscribers to the ERIC microfiche collection.

• RETRIEVABILITY

The bibliographic descriptions developed by ERIC are retrievable by the thousands of subscribers to the online database retrieval services (offered by commercial vendors such as DIALOG, OVID, and OCLC). In addition, there are thousands of locations offering computer searches of ERIC based on either compact disk (CD-ROM) systems (offered by DIALOG, SilverPlatter, EBSCO, and ERIC), local computer-based systems, or Internet sites offering free access to ERIC.

• ALWAYS "IN PRINT"

The presence of a master microfiche at EDRS, from which copies can be made on an on-demand basis, means that ERIC documents are constantly available and never go "out of print." Persons requesting copies from an original source can always be referred to ERIC. This archival function relieves the source of a distribution burden and solves the availability problem when the source's supply has been exhausted.

In addition, submission of a document to ERIC reduces the overall likelihood of overlap, redundancy, and duplication of effort among users. It increases the probability that the results reported in the document will be available indefinitely and used in subsequent efforts.

To encourage submission of documents to the system, ERIC offers to send contributors notice of document disposition, giving the ED identification number (for ordering purposes) of those documents selected for RIE. Additionally, ERIC will send a complimentary microfiche to each contributor when the document is announced in RIE.

There are no fees to pay in submitting documents to ERIC, nor does ERIC pay any royalties for materials it accepts. Other than a statement concerning permission to reproduce, there are no forms to complete.

(over)

Where to Send Documents

To submit your document for consideration for inclusion in the ERIC system, please choose one of the following:

1. Direct Submission to the Appropriate Clearinghouse

Select the Clearinghouse most closely related to the document's subject matter. A list of the ERIC Clearinghouses and their addresses is on the inside back cover of this issue of RIE. Material is expedited if it is directed to the attention of "*Acquisitions.*"

2. Submission to the ERIC Facility

If you are uncertain as to which ERIC Clearinghouse covers the subject matter of the document, it may be sent to the following address:

**ERIC Processing and Reference Facility
Acquisitions Department
1100 West Street, 2d Floor
Laurel, Maryland 20707-3598**

The ERIC Facility will forward all documents to the appropriate ERIC Clearinghouse for review and consideration. The Clearinghouse will contact the contributor directly with its selection decision.

U.S. Department of Education

National Library of Education (NLE)
Educational Resources Information Center (ERIC)

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title:	
Author(s):	
Corporate Source:	Publication Date:

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

<p>PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY</p> <p align="center"><i>Sample</i></p> <p>_____</p> <p>_____</p> <p>TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)</p>
--

1

Level 1

☐

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

The sample sticker shown below will be affixed to all Level 2A documents

<p>PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY</p> <p align="center"><i>Sample</i></p> <p>_____</p> <p>_____</p> <p>TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)</p>

2A

Level 2A

☐

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only

The sample sticker shown below will be affixed to all Level 2B documents

<p>PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY</p> <p align="center"><i>Sample</i></p> <p>_____</p> <p>_____</p> <p>TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)</p>

2B

Level 2B

☐

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only

Documents will be processed as indicated provided reproduction quality permits.
If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)

Publisher/Distributor:
Address:
Price:

IV. REFERRAL OF ERIC TO COPYRIGHT/REPRODUCTION RIGHTS HOLDER:

If the right to grant this reproduction release is held by someone other than the addressee, please provide the appropriate name and address:

Name:
Address:

V. WHERE TO SEND THIS FORM:

Send this form to the following ERIC Clearinghouse:

However, if solicited by the ERIC Facility, or if making an unsolicited contribution to ERIC, return this form (and the document being contributed) to:

HOW TO ORDER

Resources in Education (RIE)

Resources in Education (RIE) is a monthly abstract journal covering the document literature of education. It is published for the U.S. Department of Education by the U.S. Government Printing Office (GPO). RIE consists of twelve (12) monthly issues (each announcing over 1000 documents and indexing them by Subject, Institution, Personal Author, and Publication Type). RIE is sold by GPO on subscription or as individual issues on-demand. Stock is retained for only approximately six months; issues older than that are generally not available from GPO. Orders from foreign sources cost 25% additional, as shown in the table below.

NOTE: GPO discontinued its *Semiannual Index* to RIE with the volume for July-December 1994.

Oryx Press now publishes commercially an *RIE Semiannual Index*, an *RIE Annual Cumulation (Index)*, and an *RIE Annual Cumulation (Abstracts)*. Contact Oryx Press, P.O. Box 33889, Phoenix, AZ 85067-3889 (800-279-6799 or 602-265-2651).

RIE Product (Master Stock No. 765-003-00000-8)	Domestic	Foreign
Subscription to Monthly Issues (12 issues)	\$78.00	\$97.50
— Single Copy On-Demand (1 issue)	\$27.00	\$33.75

Mail Orders: Check or money order (full remittance required) made payable to "Superintendent of Documents":

Mail to: Superintendent of Documents
P.O. Box 371954
Pittsburgh, PA 15250-7954

Telephone or FAX Orders: Acceptable **credit cards** are: MasterCard or VISA. You may also charge against your pre-paid GPO deposit account, if available.

SHIPPING RATES & INFORMATION

Shipping rates apply to all microfiche and paper copy orders, and are a separate cost from any optional charges. Rates are effective 1/1/1999, and are subject to change without notice.

■ **DOMESTIC** — Customers in Canada, Mexico, and the USA, including Puerto Rico and regions administered by the U.S. Rush and Mid-Level domestic services are for US customers only.

- Paper Copy (PC) orders ship via UPS
- Microfiche (MF) orders over \$25.00 ship via UPS
- Microfiche (MF) orders \$25.00 or less ship via U.S. Postal Service First Class

■ **INTERNATIONAL** — All orders are shipped via U.S. Air Mail — Many of our customers receive their orders in 7-15 business days. Mid-Level Fax Service only is available. Rush Fax available—contact EDRS for pricing.

■ **FAX** — Fax service is limited to 50 pages per order. EDRS ships fax orders over 50 pages via Next Day Air.

GENERAL INFORMATION

■ **CLAIMS POLICY—ALL SALES ARE FINAL.** EDRS will replace products returned within 30 days of delivery due solely to reproduction defects or incompleteness caused by EDRS. Pre-approval of return is required.

■ **DEPOSIT ACCOUNTS**—For customers who have a continuing need for ERIC documents. See also "PAYMENT," below.

- **DOMESTIC CUSTOMERS** can establish an account for a \$200.00 suggested minimum. In Virginia, if tax-exempt, include a copy of the tax exemption certificate.
- **INTERNATIONAL CUSTOMERS** can establish an account for a recommended minimum of \$300.

■ **DOCUMENT AVAILABILITY**—ERIC uses 3 codes to indicate the format in which a document is available

- **Level 1**—available in both paper and microfiche; 1993 forward available in electronic format (\$3.50 Base Price + \$0.15 per page) via online order form
- **Level 2**—available in microfiche only
- **Level 3**—not available through EDRS; see document citation for source information

■ **EJ ARTICLES**—ERIC Journal (EJ) articles are **NOT** available through EDRS. For copies contact your local library or:

- CARL Uncover: 800-787-7979 or 303-758-3030
- ISI Document Solution: 800-336-4474 or 215-386-4399

■ **PAPER COPY (PC)**—A laser-printed reproduction of electronic images created from the microfiche of the original document with a Vellum Bristol cover to identify and protect the document.

■ PAYMENT

- Prices do not include any sales, use, excise, or similar taxes, including customs duties, which may apply to the sale of microfiche or paper copy to the customer. The cost of such taxes or duties, if any, shall be borne by the customer.
- We accept purchase orders from U.S. customers; terms are net 30 days. All other orders must be pre-paid in U.S. dollars drawn on a U.S. bank (check, money order, credit card, or EDRS deposit account).
- The DynEDRS, Inc. Federal ID # is 54-1828547

ERIC Bibliographic Database in Electronic Form

The Educational Resources Information Center (ERIC) has been responsible, since its inception, for creating a bibliographic database covering the significant literature in the field of education. The document and book literature (announced monthly in *Resources in Education* (RIE)) has been covered since 1966. The journal article literature (announced monthly in *Current Index to Journals in Education* (CIJE)) has been covered since 1969. The database through 1997 contains 951,770 records (1.085 gigabytes) and has a growth rate of over 30,000 records (about 35 megabytes) annually.

The ERIC database is available in electronic form to organizations for a wide variety of applications, including to vendors or others offering value-added online services or CD-ROM products.

Under authorization from the U.S. Department of Education, the ERIC database is provided in electronic form by the ERIC Processing and Reference Facility. The entire backfile (1966 to present) is available, as well as regular updates on a monthly or quarterly basis, to keep the database current. These data are offered at unusually low cost to encourage the widest possible dissemination.

The basic RIE and CIJE bibliographic files are available in the well-known "DIALOG B" format, as ASCII files with the data fully fielded and each field tagged. The individual variable length records include the complete ERIC "resume" (cataloging, indexing, and abstract or annotation) of each document or journal article announced.

In addition to the basic bibliographic files, several peripheral files are also available:

- (1) ***Thesaurus of ERIC Descriptors*** (a controlled subject indexing vocabulary consisting of formally approved Descriptors);
- (2) ***Identifier Authority List*** (IAL) (a semi-controlled list of additional subject content Identifiers, e.g., proper names, candidate Descriptors, etc.);
- (3) ***Source Directory*** (an authority list of names of organizations that have prepared or sponsored documents processed by ERIC);
- (4) ***ERIC Digests in Full Text*** (EDO). ERIC Digests are brief 2-3 page (about 1500 word) documents on "hot topics". The EDO file contains the full text of these documents appended to the regular ERIC bibliographic records for each item.

The ERIC database files (RIE and CIJE) may be purchased individually or together.

Backfile orders, because of the large amount of data involved, are sent to the purchaser on either reel magnetic tape or DAT magnetic tape, as the purchaser prefers. The preferred mode of distribution for the monthly or quarterly updates is by FTP electronic transmission, directly to the subscriber's computer (however, arrangements can be made for update distribution on tape, if FTP is not available).

For additional information, complete and mail the form on the reverse of this page, or call the ERIC Facility, or consult the ERIC Facility's Web site at

<http://ericfac.piccard.csc.com>

Please send me information on the items checked below:

Basic ERIC Bibliographic Files:

- ☐ **Document Records**, Corresponding to the content of the abstract journal *Resources in Education* (RIE)
- ☐ **Journal Article Records**, Corresponding to the content of the abstract journal *Current Index to Journals in Education* (CIJE)

Peripheral Files:

- ☐ *Thesaurus of ERIC Descriptors*
- ☐ *Identifier Authority List* (IAL)
- ☐ *Source Directory* (organization names)
- ☐ ERIC Digests in Full Text (EDO)

Let ACCESS ERIC Be Your Gateway to the ERIC System

Both new and experienced ERIC users will find ACCESS ERIC a convenient launching point for exploring all the resources of the Educational Resources Information Center. ERIC is a federally funded, nationwide information network designed to provide you with ready access to education literature. Sponsored by the U.S. Department of Education and administered by the National Library of Education, ERIC includes the world's largest education database and a network of subject-specific clearinghouses.

Call 1-800-LET-ERIC (538-3742) to:

- Obtain information about the subject-specific ERIC Clearinghouses, which will help you answer your education questions about learning disabilities, reading instruction, technology in the schools, and a host of other subjects.
- Find out how and where to search the ERIC database, which contains records for nearly 1 million education documents and journal articles.
- Request helpful, free systemwide publications, including *All About ERIC*, *A Pocket Guide to ERIC*, *The ERIC Review* (a themed journal), and Parent Brochures.

Visit the systemwide Web site at <http://www.aspensys.com/eric> to:

- Search the ERIC database and then connect to a site for electronic document delivery.
- Link to the Web sites of all ERIC components as well as special projects such as the National Parent Information Center, AskERIC, and the Test Locator.
- Read or print ERIC systemwide publications.
- Link to other ERIC-sponsored databases, including the Calendar of Education-Related Conferences and the Education Resource Organizations Directory.

ACCESS ERIC staff members are eager to help you understand and use all the resources of the ERIC system. You can contact us at:

Major Vendors of ERIC Online Services and CD-ROM Products

The ERIC database is one of the most widely used bibliographic databases in the world. Users from approximately 100 countries perform an estimated half million online or CD-ROM searches a year using a variety of available commercial systems (listed below).

Users wishing to search ERIC online need a computer terminal that can link by telephone (via modem or network connection) with the vendor's system. Those preferring stand-alone CD-ROM systems must have a computer equipped with a CD-ROM drive.

As an alternative to acquiring your own ERIC search capability, the *Directory of ERIC Resource Collections* (available from any ERIC component) lists approximately 1,000 organizations that perform ERIC searches on demand for users.

ERIC NETWORK COMPONENTS

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in *Resources in Education* (RIE). They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for RIE. These information analysis products are also announced in RIE.

ERIC Clearinghouses:

Adult, Career, and Vocational Education (CE)

Ohio State University
Center on Education and Training for Employment
1900 Kenny Road
Columbus, Ohio 43210-1090
Tel.: 614-292-7069, 800-848-4815; FAX: 614-292-1260

Assessment and Evaluation (TM)

University of Maryland, College Park
1129 Shriver Lab
College Park, Maryland 20742-5701
Tel.: 301-405-7449, 800-464-3742; FAX: 301-405-8134

Community Colleges (JC)

University of California at Los Angeles (UCLA)
405 Hilgard Avenue, 3051 Moore Hall
P.O. Box 951521
Los Angeles, California 90024-1521
Tel.: 310-825-3931, 800-832-8256; FAX: 310-206-8095

Counseling and Student Services (CG)

University of North Carolina at Greensboro
School of Education
201 Ferguson, P.O. Box 26171
Greensboro, North Carolina 27402-6171
Tel.: 336-334-4114, 800-414-9769; FAX: 336-334-4116

Disabilities and Gifted Education (EC)

Council for Exceptional Children (CEC)
1920 Association Drive
Reston, Virginia 20191-1589
Tel.: 703-264-9474, 800-328-0272; FAX: 703-620-2521

Educational Management (EA)

University of Oregon (Dept. 5207)
1787 Agate Street
Eugene, Oregon 97403-5207
Tel.: 541-346-5043, 800-438-8841; FAX: 541-346-2334

Elementary and Early Childhood Education (PS)

University of Illinois at Urbana-Champaign
Children's Research Center, Room 13
51 Gerty Drive
Champaign, IL 61820-7469
Tel.: 217-333-1386, 800-583-4135; FAX: 217-333-3767

Higher Education (HE)

George Washington University
One Dupont Circle, N.W., Suite 630
Washington, DC 20036-1183
Tel.: 202-296-2597, 800-773-3742; FAX: 202-452-1844

Information & Technology (IR)

Syracuse University
621 Skytop Road, Suite 160
Syracuse, New York 13244-4292
Tel.: 315-443-3640, 800-464-9107; FAX: 315-443-5448

Languages and Linguistics (FL)

Center for Applied Linguistics (CAL)
4646 40th Street, NW
Washington, DC 20016-1859
Tel.: 202-362-0700, 800-276-9834; FAX: 202-362-3740

Reading, English, and Communication (CS)

Indiana University
Smith Research Center, Suite 150
2805 E. 10th Street

Bloomington, Indiana 47408-2698
Tel.: 812-855-5847, 800-759-4723; FAX: 812-855-4220

Rural Education and Small Schools (RC)

Appalachia Educational Laboratory (AEL)
1031 Quarrier Street, Suite 607 (P.O. Box 1348)
Charleston, West Virginia 25325-1348
Tel.: 304-347-0400, 800-624-9120; FAX: 304-347-0487

Science, Mathematics, & Environmental Education (SE)

Ohio State University
1929 Kenny Road
Columbus, Ohio 43210-1080
Tel.: 614-292-6717, 800-276-0462; FAX: 614-292-0263

Social Studies/Social Science Education (SO)

Indiana University
Social Studies Development Center, Suite 120
2805 East 10th Street
Bloomington, Indiana 47408-2698
Tel.: 812-855-3838, 800-266-3815; FAX: 812-855-0455

Teaching and Teacher Education (SP)

American Association of Colleges for Teacher Education
1307 New York Avenue, N.W., Suite 300
Washington, DC 20005-4701
Tel.: 202-293-2450, 800-822-9229; FAX: 202-457-8095

Urban Education (UD)

Teachers College, Columbia University
Institute for Urban and Minority Education
Main Hall, Room 303, Box 40
525 West 120th Street
New York, New York 10027-6696
Tel.: 212-678-3433, 800-601-4868; FAX: 212-678-4012

Sponsor:

Educational Resources Information Center (ERIC)

National Library of Education (NLE)
Office of Educational Research and Improvement (OERI)
U.S. Department of Education
400 Maryland Avenue, FOB 6, 4th Floor 4W316
Washington, DC 20202
Tel.: 202-401-3745; FAX: 202-205-7759

Centralized Database Management:

ERIC Processing and Reference Facility

Computer Sciences Corporation (CSC)
1100 West Street, 2nd Floor
Laurel, Maryland 20707-3598
Tel.: 301-497-4080, 800-799-3742; FAX: 301-953-0263

Document Delivery:

ERIC Document Reproduction Service (EDRS)

DynEDRS, Inc.
7420 Fullerton Road, Suite 110
Springfield, Virginia 22153-2852
Tel.: 703-440-1400, 800-443-3742; FAX: 703-440-1408

Commercial Publishing

Oryx Press

4041 North Central Ave. at Indian School Road, Suite 700
Phoenix, Arizona 85012-3397
Tel.: 602-265-2651, 800-279-6799; FAX: 800-279-4663; 602-265-6250

Outreach:

ACCESS ERIC

Aspen Systems Corporation
2277 Research Boulevard, 6L
Rockville, Maryland 20850
Tel.: 301-519-5157, 800-538-3742; FAX: 301-519-6760
